State College, Kingston, R. I.

The first annual exhibition of the Sayville, N. Y., Garden Club, held last week, surpassed all the expectations of the members, the combined exhibits making one of the most beautiful flower shows held on Long Island. The Sayville Opera House was taxed to its capacity in housing the exhibits, and in caring for the large throngs that attended the three sessions.

Among the prize winning exhibits were the following: Dahlias—J. S. Griffing, Flemington, N. J.; John Lewis Childs, Flowerfield; Jos. A. Becvar, Sayville. Gladioli—John Lewis Childs. Hardy Perennials—Miss Minnie Foster. Dinner Table Decoration—Jos. A. Becvar. Evergreens—Swan River Nurseries, Patchogue. Annuals, Asters, etc.—Mrs. F. S. Jones, gard. R. Kellenberg; Mrs. E. W. Betts, gard. Edw'd Berry; Mrs. R. W. Caldwell, Bayport, gard. D. Kwaak; Mrs. W. L. Suydam, Blue Point.

There was a large attendance at the annual flower show which opened in the town hall, Andover, Mass., on Friday afternoon, September 9, and the exhibition, although the entries were not so numerous as in previous years, was well up to the high standard in quality. At night the attendance increased and those present were greatly pleased with the exhibition.

Fottler, Fiske, Rawson Co., of Boston had an exhibit of gladioli as did J. H. Playdon and H. F. Chase and the two Andover florists' exhibits were the best ever seen here. John Nicoll, M. E. Gutterson, Thomas Low and William A. Trow were the principal prize winners. The judges were George Westland of North Andover, Frank Leith of Haverhill and George MacLeod of Lawrence.

PROPOSED NORTH SHORE HORTICULTURAL BUILDING.

The accompanying picture shows the architect's drawing of the proposed new building for the North Shore Horticultural Society, to be erected at Manchester, Mass.

The plans call for a building 88 by 70 feet, including two wings, the exterior to be of stucco and the interior of rough plaster. The exhibition hall will be 40x60 feet, having movable seats to accommodate 500 persons,

with a gallery extending across the rear and halfway along two sides to seat 160 more. There will be a stage 24x18 feet. The wings will contain dressing rooms, coat rooms, toilets, and the basement a large banquet hall, kitchen, dressing rooms for the stage, toilets, heating plant, etc. The building will be heated by steam and lighted by electricity.

The contract price for the building complete, exclusive of furnishings, is \$23,500. One member of the society has already contributed \$2000 to the fund, which is to be raised by subscription, and several other pledges of \$500 each have been received. It is expected construction will begin in a few weeks.

DURING RECESS.

Greenwood Florist Employees' Association.

Labor Day was observed by members of the Greenwood Florist Employees' Association of Brooklyn, N. Y., with an outing at Green Island. The affair was the first to be conducted by the organization. In athletic events winners were: James Daly, fat men's race, 100 yards; John Watson, one mile walk; Frank Keating, one and one-half mile swim; Daniel L. Donovan, sack race; James Kennedy, potato race; James Daly, low hurdle race, 500 yards; John Lyons, 880-yard run. The officers of the organization are: James J. Daly, president; James J. Kennedy, vice-president; George Gru, treasurer; John Watson, secretary.

Winterport, Me.—The greenhouses of Wesley Nickerson were badly damaged in the electrical storm and heavy hail of August 23.

Obituary

James Fitzgerald.

James Fitzgerald, formerly prominent in the retail florist trade, died in Long Island City, N. Y., on September 4, aged 74 years.

Wm. T. Bell.

William T. Bell, founder of the Bell Floral Company now conducted by his sons in Franklin, Pa., was instantly killed by a train on the Erie railroad while walking on the track on August 29. Mr. Bell was 73 years of age and was a native of Eals, Northumberland County, England.

John W. Graham.

An attack of indigestion, from which he had suffered for some time, proved fatal to John W. Graham, secretary and treasurer of the Philadelphia Lawn Mower Company, who died at his home, No. 6378 Overbrook avenue, Philadelphia, on Wednesday, September 6. He was 59 years old and a graduate of Chester Military Academy. His widow survives him.

William J. Newton.

Wm. J. Newton, florist, of Norfolk, Va., died of typhoid fever on August 29, aged 33 years. Mr. Newton was an enterprising young man, a credit to the flower business and of attractive personality. He was building up a very prosperous business and his demise in early manhood will be deeply regretted by many friends in the trade who knew him and liked him. He leaves a widow and two children. Three brothers are all engaged in the florist business in Norfolk.

Henry A. Salzer.

Henry A. Salzer, president of the John A. Salzer Seed Company, of La Crosse, Wis., was instantly killed in an automobile accident on August 22, near Dresbach, Minn.

Mr. Salzer was born January 23, 1855, at Dutch Creek, Iowa, and was the second son of John A. Salzer, founder of the John A. Salzer Seed Co. After the death of the elder Salzer in 1892, Henry A. Salzer became head of the concern, which under his management has become one of the leading seed houses in the country.

Mr. Salzer had also other large interests aside from the seed business, among these being the La Crosse Floral Company. Mr. Salzer is survived by his wife and two children.

Mrs. James T. Aldous.

Mrs. James T. Aldous, mother of Arthur Herrington, died on Sunday morning, September 3, aged 76 years. Mrs. Aldous was born at Tangmer, Sussex, England, and was married to William Herrington at the age of 21. Five children of this marriage survive. Mrs. Aldous came to America in 1907, accompanied by two daughters, on a visit to her son in Madison, N. J. She met James T. Aldous in

1909, and at the end of that year became his wife. Mr. and Mrs. Aldous then went west, and took up their residence in Iowa City. Mrs. Aldous was an intensely religious woman, and was unusually active in mission work. She had been an invalid for months and had been confined to her home much of the time.

John Boyle

Washington, D. C., on Monday last lost one of its oldest and best known members of the trade when John Boyle, of Silver Springs, Md., was called to his last home. Mr. Boyle was 79 years of age and for many years was a familiar figure in and around the Center Market, where he maintained a stand which was in the charge of his daughter, Miss Mary Boyle. At one time he was employed at the Botanic Gardens, under the late William R. Smith, and later he entered the service of the Department of Agriculture. When the late Mr. Saul's business, located on a part of what is now known as Saul's addition, was offered on the market, he secured possession. He later removed to Silver Springs, Md., where he continued in the business, raising flowers which he retailed at the market. Funeral services were held on Thursday, following which the interment was in Rock Creek Cemetery.

Honest Advertising. Discontented Partners

Various Cases Brought Under Honest Advertising Laws.

In these articles I have several times discussed different phases of the honest advertising law, which has been enacted now in most of the States. In substance, all these acts are closely similar. They provide that anybody making false representations in any form of advertising as to the real value, or character, or brand, or origin, or quality of merchandise which he offers for sale, shall be guilty of a misdemeanor and subject to fine or imprisonment.

In some States the honest advertising law has been very vigorously enforced, in others it has not been enforced at all. In Pennsylvania, my own state, no effort worth the name has been made to do anything with it. The most effective campaigns which have been waged under advertising laws have been waged by associations of merchants formed for that purpose, or existing associations which added this as a new department.

When the states first began to pass honest advertising laws, I predicted that most prosecutions would be for false statements regarding the real value of a "bargain," or its former value. This prediction has not been entirely borne out. There have been a great many such cases, but at least an equal number have been brought for making false statements regarding the origin of goods offered as bargains, usually for offering them as goods bought at bankrupt sales when they were merely part of the regular stock.

I have rather closely followed the enforcement of these most useful laws and here present brief reports of several prosecutions brought under them in various places. One of the most interesting was brought in Spokane, Wash. Readers hereof will remember that when I predicted that most prosecutions would be for falsely representing a former or real value, where an article was offered for less, I admitted that this would be about the most difficult part of the act to enforce, because the actual value of an article was within certain limits a matter of opinion, and therefore it was going to be difficult to prove a given representation intentionally false. I showed by illustration how this could be done, however, viz., by producing testimony of expert witnesses that the article whose real value was given at such and such a

figure, had never sold for that and never in the nature of things would be sold for that. Where this evidence was available the defendant would be held to have known the fact.

The Spokane case was against a piano dealer who advertised "Weiler pianos, regularly \$400, on sale at the special price of \$195." Prosecution was begun, based on the charge that the representation that Weiler pianos were sold regularly at \$400, was false. At the trial it was shown that the Weiler piano cost \$75 at the factory and \$90 laid down in Spokane, and had never been sold at such a price as \$100. The advertiser was found guilty and fined.

In a case brought in Milwaukee, Wis., a local advertiser had for a long time been particularly extravagant in his price comparisons. "Real value," or "former value," or "worth," so much. Here the matter was cured without prosecution. The local merchants' association induced the newspapers to go to the advertiser and tell him that if he didn't moderate his comparisons he would be prosecuted.

In Indianapolis, Ind., a department store advertised "\$2 Medallions for 23 cents," and showed a picture of a framed medallion. The customer who went in after one found that the 23-cent price was for the medallion unframed, and the local association got the storekeeper to modify his advertising by stating that the medallions were unframed.

In another case which arose under the Indiana law, also in Indianapolis, an advertiser announced "the biggest sale of clothing in many years." The stock was represented to have been brought from a bankrupt sale. The fact was that only a small part of it had been; the balance was from the store's own stock. The concern was compelled to change its advertising to conform with the facts.

An exactly similar case transpired in Los Angeles, Cal., where a dealer advertised a bankrupt sale of pianos—"the entire stock" of a bankrupt concern—though he had bought only eight pianos from the bankrupt stock and the balance was his own. This man was prosecuted, pleaded guilty and was fined.

A New York City retail hat dealer committed a fraud which I am told has been widespread during the present season—he advertised for \$2.85, a "genuine Panama hat, value \$5, \$6 and \$7.50." The local association took the case up and brought prosecution. The "genuine Panama" hat was proved to be a cheap imitation from Japan. The defendant was found guilty and fined. His only defense was that the manufacturer of the hats had stamped "genuine Panama" inside, but this was not accepted. Under most honest advertising laws, this would not be

ANNOUNCEMENT

Commencing December, 1916, I shall disseminate

Crimson Carnation Doris

Awarded A. C. S. certificate at St. Louis, January, 1916, **scoring 88 points after being in the boxes on the trip 48 hours.** This will give some idea of its keeping and shipping qualities. Habit erect, producing an abundance of high-grade flowers on long stiff stems, fine color, calyx very seldom splits.

Price, \$12 per 100, \$100 per 1000

S. J. GODDARD, Framingham Centre, Mass.

a good defense, first because some of these laws do not require that the misrepresentation should be made knowingly, and second because the law would usually hold a man guilty who made representations that he did not absolutely know were true.

Some Suggestions for Discontented Partners.

The following, which comes to me from a Chicago paper, has a familiar sound:

Mr. A, senior member of a firm, owns two thirds of the business. Mr. B, junior member, owns one third. Mr. B gets one third of the profits and does most of the work. He has become dissatisfied and wishes to sell out. He has not sufficient money to buy Mr. A's interest, and Mr. A will not buy him out, for he needs him and his influence in the business. Now, the question is, if Mr. B finds a buyer for his one third interest, can Mr. A refuse to accept the buyer as a partner, thus compelling Mr. B to retain his interest in the business?

All over this broad land there are partnerships in precisely this situation. In fact, dissatisfaction between or among partners, over the feeling that one is doing more work than the other, or getting more money, is one of the chief drawbacks of partnership. My observation is that very rarely indeed do you find a combination of two partners—it is even rarer, I believe, with two partners than with more—which is so well matched that each member of it is satisfied with everything that the other does.

I have always advised men who came to me wanting to form a partnership, that this was the rock on which very many firms split, and that if such a situation arose, they would not find it as easy to get apart as it had been to get together.

I can answer this inquiry and discuss some generally interesting phases of partnership law at the same time.

This correspondent does not tell me what sort of a partnership agreement these people have. It may be merely a verbal understanding to yoke up together on certain terms, not for any particular period. Or it may be a for-

mal written agreement, as it should be, for a definite period.

If it is an informal partnership not for any specific period, either partner can withdraw from it any time he likes, merely by giving notice to his fellow partner. Some states (Arkansas and Louisiana) require the withdrawal to be done in good faith, and will not permit it to be done at what is obviously so inconvenient a time as to intentionally embarrass the firm. But in most states it can be done on reasonable notice at any time.

Of course a partner who withdrew in this way could expect to sell his interest. He would usually offer it to his fellow partners first, and if they refused, then to some outsider. The law will permit him to sell his interest to an outsider without restriction—but it will not admit his buyer to a partnership in the firm without the remaining partners' consent. In other words, the law will not force a partner on anybody. It will not create a partnership without both partners' consent. So that in the above case A can refuse to accept B's buyer as his partner, and this will usually block the sale, but not always. For the outsider who buys the outgoing partner's interest can always demand an accounting from the remaining partner, and this usually winds the firm up. If the remaining partner doesn't want it wound up, he will sometimes accept the new partner in order to avoid that.

All that a man gets who buys a partner's share in a business—if that share is one-half, say—is the right to one-half the firm's assets after all its obligations are paid. He doesn't get a share in a going business at all. The accounting which he can ask for is for the purpose of ascertaining the net assets and giving him his share.

Of course if the remaining partner accepts the buyer as his partner, there is no accounting, and the business goes on as before.

If the partnership agreement is formal and written, and is for one

year, say, either partner must wait until the year is out before he can withdraw, unless he wants to incur a damage suit for breach of contract. In Pennsylvania, Utah, West Virginia, Connecticut, Iowa and New Jersey, the law will hardly permit a partner to withdraw until the year is out. In other states he can do it, subject to the risk of suit for damages. The partner under such an agreement can sell his interest, just as a partner can under the other kind of an agreement, subject to the same legal restrictions.

The way to get an accounting in such a case is to go into court, either in an equity proceeding or in a common law accounting proceeding, and set forth that the partnership having been dissolved by the sale of one partner's interest to a third party, which third party has been refused admission to the firm by the remaining partner, accounting is demanded by the buyer of the outgoing interest.

I think I neglected to say that the sale of one partner's interest to an outsider automatically dissolves the firm.

How could B have avoided this situation in the beginning? Of course he could have done it by having a written agreement with A, binding either party, if the other withdrew and sold his interest, to accept the latter's buyer as a substitute. Usually neither partner likes this in the agreement, as it is almost too much to expect. Or the agreement could bind each of the partners to buy the other's interest in case of withdrawal. Outside of these or some modification of them there is no way in which such a situation could be avoided. It is one of the risks of partnership.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Kirby B. White, Detroit Mich.; First Vice-President, F. W. Bolgiano, Washington, D. C.; Second Vice-President, L. L. Olds, Madison, Wis.; Secretary-Treasurer, C. E. Kendel, Cleveland, O.

Pedigree Pea Prices.

Since our crop report of the 9th, confirmation of our prediction that seed peas of pedigree stock will be desirable property has been received. We learn that sales aggregating several thousands of bushels have been made to Pacific coast buyers, and for export, ranging from 65c. to \$1.00 per bushel, above contracting prices of last winter and spring. These sales cover a considerable number of varieties, including Alaskas and the early large pods, as well as the late long pods. Europe will not be prepared to place any considerable stock of seed peas on our markets this year. There undoubtedly will be a ban placed on the export of edible peas by all European countries the coming year, both neutrals and belligerents. Thus far we have learned of just one quotation, and that at practically prohibitive prices. Varieties such as Alderman, Duke of Albany and Extra Earlies are listed above \$6.00 per bu.; English Wonder, \$8.50; Ameer, \$7.00; Daisy, American Wonder, Little Marvel, Telephone and Vanguard, \$8.50 to \$8.80; Laxtonian and Pioneer, \$9.75; Gradus and Thomas Laxton at \$6.50; Gems, \$5.10; other varieties proportionately high.

These quotations are all f. o. b., London or Liverpool, which means that at least another dollar per bushel must be added to cover freight, insurance and incidental expenses. After this comes the pertinent question—"shall we ever get them?"

Seed Bean Prospects.

While sales of peas in considerable quantities have been made we have learned of no growers nor dealer with sufficient hardihood to quote seed beans in quantity. We have heard of frost in central and western New York during the past week, but the bean crop of the Empire State is already so nearly a failure that it can suffer but little further damage from any source. Beyond this above report we have heard of no other damage to the general crop during the past week.

Garden Beets, Carrots, Etc.

European reports of very serious damage to garden beets and carrots should cause a sharp advance in values of these two important families of seeds. There are heavy shortages in other families of seeds and prices on many items are likely to reach higher levels than for several years, and it will be a serious problem to arrange an equitable list of prices the coming autumn and winter.

Rice Seed Co. Entertains.

seedsmen at their farm near Grass Lake, Mich., the past week. The visitors expressed themselves as having been highly interested and pleased, although the trials did not all reach the high standard of excellence set by the superintendent, George Starr, owing to the very erratic and unfavorable season.

One Week's Imports.

Imports at the port of New York, of horticultural material, for the week ending September 1, were recorded as follows:

Bulbs—France, \$1,832; Netherlands, \$37,292; England, \$3,245; Bermuda, \$225.

Plants, Etc.—Belgium, \$155; Italy, \$3; Netherlands, \$3; Costa Rica, \$64; British West Indies, \$66; Columbia, \$1,313; Venezuela, \$432.

Clover Seed—France, \$8,635.

Grass Seed—England, \$405.

Other seeds—Denmark, \$299; Italy, \$174; Netherlands, \$341; Argentine, \$15,013; Hongkong, \$15; Austria, \$2,249; Canary Islands, \$15,701; France, \$242; England, \$2,590; British West Indies, \$67.

Carbonate of Potash—Netherlands, \$10,781; Hongkong, \$142.

Other Fertilizers—England, \$36,832.

Seed Importation Act Amended.

The seed importation act of August 24, 1912, prohibits the importation into the United States of those seeds subject to the act when they are adulterated or contain three per cent. or more of weed seeds, or when clover and alfalfa seed contains more than approximately 90 seeds of dodder per pound.

This act was amended on August 11, 1916, by including the seed of ryegrass and vetch in addition to those seeds enumerated in the original act and by prohibiting the importation of seeds which contain less than 65 per cent. of pure live seeds, except that the seed of Kentucky blue grass and the seed of Canada blue grass may be imported when it contains 50 per cent. or more of live pure seed. The amendment fixing a minimum quality for imported seed is intended to keep out of the United States seed of low germination as well as seed containing large proportions of chaff, both of which

have been imported in large quantities in recent years.

The regulations for the enforcement of the seed importation act published as Treasury Decisions No. 35363 on May 6, 1915, and as Service and Regulatory Announcements, Bureau of Plant Industry, No. 2, May, 1915, are being revised to conform with these amendments and it is expected that they will be promulgated to be in effect on and after November 1, 1916.

NEWS ITEMS FROM EVERYWHERE

CHICAGO.

Joseph Marks left this week to travel the territory east and north of Chicago for A. Henderson Co. Mr. Marks is a well-known and able salesman.

Johnson & Spetz add one more retail store to the south side at 1924 E. 71st street. This is not the Johnson of Johnson & Cronis, though he was formerly in their employ.

The A. Henderson Co. are just handling their second car of *Formosum* lilies from Japan. The stock is good and came through with little delay; a shipment of paper white narcissi is expected to arrive from France this week.

Geo. Gerasimo is proprietor of a new store at 6302 University avenue, under the name of the University Florist Co. As there was already a retail store, but a few blocks away, known as the University Floral Co., the names are confusing.

Ed. Vilter was the last of the Zech & Mann force to take a vacation. Mr. and Mrs. J. Schoepfle and daughter, 933 Belmont avenue, have returned from an extended eastern trip. Arthur Blome and Mrs. Blome are back from a two weeks' cruise on the Great Lakes.

Frank Oechslein's place on Harlem avenue, which he purchased recently, is now nearly in perfect working order. The houses have been overhauled and a carload of pipe has arrived from Birmingham, Ala., to connect the place with the city water. The four new Foley houses added to the old range are now completed and ready for planting.

The Civil Service Board of the West Chicago Park Commissioners will hold the following examination on the date and at the place given below. Application blanks may be obtained at the office of the Board in Union Park or at the West Park playgrounds.

Examination No. 225. Florist, Class G. Rank II. Original Entrance. Pay, \$80.00 to \$90.00 per month. To be held October 3rd, 1916, at 9:00 A. M., at the Garfield Park Pavilion. Open to men over 21 years of age, regardless of residence. Applications must be filed in the office of the Civil Service Board in Union Park before 5:00 P. M. of October 2nd, 1916.

Special Subject, weight of 6; Experience, weight of 3; Physical, weight of 1.

Special Subject: An oral and practical test in exhibition greenhouse work and written questions on the care and propagation of plants and general greenhouse operations.

The duties of Florist are general work in the conservatory and propagating house and in the outdoor gardens throughout the system.

FRED G. HEUCHLING,
Superintendent of Employment.
September 6, 1916.

PITTSBURGH.

Mr. and Mrs. Gilbert Weaklin celebrated the 13th anniversary of their wedding on last Saturday evening.

Representatives of the U. S. Dept.

of Agriculture and the Penna. Dept. of Agriculture attended the corn roast given last Tuesday evening in order to study the progress of the Pittsburgh Vacant Lot Garden Association. The families who cultivated the gardens under the auspices of the Association were the hosts for about 1,000 guests. Chancellor McCormick of the University of Pittsburgh and president of the Association presided.

Mr. and Mrs. Gustav Ludwig left early in the week for a trip to California. Mr. and Mrs. T. P. Langhans and Miss Langhans, have gone to Atlantic City for September. Miss Emma Maxwell of Wilkinsburg has returned from a three weeks' vacation at Van Buren Point, Lake Erie. Miss Eleanor Craig, her bookkeeper has returned to duty, following a three months' illness. W. M. Turner, and son have returned from a motoring trip through the east. James J. Higgins and family are in the Laurel Ridge range of the Alleghenies.

BOSTON.

Notice has been given by the Referee in Bankruptcy that a dividend of three per cent. has been declared on all unsecured claims against the estate of Sidney Hoffman.

A messenger service has been established in the Flower Exchange, with a system of receipt blanks, etc., which has already proved a popular convenience for both dealers and buyers.

Formal announcement has been made of the betrothal of Miss Alice M. Doyle of Brookline and Dr. Francis P. Jantzen of Commonwealth avenue. Miss Doyle is the daughter of the late William E. Doyle.

Arthur S. Thurston of Everett, Mass., has accepted a position as professor of floriculture at the Iowa State College at Ames, Ia. Professor Thurston received his education in the Everett schools and was graduated from the Massachusetts Agricultural College at Amherst.

The annual auction sale of choice of stalls in the Co-operative Market took place on Saturday, Sept. 9, W. W. Tailby, auctioneer. The first choice was sold to Robert Montgomery for \$71.00. The directors have now under consideration the abandonment of this method of assigning preferred positions and grading of stall rents according to position.

Owing to the infantile paralysis situation, the Board of Health have ordered the fall show of the Medford Horticultural Society abandoned and the society has notified its members to that effect. There were to have been given a number of prizes to children and others at the show, which usually is held in the Mystic Congregational Church, Medford.

PHILADELPHIA.

Morris Meyer, lately with A. M. Campbell, is now with the Philadelphia Cut Flower Co.

For the first time in many years there seems to be some little excitement here about the club election in October. Messrs. Farenwald and Therkindson are the nominees for president of the club, and Rust and Cowperthwaite for the secretaryship. It looks at this writing as if there would be some warm alignments.

James Griffin, one of the oldest and most successful of our local florists, is moving from Frankford to Torresdale. He has already a good range of glass up on his new place and has moved his orchid collection there at this writing. For a "back number" he seems to be progressing very nicely.

Dear Tom: I don't know how it will affect you, but it made me kind o' goosy to read on North Fortieth street the sign of "Delmer J. Colflesh, Undertaker."

We have some Colflesh boys in our business—the sons of J. Wm. Colflesh, for many years treasurer of the Florists' Club; but they are very live boys, and in spite of their name, they are not dead ones by any means.

NEW YORK.

The Macniff Horticultural Company had a very successful auction sale last Tuesday. The demand for bulbs was unexpectedly lively for so early a date and palms brought very good prices.

Richard Vincent, Jr., of White-marsh, Md., lectured before the Ladies' Club at Lawrence, L. I., on Thursday, Sept. 14. Mr. Vincent also visited Oyster Bay in the interest of the approaching Dahlia Show.

Wm. J. Elliott, the veteran plant auctioneer, promises something lively and interesting for all who attend his first reception for the fall season which is scheduled to take place on Tuesday, September 19. Bulbs and foliage plants will be the attraction.

Johnson & Millang, the up-town plant auction house report that their initial sale on Tuesday of this week exceeded their expectations. The attendance was mostly dealers and retail florists and they developed a good appetite for bulbs and decorative stock, ferns, etc.

WASHINGTON. D. C.

Miss Nellie Brueninger, of Gude Bros. Company, is spending her vacation on a ranch near Denver, Colo. Miss Brueninger is one of the best known women in the floral trade in this section, as well as one of the most popular.

Gude Bros. Company has placed an agency with Thomas J. Donovan, of 9 H street, N. W., who will take orders for flowers and designs. This establishment is directly opposite the big building of the Government Printing Office, and good trade should result from the placing of the agency.

The Influence of Department Store Flower Selling

(A Paper Read Before the Chicago Florists' Club by Allie Zech.)

Mr. President and Fellow Members:

At the last meeting I promised to read a paper on whether it is harmful or beneficial to the flower business for the department stores to sell flowers at ridiculously low prices. There has much been said for it and against it. Some will say it makes new flower buyers because people buying from department stores would not go to a flower store to buy, but when they get in the habit of having flowers at home they will buy from the legitimate florist. Then others say it hurts the florists in a way, because the public gets to believe that flowers have no value and that the florists are "hold-up" people.

The department stores advertise cut flowers at a price that is less than the cost of producing the stock, such as carnations at 8 cents per bunch of 25, roses at 6 cents per dozen. The general public does not know a good flower from a poor one. A flower is a flower to them regardless of quality, therefore I say that the public should be educated in regard to the quality of the flowers. Just imagine a department store advertising roses at 12 cents per dozen the day before Mothers' Day, when the price in the market is \$2 and \$3 per 100 for the very shortest roses. Can the retailer sell his stock at these figures? One department store last year came out with a big ad. in the paper with lilies

at 19 cents a pot, saying that they were going to protect the public and not overcharge on flowers. Don't you think a thing like that hurts the flower business? In the wholesale houses it can be noticed at once; as soon as the department stores have a sale on flowers the retailers do not buy anything. When you ask them why they are not buying they answer, "If we buy we cannot sell, as people tell us they will go to the department stores and then we have to throw our stock away." The department stores do not give a rip for the florists. They do not make any money out of the flowers they sell but have found out it is a better way of getting customers into the store than any other item they can advertise. They are only selling flowers for an advertisement and not for a livelihood.

Now I will say that all three branches of the cut flower business are to blame for these conditions. Take the wholesaler; he is overloaded with stock; the buyer for the department store comes in, and the wholesaler unloads on him for a song. Now would it not be better if this stock was thrown in the barrel and the balance sold for a better price? In the end the wholesaler would sell say one-third of his supply and get as much if not more money than by unloading to the department stores. In the second place take the grower. When the market is glutted he ought to sort his

cut and send only the best to the market in place of sending in every flower whether good or bad. By sending only the best stock to the market during the glut he would cut down the supply and in that way retain the market. But most growers figure on how much they can cut, then they will say I cut so many flowers during the season, not saying how good they were. So if the grower would help in this way during a glut it would help to cut out the department stores.

Now in the third place take the retailer. He could help to cut out the department stores by buying more stock during a glut. The retailer of today does not carry a stock of flowers in his store. He buys a few and then waits for an order and goes to the market and buys just enough to fill his orders. When a glut comes in the market why does not every retailer buy a good supply and run a sale of his own, not let the department stores do it? He could sell many more flowers in this way. When stock is plentiful he could go to his wholesale house and order a large amount of flowers for a certain day, then go to the printer and get out some hand bills to be delivered by mail or by boys to every house in his neighborhood, letting the people know that he had made arrangements with the growers to supply him with a large stock for a certain day at a lower price than usual and that he wanted to give everybody in the neighborhood the benefit of this low price, and then sell this lot of flowers at a lower than usual figure. Don't you think in this way every retailer could dispose of more flowers and create more floral buyers? Another way for the retailer would be to buy a lot of flowers and put them in small boxes, say six to a box, and enclose a card with his compliments and have them delivered to all his customers or to all the people in his neighborhood. This would advertise the retailer, and also make new flower buyers, and the best thing it would do would be to eliminate the department stores from the flower business.

LET US SUGGEST to you during the
hot months of the year

BEAUTIES

\$1.00—\$3.00 dozen

Grown from young plants for summer blooming, is an item we can recommend to you. The flowers are of a fair size, good color and clean foliage. If you cannot get them elsewhere, try us.

BOSTON All business in the whole-sale district drags most depressingly this week. Receipts are not very heavy but such as they are there are very few customers for any line and prices on all sides have dropped materially from those demanded a week ago. Gladioli are not seen in the quantity displayed heretofore and the main crop is evidently on the wane. Asters have not increased in volume since last week and the quality seems to have gone backward. The aster crop, taken as a whole for the season, has been very far from successful but the prices obtained for them, regardless of quality of flowers, have been the highest ever known in this market and the growers cannot reasonably complain. Although in the very centre of the best dahlia growing section of the country, Boston has never developed any keen demand for the flowers for florists' use and even now at the height of the blooming season they are rarely seen in the wholesale markets in any noticeable quantity. Lily of the valley would be scarce if anybody wanted it but there is at present no call for it and it stands around unsought and often shop-worn before it is disposed of.

Since last report the **BUFFALO** market has taken a decided change throughout. The beginning of the week saw a liberal supply of good and poor quality of asters, gladioli, lilies, roses, Beauties and everything along the line was plentiful. Roses in particular are coming in heavy, and asters have improved. Business has been quite satisfactory with the merchants. Since the beginning of September many weddings have been heard from. It looks like a good autumn trade.

Trade conditions do not **CHICAGO** show any marked change. There is a gradual increase in the supply of the best grades of roses and orders can usually be filled without much difficulty. It has been a summer without a glut, and the average florist has had to pay higher prices for his flowers, but also he is nearer to making expenses than in the summers of the past. Carnations are still counted as of little importance. Chrysanthemums are confined to Golden Glow, which no great quantity have yet appeared. Asters are nearing the close of a season that has been unusual. The proportion of good ones though small has probably brought the returns up to average, however. Cattleyas are still very scarce. Lily of the valley is both

BEAUTIES

Growers are cutting from the young plants—fine color, good full flowers, good value from \$1.00 to \$3.00 per dozen.

DAHLIAS

This popular fall flower is improving every day. Price from \$15.00 to \$30.00 per 100.

Store closes daily 5 P. M.

	25.00 to 35.00	25.00 to 50.00 to 35.00	30.00 to 40.00

scarcer and small. Gladioli are not quite so much in evidence. Ferns, wild smilax and other greens are in abundance.

While business is **CINCINNATI** fair the receipts are coming in heavier than for some time and there is a tendency for stock to crowd up in the wholesale houses. The rose cut is much better in quality and quantity. Lilies again are plentiful. The receipts of asters are very heavy. Gladioli are still plentiful but are not as good as they were. Dahlias and cosmos are fairly plentiful and each has a pretty good market.

The quality of the **NEW YORK** product coming to this market is vastly improved. Roses are particularly good. Asters are seen in abundance in all grades but some are very fine. Golden Glow chrysanthemums are quite common and give a fallish tone

to the situation. But all this is of little use in the disarrangement caused by the street car men's strike and there is no business. It is an embarrassing and altogether unfortunate opening for an otherwise promising season.

PHILADELPHIA Stock has been coming in a little more freely while the demand has remained about even so that on the whole prices have sagged a little except on some special items such as cattleyas, lily of the valley, lilies and white roses. The aster growers explain their poor showing this year by the season being too wet in June and July. They also explain it further by saying it was too dry in August and September. "You pays your money and you takes your choice." Chrysanthemums are here. The early one Golden Glow is seen in moderate quantity. School 'and

Flower Market Reports

(Continued from page 389)

church movements are affected by the infantile scare. This, of course, hurts the usual flower business in these lines.

Flowers of practically all kinds have again commenced to come in nicely, and business is brightening up proportionately. Especially large and fine dahlias are being received from the Dahliadale nurseries of Vineland, N. J., and disposed of as they are unpacked to fill the orders booked ahead. Roses of really fine quality are coming in about as required, and gladioli, which, heretofore have been entirely inadequate, are rapidly ascending to the emergency. Of carnations, of course, there are none, and asters still continue scarce, but the prospect for the late crop seems fairly encouraging.

The wholesale market is quite dull and overcrowded with stock not of extra good quality. Roses in all varieties are in plenty, but only fair in quality. Short in stem and prices cheap. Carnations are few. Asters are going still. There are a few chrysanthemums. Lilies are plentiful, but lily of the valley is scarce. Tuberoses and gladioli are enough. Cooler weather is needed to stimulate the market.

Business in Washington last week showed quite an improvement. The weather is cooler and fall weddings have commenced. Flowers are more plentiful and much improved in quality. Asters will soon be off the market; dahlias are more plentiful and are better than they have been. Carnations are more in demand with supply increasing. American Beauty roses are coming in fine shape. Cattleyas bring \$9 per dozen. Lily of the valley is almost unobtainable at times.

NEWS NOTES.

St. Clairsville, O.—Harry Humphreyville has purchased the business of the Morrison Greenhouse Co.

Glens Falls, N. Y.—Crandall Flower Shop suffered damage by a fire in the block in which it is located, on Wednesday, Sept. 6.

Ridgefield, Conn.—Peter Hornig, a florist, was struck and killed by an automobile owned by George L. Wilson, of 149 Broadway, N. Y., here on Monday, Sept. 11. His neck was broken. Coroner Phelan was communicated with, and, after learning the circumstances, released the automobile party, which was absolved from blame for the accident.

WAYCROSS, GA.

In writing to Advertisers kindly mention Horticulture

Hammond's Thrip Juice No. 2

REGISTERED

A Contact Insecticide, Useful and Reliable, Used for 30 Years in Greenhouses, and on Plants, Grape Vines, Trees and Shrubs

Some common Sucking Insects, magnified.

HAMMOND'S PAINT & SLUG SHOT WORKS, Beacon, N. Y.

BELGIAN SHIPMENTS IMPROBABLE.

Our Washington representative informs us that there seems little likelihood of American florists being able to get any Belgian horticultural products because of the stand taken by the British and the German Governments, the latter declaring that it will not permit exportation unless the money therefore is paid into their hands, while the former will not agree to the release of the goods because of the fact that the money may come into German hands and thus be used against the Allies in hostilities. William F. Gude and C. B. Knickman, on Monday last, visited the State Department, as well as the British and German Embassies in an effort to secure some relief, but they feel that their visit was of little or no avail.

On the other hand, a leading New York importing house informs us that their latest news from Holland—date up to August 23—gives hopes that the efforts of the Chambre Syndicale des Horticulteurs at Ghent will be successful in obtaining the export

permission from the German provisional government, the same as they succeeded in the end last year, though at present such objection to the export is not yet officially removed.

We are also informed that Holland insurance companies will not agree to cover this season any extra risks of damage by delay or detention.

CATALOGUES RECEIVED.

F. & F. Nurseries, Springfield, N. J.—Trade List of Nursery Stock for Fall, 1916.

Peth & Duggan, New York Autumn Catalogue of Bulbs, Seeds and Garden Supplies.

Wm. Elliott & Sons, New York—Flowering Bulbs, 1916. A general catalogue of good quality.

Conard & Jones Co., West Grove, Pa.—New Floral Guide, Autumn 1916. Bulbs, Roses, Peonies, Hardy Border Plants, etc.

Storrs & Harrison Co., Painesville, Ohio.—Autumn Catalogue No. 3, 1916. Devoted to bulbs and general plants for greenhouse or garden.

Henry F. Michell Co., Philadelphia, Pa.—Wholesale Price List of Bulbs, etc., for September, October, November, 1916. A large, fully illustrated and comprehensive publication.

R. & J. Farquhar & Co., Boston.—Autumn Catalogue 1916. This 84 page catalogue is the handsomest fall issue this house has ever put out. A green toned ink has been used which brings out the numerous cuts of bulb and shrub flowers with pleasing effect. The Regal Lily forms the chief cover subject.

THE PAPER FAMINE.

Now while paper is so scarce,
Cut it short.
Please omit the frills and airs.
Cut it short.
If you've anything to say,
Say it in the briefest way;
Paper costs a lot today;
Cut it short.

If you feel like writing verse,
Cut it short.
Make it vital, pithy, terse,
Cut it short.
If you wish your words to glisten
And would have the whole world listen,
Shape your poem 'bout like this'n,
Cut it short. —*Boston Traveler.*

The Recognized Standard Insecticide.
A spray remedy for green, black, white fly, thrips and soft scale.
Quart, \$1.00; Gallon, \$4.50.

**FREAKISH FACTS AND FACKLESS
FREAKS.**

Edward G. Murphy, a 70-year-old Waverly farmer, lays claim to attaining 900 per cent. efficiency in corn raising. He has sent the Post freak vegetable editor proof in the form of nine ears of green corn growing where ordinarily only one grows. Farming is only a sideline with Mr. Murphy. He is a blacksmith for a big express company at its stables in Boston. He leaves home at 5.30 every morning on week days and gets home around 6.30 at night. The rest of his spare time he devotes to farming.

—Boston Post.

Petersburg, Ind.—J. W. Wilson, an attorney of this town, has a dead South Carolina poplar tree back of his law office. Several months ago he noticed a sprig of green sprouting from one of the limbs. He knew the tree was dead, and watched the sprout until now it has grown into a large sunflower bush that will be ready to bloom in a few days. There is no way to get moisture to the sunflower and the limb is less than two inches in diameter, yet it has withstood the drought while vegetation on the earth has perished.

—Boston Traveler.

A certain Worcester woman, whose hobby is floriculture, is a bit suspicious of employees of the agricultural department in Washington and friends that contributed seeds for her garden. Early in the season she planted the contents of a seed package, according to printed directions. Day by day she watered her garden plot, kept the earth in which she planted the seeds soft, and waited patiently for chrysanthemums to sprout. She was rewarded a few weeks ago when she saw tiny sprouts in the garden and decided that she was to have flowers of the dwarf variety. She was doomed to be disappointed, however, because a caller well versed in horticulture, exclaimed when he saw the greenery, "What nice lettuce you are going to have." Now the woman is wondering if some one mixed the seeds in the package before or after they left Washington.

—Worcester (Mass.) Post.

SIGGERS & SIGGERS

PATENT LAWYERS

Box 9, National Union Building
Washington, D. C.

This is actual size. About $\frac{1}{2}$ that of our old one.

The valve itself is brass and copper. Nothing to rust and stick.

A rough sketch of the old one, by way of comparison.

Just the way it looks from the outside.

New Automatic Valve For Your Overhead Mains

IT'S a great improvement over that big barrel shaped one we used to make. It's less than half the size. Simpler in construction. Easy to connect up. Easy to clean.

Just tap in a connection at the highest point of your mains, screw on this Little Marvel Valve and forget it.

Day and night it's there, automatically working, freeing the mains from all air pressure, and increasing your heating system's efficiency.

Considering how carefully it's made; the accuracy with which it works; and the added efficiency it gives your heating; the price we ask for it is ridiculously low.

Send for price.

Putting Practical Practice Into Practice In Building Greenhouses For the Schools of the West and East

WHY shouldn't children be taught about plants—real live, living, growing plants; instead of pictures of them, or uninteresting dried up specimens; or those preserved in alcohol?

Why shouldn't a knowledge of real plant life be a part of their education, quite as much as many of the other things that are taught?

This early teaching means a greater, a larger love of flowers; which in turn eventually means a greater demand for flowers; which again in turn means more sales and more money for the growers.

Ever think of it that way?

With the Boards of Education all over the country waking up to the importance of teaching, talking and living with flowers in the schools, it's easy to see that there is going to be no great danger of growers "over building" for some time to come.

When you teach the children about flowers, you teach and influence the parents also.

Don't lose sight of that fact!

In the last three years we have built greenhouses for close to a hundred schools and institutions. Yes, more than a hundred.

The houses illustrated adjoin one of the splendid schools for which Minneapolis is justly famous.

One is used for a regular growing house; the other as a sort of plant laboratory and class room.

Last Fall we put one on the tip top roof of a New York school. It was the only place in that crowded district, where fresh air and light and sunshine was in abundance.

Among some of the others we have built, are:

Deerfield Township High School, Highland Park, Ill.
Ohio University & Normal College, Athens, Ohio.
State Training School, Red Wing, Minn.
Chisholm High School, Chisholm, Minn.
Montevideo High School, Montevideo, Minn.
Kentucky Agric. Exp. Station, Lexington, Ky.
Conception Abbey, Conception, Mo.
Montana Agric. College & Exp. Sta., Bozeman, Mont.
Agricultural College, Urbana, Ill.
Owatonna Public School, Owatonna, Minn.
Maddock School, Maddock, N. Dak.
State Normal School, Mayville, N. Dak.
South Dakota Agric. Exp. Station, Brookings, S. Dak.
University of Nebraska, Lincoln, Neb.
Colorado Agric. Exp. Station, Ft. Collins, Colo.
Washington State College, Pullman, Wash.
St. Vital Agric. College, Ft. Garry, Man., Canada.
Agricultural College, Ames, Iowa.
Missouri Botanical Garden, St. Louis, Mo.
University of Nevada, Reno, Nev.
And Many Others.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

"If vain our toil, we ought to blame the culture, not the soil."—*Dece.*

Canterbury Bells

Those who planted out a batch last spring in the open border should now lift a good number and pot them using any good rose or carnation soil. Azalea or half-pots are the best to use. These plants possess so many advantages that all florists should grow some. Their culture is simple, requiring only very little handling and care. When lifting and potting field-grown stocks they should be given a semi-shady spot outside for a week or so and after that expose them to the full sunshine. When severe frosts threaten they can be placed in a deep frame here to remain until wanted for indoor blooming. I prefer constant pot culture for the plants because you will get better and more stocky specimens when they are well established before winter sets in and such stock is always sure to give the best results when grown under glass. Plants that have been grown in the field will give the biggest plants though they are not necessarily the most floriferous.

Dutch Bulbs

Don't leave bulbs lying around for days, but box or pot them up as soon as they arrive. When this has been done give them as much water as the soil will take. This will plump the bulbs up, and put them in the right condition to start and make roots. Store them away in some cold frame or—what is better—a bulb cellar, and keep dark and moist until they have advanced far enough with root growth. To be successful in forcing these bulbs, a good compost is necessary. Any good loam three parts, to one part of dry cow manure, and enough sharp sand to make the compost open will grow good flowers. Where the above mentioned compost is not handy, of course old carnation or rose soil that has some fresh loam and old manure added to it will answer in a general way. Now is the time to plan ahead how many of the different kinds of bulbs we shall need.

Summer Flowering Bulbs

Many bulbs are lost every year for the want of proper care at the right time. If there is not room in the houses they can be placed in a frame covered with sash and can stay until heavy frost makes it dangerous for them to remain out any longer, when they can be removed to a dry shed, leaving the pots on their side. Place the bulbs in some dry corner of a cool house where they will not be liable to get too much water. Later on shake them out and store in boxes where the temperature does not fall below 50 degrees. Achimenes, gloxinias, gesneras, tuberous-rooted begonias, etc., as they pass out of flower should have water gradually withheld until they have had time to thoroughly ripen

up. Ornamental caladiums will, like most tropical bulbs, like alternate periods of absolute rest. When these are ripened up they can be packed away in sand and kept in a temperature of about 55 degrees.

Lifting Shrubs for Forcing

Shrubs potted now will have several weeks in which to form fresh root fibres before the winter comes. Use pots or tubs that will first hold them conveniently. Give them a good, strong compost, say three of fibrous loam and one of manure and give each pot plenty of drainage. Work the compost well in and around the roots. These should be lifted now as greater success will follow potting now than a month later. When the weather becomes cold in November they can be placed where their pots will not break, but keep as cool as possible. Set them where they can have shade for four or five days, but after that they should be given a place where they can have full sunshine. Extra care will have to be exercised in watering as some will dry out more quickly than others.

Lily Bed

Replanting should be done at intervals of five or six years. If left longer the bulbs get smaller and smaller, ultimately dying from starvation. This work should be commenced as soon as their tops dry down. Throw out the soil to the depth of about 8 or 9 inches, replacing it with some well-rotted manure or leaves to the depth of 4 inches, after which dig it in with the soil. Then replace the bulbs, setting them from 12 to 15 inches apart. Every florist if he has the ground should have a lily bed. A succession of flowers can be had from June until September. Lilies prefer a light soil as a rule, enriched with some very old manure. The principal requisite is that the soil is well drained. They also like some shelter from the severe winter as well as the midday sun. When planting set the bulbs at least 6 or 7 inches deep and from 12 to 15 inches apart.

Reminders

Ventilate carnation houses freely on all good days.

All pot bound palms should be fed from now and up to the end of November.

Azaleas that are intended for Christmas should be in a house that runs at 55 degrees at night.

Do not syringe chrysanthemums so often now. Give them a chance to harden up. Give plenty of ventilation also.

In order to work up a good stock of crotons, dracaenas and other foliage plants keep the warm propagating benches filled up and busy.

Next week—Cyclamens; Carnations; Lorraine Begonias; Orchids; Peonies; Reminders.

has been done. This shows the most essential thing to develop a market is to get people interested in growing things" and argues that the opportunity to purchase garden material at an unexpectedly low price tends to make new permanent customers who might not otherwise have ever been interested and that these by their example will stimulate and encourage emulation on the part of others also. This strikes us as pretty logical reasoning and we have seen it demonstrated repeatedly. Take a given neighborhood where the homes are all unadorned and let the owner of just one of these proceed to beautify it with trees, lawn, flowers and vines and note the result. It will not be very long before the whole neighborhood is transformed. The most effectual missionary work isn't all preaching.

The English sparrow

In common with many others, we are not in full accord with the sentiments expressed by Mr. Forbush in regard to the standing of the so-called "English" sparrow, in his lecture before the Gardeners' and Florists' Club of Boston, last Tuesday evening. We recognize the fact that as a life-long devoted student of bird habits, and as State Ornithologist of Massachusetts, Mr. Forbush possesses an exceptional knowledge of his subject and his opinion should carry great weight. But we have repeatedly seen such evidence of this bird's useful services in insect destruction that we are always moved to register our protest whenever we hear him denounced, as it seems to us, too harshly. We think, too, that it is a mistake to hold the English sparrow so largely responsible for the reduction in numbers of our native birds as do Mr. Forbush and others. The full effect of the encroachments of civilization on Nature's domain is a subject too complex to be disposed of offhand and even at his worst the sparrow can be but an insignificant factor. The woods, fields and meadows are the natural habitat of the native birds and there the English sparrow does not care to go, preferring to keep close to the habitations of man. Not all his traits are lovable but he has enough good points to entitle him to a "square deal."

A good move

In addition to continuing the successful series of Landscape Gardening classes which have been conducted for a number of years under its auspices, the Gardeners' and Florists' Club of Boston now proposes to inaugurate also a course in Floral Art provided a sufficient number of members signify a desire to take advantage of the offer. The only untoward feature of the landscape enterprise has been the occasional difficulty of securing enough students to make it self supporting. In a club numbering over four hundred members a goodly proportion of whom are young gardeners presumably desirous of advancing in the knowledge of their art and in the emoluments which appertain to it, this lack of interest is regrettable. To what extent support will be given to the new proposition remains to be seen. "Floral Art" is a topic of very broad application, closely touching upon the major part of a gardeners' as well as a professional florists' function and we do not yet know just what line of instruction is contemplated. But it is safe to say that in no particular is the average florist or gardener more deficient than in a knowledge of the fundamental principles underlying correct harmony and contrast in form and color arrangement. Whether it be in garden planting, exhibition grouping or decorative cut flower work, equal crudeness is generally seen. The workers evidently have much to learn and the field is limitless. We hope to see a ready response in this new and very commendable club enterprise.

"Good out of evil"

The frequent discussions of late in regard to cut price sales, department store competition, "dumping", auction sales, etc., call to mind a recent article in the National Nurseryman touching on the agitation and railing in the nursery trade against these methods of disposing of surplus stock. The writer of the notes here referred to very pertinently says "Perhaps these evil things will eventually work good" and adds "Every nurseryman knows that localities that have planted most are easier to sell to than those where little or no planting

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Liquid Manure

It is not too early in the season to start liquid manure, especially in the earlier planted houses where the plants have made quite some root. It will be best to use it weak at first and then only following a watering with clean water. This will insure against harm, for at this time of the year the plants dry out rapidly as a rule, and if the liquid hit at dry plants it would be sure to damage the roots a good deal thus giving a check from which it would take them a long time to recover. Where no dairy is maintained on the place the liquid can be made by mixing good cow manure with water and after running the liquid through screens, pumping it into the water pipes and using it same as clear water, only that we do not apply so much of it for it is expensive and if the plants are watered as suggested above it will not take so much to saturate the soil from top to bottom without wasting hardly any through the benches. To avoid stopping up the pumps with sediment it is best to mix a tank full at least two days before it is needed, and then allowing it to stand unstirred until used. This will settle all the coarse stuff to the bottom while all available parts of the manure will remain dissolved in the water. Where a dairy is maintained the liquid from all stables should be saved and diluted with water to the proper strength and used same as other liquid manure. Chemicals should not be added unless expert men handle them, as often more harm will result than good. A bag of bone dropped into the tank every now and then will make the mixture much better for the rose. Lime can also be added when the plants need it and when applied with the liquid manure will help harden them, and will kill many earth worms in the soil, too many of which are not wanted. Lime should never be mixed with manure in heaps or applied with manure when mulching, as it frees much ammonia and other chemicals long before the plants can take them up and the result is that there is a great waste.

Flowers for Retail Work

Jack Frost will soon do away with all flowers outside, and it will therefore be necessary for growers who do any amount of retail work to move some of the plants in before they are touched by frost. Much of these can be put into boxes at the ends of the houses. They will not produce flowers of the best quality as the houses will be run to suit the roses, but for making up designs now and then and to add to a box of mixed flowers these little odds and ends will come in handy. Snapdragons, stocks, swainsons, heliotropes, crocuses—all these can be used during the winter, and the plants made into cuttings in the spring with the exception of the first two which do better from seeds. A few cold storage Giganteums will come in handy too as will a little other bulb stock. As stated before the flowers thus grown will not be of the best quality, but with a little care they can be grown to be good enough to use for the purpose mentioned and will be a great help to any one called on to

make up work of any kind. Cultural directions will be found elsewhere in HORTICULTURE for any of the stock mentioned above.

Careful Packing

There is very little use in being very careful in growing roses and then handling them like stones when packing them for shipment. There is many a lot that would have sold for double the price they did if they had been packed carefully so that they would not arrive in the market all bruised and torn, with the leaves badly torn by the thorns and in many cases the buds themselves punctured by thorns of roses packed over them. To begin with, all roses should be in water at least four hours before shipment, and in an ice box if possible, to harden them. When properly hardened they will carry much better and stand handling. Have the boxes properly lined with paper, and use a cushion of tissue up against the end of the box, being careful to pack the first rows a safe distance from the end. Pack well; being careful that the heads of the buds do not crush up against the row ahead of them. Although the roses should not be crushed by packing too many in a box they should not be packed loosely either, as they bruise if they are packed loose almost as much if not more than when they are overcrowded. If necessary to pack two layers to a box, make it a point never to pack anything over white, as these show the marks much more than any other. Also see that there is sufficient paper in between the layers to protect the lower roses from the thorns of the upper ones.

Lilium Sargentiae

After five years' thorough trial in this part of the country, where the winters are annually of sufficient severity to test any plant to the utmost, it is pleasant to accord this grand lily the highest commendation. In addition to being one of the largest flowered lilies it is also one of the strongest growers, and when planted and left undisturbed in a congenial soil, a well drained loam suiting it admirably, one will soon be able to look upon stately stems six to seven feet high, carrying from fifteen to twenty flowers. It can be reproduced by bulblets taken from the axils of the leaves, and the accompanying illustration shows what may be expected of these after two years' growth. From one to four flowers will be produced on each stem.

The color is beautiful, the pure white of the interior, the brown anthers and the ruddy shading on the back of the petals combine to make one of the handsomest of all the lilies. Considering the beauty of this lily, its vigor and hardiness and all its other good qualities, one cannot too highly recommend it to garden lovers.

Arthur E. Thatcher

Bar Harbor, Me.

CLUBS AND SOCIETIES

NEW YORK STATE FEDERATION OF HORTICULTURAL SOCIETIES

A meeting of the State Federation of Horticultural Societies was held at the State Fair in Syracuse on September 14, 1916. Vice-President E. A. Bates of Syracuse presided. There was a good attendance at the meeting, and various reports were given on the work of the different committees during the past year. A committee consisting of Messrs. McCarthy, Thorpe and White was appointed to draw up suitable resolutions on the death of President Wm. F. Kasting.

It was the opinion of the Federation that its work would be more effective if there were more meetings during the year. It was, therefore, voted to hold an annual meeting at New York State Fair Grounds in Syracuse during State Fair Week, a second meeting at Cornell during Farmers' Week, a meeting in New York City during the Spring Flower Show, and a fourth meeting with some society of the Federation at such time as the President might designate. It was voted to provide for an executive board to consist of the President, Secretary and Treasurer of the State Federation of Horticultural Societies and the president of each affiliated society in the Federation.

The officers elected for the ensuing year were as follows:

President, F. R. Pierson, Tarrytown; First Vice-President, Dr. E. A. Bates, Syracuse; Second Vice-President, George McCarthy, Syracuse; Third Vice-President, C. H. Vick, Rochester; Fourth Vice-President, George E. Thorpe, Syracuse; Fifth Vice-President, F. A. Tinker, Albany; Secretary, E. A. White, Ithaca; Treasurer, W. A. Adams, Buffalo.

It was voted to appoint a committee of the Federation to confer with the Horticultural Council in regard to an appropriation for a Horticultural Building at the New York State Fair. The members elected to this committee were President Pierson and Messrs. Bates, Lumsden, Workman and Thorpe.

E. A. WHITE, Sec'y.

ST. LOUIS FLORIST CLUB.

The September meeting of the Florist Club was held at the Sanders Nursery Co. in St. Louis County on Thursday, September 14. The members met in the wholesale district and the trip was made in decorated automobiles. After a walk through the greenhouses and nursery grounds the meeting was held on the lawn. The show committee reported that the Spring Flower Show would be held in Armory Hall, March, 1917, and that the show was incorporated as the St. Louis Flower Show Association. F. J. Fillmore and C. C. Sanders were appointed to install the new officers, as follows: Jules Bourdet, president; Aug. H. Hummert, vice-president; J. J. Windler, secretary; W. C. Smith, treasurer; F. A. Windler, trustee. The retiring officers—J. J. Beneke, for the past ten years secretary, and W. S. Wells, vice-president—were given a rising vote of thanks for their good work while in office. The meeting

Meetings Next Week

Monday, Sept. 25.

Wednesday, Sept. 27.

Oyster Bay Horticultural Society, Oyster Bay, N. Y.

then adjourned and refreshments were served on the lawn by Misses Laura and Jessie Sanders. The next meeting will be held on October 12 at the St. Louis Wholesale Cut Flower Co.'s new home.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The September meeting of this club, held on Tuesday evening, September 19, was a most enjoyable affair and an auspicious opening of the season of 1916-17. Fully two hundred and fifty, of whom at least one-half were ladies, were present to enjoy the stereopticon lecture on "Birds and Their Value to Gardeners and Florists." Another attraction was the promise of a collation and then dancing to follow the lecture.

Mr. Forbush showed a large number of prettily colored pictures of wild birds in various positions and activities, many of them obtained only after the exercise of much ingenuity and patience. The lecture was convincing as to the necessity of protection for the native birds in order to cope with the insect invasions. Mr. Forbush's antipathy to the English sparrow drew out several members in defence of this much berated emigrant.

The younger members tarried and indulged in dancing until close to the midnight hour.

At the October meeting of the club "Chrysanthemums" will be the subject. In November there will be a stereopticon lecture on "Tree Surgery," and in December one on "Greenhouse Construction."

MASSACHUSETTS HORTICULTURAL SOCIETY.

The Fruit and Vegetable Exhibition of the Massachusetts Horticultural Society will be held in Horticultural Hall, Boston, on Saturday and Sunday, October 7 and 8. The hall will be open for exhibits of new, rare or improved varieties of plants, flowers, fruits and vegetables, for which suitable recognition will be made on Saturday afternoon, September 23, and Saturday afternoon, October 21.

The Grand Autumn Exhibition will open on Wednesday, November 1, and close on Sunday night, November 5. This latter is a "pay show." The others are free to the public.

NASSAU COUNTY HORTICULTURAL SOCIETY.

The monthly meeting of this society on September 13 was the best attended of the season. A letter was received from Henry Gibson tendering his resignation as secretary, he being about to locate elsewhere, and Ernest Westlake was appointed secretary pro tem. During his term of office Mr. Gibson proved to be a most capable official and we deeply regret losing his services. He carries the best wishes of all his fellow members to his new location. The schedule of the Chrysanthemum Show, 53 classes, was read and approved. In all but a very few classes competition is open to all. James Gladstone was appointed manager for the Dahlia Show to be held on October 5 with Thomas Twigg as assistant. An essay on "Mushrooms and Their Culture" was read by Joseph Robinson, describing the various types of edible fungi and the distinguishing characteristics of the poisonous varieties. Two essays received from the National Convention of Gardeners were very favorably received.

Awards were made to the following exhibits: Jos. Robinson 1st for muskmelon; F. Petroccia 1st for corn, and lima beans, also vote of thanks for new Honeysweet corn.

JAMES MCCARTHY, Cor. Sec.

SEWICKLEY HORTICULTURAL SOCIETY.

The regular monthly meeting of the Sewickley (Pa.) Horticultural Society was held on Tuesday, Sept. 12, in the Odd Fellows Hall. The coming show, on Sept. 22 and 23, was up for discussion and a final committee of arrangements appointed. Wm. Thomson, Sr., showed some orchids and Thos. Sturgis showed a collection of gladioli, also some very fine seedling dahlias of the Indian family type. A vote of thanks was accorded the exhibitors. Reports of the Field Day, held on Aug. 30, showed the picnic to have been a success in every way. The Society extended a vote of thanks to Mrs. Wm. Thaw for her kindness in granting the freedom of her estate for the day. Applications were received for five new members.

M. CURRAN.

RHODE ISLAND HORTICULTURAL SOCIETY.

The September show of the Rhode Island Horticultural Society was held in the Narragansett Hotel, Providence, on September 12 and 13. There was a grand display of dahlias, gladioli, asters and roses, as well as fruit and vegetables and the public attendance was very large. W. D. Hathaway and Miss Nellie Jilson were large winners in the professional dahlia classes. J. P. Rooney received a gold medal for his dahlia Mrs. Frederick Grinnell, and Geo. L. Stillman got a like award for his Millionaire. Roger Williams Park put up a showy table of flowers. The next exhibition will be in November.

NEW HAVEN COUNTY HORTICULTURAL SOCIETY.

The New Haven County Horticultural Society is doing more insistent work than ever before. The annual exhibition, which was held the past week, was full proof that this Society is still full of life and activity.

John H. Slocombe, who has been in touch with the Society for forty years, had a wonderful display. In the class "Open to All, for 24 dahlias, any and all types," he won first. All these varieties were of his own raising and they won in open competition, over imported varieties, as well as those of domestic origin. It is questionable if any other dahlia grower in America could place 24 dahlias of his own raising and win first prize in open competition, especially with such growers as are to be found in New Haven and vicinity.

The following is a list of the 24 varieties exhibited by Mr. Slocombe: Mildred Slocombe, Beatrice Slocombe, Emma Slocombe, Chieftain, Red Chieftain, Geisha Seedlings 1, 2, 3 and 4, Mrs. Nathaniel Slocombe, Herbert Slocombe, Elsie Bunnell, White Excelsior, Purity and ten unnamed seedlings of 1915.

W. F. Jost, of East Haven, won nine 1st and four 2nd cash prizes. A. E. Doty, Morris Cove, won four 1st and eight 2nd, also a certificate of merit for a new dahlia not introduced prior to 1914. William Austin, gardener for L. E. Stoddard, won the Sanderson prize for 25 dahlia blooms. Great interest was taken in the school children's class, in which many prizes were given. William Austin received 1st and David Kydd 2nd in the State prize for one-half bushel of potatoes.

The judges for the show were Maurice Fuld, E. L. Childs and George L. Thrall, Sr.

Coming Exhibitions

Sept. 26-28, New York, N. Y.—Amer. Dahlia Soc.'s annual show, in Engineering Bldg., 25 W. 39th St. In conjunction with The American Institute of the City of New York.

Sept. 26-29, Chicago.—Vegetable Growers' Association, Hotel La Salle. Annual Convention and Trade Exhibit.

Oct. 7-8, Boston.—October Fruit and Vegetable Exhibition, Massachusetts Horticultural Society, Horticultural Hall.

Oct. 10-12, New Orleans, La.—Eighteenth Annual Convention American Association of Park Superintendents.

Oct. 26-27, Madison, N. J.—Twentieth Annual Flower Show, Morris County Gardeners' and Florists' Society, James Assembly Hall.

Oct. 27-29, Mount Kisco, N. Y.—Fall show of the Northern Westchester County Hort. and Agri. Soc.

Oct. 31-Nov. 1, Greenwich, Conn.—Fall Flower, Fruit and Vegetable Show of the Westchester and Fairfield Horticultural Society.

Nov. 1-5, Boston.—Grand Autumn Exhibition of Plants, Flowers, Fruits and Vegetables, Massachusetts Horticultural Society, Horticultural Hall.

Nov. 1 to 3, Tarrytown, N. Y.—Chrysanthemum show of the Tarrytown Hort. Soc. in Music Hall.

Nov. 8-10, New York.—Annual Chrysanthemum show of the American Institute, Engineering Society Bldg., 25-33 W. 39th St., New York.

Nov. 9-11, Lancaster, Pa.—Fall flower show.

Nov. 9-12, New York.—Fall exhibit Horticultural Society of New York at Museum of Natural History.

Nov. 11-19, New Orleans, La.—Flower show.

Nov. 14-15, Providence, R. I.—Flower show of R. I. Hort. Soc.

DAHLIA SHOW AT ATTLEBORO, MASS.

The Attleboro (Mass.) Dahlia Association held their second annual dahlia show on Friday and Saturday, September 15 and 16, at Y. M. C. A. Hall. The schedule was an attractive one and the local growers supported it well with their advertising. J. K. Alexander was judge. George J. Bauer, of Briggs Corner, was the big local winner. Two exhibitions by W. D. Hathaway and J. K. Alexander were not in competition, but attracted lots of attention by their beauty and quality. This has been a bad year for dahlia growers, owing to the inroads made in the gardens by the cinch fly. Whole gardens have been destroyed and it had its effect upon the annual shows in the quality as well as quantity of flowers shown.

The committee in charge of the show included Charles Sleeper, George L. Cobb and Thomas N. Proctor. Next to G. J. Bauer in the list of winners were Thos. N. Proctor, F. L. Tinkham, Geo. L. Cobb, Sidney Addecott, H. N. Fiske, R. S. Hossington, E. N. Hiron and C. E. Sleeper. The winners on seedlings exhibited by the originators were as follows:

Cactus—1st, Joseph Hewings; 2nd, Eben N. Hiron.

Decorative—1st, Sidney Addecott.

Peony flowered—1st, Thomas N. Proctor; 2nd Thomas N. Proctor; 3rd, R. S. Hossington.

Single—1st, 2nd, 3rd, Thomas N. Proctor.

Collarette—Thomas N. Proctor.
Pompon—Thomas N. Proctor.

CLEVELAND INDUSTRIAL EXPOSITION.

The big show at Cleveland turned out very successful. The flower show section was one of the most artistic features of the entire event and attracted favorable comment.

The retailers had a lot of fine tables, a total of ten in all, changing them about every second day. There were three tanks of water lilies and other aquatic plants.

The floral interests of Cleveland made an elaborate exhibit, consisting of a rustic bridge and water falls. The private gardeners more than spread themselves on their various group feature exhibits.

Prize Awards.

Ornamental Grasses—1st. Woodside Farm, O. P. Blackman, Mgr., West Park, O.

Foliage Plants—2nd. Woodside Farm.

Group of Stove and Greenhouse Plants, 150 sq. ft.—1st. James W. Corrigan, Wickliff, O.

Specimen Palm—1st. Woodside Farm.

6 Specimen Crotons—1st. Woodside Farm.

6 Dracaenas—2nd. Woodside Farm.

Pandanus Veitennii—2nd. James W. Corrigan.

Gladioli, 5 classes—1st. James W. Corrigan.

Display of Delphinium arranged for effect—1st. James W. Corrigan.

Lemon Tree—1st. James W. Corrigan.

Straw Flowers—1st. Chas. Reece, 13526 Detroit avenue.

Petunias—1st. Corrigan Estate, 2nd. Chas. Reece.

Centaureas—1st. Corrigan Estate.

Hardy Lilies—1st. Mrs. C. W. Wason.

Hanging Basket—1st. James W. Corrigan.

2nd. H. P. Eells, Wickliff, O.

Begonias, Hanging Baskets—1st. James W. Corrigan.

Hamper—1st. James W. Corrigan, 2nd. H. P. Eells.

Asters, 5 classes—1st. Mrs. J. W. Weth, Bay Village, O.

Hardy Phlox—1st. Woodside Farms.

Boston Fern—1st. H. P. Eells.

Collection Garden Flowers—1st. Woodside Farms, 2nd. James W. Corrigan.

CLUB AND SOCIETY NOTES.

The Massachusetts Asparagus Growers' Association held its annual meeting on Thursday, September, at the Experiment Station, Bedford road, Concord, Mass., at 11 o'clock A. M. Among the speakers were Dr. N. W. Sanborn of Holden, Henry Green of New York, Professor William P. Brooks and Professor J. B. Norton.

The prize schedule of the annual flower shows of the Morris County Gardeners' and Florists' Society has been received. The exhibition will take place on Thursday and Friday, October 26 and 27, in Assembly hall, Madison, N. J. This will be the 21st fall flower show of the society. Copies of the prize list may be had on application to Edward Reagan, secretary, Morristown, N. J.

September 14 was an ideal day for the Worcester County (Mass.) Horticultural Society's flower, fruit and vegetable exhibition, and hundreds visited Horticultural Hall in the afternoon. There was a good showing of gladioli, and though not many dahlias were shown, the specimens were beautiful. Dahlias are not numerous, owing to the late wet season, but there will be some fine dahlia blossoms later.

The flower show committee of the Holyoke and Northampton Florists'

DREER'S ARAUCARIAS

ARAUCARIA (NORFOLK ISLAND PINE) 1916

We have a good supply of Araucarias. You gain the benefit not only of the fall's growth by laying in your supplies now but to many points shipments by freight can now be made with safety at a saving of transportation charges.

HENRY A. DREER

714-716 Chestnut St., PHILADELPHIA, PA.

and Gardeners' Club announces that the fourth annual flower show under the auspices of the club will take place in Northampton, Mass., City Hall, Nov. 1 and 2. The committee, which met recently in Northampton is as follows: H. E. Downer, Northampton, chairman; G. H. Sinclair, D. J. Gallivan and George Rackliffe of Holyoke, F. D. Keyes of Florence, A. H. Nehrling of Amherst and K. B. Uhlman of Northampton.

The monthly meeting of the Lenox (Mass.) Horticultural Society was held September 13th. A paper for the evening entitled "Diabroticas" was read and well discussed. There was also a discussion on the pine tree disease which this season is very prevalent in the Lenox district. It was voted to hold the annual Field Day on Thursday, September 21. A good program of sports has been arranged. There was a large attendance and two new members were proposed. At the next meeting, October 11, there will be a lecturer from the state college.

An interesting meeting of the Westchester and Fairfield Horticultural Society was held in Greenwich, Conn., Sept. 8. For the fall show several substantial additions to the premium list were received. The judges reported the following awards on the evening's exhibits: Mills & Co., Mamaroneck, N. Y., highly commended for display of dahlias, also special mention for seedling dahlias; Wm. Graham, certificate of merit for display of rose Ophelia and vote of thanks for Centaurea Americana; Anton Pederson, certificate of merit for new tomato "Stanford

Beauty"; Andrew Whitelaw, vote of thanks for tomatoes "Yellow Ponderosa." After the regular business the members enjoyed a social session. The next meeting will be held Oct. 13. A display of dahlias and other seasonable flowers will be in order.
P. W. POPP, Cor. Secy.

THE OLD, OLD SUBSCRIBER.

How dear to my heart are the old things in general,
When fond recollection presents them to view;
Old pewter, old linen, old friends and old china,
Old books and old songs are far better than new.
And old shoes for comfort (we need new ones badly),
The old corn-cob pipe I shall always hold dear—
But the old, old subscriber, I mention him gladly,
Even faithful and true, he renews by the year.
The old, old subscriber, the dear old subscriber,
The faithful old friend who renews every year.

Old wine and old sweethearts, the older the better;
The old folks at home what is home without them?
The old swimming hole—it must not be forgotten—
The jewel of Memory's whole diadem;
Old times and old customs, and e'en the old dances
(We'll have to admit we cannot turkey trot)
But of the old institutions, if one must take chances,
The old, old subscriber's the best of the lot.

The old, old subscriber, the dear old subscriber,
The paid up subscriber's the best of the lot.
—Nat. Stockman & Farmer

GROVELLING ACCURACY

Being too precise about things is a grave mistake.

If you are charged fifteen cents where it ought to be ten and you protest then you are a nuisance and a victim to grovelling accuracy.

My friend 'Gene at Dreer's is a past-master on this point and has consigned me to the lowest academic pit—the pit of grovelling accuracy.

"We have no time in our business for drawing fine hairs," said he. "We are too busy."

Granting all that, about the busy end of it, isn't it permissible to ask where would the advancement of horticulture have started if some long haired individual hadn't started drawing fine hairs and giving us Killarneys and things. Getting out the orders and getting the money are big things. But the

Big Spirit

lack of all that is what makes the business possible!

If it were not for that big spirit there would be no Dreer's. Make no mistake about that and when we say Dreer's we mention them as typical in leadership and we know that 'Gene does not mean what he says about academic and hair-drawing.

We trust he will have a change of heart towards the dear public hereafter and put his remarks in such form as may be useful to the world beyond the confines of Philadelphia.

GEORGE C. WATSON.

During Recess

The Farquhar Outing.

On Saturday afternoon, September 16, the employees of R. & J. Farquhar & Co., Boston and Dedham, Mass., held their first outing, and so successful was it that it is hereafter an assured annual event. There were nearly one hundred in the party and a special car carried them from Boston to the Spring Grove at Wellesley. Following is the "list of events" and the winners:

100-Yard Dash for Men—1st. R. Chapman, store; 2nd. E. Johnson, nursery.

50-Yard Dash for Girls—1st, Miss C. Wannberg, store; 2nd, Miss R. McBride, store.

Pipe Race—H. Jones, store.

Three-Legged Race—T. Westwood and M. Raux, store.

Throwing Baseball for Distance for Girls—1st, Miss S. Sutton, store; 2nd, Miss R. Beckett, nursery.

THE FARQUHAR OUTING.

Men Over 40, Ready for the 50-yard Dash.

50-Yard Dash for Men Over 40—John Van Leeuwen, nursery.

Relay Race Between Store and Nursery—Won by Store: T. Westwood, G. Sanford, H. Jones, R. Chapman.

Baseball Game—Store and Nursery, five innings, resulted in a tie, 5 to 5. The features of the game was the battery work of Stead and Chapman for the store, and McGoldrick and Johnson for the nursery. The game was a regular Red Sox-Detroit affair.

The soccer football game between the store and nursery was won by the nursery, in a well-played game, 1 to 0. Valuable prizes were awarded in each event.

The committee in charge was J. W. Davy, chairman; V. E. Nilsson, financial secretary; Miss Agnes Keogh, William Bewsher, Frank Stead, Arthur Holland, Edw. Johnson and Patrick Fordham.

OFFICIALS OF GAMES.

Athletic Events—Frank Stead, clerk of course; Edw. Johnson, timer; Alex. P. Dewar, Frank Murray, Wm. Gordon, judges; John Van Leeuwen, start-

er; J. W. Davy, announcer.

Umpires for Baseball Game—James Armstrong and John Traquair.

Referee for Soccer Football Game—Don M. Smith.

Official Scorer—Jack Patten.

Prize Awarder—John K. M. L. Farquhar.

Music—John Cody, piano; William Horton, drums.

Concert and Dancing—Miss H. Mullen, soloist; R. Chapman, Charley Chaplin act; George Sanford, flute selection; Harold Leary and William Green, exhibition toe dancing.

Luncheon was served in a spacious pavilion.

Newport Horticultural Society.

Hundreds of people packed the capacious beach dance hall, Tuesday evening, September 12, for the eighteenth annual ball of the Newport Horticultural Society, which was, as in other years, one of the social events of the local season. Probably the biggest attraction, other than the ball itself, was the presence of Conrad's complete orchestra, with Mr. Henri Conrad leading, to render the latest music for a program of 20 dances. The couples

Rhinebeck Growers.

The Rhinebeck (N. Y.) Violet Growers held their first outing at Pink's Pond on Saturday, September 9. It was a very successful occasion both socially and piscatorially and will be made an annual event.

FIFTEEN YEARS AGO TODAY.

Tom Roland was spending his good money advertising the Lorraine Begonia. He knew how. Now he's rich.

White Golden Gate, "the great prize winner," was the slogan of the American Rose Co. of Washington, D. C. That one brings many pleasant memories—also some sad. Benj. Durfee was a good old scout in his day and not afraid to advertise.

S. L. Watkins, of Grizzly Flats, California, was advertising the best mole and gopher trap ever devised.

A would-be orator was making a speech here in Philadelphia recently and described one of our ash-collecting politicians "as the greatest statesman ever produced." We suggest to him that word "devised" as an improvement. Oh yes, Mr. Editor, I know what you think and I frankly own up to being a slave to grovelling accuracy."

Fifteen years ago today this is what Edwin Lonsdale said about Dreer's.

"Everything attempted there is done with a definite object in view; no trifling experiments being indulged in. No unoccupied spaces are to be seen nor any wasted energy on the unlikely or unprofitable."

And yet for all that 'Gene has the audacity to say that he is no slave to grovelling accuracy or hair-splitting. The greatest hair splitter on earth when it comes to a question of making money.

Harry A. Bunyard was making the welkin ring with—

"Galax, galix, galox!
We have the goods if
You've got the rocks!"

and Harry, thank the Lord, is still in evidence, adding bright cheer to a gloomy world.

And our good friend Harry Bayersdorfer was also young and frisky in those days. This is the way he was capering at us:

"When your stocks look tired and dusty
And the baskets old and rusty
Let us tell you what to do—

Just write to Bayersdorfer
Ask him what he has to offer
I'd do it if I were you."

The old scout is still on deck and while he may girth a little and stick to plain prose he still leads the procession in his line.

Fifteen years ago today Sam Pen-nock fell a victim to the golf fever and there was much grim head shaking among the ancients around the good old Quaker settlement of Lansdowne.

The market report on glass was that it was "still going up." Of course. It always is. It is now. Fifteen years makes a big difference to some things but never to glass. It's like the poor boys' song on the English treadmill.

Always going up!
And never coming down again!!

So you had better hurry up and buy now. G. C. W.

Emulate the pin. Be sharp and to the point, but with head enough to keep you from going too far.

—Boston Traveler.

ARTHUR T. BODDINGTON CO., Inc.,

128 CHAMBERS ST.
NEW YORK CITY

FORCING SPRING FLOWERING SHRUBS.

Can you give me any information as to the proper method of treatment of forcing stock in winter storage.

I am handling a large quantity of Lilacs, Spirea, Azaleas, Skimmias, Rhododendrons, and so forth, for the winter and spring trade. Any information as to the light, air, water, and heat requirements for the successful handling of such stock would be very much appreciated.

In order to have good success in forcing shrubs all plants should have careful culture with that in view for one or two years previous. Lilacs should be potted and stored in a cool place until wanted. For early forcing they should be exposed to a week or more of freezing weather. After being housed they should have a temperature of 70 to 75 degrees. Syringe the wood several times daily and keep up a moist atmosphere. When the buds have grown one inch water freely and raise the temperature five to ten degrees. As soon as flowers begin to show gradually reduce the temperature to harden the blooms. Most other deciduous spring flowering shrubs may be given similar treatment. Azaleas should have the balls dipped in water until the roots are soaked through, as soon as received. Pot with good drainage and keep them close and shaded for a few days, spraying them daily after which place them in a cool, airy house at about 55 to 65 degrees. Do not push them into heat too rapidly and should any leaf growths appear they must be pinched out. After the buds show color, gradually accustom the plants to a cooler atmosphere.

Rhododendrons require

treatment similar to the azaleas. Keep them well syringed but as soon as the buds show color a dryer atmosphere will be essential as excessive dampness is dangerous. Fifty to 55 degrees is sufficient heat. Never allow them to get dry at the roots.

Spiraea (astilbe) clumps should be "heeled in" in frames and covered with litter until required. They require about three months from the time of starting until they are in bloom. After potting, soak them thoroughly and give heat very slowly at the start, gradually increasing, and keep them in full sun.

CATALOGUES RECEIVED.

Weeber & Don, New York.—Bulb Catalogue for 1916. An attractive issue.

Martin Kohankie, Painesville, Ohio. Wholesale Catalogue and Price List of field grown Nursery Stock, for 1916.

Joseph Breck & Sons, Boston, Mass. Autumn Catalogue of High Grade Bulbs. A boldly illustrated and impressive 60-page book, containing also a list of the Breck, Robinson Nursery Co., specialties.

Lord & Burnham Company, New York—"A Passing Glimpse at Some of the Vegetable Houses We Have Built"—an eight-page pamphlet, illustrated with handsome exterior and interior views of greenhouses devoted to vegetable forcing. Very timely on account of the Vegetable Growers' Convention in Chicago.

ADVANCING PRICES—WHY NOT?

I was certainly pleased to read in the paper of others taking up the advance of price. Gentlemen, you will have to raise or quit and now that the time is here when everyone else is making all degrees of advancement, why not get what is coming to you?

The grower who does not raise will be working for the other fellow soon unless he does, and right now. Look about you, pick out the man who got the better prices and either follow his lead, or as a "Safety First" movement go to him and engage a place with him because you will need the job soon and you may as well be prepared as the only thing now is "Preparedness."

Some growers I have met keep two books—a check book and a bank book. If the bank book shows a balance on the right side they think they have made some money but that may be because some one has left them some money and not because of superior ability in growing or salesmanship.

Men! It's up to you and it only requires a little nerve, some common sense and some brains. The team work will come just as soon as the other fellow sees that you are raising. He is only waiting and wishing you would start, so why not show him that you have the confidence in your products to demand the right price and get it. Don't be afraid of the "other fellow." He is human like yourself and you know that you could use a few more dollars, the same as all the rest of us—SO WAKE UP.

Sharon Hill, Pa.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Kirby B. White, Detroit Mich.; First Vice-President, F. W. Bolgiano, Washington, D. C.; Second Vice-President, L. L. Olds, Madison, Wis.; Secretary-Treasurer, C. E. Kendel, Cleveland, O.

Clover for Seed

The Department of Agriculture reports that the acreage of clover for seed increased this year over last 9.1 per cent., equal or greater acreages being reported in all States except New York, in which it suffered a reduction to 97 from drought, and Wisconsin and Minnesota, in which it fell to 90 and 95 per cent. of last year from the effects of winterkill, drought, and the pasturing of the clover meadows. Marked increases are shown in all other important clover seed states of the North Central group, ranging from 105 in Iowa to 125 in Michigan and Nebraska.

The condition of the crop is reported at 84.1 per cent. of a normal, which is 3.8 higher than last year and 4.8 above the ten-year average, the condition being between 80 and 90 per cent. in all important clover seed states. Oregon reports 94, Washington 97, Mississippi 99 and New Jersey 100.

One Week's Imports

Imports at the port of New York, of horticultural material, for the week ending September 8, were recorded as follows:

Bulbs.—Azores, \$345; France, \$134,527; Netherlands, \$9,970; England, \$249; Bermuda, \$204; Japan, \$2,005.

Plants.—England, \$64; Bermuda, \$76.

Red clover seed.—Canada, \$424.

Clover seed.—France, \$4,620; Canada, \$6,143.

Grass seed.—Denmark, \$1,078; England, \$5,108.

Other seeds.—France, \$21,501; Italy, \$1,301; England, \$21,198.

Nitrate of potash.—England, \$35.

Other fertilizers.—England, \$244.

Largest Bulb Shipment

Twelve thousand five hundred cases of Dutch flower bulbs, said to be the largest cargo of its kind ever imported into the United States on one vessel, arrived at New York Sunday, September 17, on the Holland-America freighter Poeldyk from Rotterdam.

French Bulbs, etc.

All French bulbs are cleaning up rapidly in New York. Roman hyacinths are very scarce. Paper whites are firm in price. Candidum lilies, large sizes are all sold. French freesias are in fair demand, stocks small.

Notes

San Francisco, Cal.—A new seed store has been opened at 326-328 Market St., by W. F. Pitts Seed & Nursery Co.

Owensboro, Ky.—The Rapier Grain & Seed Company are erecting a new building to replace the one recently destroyed by fire.

RE BELGIAN SHIPMENTS.

McHutchison & Co. are sending out the following statement:

With regard to fall shipments of Azaleas, etc. from Belgium, we are up against a serious problem; the German authorities will not allow the shipments to leave Belgium unless payment is made to the Belgian growers in advance. This of course is impracticable; money cannot be sent into Belgium, and the British will not pass the shipments through the blockade if payment is made to the Belgians, who of course are under the control of the German military authorities.

Up to June, 1915, the German authorities made no objection to the shipping of these goods. The British "Order in Council" went into effect about that time, and British permits were given on the understanding that payment be deposited in a bank in Great Britain to the credit of the shipper—not to be withdrawn without British consent. The German authorities evidently agreed to these conditions, as after much negotiation with the Belgian growers they likewise gave permits to ship, and shipments have come forward since on that basis.

As the strong censorship in Belgium prevents information coming from there, we did not get the exact text of the former agreement made; but from information which reached us in devious ways, we understood the British would release, through Belgian banks, part of the funds accumulated in the Banque Belge pour l'Etranger, London. Evidently not enough of the funds were released to satisfy the Germans, and that is likely the reason why they now stop shipments.

We surmounted all previous obstacles, got shipments through from Belgium each fall and spring since the war began, but the German authorities probably acted with deliberation in this case and did not allow suffi-

cient time for pressure to be brought to bear upon them to change or even modify their orders. Still, the situation was almost as bad last fall—yet shipments came, late we admit, but we shipped all our orders, so we are not without hope that this fall's shipments will yet come, though we feel you should know the situation.

The United States State Department acted energetically and placed the matter by cable directly before the German authorities in Belgium. The German and British Embassies are both lending assistance. Our Holland connections are in touch with Berlin and London, and the strong Syndicate of Belgian growers is negotiating direct with the German military authorities in Belgium, so you will see that every agency is working to the end that these shipments will come this season.

If shipments can be made, you will get yours—more we cannot promise. We even offered to advance payments through Holland for the shipments, then pay a second time through London, but the British authorities refused to allow the shipments to pass the blockade if payment had been made in advance for them.

Importers and others interested in getting into the United States the azaleas and other plants being held up through the action of Great Britain and Germany in refusing export permits on these from Belgium, are not dealing with possibilities, and are going right ahead in their efforts to prevail upon the Governments named, through our own State Department, to reverse their decisions. The whole story is aptly told by William F. Gude in a recent letter addressed to the Secretary of State.

WESTERLY FLORIST MISSING.

Efforts are being made by the police of New York city to locate Lewis P. Rankin, a Westerly, R. I. florist, who has been absent from his home and business since Tuesday morning, Sept. 12. Much anxiety has been felt by the relatives of Mr. Rankin since last Wednesday, when he was expected home, but the facts were suppressed from the public in hopes that his whereabouts might become known.

Mr. Rankin left Westerly on Tuesday morning for New York city. That afternoon he was in the shop of the S. S. Pennock-Meehan Co. on West 28th street. From the time he left there to the present he has not been seen or heard from. It is feared he has either met with some accident or foul play while in the city. Any one who has seen or heard of him since September 12 should communicate at once with the family.

NEWS ITEMS FROM EVERYWHERE

CHICAGO.

The first meeting of the creditors of David D. Johnson, bankrupt, will be held at 53 West Jackson Boulevard, Chicago, on September 26.

Dahhas have been about a half crop this fall, just when they would have sold, as one wholesaler stated this week. There are others who count the cut as much less.

The question heard most often in the market these days is "Have you any Russell roses." Allie Zech says this is the result of the stock being reduced one-half and the demand doubled.

J. Michaelson, of E. C. Amling Co., has just returned from the East where his special mission was to see the violet situation. He expects shipping to Chicago will be in full swing about the second week in October.

P. M. Koster of Koster & Co., Bos-Koop, Holland, has many interesting things to tell of conditions in his country at this time. Among other things he says it takes twice as long to reach this country as formerly.

Albert Cole backs up his contention that florists take their vacations too early, by citing the present season, when florists have little to do on account of light cuts of all kinds of stock and earlier in the summer when there was need of all the help to care for the trade. Paul Klingsporn, manager of the Chicago Flower Growers' Association takes his vacation last.

Retail florists are reporting the fall weddings as quite a feature in the opening of the season. If the quantity of flowers used at these events is limited by the higher prices, it causes the retailer no disappointment. With lily of the valley at five and six dollars a few less will answer in the bride's bouquet. One wholesaler suggests swainsona again while lily of the valley is scarce.

A light frost visited Chicago and vicinity on the night of Friday, Sept. 15, when the wind was from the north. Considerable anxiety was felt by florists and plantmen and work of covering up lasted well into the night. The damage was most in low places. Saturday night a south wind raised the temperature 15 degrees and danger was thought to be over when it veered again to the northwest and a severe frost occurred Sunday night. Reports from growers who ship their stock into this market tend to show that little outdoor stuff remains. Temperature was recorded as low as 26 degrees.

The Wm. J. Smyth store at Michigan avenue and 31st street is now free from the workmen who have had things their way since the last of June. With the renewal of the lease for five years at an advanced rental, the changes in the store were a consideration. The outer walls were removed and plate glass substituted, affording a most sightly display of all the attractive novelties in plants, vases from a tiny one to those 7 ft. tall,

accessories of every description and the novel colored wares now so popular for holding flowers. On Michigan avenue there is a 75 ft. unbroken stretch of glass and on 31st street 35 ft., with entrances at corner and at each extremity. The immense 75 ft. awning on the south is raised and lowered by a device easily handled by one man. The attractiveness of the interior is greatly enhanced by the windows which are 12 ft. high. The decorations are in white. Mr. Smyth has been in the retail flower business in Chicago many years and is known for his good taste as well as business ability and his improvements of the store have been watched with much interest.

WASHINGTON.

J. J. Bickings, recently a victim of a bad accident, is now at his home but unable as yet to do active work. Mr. Bickings' wagon was struck by a car, throwing him out and into the wheels of another wagon.

William, Adolph and Ernest Gude, accompanied by George W. Hess, Edward S. Schmid and Justice Gould, last week motored to White Marsh, Md., where they were the guests of Richard Vincent, Jr.

William Marche is receiving congratulations upon the attractiveness of his remodelled store. The florist has made the best of use of every inch of space, as he puts it, and he is to be commended upon the fine showing he now makes.

A number of the florists are practicing several nights each week as members of the Florists' Club bowling team. Those who will probably play with the team are George C. and Arthur Shaffer, Otto Schoeps, Edward Niedomanski, Milton Redman and George Gouldman.

A big showing of flowers, fruits and vegetables is expected for the Brookland Brotherhood show, October 3 and 4. David Oertly and Seabury G. Quinn are chairman and secretary, respectively, of the show committee. The judging committees will be composed of men from the Department, the Maryland Agricultural College, and it is expected that local florists will also be invited.

CINCINNATI

W. R. Murphy returned last Saturday from his out-of-town business trip.

W. A. Whitteher, of the J. M. McCullough's Sons Co., left last week on an extended business trip.

Mr. Chisholm, formerly with Bertermann Bros., Indianapolis, is now with the E. H. Hill Floral Co. store in this city, taking the place of Mr. Koob.

PHILADELPHIA.

M. Rice & Co. will move shortly to their new location at 1220 Spring Garden street.

The Joseph Heacock Co. have reopened their store on Ranstead, near 16th street.

NEW YORK.

Frank H. Traendly and family have returned to Brooklyn from Rowayton, Conn., where they have been summering.

The fall meeting of the directors of the Cut Flower Exchange will be held at Queensboro Plaza, L. I. City on Saturday afternoon, October 7.

T. A. Havemeyer has returned to town and flower show business should "hum" from now on. Mr. Havemeyer this year is chairman of the Flower Show committee.

C. H. Totty started on Wednesday on an automobile trip up the Hudson visiting his many customers among the private estates, etc. He will be gone about a week.

J. A. Peterson and wife of Cincinnati, O., passed through the city in their touring car last Friday on business and pleasure combined, registering 1200 miles since they started out.

The enormous amount of bulbs coming in from Holland has so congested the local mediums of disposal that the MacNiff Horticultural Company have had to change the hour for their sales from 11 to 10 A. M.

W. C. Van Name, manufacturer of florists' letters, etc., in Brooklyn, had the misfortune to lose his left eye, having been struck by a block from a circular saw running at 5,000 revolutions per minute. He has been four weeks in the hospital. The lens has been removed, but the eye is still in bad shape and probably will be for some time.

Attention is called to the Fifth Annual Public Exhibition of Living Aquarium Fish to be held in the Brooklyn Museum of the Brooklyn Institute of Arts and Sciences, Eastern Parkway and Washington avenue, Brooklyn, on September 21, 7.30 to 9.45 P. M.; September 22-23, 9 A. M. to 6 P. M.; September 24, 2 to 6 P. M. Chas. Tricker, manager of William Tricker, water lily specialist, will make an elaborate display of aquatic plants.

BOSTON.

The Florists Bowling Association will have a 10-team league this coming season and will begin their season Oct. 19 at the Arch street alleys.

M. H. Norton made his first trip to the business district on Wednesday of this week, after his long illness. He looked fine and received joyful congratulations on his recovery.

Thomas Roland has gone heavily into ericas this season and has an unprecedentedly fine stock of the beautiful King Edward, cupressina and other choice varieties in addition to the great holiday standby melanthra.

James F. M. Farquhar and Mrs. Farquhar have gone to spend the winter in Mandeville, Florida, sailing from New York on the Sixiola of the United Fruit Company's fleet. It is hoped that the tropical air will greatly improve Mr. Farquhar's health.

Obituary

Charles E. Chenery.

Charles E. Chenery, one of the oldest market gardeners in Massachusetts, died at his home, 52 Washington St., Belmont, Thursday, Sept. 14th, at the age of 75 years.

James Broadfoot.

James Broadfoot, for 45 years gardener for the late S. H. Hammond, Geneva, N. Y., died on September 3, aged 69 years. His son Robert is superintendent of Glenwood Cemetery, Geneva.

Arthur J. Leary.

Arthur J. Leary, head gardener on the estate of Mrs. John Nicholas Brown, was stricken with a hemorrhage at his home, Wellington Ave., Newport, R. I., on Tuesday, September 12th, and died within an hour. He was unmarried.

John Patterson.

John Patterson, a florist of Ashton, R. I., died on September 16, as the result of a shock sustained a week previous. He was 72 years old and a native of Stockport, England. Two sons, Herbert and Robert, of Ashton, survive him.

William J. Snow.

William J. Snow, for many years a successful florist of Waterbury, Conn., died in Milford, Conn., on September 13. Mr. Snow's establishment was burned out some years ago and he being in poor health did not resume, but went to Milford hoping to be benefited by the sea air.

Mrs. John H. Johnson.

We regret to record the death of Mrs. John H. Johnson, formerly Miss Rachael Rebstock, well-known and respected for many years in the florist trade of Buffalo, N. Y., sister of J. H. Rebstock, also prominent in the trade years ago. Mrs. Johnson died in the Women's hospital on September 11 after a long illness.

William Langstaff.

William Langstaff, an old-time gardener and former member of the S. A. F., died at his home in Indianapolis, Ind., aged 81 years. For many years Mr. Langstaff was superintendent at the Institution for the deaf. He was the first president of the Indiana State Florists' Association. Personally he was companionable and blithesome and his friends were many.

Mrs. Charles A. Taylor.

Mrs. Charles A. Taylor, eldest daughter of Malcolm MacRorie of South Orange, N. J., and sister of Dan MacRorie of San Francisco, died suddenly from heart disease at her home in Orange, N. J., on September 7. Mrs. Taylor was born in Comrie Perthshire, Scotland, September 20, 1871. She was for five years a teacher in the Orange public schools. Her husband, two sons, Malcolm M. and Edward A. Taylor; her parents, Mr. and Mrs. Malcolm MacRorie survive. She leaves also two sisters, Mrs. Thomas M. Wright of Canada and Miss Jeanette MacRorie of South Orange, and two brothers, John MacRorie of West Orange and Daniel MacRorie of San Francisco.

THE LATE JACKSON DAWSON.

Dear Mr. Editor:—I have only just read in your issue of August 12th of the death of Jackson Dawson, and if I may be allowed to do so, I should like to add my few poor words as a tribute to his memory. As you are aware I have been visiting the States for over 20 years, and my earliest recollection, and my latest recollection has been the same, the deep feeling of friendship for the man, and my intense admiration of his ability. I never met a better friend than Jackson Dawson and I never met anybody with such a brain for horticulture in its true sense, and I for one shall sadly miss his cheery presence and wonderful enthusiasm.

Yours sincerely,
F. GOMER WATERER.

Bareshot, England, Sept. 4.

LET US SUGGEST to you during the
hot months of the year

BEAUTIES

\$1.00—\$3.00 dozen

Grown from young plants for summer blooming, is an item we can recommend to you. The flowers are of a fair size, good color and clean foliage. If you cannot get them elsewhere, try us.

Flower Market Reports

Business in the wholesale
BOSTON district is decidedly dull.

Not much stock is coming in, except roses, which are now on the rapid increase. Damp nights have had a deleterious influence on the asters and while they look fair when shipped they quickly discolor when taken from the boxes. Carnations are coming forward rather slowly. White flowers are enjoying the best demand, other colors hanging fire, except the deep purple asters, which are selling all right if in good condition. Gladioli are withdrawing slowly but surely from the front.

Things are quite satisfactory. Some days good and some days dull. Demand has fallen to white roses, lily of the valley, orchids and wedding flowers. Roses were more plentiful for a few days but the cool weather has again shortened them up. Chrysanthemums of Golden Glow variety are coming in and have had a ready sale. There is plenty of outdoor material, especially asters, gladioli, marigolds and other stuff. Lilies have been in good supply and these, too, have shared in the demand.

The market is tighter
CHICAGO now than at any other time this fall and quite possibly than at any other time in its history. Roses are off crop, carnations are late, asters about gone, chrysanthemums very slow getting started, and gladioli in many places killed by Sunday night's frost. No one cause can be given for all those things but the hot and dry summer is responsible for most of them. The counters and iceboxes present a forlorn appearance for almost as soon as boxes are emptied there are plenty waiting to secure stock for booked orders. Killarney roses are scarce and not very good, so they are not of much account in tiding over the present shortage on Mrs. Russell, which till now have been in very fair supply. American Beauties also are extremely scarce in all lengths. Asters are very near to the end and the growers of carnations have nothing to fear from them. A very few white chrysanthemums are added to the Golden Glow, but the big fall flowers are very late this year. Of miscellaneous stock there is none.

The first frost of the
CINCINNATI season came last Saturday morning. It was a light one and did no damage. The market is well supplied. Because of several large openings and the consequent demand business is rather brisk this week. Roses are in a fair supply. Carnations have come along nicely during the past fortnight until the cut now is steady and is large enough for all present wants. Asters are still plentiful. The same is true of gladioli, but these are no longer very good. Lilies are in a supply that is both large and good. Some excellent

The Queen Mary

Iridescent Corsage Shield

This season is now fast approaching and corsage bouquets will be all the rage, and every live florist should be prepared in advance with a good supply of our wonderful costume protector. Light, graceful, inexpensive. Appeals to every lady of refined taste. Waterproof colors: violet, white, pink, orchid, Nile green.

Per doz. \$2.25, per gross \$24.00

SILK VELOUR

dahlias are coming in. The cut of cosmos is large. A few yellow chrysanthemums may be had.

Stock is very scarce
NEW YORK but business is exceedingly quiet and prices exasperatingly low on most things. A cold snap following a storm has spoiled much of the outdoor stock. Gladioli and asters are gradually disappearing. Lilies, both longiflorum and speciosum are more in demand and the best quality roses are selling well, while, strange to say, lily of the valley is accumulating and does not command the prices recently prevailing. Cattleyas are a good thing to have at present if of fine quality. Chrysanthemums are gradually making their presence known. Golden Glow is in the lead yet, but there are also a few large blooms of pink and white and they sell quickly. Gardenias are good and in sufficient supply for the demand.

Vacations are
PHILADELPHIA nearly over and most of the active workers are back with their sleeves rolled up and fire in their eyes—which being interpreted means "Now, then, for more business and better business." That's the spirit. Nothing great was ever accomplished without enthusiasm. Last week trading was a bit more brisk and everything cleaned up fairly well. Roses are now more plentiful and the carnation is a little more in evidence. Asters and gladioli are still big features although we must expect them to gradually give way from now on. The dahlias are now arriving in quantity and come in handy for decorative work where nothing better can be had at a low price. Cattleyas are still scarce. There are a few other orchids such as oncidiums and cypripediums to be seen but not enough to make any stir in the market. Lilies are more plentiful.

Flower Market Reports

(Continued from page 41)

ST. LOUIS The condition of the local market remains about the same as a week ago. The cooler weather at the end of the week did brighten up things a little with the retailers, and a steady improvement is looked for from now on. There is no scarcity in stock; plenty of asters at any price and gladioli have sold cheap. Roses are small and carnations few and poor. Smilax is scarce.

Stock is less plentiful but there is enough to go around. Orchids continue to bring as high as \$9 a dozen and there is a better demand for these and for American Beauty roses, which are now quite good. There are more carnations coming in, and dahlias are more plentiful, but asters are fast waning and good ones are scarce. Lily of the valley continues very scarce. There is a better sale of cut flowers generally reported.

Bulbs of all descriptions. Write for prices.
NEW YORK BRANCH, 8-10 Bridge St.

Mr. B. Progressive, Florist,
Everywhere, U. S. A.

Dear Sir: It will be a decided advantage as regards prices and quality to place your order with us.

Soliciting your order through this ad cuts down the overhead selling expenses and you positively get lower prices and better quality. Our terms are liberal and are a guarantee that you get a square deal, all bulbs guaranteed true to name or money refunded.

Write us and upon request we will mail you our booklet giving prices f. o. b. New York or Chicago, and we also cheerfully furnish you with any information that may be desired. Those of our friends who will mail us a list of their requirements will find it has paid them to do so.

Awaiting to hear from you at your pleasure, we remain,
Yours very truly,

Westerbeek & Kott,
Sassenheim, Holland

HARDY CHRYSANTHEMUMS

A Paper Read Before the Lawrence Garden Club, Lawrence, N. Y., by
Richard Vincent, Jr.

I am here today to talk on "The Hardy Chrysanthemum, the Queen of Late Autumn," for we find her reigning supreme when the early wintry blast has killed almost all other flowers. And the chrysanthemum is practically the only thing blooming to brighten up our beds and shrubbery, and the uses that it can be put to are almost unlimited. It is a flower that can be adapted to almost any locality and one easy of propagation and growth, and on this account is taking with the masses wherever fall adornment and beauty is required and people are beginning to find out there are varieties that are hardy and vigorous enough to withstand almost the severest of our winters, while there are others that are only suitable for conservatory or greenhouse growing. What varieties do best in your particular locality is a problem that you can test out far better than an outsider can tell you.

The hardy chrysanthemum, as the writer knew it, was an old-time favorite. The first mention that I can find of it was about the year 300, and with myself from boyhood up I have always liked it. Well do I remember the clumps as a child in my father's garden. Then came a craze and the large-flowered ones were "all the go," and the old-time pompons were practically forgotten.

Somewhere about fifteen years ago I took a notion that the discarded hardy chrysanthemums were entitled to a front place among our autumn flowers, and set about accomplishing the same, but was told by a number that I was a crank; that pompon chrysanthemums were a thing of the past, and there was no place for them. I persisted in my efforts to reintroduce them and results show whether I was right or not.

Nearly every florist the country over now uses them, and very few chrysanthemum decorations are thought complete without them whenever they can be obtained. When I had made up my mind to introduce them I found that there were very few varieties obtainable—a poor collection. But having set my mind on having a good collection we got all the varieties that were to be found anywhere. We crossed and recrossed the varieties, raising a

large number of seedlings—thousands of them—for several years, till we got up one of the best collections that up to that time the world had ever known. As soon as we had a good collection we commenced to advertise some and people woke up to their possibilities and soon hardy chrysanthemums were everywhere.

One of our first exhibitions was in the Macy building, New York City, and gardeners and visitors were amazed at their beauty. I believe that the next year we made another exhibit in New York where the Chrysanthemum Society of America held its show and meeting. Up to that time the American Society had not recognized hardy or single chrysanthemums. On the floor at that meeting I demanded recognition, and it was granted and from that time premium lists were not considered complete unless they contained classes for pompons and singles.

To have the finest of flowers the florists have whole greenhouses planted with them, as it is found that for extra fine work the field grown are often damaged by rains or early frosts and that while standing in the beds, etc. they will look fairly well, but when gathered they do not compare favorably with those grown inside for cut flowers, or design work.

Mr. Vincent then gave full details of propagation by cuttings, propagation by division, propagation by seed, suitable soils, manuring, insect pests,

diseases, remedies, planting in garden and replacing the beds of other flowers that have finished their season, potting up and setting in cool shady frames to hold back for house and conservatories, etc., also lists of varieties for early blooming, medium and late blooming, etc., and selected varieties for conservatories.

Mr. Vincent closed with the following original ode to the hardy chrysanthemum:

Queen of the Autumn I greet thee,
It is a joy sublime to meet thee,
Wonderful flowers of gold, pink and white,
They thrill me with memories bright.

Centuries old and yet with youth eternal,
A heart of gold and character supernal,
With open arms and smiling blooms to greet us.

Why do we love thee, we of these later days,
We are fascinated as we gaze upon thy face;
Surely some memory dear of the past enralls us.

Back to our father's garden memories call,
And as we journey, lovingly our thoughts grow fonder,
T'was father's flower and he loved it well,
We see its beauty, we love it as we ponder.

So Autumn Queen, we ever greet thee,
Thou art a flower to our memory most dear;
Our father's flower proud are we all to meet thee,
Proud of thy triumphs o'er autumn blasts.

And so with father's name we will link thee ever,
Father and Hardy 'Mums with all the years gone by;
And naught in all the years to come can hide thee, nevermore;
For thy love and beauty will stay with our memories evermore.

Ardisias are scarce and indications point to a very insufficient supply of this unexcelled Christmas berry-bearing plant this year.

Horticulture, with its clean-cut articles, deserves to be in the office of every florist. I enjoy reading same, and look for it each week and if not delivered would miss is very much.

I wish it all success.

A. L. MILLER,

Jamaica, N. Y.

A HOME GARDEN.

View in the Grounds of Wm. A. Clarke, of Pittsburgh Cut Flower Co., at Sheridan, Pa.

GREENKEEPING NOTES

Clovers are undesirable on putting greens, so take care that you do not manure the greens with manure containing phosphates in excess. A green apparently without clovers will often produce a large crop of clovers when manured with manures containing phosphates in excess.

Artificial manures do not act equally upon all soils and usually give better results on heavy soils. In any case, but particularly on light soils, they are not to be relied upon alone. Light soils are usually deficient in Humus and artificial manures add no Humus to the soil. Humus in the soil is a very great necessity for the growth of healthy grass and strong artificial manures are apt to destroy it especially in light soil. Humus should be obtained from farm yard manure, Rex Humus, or from a good compost containing plenty of either of these two sources.

Do not use farm fertilizers for growing grass unless you are sure of what you are doing. While very good for their intended purpose they are apt to be very ill balanced for use on grass. Farm yard manure made in a covered water-tight box or pit is half again as valuable as manure made in the open. If placed in uncovered heaps it loses a large percentage of ammonia by volatilization. If necessary to keep it in the open it should be covered with two or three inches of soil. The soil will fix and retain the ammonia.

Fall is the best time to use ground limestone.

Very frequently freshly dug land and imported soil will produce a strong crop of weeds, both annual and perennial. How the weed seeds get into the soil, and how long they will retain their germinating power, is a debatable matter into which it is not necessary for us to enter. Darwin tells us that seeds which germinate freely have been found in the little chamber at the end of a worm hole, at a depth of 8 feet. In his opinion these seeds were taken down the holes by the worms, with the object of lining the little chamber in which they winter in a dormant condition, so as to prevent their skins, through which they breathe, from coming into contact with the cold damp soil.

There are a multitude of different ways in which weed seeds get into the ground, and the only way of making a good lawn upon foul ground is to allow it to lay fallow, and clean it by frequently disturbing the surface with a hoe for a small plot, and a harrow for a large area.

The work should be done during still, dry, bright weather, either in the fall or in the spring.

To free a lawn from tap-rooted weeds, divide the lawn into strips about 3 feet wide, take a basket to hold the weeds and a border fork with four flat prongs. Now, to remove the weed successfully, it is necessary to guess the depth of the root. Well-

BAILEY'S NEW STANDARD Cyclopedia of Horticulture

Six large quarto volumes.
More than 3,600 pages. 24
exquisite full-page color
plates. 96 full-page sepia
halftones and more than
4,000 text engravings. 500
collaborators. Approx-
imately 4,000 genera, 15,000
species and 40,000 plant
names.

The new Standard Cyclopedia of Horticulture has been freshly written in the light of the most recent research and experience. It is not merely an ordinary revision or corrected edition of the old Cyclopedia, but it is a new work from start to finish with enlarged boundaries geographically and practically; it supersedes and displaces all previous editions or reprints of every kind whatsoever. It is both an Encyclopedia and a Manual, for with the aid of its Synopsis and Key, amateur and professional alike may quickly identify any plant, shrub or fruit contained within the set, and then receive expert instructions for its cultivation. Price \$6.00 per volume. Four volumes have now been issued and the others will follow in succession. Order from

grown dandelions and docks will go down over a foot, the smaller ones and the rib grass about 6 inches. In the first case, force the fork into the turf as deep as it will go, and as far from the weed as the length of the prongs. By depressing the handle of the fork the turf will be forced up like a mole hill. If the distance has been guessed correctly it will crack on either side of the weed, which can then be removed easily. In the case of the smaller weeds, force the fork into the soil about 6 inches from the weed and about 6 inches deep, and go on as before. After a little practice it is possible to take out weed after weed without breaking or leaving behind any of the root, which if left might grow again. It is best to weed in this fashion when the soil is damp. Before rolling down the "mole hills" drop a pinch of seed into the hole left by the weed. Forking up the turf in this way tends to improve it. Removing the crown of a tap-rooted weed with a knife does more harm than good, as in most cases the weed will throw out several crowns to replace the one cut off. Always burn weeds, then you know for certain that they cannot give any more trouble.—*The Golf Course.*

FLOWERS, ANIMALS AND MEN

The organization of a society for the preservation of wild flowers seems the apt expression of an age which has determined to regard nothing living as alien to it. We have reached a period of human history in which man finally recognizes his oneness with the great tribe of life and is willing to receive all growing and sentient things into his protection and care. It is from this standpoint that he deplores the unregulated slaughter of the seal, the commercialized pursuit of the whale, the persecution of the American bison, the extermination of the dodo, the great auk, the solitaire,

the Eskimo curlew, the Labrador duck and the Carolina parakeet. The cry already goes up that the American flamingo, the scarlet ibis, the upland plover, the egret, sage grouse, heath hen and at least twenty other beautiful American birds are in danger of extinction. And now comes the turn of the flowers, for the arbutus or "mayflower" is disappearing, the mossassin flower shrinks away from sight, and unless the new society can prevent it we shall soon see the last of the cardinal flower, the Christmas fern, the partridge berry and the white pond lily.

If animals can have their rescue leagues and birds their Audubon societies, why should not "The Wild Flower Preservation Society of America" campaign against "the vandalistic plucking of flowers"? All these organizations deserve encouragement and support. It is impossible to estimate adequately the result of their work in terms of human uplift. We need more rather than less of it. But if a "higher intelligence" from some more favored planet were to visit us just now his commendation of that work would be tempered by reflections. He would notice that we were in the midst of a great war, and would observe with surprise that we were extending to the creatures below us the protection which we refuse to the members of our own kind. What we offer to the gaze of such a visitor is the spectacle of the whole resources of our science devoted to the slaughter of our fellow men. His report back to Mars or to some world in the parish of Arcturus would infallibly contain the declaration that we were at cross purposes with ourselves and had not yet risen to the rank of reasonable beings. And that report might very well conclude with the statement that when our race puts into the work of preventing men from killing and mutilating each other only half of the organized energy it now devotes to seeing that animals are not starved, that organ grinders are kind to their monkeys, and that hot plates are not used for the training of dancing bears, he will be the first to acknowledge that we have squared our practices with our sentiments.—*Boston Herald.*

IT is totally unlike other catalogs of private green-houses. It tells more in a short space. It shows more of the things that you have always wanted to know about.

Every subject illustrated, is a thoroughly practical one. There are none of the over ornamented, fussy-feather kind of houses that look attractive, but are sad failures when it becomes to growing.

Each page is surrounded with a delightfully restful border of greenery, which in combination with the

high excellence of the printing, makes a catalog of such striking beauty, that in the hands of your employer, it is bound to arouse a lively interest.

Send us the name and address of both your employer and yourself and we will promptly send you both a catalog. Or we will send you two, so you can when favorable opportunity offers, pass one along to your employer.

It may be just the entering wedge to get the houses you have so long wanted.

Let us know which way you prefer.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

"If vain our toil, we ought to blame the culture, not the soil."—*Pope*.

Cyclamens

Stock in 3½ or 4 inch pots in good growing order at this date should be kept moving, whether the plants will come in for Christmas or not. Only by taking good care of them now can you get pay for the months of trouble you had with them. While it would be folly to place backward plants of cyclamen in a warm house to hurry things up a bit one can accomplish a good deal by removing any plants that are not far enough advanced to a place where from now on they will have full sunlight and be kept a little on the dry side. While you grow the plants on a moist atmosphere is required in order to produce good foliage and stems, but this isn't so necessary when the plants are to set buds, and are expected to bloom.

Care of Carnations

Now that the days are becoming shorter syringing should be cut down to once a day, early in the morning, and even then they sometimes will have to be shaken to remove the surplus moisture so that they do not remain wet over night. When syringing, special attention should be given to the ends of the benches where pipes may be nearer the plants, and dry walks should be damped down every day. If a general syringing is not given every day the plants should at least get a spraying through the bottom from every other walk. It must be done early in the morning, so that they will dry off before night. Disbudding is another thing which must be done at the right time. When the plants are growing fast, they should be gone over at least once a week. You can apply a top dressing of loam and cow manure in equal parts, putting it on about half an inch thick. Apply a light dusting of bone flour, about 100 pounds to 2,000 square feet of bench surface. Keep the soil in the benches in as even state of moisture as possible.

Lorraine Begonias

Ventilate carefully as we are running into the shorter days now. If they have been grown along in a moderately warm house give them one now where a minimum of 50 degrees is kept. Stand them well up to the light. It is a good plan to suspend a number over the paths by wire hangers. Use care in watering and give liquid stimulants occasionally. Some of these are now sufficiently well bloomed to be quite salable. Now is a good time to do what tying is necessary. Some use three or four small stakes and surround the plants with a strand of silkline. Others prefer one stake in the center of the plant and the branches supported by a tie of this material. This should be done soon, so that the plant has time to assume a natural appearance.

Orchids

Shading can be reduced now as they will be better for all the light they can get. All such orchids as cattleyas, laelias, celogynes, odontoglossums, dendrobiums, miltonias, etc., can stand full sun by the middle of October. Give ventilation whenever possible as they all enjoy plenty of fresh air, outside those of the East Indian and tropical kinds. Make it a point to change the air at least once a day. Now when we are liable to have spells of dark and rainy weather we shall have to be very careful about watering orchids. A good rule to follow in whatever watering you do is to let it be done fairly early in the morning, which will give them a chance to dry out some before the night. From this out overhead syringing should be gradually discontinued. Where syringing is carried on, let it be done in the morning of bright days and only in the form of a fine misty spray. Orchids should be given a good cleaning at least once a month.

Peonies

The best time for planting peonies is September and October as soon as the temperature is cool enough for the plants to be sent without damage. Plant at least four feet apart each way and not too near voracious shrubs, the roots of which exhaust the soil. If the soil be poor, it should be copiously mixed with rich manure. Cow manure is the best for all light soils. Manure must not come into direct contact with roots. The plants should be inserted with the crowns or dormant buds about three inches below the surface and should then be well watered if it is at all dry. The peonies are perfectly hardy and so robust that they grow well in any ordinary garden soil. However, they furnish the best flowers when planted in good, deep-trenched ground, and in situations where the soil retains a moderate degree of dampness. Where old clumps are to be divided don't cut them up into too small pieces. Leave at least five or six good eyes to each clump. Grow six or eight of the best varieties and let the colors be white, light and dark pink and one good red.

Reminders

Pot on schizanthus before they become pot bound and make successional sowing for spring flowering.

Prick out pansies, violas, double daisies, myosotis, and other biennials or perennials for spring sales.

Give geraniums abundant ventilation and all the sunlight possible and water only when showing signs of dryness.

Now is the time to lift, divide and replant almost all kinds of hardy perennials. The earlier the work is now done the better will be the results for next year.

That is very cheering news which comes from Chicago of the appearance in that market of azaleas commercially grown in our own country. It is, of course, too early to go to the extent of declaring the enterprise to be an unquestioned success. We do not yet know how well the American grown stock will respond to the usual fore-

ing methods or how the prices of the plants laid down at the florists' door will compare with the cost of the European material which has been our sole reliance hitherto. But we confidently expect to see the stock from California give a good account of itself and should it so turn out we shall regard it as one of the best things that has happened in the horticultural world for a long time. The intolerable conditions which the trade has had to face this fall in connection with the importation of Belgian plants make this new proposition all the more timely and welcome. With all our heart we hope it may turn out to be an unqualified success.

Dahlias and dahlias

Criticism of trade paper flower price quotations is a common occurrence. They are quoted "too high" or "too low" according to the critic's view point, but usually "there's a reason" and the reporter has exceptional opportunity to get the facts. In our saunter about the wholesale markets in New York this week we saw dahlias sold for fifty cents a hundred and we saw dahlias sold for seventy-five cents a dozen—a slight difference of twelve hundred per cent in market value! In each instance too, the stock brought its full value. The man who sent in the fifty-cents-a-hundred kind especially got all the stuff was worth. Slipshod culture and rough handling will make fifty cent quality out of four or six dollar quality in double quick time. When will growers learn to handle and pack their product, as though each flower was the only one of its kind? If you find your shipments are relegated to the rubbish class, you will not have to go far in the wholesale market, if you are an observant man, to learn "the why and wherefore" of some things.

The flower show; its use and its abuse

The "sky line", so to speak, of a flower show is a much stronger factor than exhibition managers seem to realize, in fixing its impression as a whole upon the visitor. We were much pleased and duly impressed, on entering the show room where the American Dahlia Society staged its annual exhibition, in New York this week, by the general arrangement and the evident purpose to break away from the monotonous flatness of the typical dahlia show. The central object was a slender vase design some nine feet tall deftly fashioned by the one New York retail florist who chose to represent his department of the floral industry by an exhibition of his handiwork. It was a very creditable piece of designing and as such worthy of commendation but the particular point we here wish to emphasize was its value as giving grace and character to the show as a whole, in conjunction with the several vases of long-stemmed blooms which helped to carry the eye above the common level of the ranks of single blooms. Dahlia shows, generally, have been largely monopolized by dealers who are there to take orders for named varieties for garden planting in the coming season and have not the slightest personal interest in the exploitation of the dahlia as a florists' cut flower or in the show itself beyond its use to them as a convenient and profitable means of displaying their samples as a sort of supplement to their catalogue lists. While this may be all right in its way, yet we must not lose sight of the fact that a public flower exhibition has other functions than to serve merely as a sample room for the dealers in dahlia roots.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur C. Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

The Night Temperature

From now on careful attention must be paid to the night temperature in the houses if the roses are to do at all well. The way the nights have been here in southern New England the last week or two it is necessary to have heat every night right up to about eight o'clock in the morning. From 62 to 64 at night will be right, and the houses should not be run any cooler unless there are special reasons for so doing, as the days are still warm—hot in most cases—and if the houses were run a little cooler there would be too great a difference between the day and the night temperature, for roses should have a steady temperature as far as possible, with about 18 degrees difference between the day and night. This refers to clear days. On cloudy days it will be necessary to run the houses only about 4 degrees warmer than the night temperature. By a cloudy day we mean a day with no sun at all, and perhaps a little fog or rain. It will be best to carry air right along especially after syringing or watering. We always try to carry air until the temperature drops to 26 outside when the houses would first be closed up. Of course there may be rainy, or windy nights when it would be best to have the vents closed, as the air outside is worse than the air inside.

Repairs

Jack Frost is already nosing around nights and the bars on the houses will soon be wet all the time so that it will be very difficult to apply paint and putty. It will therefore be well to go over the place and see that all broken glass is repaired before the weather gets too cold. Repairing broken glass is not a very pleasant job at best but cold weather makes it much worse. There may also be other repairs that will have to be made. Look for loose bars in the old wooden houses and for decayed posts where no iron was used. The backs of the old greenhouses can also be made a great deal warmer by applying tar paper, which should be a good grade. We do not always like to do this, but in a pinch it has to do and then when we walk past the greenhouse we look the other way. Tar paper will mend an old leaky wall a good deal so that it will go two or three years before new boards have to be put on or the wall built up of concrete. The coal saved will pay for the paper the first year. While looking for broken glass see that all panes that may have slid down are replaced and nail properly. If time will permit it would pay to take them out and put new putty under them and after this treatment they will stay put for a while.

Watering

Watering will have to be done very carefully from now on. See that the leaves on the plants are not touched by the water, especially if it should be necessary to water on a cloudy day. By holding the nozzle close to the bench the water will strike the soil only and the foliage will remain dry. The plants should also be allowed to dry out fairly well between waterings so as to encourage the roots. If these get all they want right

around the plant they will spread very slowly. But if they have to get out and hustle they will soon spread through the soil in search of water, food, etc. When watering be careful to see that the poor plants that may be in the bench here and there are not overwatered. This can be avoided by going through the houses with a little lime and marking the cut-off plants or poor plants by scattering a little lime around them. With this system there will be no excuse for anyone to lose any plants that were all cut off and died because of too much water. By careful cutting some growth can always be left and if this is done there will be little danger from too much water. In the houses that were planted quite late it will not be safe to water the whole bench, but the circles around the plants should be increased as the roots spread out.

Keep the Soil Rough

As soon as the soil in the benches breaks up so that it will be all fine and not take water as it should, it should be given a light mulch of cow manure and good sod. There should not be too much soil in it as this as a rule becomes only a nuisance. Apply enough of the mulch to keep the water where you place it so that it will not run all over the benches and fairly drown the plants in places, and leaving others suffering for want of water. Deep scratching should be avoided as the roots are pretty well into the soil and if this is stirred too deeply some of the roots are sure to get torn and otherwise damaged. Every little check will tell in the long run, as it is the little things that gradually lead to the bigger ones. If manure is plentiful then this can be used by itself, but care should be taken to see that it is not applied too heavily. A light application is much better for the plants than a heavy one, it being much easier to control the moisture. But the surface of the soil should be kept rough and lumpy at all times to insure proper distribution of water and to protect the roots working in the compact soil just underneath.

Asparagus and Smilax

There are a few places growing only roses and not having any smilax or asparagus around, most places growing it in the cross houses and the ends of houses. With a little care these two can be made to make all the cross houses pay for their keep with a dollar or two to the good now and then. They are crops that can be held when the market is low so it is seldom that this will be a loss of any kind, besides there is always market for good asparagus and good smilax. A little mulching with horse manure now will do the greens worlds of good, as will an occasional dose of liquid manure to which a little nitrate is added. If there are not enough greens to make it worth while mixing the nitrate extra, it can be applied directly to the benches, being careful to see that the plants are wet enough at the roots but that the foliage is perfectly dry. If this is not so do not apply the nitrate as it will stick to the foliage here and there and will surely burn it or mark it so as to reduce its market value.

AMERICAN DAHLIA SOCIETY

The Annual Exhibition of this Society opened on Tuesday, September 26, at the Engineering Building, New York City in association with that of the American Institute. It can safely be said that this was the best and most impressive dahlia exhibition ever put up in this country. The halls were filled with exhibits of high individual quality and commendably arranged. A display worthy of high praise was that of W. Atlee Burpee & Co., arranged by George W. Kerr. Not only in quality of its material but in decorative effect as a whole it was a conspicuous success. This exhibit won the Michell gold medal. The Dreer silverware for floral design of dahlias was worthily won by Young & Nugent. The silver medal for general collection was won by H. Cottam & Son and the bronze by W. A. Manda. P. W. Popp got the Chapman cut glass vase for giant singles in vases and the Burpee cup for best vase, peony-flowered. W. C. Noonan was awarded the Vincent silverware for best vase, mixed. The Stout cup for best seedling cactus went to James Duthie and the Mordecai cup for best new seedling was won by Mrs. C. H. Stout.

Certificates of merit were awarded to Jean Kerr, pure white show, from W. Atlee Burpee & Co. Also to Fiery Cross, crimson scarlet peony, from Frank P. Quinby, White Plains, N. Y.

A certificate of merit was granted to J. F. Anderson, Bernardsville, N. J., for a seedling, Geisha \times J. B. Fry also to W. H. Waite for "Rohallion." Preliminary certificates were granted to Jas. Duthie for three seedlings, Nos. 2, 12, and 30. Special awards were made to Richard Vincent, Jr. & Sons Co., Mrs. Chapman, Jr., and Mills & Co.

In the regular schedule classes for commercial growers, W. D. Hathaway, New Bedford, Mass., won five 1st and Mills & Co., one 1st. Other winners were Maurice Fuld, C. Louis Al-ling, D. V. Howell and G. H. Walker. All these classes were contested by from four to eight competitors. Prominent winners in the gardeners' classes were James Kirby, P. W. Popp, Jos. Robinson, W. C. Noonan, Forbes & Keith, Arthur Daley, J. Gowans and W. H. Waite. In the "open to all" classes the big winners were John Lewis Childs, W. D. Hathaway, W. A. Manda, N. Harold Cottam & Son, Maurice Fuld, Brookcrest Gardens, Fred P. Webber, C. L. Al-ling, Jas. Gowans, O. P. Chapman, Jr., and A. E. Doty.

The Meeting

The Annual Meeting of the American Dahlia Society was called to order in a spacious room on the 12th floor of the Engineering Building at 3 P. M., September 26. President Vincent in the chair and every seat filled.

President's Address.

Ladies and Gentlemen, Members of the American Dahlia Society, I welcome you to this our second annual meeting.

We are not yet a year and a half

old, but with strength and vigor equal to some of the older floral organizations. Now, with two successful exhibitions to our credit, we feel well recompensed for the exertions we have made, and if success is to be continued, of which I have no doubt, it is in your hands. We have every assurance and belief that you will do your part to back up the officers.

As your retiring president I heartily express my appreciation of your kindness toward me and the good work done by all of you during my incumbence of the office. I request you kindly to continue in the good work and do your very best for those you may elect, as I assure you I will con-

R. VINCENT, JR.

President American Dahlia Society

tinue to do my little. Much of our success is due to our worthy secretary, and Mr. Eagleson, secretary of the American Institute, and the other officers.

The premiums offered at this meeting, we think, are very appropriate and numerous. The Institute has done grandly by us, as also the trade, with other kindred organizations and individual members, for which we are all truly thankful.

Nomenclature.

I would recommend the continuance of our present Nomenclature Committee, who have already done good work. They have a big task before them and it will possibly take several years before they can say it is complete. There is much to be accomplished, both in classification and in the elimination of duplicate varieties. Many are misnamed or similar varieties raised by growers who did not know that a similar variety already existed. There was no society in this country at the time of our inception to look after these matters or adjudicate upon a new variety. There has been also a few, and we are glad to say a very few, unscrupulous dealers who tried to mislead the public by using the

names to old or worthless varieties, thus misleading buyers and doing the dahlia cause harm. But with the education we are giving our members we will soon educate the buyers. With the description of new varieties given in our bulletins from time to time, they will know at once, when the plant blooms, if they have the true variety or not.

It is my opinion that it would be advisable to amend the by-laws in relation to new membership and dues. There is a great deal of objection to the initiation fee. I think that two dollars for active and one dollar straight for associate members, or ten dollars for club membership (affiliation) would bring us in more money than we are likely to get by sticking out for the membership fee.

Affiliation with the S. A. F. and O. H.

A number of our members worked hard to get a sufficient number of S. A. F. members so that we would have the one hundred required for representation with that body, but failed. We need this to put us on a par with other societies. All good work needs some little sacrifice from the individual. Will you, as a member of this society, help us in this? It has to be done previous to January, 1917, to entitle us to representation for that year.

Dahlia Trial Grounds.

We have two trial grounds in different sections of the country. One is at the New York Experiment Station at Geneva, under Prof. F. H. Hall; the other at the St. Paul (Minn.) Experimental Farm, under Prof. Le Roy Gady. Prof. J. B. Norton, of the Maryland Agricultural Station, and others are experimenting with numerous varieties and all types.

We think that we will be able to give the dahlia world, in our quarterly bulletins, some interesting and valuable information during the coming year, and anyone having anything interesting to communicate is invited to send it to the publisher of the bulletin.

The reports of secretary and treasurer followed, as below:

Report of the Secretary.

The support that the American Dahlia Society has received since its inception in New York on May 10, 1915, has been eminently encouraging. To the end of August, 1916, the total paid-up membership was 244, being 169 active members and 75 associate members.

The first annual show was held on September 24 and 25 in the Museum of Natural History, New York city. With all flowers that are cultivated entirely out of doors there is always a large element of risk owing to periods of bad or unfavorable weather. It happened that the period of three weeks immediately preceding the exhibition was the hottest and driest of the whole summer and autumn, terminating in violent thunderstorms with rain, which destroyed the flowers of several of the large growers. Despite these drawbacks the show was a good one and was attended by 35,000 visitors.

Early in the present year a change was made necessary in the secretaryship of the society owing to the increasing pressure of Mr. Joseph J.

WRITE FOR CATALOGUE.

Lane's business duties. Mr. Lane did yeoman service in his part in getting the society started and placing it on a good running basis, and the committee publicly acknowledged its indebtedness to him. Since March the duties of the secretarial office have been undertaken by J. Harrison Dick.

The society has made progress in the work which it was established to promote and conduct. A quarterly bulletin of information has been published. By and through this the members are kept informed of what is being done not only in the society but in the dahlia world generally, and the notes on the cultural treatment of dahlias have been much appreciated. Four issues of the bulletin have appeared. Copies have been distributed both by the society and by members to many dahlia lovers who have not yet joined our organization. The greater our membership the bigger and better will the bulletins be. They cost considerable to publish and only in proportion to the increase in membership can the volume of the bulletins be augmented.

Trials of dahlias have been undertaken and reports will be published. The thanks of the executive committee is tendered to the directorates of the two experimental stations and to Professors F. H. Hall and Le Roy Cadz.

An affiliation scheme whereby local dahlia clubs or associations can receive certain substantial privileges and assistance on payment of the nominal sum of ten dollars annually, was put in operation early in the summer. The Short Hills Garden Club, N. J., and the Oyster Bay Horticultural Society, N. Y., have become affiliated, and negotiations with this object in view are in progress with others.

A scheme of points for judging dahlias has been prepared and will be placed before the members for their suggestions. It is hoped that an authoritative, practicable scheme will be endorsed and adopted.

The carefully prepared scheme for the classification of all the types of dahlias was published in March, and has been adopted by many of the leading commercial growers in their catalogues, as well as by others. It is the wish of the committee that this classification arrangement be regarded as official and be adhered to.

The definition of "amateur" as applied to our exhibitor member has also been published and its adoption by the annual meeting is recommended.

An artistic certificate of merit has been prepared. This will be awarded to dahlia novelties at the society's exhibition or at the exhibitions of its affiliated societies, or at such other exhibitions or meetings as your executive committee endorses. An original medal of pleasing design has been made in silver and bronze respectively. It is hoped that later this medal will also be struck in gold.

In some parts of the country the

past growing season has been very trying, even resulting in heavy losses owing to the rotting of the roots by the prolonged rains. In other sections, as in Michigan and the Middle West, a drought seriously crippled the growth of the plants at midsummer. Despite these penalizing difficulties the interest in dahlias at this time is surprisingly great. New dahlia clubs are springing up, shows are being arranged, numberless seedling dahlias are being bred and raised, the use of dahlias for gardens and as cut flowers for December is increasing, and there is evidence on all sides of the great need of a strong, guiding, leading, authoritative society devoted to the interest of this noble flower, and this is furnished in the American Dahlia Society, national in its aims, its character and its membership.

Report of the Treasurer.

NEW YORK CITY**

the executive committee, consisting of James Duthie, I. S. Hendrickson, Geo. W. Kerr, P. W. Popp, were re-elected, and Joseph J. Lane was chosen to the place left vacant by Mr. Dick. The nomenclature committee was re-elected, namely, Prof. F. H. Hall, chairman, L. K. Peacock, Geo. W. Fraser, Jos. Kirby and Leonard Barron. The vice-presidents elected were Geo. L. Stillman, representing the north; E. S. Brown, representing the east; Prof. J. B. Norton, representing the south; W. W. Wilmore, representing the west, and the Rev. W. O. Wyckoff, representing the central west.

It was agreed to abolish the dollar initiation fee and to make a uniform annual subscription of \$2, thus doing away with the associate memberships.

The society's classification scheme was endorsed by the meeting and the secretary was asked to write to dahlia firms and others, suggesting that they publish the classification scheme in their catalogs.

Considerable discussion took place on the proposition to have a complete list of dahlia names published, said list having been prepared, it was stated, by Prof. Hall. It was the desire of the meeting that the publication be accomplished.

The question, "What is an Amateur?" was also debated, but the question bristled with so many difficulties that no action was taken, the chairman humorously remarking that such matters should be left for his successor.

The meeting was of an open, free, more or less informal character, the speaking being participated in by quite a number of those present.

The Banquet

This was a very pleasant little reunion, attended by about thirty-five members and friends on Tuesday evening, at the Hotel Navarre. It was announced as the first annual dinner of the society, but no formal speeches were made.

AMERICAN ASSOCIATION OF PARK SUPERINTENDENTS.

The eighteenth annual convention will be held in New Orleans, La., October 10, 11, 12, 1916. The program:

First Day, Tuesday, Oct. 10.

9.00 A. M.—Executive Committee will meet to consider credentials and applications for membership.

10.00 A. M.—Session called to order. Minutes, applications for membership and report of Executive Committee on same. Election of new members. Report of officers. Appointment of committees.

Address of welcome, Mayor of New Orleans. Response by President E. T. Moseley. Noon adjournment.

Afternoon: Recreation provided by local hosts. Automobile tours of Audubon Park and City Park. Refreshments at City Park.

8.00 P. M.—Business session in Convention Hall. President's Annual Address. Communications, Resolutions, Committee Reports, New Business.

Second Day, Wednesday, Oct. 11.

9.00 A. M.—Business session. Papers and discussions. "City Planning in Relation to Park Properties," by Prof. James Sturgis Pray.

Discussion leaders: W. S. Manning of Baltimore, H. W. Busch of Detroit, C. C. Lancy of Rochester.

"Playgrounds in Parks from a Designer's Standpoint," by Frederick Law Olmsted.

Discussion leaders: H. S. Richards of Chicago, M. L. Moore of Toledo, Laurie D. Cox of Syracuse.

Afternoon: Recreation provided by local hosts. Trip to City Nursery, West End Lake Shore Park and Southern Yacht Club. Refreshments at the Yacht Club.

Evening Session, 8.00 P. M.—Papers and Discussions. "Trend of the Playground Movement as It Affects Parks," by Lebert Howard Weir.

Discussion leaders: J. B. Shea of Boston, G. W. Burke of Pittsburgh, Fred C. Albers of Cleveland.

"Efficiency and Accounting in Park Administration," by Frank S. Staley, Director of Minneapolis Bureau Municipal Research.

Discussion leaders: Theodore Wirth of Minneapolis, Geo. A. Parker of Hartford, A. A. Fiske of Racine.

Third Day, Thursday, Oct. 12.

9.00 A. M.—Final Business Session. Reports of Committees. Election of Officers. Selection of place of next meeting. Unfinished Business. Question Box.

Afternoon: Recreation provided by local hosts. Boat trip around New Orleans harbor.

7.00 P. M.—Banquet at Grunewald Hotel. Each person pays for his own plate. Newly elected President as toast-master. Short talks by newly elected officers.

HENRY A. DREER
714-716 Chestnut St., PHILADELPHIA, PA.

N. Y. STATE FEDERATION.

Amateur and professional horticulturists from all parts of the state journeyed to the State Fair grounds at Syracuse to attend the annual meeting of the State Federation of Horticultural Societies and Floral Clubs held last week.

It was expected that drastic resolutions would be introduced relative to the need of a new horticultural building, but on the announcement that Governor Whitman, Speaker Sweet of the Assembly and the Fair Commissioners had promised that the horticultural interests were to receive the attention of the Legislature and be provided with a new building there was prolonged cheering.

A committee was appointed to co-operate with all horticultural interests to assist in the passage of the measure. The committee consists of Frank R. Pierson of Tarrytown, Erl A. Bates of Syracuse, C. P. Wortman of Oswego, Prof. E. A. White of Ithaca, Prof. David Lumsden of Ithaca and George E. Thorp of Syracuse.

The constitution was changed so that the winter meeting of the society will be held during farmers week at Ithaca and the spring meeting to be held in connection with the flower show in New York. Resolutions were adopted instructing the Legislative Committee to secure \$50,000 for greenhouses at Cornell for floriculture and vegetable culture.

Although a determined effort was made to re-elect Mr. Bates as president, he withdrew on the ground that inasmuch as ninety per cent. of the

members are commercial florists and growers, the best interests of the federation and the fair would be served by the election of a man in that branch, and Frank R. Pierson, mayor of Tarrytown, was chosen. Mr. Bates was elected first vice-president, Charles H. Vick of Rochester second vice-president, Hugh McCarthy of Syracuse third vice-president, Frederick A. Danker of Albany fourth vice-president and George E. Thorpe fifth vice-president. Prof. E. A. White of the Department of Floriculture of Cornell was elected secretary and W. A. Adams of Buffalo was chosen treasurer. The federation received into membership several new organizations, and it now numbers thirty-six organizations.

Plans were drawn which center authority with an executive board consisting of the president of each affiliated organization and which would include Rev. Dr. E. M. Mills, as president of the Syracuse Rose Society; Henry Youell, president of the growers' association, and Hugh McCarthy, head of the retailers' society.

CONNECTICUT HORTICULTURAL SOCIETY.

This society held its first fall meeting on Friday evening, September 22,

President Hollister presiding. This was "Dahlia Night" and there were two splendid exhibits of dahlias. John F. Huss had on exhibition a collection of some ninety varieties and Warren S. Mason displayed thirty of more varieties among which were some wonderful specimens. Both displays received first-class certificates. G. Ogren exhibited Mexican poppies and asters.

Mr. Huss in his remarks complained of the depredations made by grasshoppers, many of his dahlia blooms being entirely eaten by these pests. He also commented on the unusually fine season for the dahlia, the weather conditions being all in its favor. E. M. Smith, of the East Hartford Dahlia Gardens, gave an interesting talk on the history of the dahlia. Mr. Smith stated that he had received several secret tips, "tricks of the trade," while at the Boston Flower Show. One was to dip about half-an-inch of the stem into hot water, just warm enough so the hand could be placed in it, and then on arrival at the show to cut off about an inch of the stem and the bloom would last longer and look just as fresh as when first cut.

The meeting was well attended and thoroughly appreciated.

ALFRED DIXON, Secy.

VEGETABLE GROWERS' ASSOCIATION OF AMERICA.

About 270 men and women were registered at the 9th annual convention of the Vegetable Growers' Association of America, at its opening session (September 26), and another hundred more lacked opportunity to do so, making the attendance a record-breaker, when the meeting was called to order on the 19th floor of the La Salle hotel. The place is admirably adapted to such conventions, having room for trade exhibits, vegetable and canned fruit displays, and assembly hall on the same floor. Those who have attended the previous conventions are delighted with the opening.

Mr. Gore, of the Chamber of Commerce extended a welcome in behalf of Chicago, and tried to impress his hearers with the idea that the activities they saw about them did not mean there was no hospitality in the hearts of Chicagoans, but that the pursuit of business was here followed with the spirit of "Run or you will be

H. W. SELBY

Vice President Vegetable Growers' Association of America.

stepped on." Fred Lautenschlager briefly welcomed members in behalf of the Chicago Convention Committee and A. Geweke spoke for the Cook Co. Truck Gardeners' and Farmers' Association in which he emphasized honesty in measure to the purchaser and honesty to the soil that he cultivates. He referred to the devastation wrought by the frost in the fields which they would visit, and the great loss to the growers who lose much of the season's crop. In response E. A. Dunbar of Ashtabula, O., briefly outlined the life of the organization and said of its record "Work did it." Howard W. Selby of Philadelphia, vice-president, ably presided and gave the address in the absence of the president.

At this writing, the trade exhibits are not all in place, but every foot of space is taken. The displays of vegetables are remarkably good for the season and are largely the results of the work of the school children. These also are not complete.

Chicago, Ill.—Abraham Iralson, 421 West 63rd street, successor to Garfield Flower Shop.

NEWS NOTES.

Manasquan, N. J.—A. G. Freer has purchased the greenhouses of Mrs. Emma Patterson.

New Britain, Ct.—F. H. Bellerer has leased the green houses which have been operated by Mrs. Elizabeth Egert.

Jersey City, N. J.—John Leach has retired from business and his range of greenhouses at 29 Wegman Parkway have been taken over by Philip Dosch.

Cincinnati—Mr. and Mrs. J. A. Peterson are on an automobile trip through the East this week. Tom Windram leaves for a stay at the Lake Shore Ferneries at Leesburg, Fla.

Hamilton, Bermuda, Sept. 24—Bermuda was swept by a severe storm yesterday afternoon, general damage being caused throughout the colony. Many buildings were badly damaged. Trees were uprooted and electric light and telephone communication was interrupted.

Westerly, R. I.—An attachment was placed last Friday on the contents of the flower shop of Lewis P. Rankin by Attorney John J. Dunn for Pasquale and Maria Deplasio. The amount named in the writ is \$500. The store was closed after Deputy Sheriff Fred T. Mitchell had served the papers and he took charge of the premises.

Oakdale, L. I.—Professor Chas. S. Sargent of the Arnold Arboretum, Boston, and Mr. Theodore A. Havemeyer, of New York, visited Westbrook Garden, the home of Mrs. Bayard Cutting, this week to look over the large collection of choice and rare evergreens for which this estate is famous. Many of the specimen conifers here are among the finest in the United States. About twenty large ones have just been transplanted by Superintendent Charles W. Knight.

NEWS ITEMS FROM EVERYWHERE

CHICAGO.

Joe Bieher is again to be found at A. Lange's, where business is always good.

R. H. Mohr has transferred his energies to the wholesale end of the work again and is now with the A. T. Pyfer Co.

The frost recorded in the Chicago notes a week ago proved even more severe than was thought at the time. Practically every outdoor flower that is generally sold in the market is cut off and the spaces in the wholesale stores usually filled with asters, dahlias and gladioli are bare, further increasing the forlorn appearance of the wholesale houses.

The fall openings of the large department stores call for a large quantity of artificial flowers. The recent discussion of the effect of the flower sales at these stores set many thinking, and did much good in consequence, but the effect of the regular sales of artificial plants, flowers, etc., has not been given the thought its importance would seem to warrant. A plant is made up, a basket filled or a bouquet made while you wait and very closely has nature been copied. The prices are higher often than for the natural, but they last all winter. And the remarkable feature is that these things were introduced and pushed by florists in the trade.

Some large growers of plants for winter blooming have placed trial orders for azaleas with The Cottage Gardens in California. The initial price is high and the transportation is expected to equal that of the foreign product, but the absence of the duty will cut cost some and the element of uncertainty of delivery will be eliminated. The question of forcing them can only be solved by trial. The growers here state that so far as the foreign azaleas are concerned their delay in transit since the war has caused so much loss there was no money in them, and the doubt as to getting them at all this year, while it is only a little greater than last, is a very trying feature which they would gladly dispense with if home-grown stock is a success.

WASHINGTON, D. C.

At the next meeting of The Florists' Club, Tuesday, October 3, announcements will be made of the various matters that are to be taken up when the season opens. This will include the program of the Club's bowling team.

Two sweet-pea houses are being built in Alexandria, Va., for David J. Grillbortzer, one of which is 35 feet by 60 feet, the other being 35 feet by 125 feet. This is a new proposition with Mr. Grillbortzer and is in line with his plans for branching out. He is a large producer of roses and carnations.

The florists of Washington have been warned to be on the lookout for a smooth stranger whose "sister has

just died." Unfortunately, this warning did not come soon enough to prevent Fred H. Kramer from being "Stung" for \$2. The man visited his store and after ordering a \$3 floral piece to be sent to "Sister" tendered in payment a check for \$5. The gentleman, however, was not known at the bank.

A number of flower shows are being arranged in several of the nearby towns and included among these are the exhibition of the Takoma Park Horticulture Club at Takoma Park, October 2-3, where dahlias and roses will be on display. The sixth annual flower show in Hyattsville will be held October 5-6. The show at Falls Church will be held on October 6-7. The committee has provided ribbons only for awards to successful exhibitors, but there are a large number of cups and other special prizes donated by merchants and seedsmen.

The Leo Niessen Company, is about to open their new store at 1206 H street, Northwest. Here they have the most attractive floral establishment in the city, and fitted out with the most modern equipment. They have gotten away from the old ice box idea and have put in a refrigerator plant. The box is 15 feet by 20 feet and is located in the centre of the store; in the basement below, is a three-ton Baker ice machine and motor for operating it. Additional storage is afforded by a large vault, which is equipped with tables and can be used, especially during the cool weather, for caring for many flowers that do not necessarily have to be put in the box.

NEW YORK.

Johnson & Millang report a good start already in their newly established seed business.

Allan Wickes now has charge of the orchid department of Beechwood Heights Nurseries at Bound Brook, N. J.

Frank Millang has returned home to Forest Hills after a year's sojourn on his farm at Yorktown Heights and is the picture of good health.

F. C. Suchy and Mrs. Suchy of San Antonio, Texas, who have been visiting here left on the steamer for Galveston on Wednesday, Sept. 27.

Frank McMahon of Seabright and Dean & Co. of Little Silver, N. J., whose extensive greenhouses have heretofore been devoted to roses, have changed over for this year to chrysanthemums and carnations.

The Holland-America line freight steamship Amsteldyk arrived on September 25 from Rotterdam, via Kirkwall, with a cargo of 14,000 boxes of bulbs. The ship, according to her officers, was detained seven days at Kirkwall by the British port authorities.

Marriage intentions have been filed by Paul F. Brigham, florist, Westboro, Mass., and Helen I. Adams, Waverley, Mass.

BOSTON.

Miss May Small of H. M. Robinson's bookkeeping staff is taking a belated vacation at Belloys Falls, Vt.

B. A. Snyder and the New England Supply Co. are two new teams that have joined the Florists' Bowling League. Guess we've got everyone now.

September seems to be a great month for weddings if the figures compiled for last Saturday's showing are worth anything. Eight Boston florists had a grand total of 92 nuptial decorations and this rush has a very beneficial result on the market and wholesale business.

The reappointment of Robert S. Peabody, the landscape architect, to the Board of Park Commissioners, is announced by Mayor Curley. Mr. Peabody fills the vacancy left by the resignation of Charles Gibson. The other members of the Board are Chairman John H. Dillon and Thomas F. Galvin.

Many of Boston's most prominent florists are to be called to the witness stand in the Roper trial which is now going on. Young Mr. Comley of Park street was mentioned as one of the chief witnesses by a Boston newspaper, and Henry Cicolo of J. Zinn's is another who claims to be able to throw light on the subject. Cicolo, by the way, is a probable witness in the di Cola murder case, also.

Mr. and Mrs. Edward Baker Wilder celebrated on Saturday evening, Sept. 23, the twenty-fifth anniversary of their marriage, at their home, at 90 Columbia road, on the ancestral estate of Mr. Wilder's father, the late Hon. Marshall P. Wilder. Mr. Wilder is chairman of the fruit committee of the Mass. Horticultural Society and delegate to the State Board of Agriculture.

MICHELL'S FLOWER SHOW

This annual event took place on Tuesday, Wednesday and Thursday of this week at 518 Market St., Philadelphia. Prizes were offered for competition in twenty-seven classes in nearly all of which keen rivalry was shown by the private gardeners of this locality. The display of dahlias was especially fine, the chief prize winners on these being Wm. Robertson, Joseph Fox and R. J. Morrow. Several groups of annual flowers were shown and proved a great attraction. It was a close race between Wm. Robertson and David Aiken for the two prizes offered. The same applies to the groups of fifteen varieties of perennial flowers. There was only a fair showing of H. T. roses, hardy phlox and delphiniums, the season not being just right for these at present. The vegetable display was the best ever—not only for quantity, but the quality was distinctly better than in previous years. Among the star prize winners in this section were John Little, R. J. Morrow, David Aiken, James Coleman, Wm. Robertson, Peter McConville, George W. Quicksell, and John Dwyer. The judges were Paul Huebner, George C. Watson and Thos. W. Logan.

Under the leadership of Albert M. Herr a trip was made to the establishment of Richard Vincent, Jr., of White Marsh, Md., via automobile. There were thirteen machines and sixty-three people in them.

The distance, 66 miles, was made in a little over three hours and at Perry Hall we were met by Mr. Vincent and one of the boys who piloted us to their establishment via the shortest and best route, and there we found a lunch that satisfied to the full the appetite created by our long run on a cool morning.

Mrs. Vincent was voted a charming hostess by all the ladies present and Mr. Vincent given a vote of thanks, three cheers and a tiger by every one.

Mr. Vincent then led the party to the Dahlia fields and we were shown not only the largest acreage (close to a hundred) we ever saw but also the largest collection I presume in the world. A seedling of their own—Chas. L. Seybold—has in addition to its merits as a bloom the added feature of being the earliest and the freest of their 300 or more varieties. Another special is called Jack's Discovery. One of the cultural pointers brought out by Mr. Vincent specially was that late planting was in most cases better than early planting. They do their planting by machine and three men and one machine can plant 25,000 per day. Cannas come next to Dahlias in quantity and variety and the canna lovers of the party had quite a feast in examining the many varieties grown.

In the greenhouses the geranium stock was a great attraction and the 300 or more varieties were closely inspected by critical men. In addition a general line of bedding stock interested the retail men and the healthy condition of everything was commented upon. We found two new 100-horse-power boilers being installed and a complete pumping plant that in addition to pumping water manufactures the electricity for the place. Their box making for shipping out stock is a little industry of its own. Pompon chrysanthemums promise

Coming Exhibitions

Oct. 7-8, Boston.—October Fruit and Vegetable Exhibition, Massachusetts Horticultural Society, Horticultural Hall.

Oct. 10-12, New Orleans, La.—Eighteenth Annual Convention American Association of Park Superintendents.

Oct. 26-27, Madison, N. J.—Twentieth Annual Flower Show, Morris County Gardeners' and Florists' Society, James Assembly Hall.

Oct. 27-29, Mount Kisco, N. Y.—Fall show of the Northern Westchester County Hort. and Agri. Soc.

Oct. 31-Nov. 1, Greenwich, Conn.—Fall Flower, Fruit and Vegetable Show of the Westchester and Fairfield Horticultural Society.

Nov. 1-5, Boston.—Grand Autumn Exhibition of Plants, Flowers, Fruits and Vegetables, Massachusetts Horticultural Society, Horticultural Hall.

Nov. 1 to 3, Tarrytown, N. Y.—Chrysanthemum show of the Tarrytown Hort. Soc. in Music Hall.

Nov. 8, Philadelphia. Chrysanthemum Society of America in conjunction with Pennsylvania Horticultural Society.

Nov. 8-10, New York.—Annual Chrysanthemum show of the American Institute, Engineering Society Bldg., 25-33 W. 39th St., New York.

Nov. 9-10, Bloomington, Ill.—Fall Flower Festival, Illinois State Florists' Association.

Nov. 9-11, Lancaster, Pa.—Fall flower show.

Nov. 9-12, New York.—Fall exhibit Horticultural Society of New York at Museum of Natural History.

Nov. 11-19, New Orleans, La.—Flower show.

Nov. 14-15, Providence, R. I.—Flower show of R. I. Hort. Soc.

a big crop of flowers and plants, Mr. Vincent kindly offered to supply us with a display of these flowers for our show Nov. 9th, 10th and 11th., and if there was anything left undone toward our entertainment and comfort the writer failed to see or hear of it.

The run home was made with a stop at Quarryville for supper and Lancaster reached about 7 P. M. by a tired but well pleased party, without even a bursted tire to mar the pleasure of the trip. **ALBERT M. HERR.**

CHRYSANTHEMUM SOCIETY OF AMERICA EXAMINING COMMITTEES.

President Wm. Kleinheinz announces the committees to examine new chrysanthemums for the ensuing year as follows:

Boston—Wm. Nicholson (chairman), James Wheeler, Alex Montgomery. Ship flowers to chairman, care of W. J. Thurston, manager Boston Flower Exchange, 1 Winthrop square and Otis street, Boston, Mass.

New York—Eugene Dailedouze (chairman), Wm. H. Duckham, A. Herrington. Ship flowers to New York Cut Flower Co., 65 Twenty-second street, New York, care of chairman.

Philadelphia—A. B. Cartledge (chairman), John Westcott, S. S. Pennock. Ship flowers to A. B. Cartledge, 1514 Chestnut street, Philadelphia, Pa.

Cincinnati—R. Witterstaetter (chairman), James Allen, Henry Schwarz. Ship flowers to chairman, Jabez Elliott Flower Market, care of janitor.

Chicago—N. J. Wieter (chairman), George Asmus, Thomas W. Head. Ship flowers to chairman, 162 North Wabash Ave., Chicago.

Shipments should be made to arrive by 2 P. M. on examination days to receive attention from the committee. Must be prepaid to destination and an entry fee of \$2.00 should be forwarded to the secretary not later than Tuesday of the week they are to be examined, or it may accompany the blooms.

Seedlings and sports are both eligible to be shown before these committees, provided the raiser has given them two years' trial to determine their true character. Special attention is called to the rule that sports to receive a certificate must pass at least three of the five committees.

The committees will be in session to examine such exhibits as may be submitted on each Saturday during October and November, the dates of which will be October 7, 14, 21, 28 and November 4, 11, 18, 25.

CHARLES W. JOHNSON, Secy.

Flower Market Reports

BOSTON A decided change in the market condition has been noted since last week, and where the demand has hitherto been sluggish and weak it is now sharp and insistent. Only a deplorable scarcity of stock prevents the trade from enjoying a period of "fatness." Roses are but sparse in the wholesale houses and double the quantity could be used. Carnations, short lengths, are not over-plentiful either, and are of indifferent quality. The chrysanthemum is gaining strength both in demand and quantity, but as yet it hasn't flooded the market. The gentle aster is making its farewell bow, and will rapidly disappear. A few lilies are to be seen. Some short American Beauties are in evidence and are selling well, and like everything else are not nearly numerous enough to satisfy the call for them.

A killing frost has made **CHICAGO** a clean sweep of the usual September flowers and placed the market in a tighter position than ever before in its history. The full extent of the damage done to outdoor flowers was not realized until the shippers were heard from, when it was found that the country surrounding Chicago had all been included in the frost zone. Fortunately roses are beginning to come on more rapidly and there is a fair supply of most varieties. Killarneys still remain scarce. American Beauties cannot be said to be plentiful, but there is not the scarcity which existed a short time ago, and the quality is good. More chrysanthemums are coming each day, but no good supply is here yet, though quite possibly the empty counters, usually filled with fall stock, make the number appear less. Lily of the valley seems equal to the demand. Orchids are very scarce and prices high. Carnations are improving slowly and it will be some time before stock will be really good. Smilax and other greens are not very abundant and bring a good price.

The end of the aster **CINCINNATI** and gladiolus season and the cool weather have caused a material shortening of receipts and at times much more stock than is available could be used. Roses were checked very considerably by the cool weather. Carnations are in slightly larger supply than they were at the last writing. Lilies are abundant. Dahlias are not coming in as strongly as they could be used. In fact the dahlia cut this year is far below the normal.

Trade is by no means **NEW YORK** brisk in the wholesale district but with the exception of a lot of asters of low degree and disreputable baled and barreled dahlias there is no accumulation of stock of any kind. Roses are still quite small in bud and stem but they are clean and of excellent substance and improve noticeably from day to day. Carnations are seen here and there but it appears that they are not growing well and the crop is far from

The Queen Mary

promising at present. In one respect it may be better that this is the case as the chrysanthemums are likely to come in nearly all at the same time this season and there seem to be more of them grown than of late, so the crop will be heavy. Lilies are showing up good, the quality being greatly improved. Cattleyas are not plentiful yet there are more of them than a week ago. Gladioli still linger and good spikes of America and light colors generally sell quite well.

PHILADELPHIA

Stocks shortened up a little during the past week, while business continued good in most lines. This has had the natural effect of stiffening prices considerably. Compared with this time last year figures quoted on the leading staples are a good deal higher and growers generally are congratulating themselves. Dahlias are coming in more freely and are also of better quality. October Frost has made its appearance in the chrysanthemum line-up and relieves the loneliness of Golden Glow a little. Asters and gladioli are still to be seen but they do not dominate to any extent. Russell

is the leader in roses at present. Some really elegant stock of this variety is coming in. Carnations are gradually improving and pretty soon they will be occupying their usual commanding position. Cosmos is at its best—the large-flowering long stemmed strain which comes along about this season of the year and exhibits such good color, size and substance. Cattleyas are a little more plentiful and in greater variety. Lilies are in better supply and selling well. Gardenias have just started. There are lots of wild flowers like the perennial aster around and they fill in nicely for all decorations. Greens market is sluggish.

WASHINGTON

The condition of the local market remains about the same as a week ago. Asters and lily of the valley are the only flowers of which there is a shortage. Roses show a marked improvement and meet with a general sale, but prices continue low. It is still too early to talk carnations, although some are being sent in daily. Cosmos has made its appearance and occasionally a few chrysanthemums are offered.

Obituary

David Phillips.

David Phillips, a florist of Quebec, Canada, died on Saturday, Sept. 23, at the home of his sister, Mrs. De Poe, in East Orange, N. J., in his fifty-third year.

George H. Sullivan.

George H. Sullivan of Revere, Mass., died on Friday, Sept. 22, at the Frost Hospital, Chelsea, following an operation. He was a native of Cambridge and was engaged in the florist business. He is survived by his wife.

George W. Seavey.

George W. Seavey, the eminent flower artist, well known to many in the trade for his beautiful paintings of roses and other flowers, passed away at his home in Boston on Thursday, Sept. 21. Mr. Seavey had been in failing health for several years, but the immediate cause of his death was the result of injuries sustained in a trolley accident, pneumonia setting in.

A. H. Murdock.

On Friday, Sept. 22, Albert H. Murdock, aged 66 years, died suddenly at his home in Shrewsbury, Mass., of heart disease. He had been in poor health for some time. He came to Shrewsbury five years ago from Boylston, where he was born, and has been engaged in market gardening and flower raising with his son, David Murdock, Shrewsbury. Beside his son, he leaves his wife and a brother, Dr. E. A. Murdock, Spencer.

HYDRANGEA OTASKA.

The beautiful plant which is the subject of our cover illustration this week was grown by Mrs. Frederick L. Moody of Skowhegan. It bears 136 heads of flowers, some of them nearly one foot across. Our readers will agree that such a plant is well worthy of the prominence we have accorded to it. Its owner stands beside it in the photograph.

CATALOGUE RECEIVED.

Flory & Black, Slough, Bucks, Eng., Catalogue of Orchids. This firm purchased the entire stock of seedling, hybrid and other orchids lately cultivated by James Veitch & Sons, Ltd., which although but a part, is in itself suggestive of the extent and character of the collection listed in this exceptional catalogue. It is primarily a Hybrid collection, including a large number of unflowered pedigree seedlings.

Mr. B. Progressive, Florist,
Everywhere, U. S. A.

Dear Sir: It will be a decided advantage
as regards prices and quality to place your
order with us.

Soliciting your order through this ad
cuts down the overhead selling expenses
and you positively get lower prices and
better quality. Our terms are liberal and
are a guarantee that you get a square
deal, all bulbs guaranteed true to name or
money refunded.

Write us and upon request we will mail
you our booklet giving prices f. o. b. New
York or Chicago, and we also cheerfully
furnish you with any information that
may be desired. Those of our friends who
will mail us a list of their requirements
will find it has paid them to do so.

Awaiting to hear from you at your pleas-
ure, we remain,
Yours very truly,

HORTICULTURAL SOCIETY OF NEW YORK.

The Dahlia Show of the Horticultural Society of New York, held at the Bronx Botanical Garden last week was good as to quality of material, but was not extensive nor was it well attended, the exhibition scheduled by the American Dahlia Society for this week evidently dominating the situation. Leading exhibitors were C. Louis Alling of West Haven, Conn. and Mills & Co. of Mamaroneck, N. Y. In the private gardener section, Mr. Sullivan, superintendent of Mrs. Nichols estate held the lead. There were some nice seedlings shown by Dr. Millspaugh of Paterson, N. J. William Waite of Seabright, N. J., showed some fine blooms.

CLUB AND SOCIETY NOTES.

As a closing feature of the Houghton Horticultural Society's 42d annual autumn exhibition and flower festival at Lynn, Mass., the members of the society and friends gathered about the festal board in Odd Fellows' Hall, Thursday evening, Sept. 21, and enjoyed a good supper and listened to short talks from several of the members.

At a recent meeting of the executive committee of the Illinois State Florists' Association it was decided to abandon the prize feature at the Fall Show, which is to be held at Bloomington, Ill., November 9-10. So the secretary was instructed to write to all members asking their hearty cooperation, to help make this, the first Fall Show, one grand success, by contributing stock for exhibition. This will also be the semi-annual meeting of the association.

The New Bedford Horticultural Society opened its annual dahlia show on Thursday afternoon, September 21, with a richer and larger assortment of fine blooms than it has ever exhibited before. The committee in charge of the event found difficulty in finding table room for all. Among the leading displays were those of David F. Roy, of Marion, and John P. Rooney, of New Bedford. The majority of the dahlia prizes were won by W. B. Hathaway and Jos. A. Nolet. The amateurs were especially in evidence with some fine new blooms. They also brought in other flowers of many kinds and several ventured to exhibit favorite fruits. The judges were James Garthley and C. W. Young. They went bravely to their tasks of allotting

Lenox Horticultural Society.

The annual field day of the Lenox (Mass.) Horticultural Society was held on September 21 at Bellefontaine,

the hospitality which marks all of the doings of this organization. The man who was at the head of all the sports and ran the events like a professional was Louis Barnett, secretary of the

Group at the Farquhar Picnic.

the estate of Mr. and Mrs. Giraud Foster. About 250 persons attended. The members made it a picnic, brought luncheons and served all comers with

society. He was starter, scorer; finish judge, tape holder and participant in the soccer football game. Alexander MacConnachie, the first president of the society and one of the youngest-old members, took part in the jumping contest, although he failed to qualify. The members brought their families to the field day, and the boys and girls had sports for themselves, rifle shooting and races. The events were open and there were no handicaps. The prizes were articles for personal use, jewelry and boxes of cigars.

MASTICA

For Greenhouse
Glazing
USE IT NOW

F. O. PIERCE CO.
12 W. BROADWAY
NEW YORK

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

Will last a life-time.

\$1.25 EACH

Adjustable—can and frame separate—easily cleaned. Frame all one piece, of malleable iron. More practical and more easily operated than any other.

Seal-tight liquid putty at \$1.25 per gallon.
METROPOLITAN MATERIAL CO.
1392-1414 Metropolitan Ave., Brooklyn, N. Y.

THE FLORISTS' HALL ASSOCIATION

Is a mutual organization, insuring greenhouse glass against hail. Both commercial and private establishments are accepted. For particulars, address

John G. Bator, Sec., Saddle River, N. J.
Insurance Now.

"METROPOLITAN"

The Sign of Superiority

The success of your greenhouse depends largely upon the results previously shown by the builder you employ.

Therefore, every grower should investigate the capabilities of the greenhouse builder he selects for the job.

The above full iron frame, patented curved eave Metropolitan greenhouse was erected by us for Mr. W. W. Fuller, at Briar Cliff Manor, N. Y. This house is 26 x 100 feet, with an absolutely water proof cement boiler cellar. It is divided into three compartments which are separately heated and ventilated, and, being glazed with 24 x 24 inch glass, is extremely light. We also did the masonry.

PUT YOUR GREENHOUSE PROBLEMS UP TO US

We go anywhere in the U. S.
to submit plans and prices.

Special Pipe Hooks and Spools for Concrete Beds or Benches.

HERE is a set of hooks and spools that fully answers every need that we have so far run up against, in installing heating where there are concrete beds and benches.

They hook right over the edge, and are made in two fixed lengths, and also one that is adjustable to any length, for use between the two fixed ones. This makes grading the pipes a very simple sure matter.

It satisfactorily solves one of the most perplexing of the

concrete bed or bench problems in connection with your heating.

Every one of the castings are made of high grade iron and of ample thickness to give the necessary strength; but not so heavy as to run up their cost needlessly.

If at all in doubt just what ones, and how many hooks or spool hookovers you need, tell us full particulars, and we will gladly and promptly help you out.

None of these shown here are in our Handy Hand Book, so tear this page out and keep it.

Greenhouses As We Build Them

THERE is quite as much importance to be put on the preliminaries of greenhouse building, as the building itself. Sometimes there is more.

For example, take the instance of the house above. How admirably it fits the grounds. It didn't just happen to fit so attractively into its location. Our expert first studied the location carefully from every point of view. Then he took into consideration the various things the owner wanted to grow. The question of possible future additions was also considered, and how it could be done without marring the balanced effect. The economies of working and heating were gone into thoroughly. Then, and not till then, were the plan and design laid out and submitted to the final jurors, our construction experts, who

considered it only from its purely practical side. The designing department then added its touches here and there to lend charm and interest.

Now it was ready to submit to the owner for approval. Before him, we laid the plan and full elevations, with details of the entrance design, so that he could easily picture in his mind how the entire layout would look when finished. When such contracts are placed, we generally take care of everything, leaving nothing for the owner to worry over or upset other operations. For sixty years, we have been doing this sort of thing. We believe we have an exceptional greenhouse building service to offer you. Surely no one can build any better greenhouse. See our Booklet Number 117.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

"If vain our toil, we ought to blame the culture, not the soil."—

Acacias

There are many species of acacias, but only a few that merit a place in the florists' plant collection. For the trade the dwarf species are found to be the most satisfactory in every way. Among the best are *Acacia armata*, *A. cordata*, *A. lineata*, *A. grandis*, *A. paradoxa*, *A. heterophylla*, and a few others. Plants that were trimmed back last spring and have been plunged out of doors all summer should have now finished up a fine growth which will not fail to give a profusion of wonderful bloom by next Easter. They thrive in a winter temperature of 40 to 45 degrees, and if Easter is late they should be kept just a little above the freezing point, as with the increasing heat and light of the spring it is sometimes hard to keep them back. These plants do not like heat, and consequently are not adapted for forcing. They should be wintered in a cool house, and as near as possible to 40 degrees and allowed to come along naturally. Do not let them suffer for the want of water at any time, and give them a good syringing once or twice a week.

Cypripediums

Keep the plants free from the yellow thrips by sponging occasionally with a weak solution of nicotine or tobacco water. It is a good plan to give the house a light fumigating once or twice fortnightly to keep down this pest. It is essential to give regular ventilation as moisture in excess is liable to be very injurious. A weekly application of weak liquid manure will be of great assistance in the perfecting of the plants and bloom. Give a liberal supply of water, allowing the compost to become dry occasionally. From now on, a temperature of 55 to 60 will suit them well. For the average florist there is no more valuable orchids than *Cypripedium insigne*, which can be had in bloom just after the chrysanthemum season is over. It makes a fine flower for the holiday season lasting, as it will, for over a month in good condition. They will not need any shade after this date. Shade only tends to make them weak.

Lomarias

These can be grown under proper treatment into miniature tree ferns, which can be used for general house decoration. In their young state they make good center pieces for the table. When the plants get large and pot-bound they can be root pruned and the soil reduced, and put back into the same size pots. They will soon make a new set of roots and a new crown if given a gentle bottom heat. They can be readily raised from spores. Sow in shallow pans or boxes and keep in a temperature of 70 to 75 degrees in a close atmosphere, well shaded from the sun, using fine peat soil or leaf mold with a

good portion of silver sand. Transfer into fresh soil when large enough to handle. Keep in a temperature of 60 to 65 at night. *Lomaria gibba* and *intermedia* are the best. When they have produced two or three upright fronds they can be put into thumb pots in a soil of one-half loam and one-half peat or leaf mold with some sharp sand. Pot as needed so as to keep them moving.

Marguerites

All marguerites, whether white or yellow, single or double, flower well in spring and early summer, and a good many of them can be sold for bedding out and the filling of window boxes and vases. All will make good sized plants by the end of May. A batch can be started by propagation now if not already started. If you are going to prepare for Easter at all, a good stock of marguerites should be gotten into shape, for that is the great day for the sale of them. Bring the plants along so they will not have to stand the high pressure of extreme forcing. If at all shapely they should be allowed to grow along from now on in a carnation house temperature.

Preparing Land for Next Year

Where the ground area is very limited there is nothing better than trenching, with a heavy coat of manure intermixed with the surface soil. For those that have only a comparatively small parcel of land and cannot afford to let it lie idle for this time there is nothing better than sub-soiling, the sub-soiling plow following after an ordinary plow loosening the lower layer of soil and fairly well intermixing the two. Some florists' establishments have quite a lot of land under cultivation so can reclaim their wornout land by running it in grass crops for a few years when it will again be fit as tillable land. Every florist who has land in which to grow his stock should always make it an aim to restore to the soil some of the organic and mineral substances which have been taken away by previous crops. The first thing that suggests itself is manuring. Now is a good time to plow or dig in a liberal dressing of coarse barnyard manure.

Reminders

You will have to use greater judgment now with syringing overhead. Always try to have the plants dry by nightfall.

Lay Rambler roses on their sides where the wood is well matured. A daily syringing overhead will be enough to keep the wood plump.

Nerines will now be pushing their flowering spikes. Repot any urgently requiring it, but not otherwise as these pretty bulbs do better when the pots are well filled with roots.

Plants of merit

Our cover illustration this week shows one of the most distinctive species of the garden astilbes of recent introduction. This plant, which was fully described in HORTICULTURE by E. H. Wilson in his interesting series of notes on the new Chinese plant introductions in the spring of 1910 is one of the principal parents of the Arendsi hybrids described and illustrated in Mr. Rothe's notes on another page. HORTICULTURE takes pride in the fact that quite a number of these sterling novelties had their first introduction to the American trade through its columns. In the excellent talk by Wm. Saville before the Florists' Club of Philadelphia this week on the Gems of the Perennial Garden, which we hope to pub-

lish in full in a future issue, there were mentioned Aconitum Wilsoni, Anemone hupehensis, Artemesia lactiflora and the Buddleias, all of which were in the list of new things described by Mr. Wilson in his initial contributions to HORTICULTURE in which attention was for the first time called to their prospective value to the American planter.

We commend to the attention of the The F. T. D. florist trade of the country the forcible announcement of the Florists' Tele-

graph Delivery Association which appears in this issue of HORTICULTURE. This energetic organization, starting not very many years ago with a few optimistic individuals inspired with ideals which to many seemed somewhat visionary and impracticable, has by steadfast purpose and sheer perseverance hammered out a most remarkable success which in its way is without a parallel in the horticultural activities of the world. The organization is not only exceptional and really unique in what it has built up for its members and for the florists' business interests generally but for what it has been able to do in recruiting and solidifying the best elements in the retail florist trade of the continent into active adherence to the Society of American Florists—a much desired but seemingly impossible achievement up to the time the F. T. D. tackled the problem. In making membership in the S. A. F. a prerequisite to F. T. D. membership the latter has set up a new standard which has certainly conduced very much to the prestige of both organizations.

For the Roses

It is pleasing to note a marked increase in the quantity, also the quality, of floricultural literature sent out from time to time by the U. S. Department of Agriculture through the Bureau of Plant Industry at Washington. Farmers Bulletin, No. 750, which is just received is a very well considered and instructive document of 36 pages, on Roses for the Home, by F. L. Mulford and is worthy of a cordial reception by everybody interested in having more and better roses grown in American gardens. Simultaneous with its appearance, there comes a series of nine articles in type-written form, each article of reasonable length for convenient publication, bearing upon and summarizing the contents of the aforesaid bulletin. These have been distributed to the editors of all horticultural and agricultural papers and so lucid are they in phraseology and so well do they answer the many questions which perplex not only the novice but the more advanced worker in the rose field as well, that their widespread dissemination should in due time have a marked influence on the popular demand for garden roses of all types. Although primarily intended for the edification and instruction of those who wish to grow roses for pleasure and for the adornment of their home grounds these bulletins should be hailed with satisfaction by the nurseryman and florist, for assuredly they are most potent propagandists in his behalf. There can be no doubt that one direct result of Professor Mulford's treatise will be an augmented demand for roses in many places and, of these, presumably a goodly number will come from beginners in rose culture who have hitherto given little or no thought to the subject or have lacked confidence in their ability to produce anything creditable, because of their ignorance of the requirements for success. Would it not show good business judgment and prove profitable in the long run for any retail dealer wishing to increase his rose sales, to secure some of these bulletins and pass them around among his customers who have garden space at their disposal?

Astilbes and Herbaceous Spiraeas

ASTILBE ARENDSI HYBRIDS

A survey of our standard plant material for hardy borders and flower gardens in regard to nativity shows the extraordinarily rich contributions of the far East, especially those from China, Siberia and Japan. Of the more recent introductions we shall doubtless learn to treasure many species after sufficient stock is at hand for dissemination at popular prices. In the meantime it seems opportune to look up the instances where we evidently have failed to appreciate merits of obvious distinction.

I well recollect the time when we forced *Astilbe chinensis*, *floribunda*, *aurea reticulata* and *Thunbergi* for Easter. Of late we are giving *Astilbe japonica* preference, Gladstone in pure white and Queen Alexandra in pale pink being general favorites. What will interest the greenhouse men and particularly those ambitiously after laurels as exhibitors in the near future are the new *Astilbe Arendsi* hybrids gained by crossing the *japonica* types with *Astilbe Davidi*. Of vigorous growth, combining stateliness with grace, they rank in shades from the soft silvery pink and the salmon of *Rosa Perle* and *Lachskoenigin* to the deep rich velvety rose of *Venus* and *Gloria*. The last spring shows brought forth a few specimens. In the near future we shall doubtless see more of them. But what about outdoor use? The reply may be: Oh, we enjoy astilbes at Easter in pots; that is enough. You will sometimes hear the complaint that the rose bugs bother them while in flower late in June and during July. A third one—the Easter pot plants in the garden and they did not do at all and seemed to die away. The nurseryman in a self-resigned way follows it up with the statement:—Astilbes and spiraeas don't move very well: This is the situation in the Middle Atlantic States today.

Trying the best species and varieties around Philadelphia during recent years I have found that astilbes in pots rarely, if ever, develop to the magnificent perfection and size of specimens grown in rich soil in *moist* and *partially shaded* positions out-of-doors. Rose bugs in this locality occasionally attack early-flowering white and light colored varieties and naturally in full sunlight more than in partial shade. The damage, however, in such cases, not being so noticeable as on the individual flowers of roses, peonies and especially Japanese iris, does not, as a rule, interfere seriously with the garden effect of spiraeas and astilbes at all. Throughout the North the beauty of plantations in full sunlight may be enjoyed without any insect annoyance

whatever. The assertion that astilbes don't do in the garden at all applies to high arid situations without the necessary irrigation and reasonable amount of care.

Prejudices may temporarily delay a general recognition of even the highest ornamental merits. Nevertheless, as horticulturists we cannot for any length of time afford to overlook a choice and decorative material by means of which we may bring to light novel and superior floral effects. In regard to the future out-of-door employment, particularly of astilbes, I frankly confess I have my visions. In our arrangements of ornamental plantations along the winding course of brook and creek or the shores of lake and pond I believe we have been in the habit of using perennials rather sparingly. Instances calling for rich floral arrays invariably prompts us to make liberal investments in rhizomatous iris. Suppose we add to the gorgeous hues of the Japanese type of iris the tall slender spikes of *Astilbe Davidi*, *grandis*, or the new *Moerheimi*. Suppose we introduce amid the attractive greenery of ferns or alongside of, say the heavy foliage of funkias, clumps of *Astilbe Arendsi* hybrids with their graceful panicles of flowers in the choicest shades of pink. It is in this case simply the use of the highest quality in material that I am suggesting should have a trial. Under proper conditions the results will not only remove any prejudice but are likely to turn out a revelation of rare beauty and a credit to the originator.

The herbaceous spiraeas or meadow-sweets are also decidedly moisture-requiring plants. The old well-known species *Spiraea Aruncus* with freely branching white spikes in form somewhat resembling those of the

SPIRAEA ARUNCUS

much larger of *Astilbe grandis* is shown by one of our illustrations. Of the other white flowering species I mention *Spiraea gigantea*, 5 to 6 feet tall; *ulmaria* fl. pl., medium high, and the low growing *filipendula* fl. pl. as the most desirable. *Spiraea palmata* and *palmata elegans* represent the best pink flowering types, while the species *Spiraea venusta* and its latest improvement *venusta magnifica*—the latter 4 to 5 ft. tall—may be classed the best red meadow sweets.

Root division is the customary procedure of growers in propagating astilbes and spiraeas. Stock may be also raised from seed sown in sandy peat under glass early in spring. Plants are absolutely hardy as far north as Canada. In our northern boundary states a leaf-covering over winter is advisable.

Glenide, Pa.

Richard Roth

CLUBS AND SOCIETIES

VEGETABLE GROWERS' ASSOCIATION.

The convention of the vegetable growers at Chicago, Ill., a partial account appeared in our last week's issue, was considered a success, although the attendance was largely local, the number of members from other states not being as large as was hoped for. Vice-President Selby of Philadelphia, who occupied the chair in the absence of the president, made an especially favorable impression, always knowing what to do and doing it without hesitation.

The outing took place on Wednesday according to schedule, despite a steady rain, which was good naturedly declared always a friend to market gardeners. Almost a hundred automobiles were waiting at the La Salle to carry the visitors, and the French Gardens were first inspected, then the Poehlmann Bros.' plant at Morton Grove, where Aug. Poehlmann personally conducted the guests through plants A and C. Luncheon followed at the Wayside Inn, and 600 did full justice to the good things prepared for them. After dinner speeches with W. L. Kroeschell toast-master, followed. Among the interesting facts brought out were these, Cook County, in which Chicago is located, is 7th in agriculture in the United States and Lancaster, Pa. is first; we are schooled inside buildings but not educated; a single new idea is often worth the expense of a convention.

The closing event of the convention was a banquet, at which 176 were present, and was a fitting finale for the ninth annual meeting of the vegetable growers. W. L. Kroeschell again ably acted as toast-master and responses were made by N. C. Tolles of the Chamber of Commerce; H. W. Selby, Phila.; Vice-pres. R. L. Watts, State College, Pa.; C. W. Waid, Mich. Ag. College; S. W. Severance, Louisville, Ky., and C. E. Durst, U. of Illinois.

The trade exhibition was both big and comprehensive and the extensive displays by the Cook County school children made a wonderful impression. Among the trade exhibitors were the following:

American Greenhouse Mfg. Co., greenhouse fittings; Armour & Co., fertilizers; Beeman Tractor Co., motor cultivators; A. Dietrich & Co., short span greenhouse; American Mutual Insurance Co., cyclone and hail insurance for greenhouses; Coyne Bros.; John C. Moninger Co., model all-steel frame greenhouse; Lord & Burnham Co., section of pipe frame greenhouse, hot bed sash and boiler; Foley Greenhouse Mfg. Co., section of standard greenhouse and hot bed sash; Garland Mfg. Co., Garland gutters; S. J. Allen, Plaster, J. L. implements; Vaughan's Seed Store, implements, seeds, plants, etc.; Jos. E. Pollworth, fertilizers; M. B. Slane, emergency clamps; Leonard Seed Co., seeds and garden machinery; The Packer, trade paper; Hensell Grate Bar Co., grate bars; Kroeschell Bros. Co., steam boilers and refrigerating plant; Southern Cypress Co., model bungalow; H. Munson, boiler flues; Skinner Irrigation System; Advance Co., ventilating apparatus and fittings; E. J. Hammond, insecticides; Poehlmann Bros. Co., garden hose and insecticides; Superior Boiler & Engine Co., model of boiler; A. L. Randall Co., sundries; Brown & Co., agent Co.

Meetings Next Week

Monday, Oct. 9.

Cleveland Florists' Club, Hollenden Hotel, Cleveland, Ohio.
Gardeners and Florists' Club of Baltimore, Florists Exchange Hall, Baltimore, Md.

New York Florists' Club, Grand Opera House, New York City.

cement construction; Kentucky Tobacco Product Co., insecticides; Gray & Co., cement machinery; Market Growers' Journal; Ickes-Braun Mill Co., greenhouse lumber.

The University of Illinois, University of Ohio, University of Indiana, and University of Pennsylvania made extensive educational exhibits.

E. A. DUNBAR, Ashtabula, Ohio.
The following are the names of the exhibitors at the vegetable growers' convention at Chicago, Ill., who were present at the meeting of the vegetable growers' association at Chicago, Ill., a partial account appeared in our last week's issue, was considered a success, although the attendance was largely local, the number of members from other states not being as large as was hoped for.

LANCASTER COUNTY FLORISTS' ASSOCIATION.

At the monthly meeting held on Thursday evening, September 28, M. J. Brinton of Christiana read a paper which he called "Hash." Mr. Brinton is a little more than a florist; he is a man of affairs and a student of political and economic conditions, hence his "Hash" was pretty rich food, the kind that creates both brain and brawn. He reviewed the unhealthy condition of business today with its immense war profits along certain lines, profits that are a detriment to our particular business in the way they affect the labor and supply market. This increase of cost all along the line was used to demonstrate the necessity of our getting higher prices for our products.

He showed how the country at large was ripe for a good year in the florists' business and urged the production of high quality stock, so that this demand might be met with the satisfaction to the buyer that creates future business. Co-operation between all lines of our business was urged as a fundamental principle in the building of success, and especially between the grower and the distributor. He advised florists to keep in constant touch with business conditions and especially so in the general readjustment that will follow the close of the war.

His paper set us all to thinking, the first thought being one of gratitude for his able paper, and a hearty vote of thanks was tendered him for this contribution to our club literature.

The Flower Show committee reported gratifying progress and A. M. Herr gave a resume of the Vincent trip. Frank Kohr, Lemon Landis and A. K. Rohrer were appointed as an automobile committee to arrange for automobiles to be used on our visiting trips. Fred Spinner of Lititz had a very handsome vase of Chrysanthemum Smith's Advance on display.

The next meeting will be held Oct. 19th and we hope to have Mr. Otto Thilow of H. A. Dreer give us one of his lectures, as Mrs. Albert M. Herr, chairman of the Junior Garden Department of the Iris Club, has secured him for the afternoon. A trip will be made visiting the growers in the vicinity of Lancaster, starting from the square at 1 o'clock via automobile.

ALBERT M. HERR.

CLEVELAND FLORISTS' CLUB.

The regular meeting of the Cleveland Florists' Club was held Monday night, Oct. 2. The chief topic of discussion was the holding of a flower show in Cleveland every year, also the one to be held this year on Nov. 10, 11 and 12 at The Hollenden Hotel.

President Pentecost has announced the following standing committees: Executive—H. P. Knoble, chairman; Timothy Smith, Geo. Bate, O. P. Blackman and Frank Friedley. Entertainment—W. E. Cook, chairman; Frank J. Ritzenthaler, Chas. Bastian. Reception or "Glad Hand"—H. P. Merritt, chairman; H. P. Rapley, K. W.

PEONY DAHLIA — Mrs. Frederick Grinnell

Seedling 1911. The Most Wonderful Dahlia Introduction. Creates a Sensation Wherever Shown

Its color is pond-lily pink, and like the pond-lily, it will grow in water from a bud just showing color to a full bloom. It keeps anywhere from four to ten days and will show its color in artificial light as well as in sunlight. Grows equally well in shade or sun, does not require rich soil and has a delicate fragrance which is very inviting.

Has received the following awards:

- 1st Class Certificate New Bedford Horticultural Society, September 14, 1911.
- 1st Class Certificate Massachusetts Horticultural Society, August 8, 1914.
- 1st Class Certificate Newport Horticultural Society, August 13, 1914.
- Bronze Medal Massachusetts Horticultural Society, August 7, 1915.
- Bronze Medal Newport Horticultural Society, August 12, 1915.
- Special award Southern New England Country Fair, September 14, 1915.
- Silver Medal, New Bedford Horticultural Society, September 21, 1915.
- Silver Medal, Massachusetts Horticultural Society, September 9, 1916.
- Gold Medal, Rhode Island Horticultural Society, September 12, 1916.

Nov. 14-15, Providence, R. I.—Flower show of R. I. Hort. Soc.

his address on October Glories in Outdoor Flowers. He made a splendid address and scored many new points which it will be well for the experts to take note of. In illustration of his remarks there was one of the finest exhibitions of seasonable flowers we have ever seen. It was a liberal education to every member of the Club and worth to the student many times the cost of membership. October being the annual meeting, the following were elected officers for the ensuing year: President, Adolph Farenwald; vice-president, D. Colflesh; secretary, David Rust; treasurer, George Craig.

AMERICAN ROSE SOCIETY.

The American Rose Society has received application for Rose Test Gardens in the States of Washington and Texas. The interest that has been aroused in this line seems to be going country wide, and predicts better trade for rose growers.

This year there has been a marked increase in the receipt of Associate members: the present membership of the Society exceeding four hundred not including Life Members.

There will be a meeting of the Executive Committee shortly at which matters of decided interest will be taken up. Twenty-eight members have subscribed to the fund for the investigation of "Black Spot."

BENJAMIN HAMMOND, Secy.
Beacon, N. Y.

NEW JERSEY FLORICULTURAL SOCIETY.

The eleventh annual show of the New Jersey Floricultural Society was held in the Jr. O. U. A. M. Hall, on Monday, September 18. The date proved to be a trifle early and the number of entries fell short of the previous year. The vegetable classes were well filled with some fine displays. A group of herbaceous plants and shrubs by the Elizabeth Nursery Co. was well staged and received a special prize. A collection of fruit by S. M. and A. Colgate, of Orange, was the finest ever seen in this part of the country. The judges were John P. Sorenson, Alex. Robertson and Walter M. Gray.

List of Awards.

36 Dahlias in 12 varieties, Hitchings cup, Dr. D. P. Millsbaugh, Paterson, N. J.
50 Show dahlias, 1st, C. C. Goodrich, Orange.
25 Show dahlias, Mrs. Wm. Barr, West Orange.
25 Decorative dahlias, W. A. Manda, Inc., So. Orange.
Centrepiece of dahlias, Peter Hauck, Jr., E. Orange.
Display of seedling dahlias, Mrs. Wm. Barr.
Best flower of dahlia "Hortulanus Flet.", Dr. Millsbaugh.
Best display of "Canna Firebird" in pots, Peter Hauck, Jr.
Display of gladiolus, S. M. and A. Colgate, Orange.
12 Decorative dahlias, W. A. Manda.
12 Cactus, Mrs. Wm. Barr.
6 Decorative, Hugh Volkening, Orange.
4 Yellow show, Essex Co. Country Club.
4 Pink show and 4 White decorative, Dr. Millsbaugh.
4 Red decorative and 4 Maroon decorative, W. A. Manda.
4 Red cactus, Mrs. W. Barr.
4 Cactus and 25 Pompon, Dr. Millsbaugh.
6 Decorative dahlias, 6 vars., W. A. Manda.
Specimen show, Dr. Millsbaugh.
Display of vegetables, Thorburn silver cup, Dr. Millsbaugh; 2nd, Henderson & Co. prize, Peter Hauck, Jr.
Open to All.—Collection of vegetables, Stumpp & Walter silver cup, Peter Hauck, Jr.
Display of fruits, S. M. and A. Colgate, Outdoor grown grapes, Peter Hauck, Jr.

AMERICAN ASSOCIATION OF PARK SUPERINTENDENTS.

Much local interest is being taken in the coming convention of the American Association of Park Superintendents to be held in New Orleans, La., on Oct. 10, 11, 12. At a meeting held in the parlors of Hon. Martin Behrman, mayor of the City of New Orleans, who presided over one hundred and ten chairmen and members of the various local park boards (in New Orleans, each park has its separate board or commission), the mayor emphasized the importance of the coming convention, and earnestly requested every member of local park boards to attend all sessions, expressing himself as assured it would be a great inspiration and benefit to them in their park work. The mayor was authorized to appoint a sub-committee to have charge of the details of entertainment, which will include inspection trips to various parks, a boat trip, a trip to the Southern Yacht Club, the City Nursery, etc. The sessions will be held at the Grunewald Hotel.

RYNSBURG, HOLLAND
32 Broadway New York

Winter Spencer Sweet Peas

THREE EXCELLENT SORTS

BRIDAL VEIL

Pure white. A cross between White Orchid and Whitebelong, one of the earliest. Its color and purity of color make it one of the best. White seed: 1 Oz. \$1, 1/4 lb. \$2.50, 1 lb. \$2.

PINK-AND-WHITE ORCHID

Similar in color to Christmas Pink, but produces a larger flower on longer stems. 1 Oz. 65 cts., 1/4 lb. \$2, 1 lb. \$7.50.

YARRAWA

Bright rose-pink, with light wings. Yarrowa has the heavy foliage and strong growth of the summer flowering type, and is a true winter blooming Spencer. Seed sown early in October will flower about January 1, and bloom profusely and continuously until June. Yarrowa is absolutely fixed and true to color and type. The flowers are exquisitely waved, and when full grown will average 2 1/2 inches in diameter. They are borne usually in fours on extra-long, strong stems.

Australian grown seed: 1 Oz. \$2.00, 1/4 lb. \$7.00, 1 lb. \$24.00.
Californian grown seed: 1 Oz. 65 cts., 1/4 lb. \$2.25, 1 lb. \$8.00.

Full descriptive list of all Winter Spencer Sweet Peas and Seasonable Flower Seeds will be found in our new Bulb Catalogue, mailed free on request.

ARTHUR T. BODDINGTON CO., Inc.

128 Chambers St., NEW YORK CITY

"TEAR DOWN" WEEK.

The Massachusetts Forestry Association is heading a movement to free the public shade trees and other objects within the public highways of the State, of all illegally posted advertising matter.

These signs have been declared a public nuisance by law, and should be removed. The parties responsible for posting such signs may not know that they are breaking the law, and are subject to fines, but such ignorance will not excuse them. Automobile Clubs, Women's Clubs, Boards of Trade, and other organizations are being asked to co-operate in this work to rid the highways of their respective towns of this obnoxious nuisance. Many of them have already made plans to participate in this clean-up work during the "Tear-Down" week, October 9 to 14 inclusive.

Here is a chance for the public to register its sentiment concerning this illegal advertising. The beauty of our highways in many sections is spoiled by these signs. Our shade trees which represent a value of hundreds of thousands of dollars, are in many instances being injured by such signs. Thousands of tourists visit our state annually because of our good roads. Why should we not keep our roadsides beautiful? Everybody can help to clean up our highways. If everyone will take it upon himself to remove these signs along one mile of road near his home, the whole state can be covered in this one week.

We hope that this appeal will enlist all persons who have felt that some-

thing should be done in this matter to the end that our highways shall again be restored to their natural beauty.

—Press Bulletin, No. 7.

PERSONAL.

Thomas Flynn has resigned as florist for Higaho Company at Osterville, Mass., to take charge of an estate on Long Island, N. Y.

John Oliver, gardener on the Shedd estate, Tilton, N. H., met with an accident which will confine him to his home for several weeks.

H. W. Ross has accepted again the position of superintendent of Newton Cemetery, Newton, Mass., filling the vacancy caused by the death of his father who succeeded him as superintendent two years ago when he resigned to go into business in Worcester.

The complete schedule for the Annual Exhibition of the Tuxedo (N. Y.) Horticultural Society has been issued. It is a finely printed and attractive publication. The show will be held at the Tuxedo Club on Friday, Saturday and Sunday, Nov. 3, 4 and 5. Thos. Wilson is secretary of the society and Fred'k Bentley is exhibition manager. There are ninety-eight classes in the prize list.

Shipments received this week by McHutchison & Co. include 500 bales of raffia, also 22,000 pieces of raffia cloth, which was introduced by them for the manufacture of men's hats.

BELGIAN AZALEAS COMING.

From McHutchison & Co. we have received the following encouraging communication:

Since we wrote you Sept. 19th with regard to shipments of Azaleas, etc. coming this fall from Belgium, the prospects have become more favorable. We know now definitely that at least some shipments will come—perhaps all of them. Several hundred cases are already in transit from Rotterdam per S. S. Ryndam. Of course we cannot tell which orders the shipments contain until the shipping documents arrive.

August Rolker & Sons also write as follows:

We had cable last Thursday stating that the first shipment of azaleas are coming by S. S. Ryndam, leaving Rotterdam, Saturday, September 30th.—This notice refers, of course, only to shipments in our care; what others are getting we do not know, but we think this means the starting of azalea shipments from Belgium for this season. We believe this success is mainly due to the efforts of the Belgian Chambre Syndicate Horticole, assisted by the efforts of our Rotterdam forwarders to influence England to allow a liberal advance payment to the Belgian growers from last year's funds remitted by British request to a London Bank, and held there in trust for the Belgian growers.

LILIUM FORMOSUM

LILIUM FORMOSUM BULBS

We have just received a late shipment of bulbs of this favorite type of Lilies, which are extra fine. You should be sure to try some of them. Our bulbs have been grown from the original true type, and none better can be obtained at any price. We advise immediate ordering, as the stock is limited.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Kirby B. White, Detroit Mich.; First Vice-President, F. W. Bolgiano, Washington, D. C.; Second Vice-President, L. L. Olds, Madison, Wis.; Secretary-Treasurer, C. E. Kendel, Cleveland, O.

Crop Reports From Holland.

From the September crop report of Slus & Groot we extract the following: Cabbage, Red Cabbage, Brussels Sprouts, Borecole—Stand here and there sufficient but in general very poor.

Turnips and Swedes—Poorest average yield in many years.

Mangels, Sugar Beets, Beets—Stand rather satisfactory.

Kohlrabi—Very poor and scanty.

Radish, Winter Radish—Unusually small plantations but does not look bad. Several sorts of Winter Radish fail wholly.

Onion Minimum acreage, and with home requirements little will be left for export.

Garlic—Stand very good.

Parsley—Stand averages rather good.

Chervil—A moderate crop.

Spinach—Middling stand and not more than one-half normal produce may be expected.

Cucumber—Looks like a poor and rather late crop.

Peas—Only small area, but not unsatisfactory.

Dwarf Beans—Several fields totally lost; at best only a middling crop expected.

Running Beans—Small acreage. Crops retarded greatly.

Broad Beans—Stand rather good.

Parsnip—Stand satisfactory.

Scorzonera—A small average crop.

Corn Salad—Dutch large seeded sown on small scale and very high price expected. Stand not bad.

Celery—Small acreage. A sufficient crop if mild weather continues.

One Week's Imports.

Imports at the port of New York, of horticultural material, for the week ending Sept. 22, were recorded as follows:

Bulbs—France, \$6,744; Netherlands, \$280,357; England, \$13; Brazil, \$126; Hongkong, \$3,150; Japan, \$7,096.

Plants—Scotland, \$157; Bermuda, \$9; Colombia, \$400; Venezuela, \$336; Gibraltar, \$10; Netherlands, \$77.

Red clover seed—France, \$6,000.

Clover seed—England, \$2,727; Canada, \$4,693.

Grass seed—Denmark, \$7,236; England, \$140; Ireland, \$961.

Other seeds—Denmark, \$348; France, \$429; England, \$1,044; Bermuda, \$5; Hongkong, \$61; Japan, \$36; Canary Islands, \$328.

Nitrate of soda—Chile, \$159,637.

Other fertilizers—England, \$300.

Notes.

Palm seeds are reported to be a very scarce commodity in France and Great Britain.

Axel Knudsen, of Minneapolis, Minn., American representative for L. Daehnfeldt, Ltd., of Odense, Denmark, has received a cablegram from his firm announcing that the Danish Government has prohibited all export of Mangel seed. This embargo will prevent all deliveries of Mangels on the 1916 contracts. Mr. Knudsen says that—of course, it is possible that the embargo may be lifted again this fall, in which case notice will promptly be sent out, but with the present outlook, the prospect of delivery is very remote.

The Danish Export Review, for August, 1916, devotes four pages to an interesting description of Danish seed cultivation as carried on by Hjalmar Hartmann & Co., of Copenhagen. As

is well known, Denmark has in recent years attained a leading position in the province of seed cultivation and improvement, especially as regards all varieties of cabbage and the cruciform family of vegetables. The Danish seeds have such conspicuous properties and qualities that the markets of the world have long been open to them and among the producers and exporters best known and most highly esteemed in this country is the house of Hartmann, which for the past four years has been efficiently represented by Loechner & Co., of New York City. The firm of Hartmann was founded in 1894 and their export of cauliflower seeds to America dates from the year 1899. Recently they have acquired in addition to their previous large holdings a tract of about 300 acres of land near Copenhagen for the propagation and cultivation of advanced strains of their seed specialties.

FLORICULTURE AT OHIO STATE COLLEGE.

Instruction in floriculture has been offered for the first time this collegiate year at the Ohio State University College of Agriculture, Columbus. Opportunities are afforded for study of the main florist crops, their diseases, and insect enemies. Garden flowers, greenhouse management and construction, as well as flower shop work and landscaping, will also receive attention.

The courses are being offered both in the four-year college course which has already begun and in the three-year course which begins October 17. Instruction is in charge of Professor Alfred C. Hottes. Professor Hottes comes to Ohio from Cornell University, New York, where he was an instructor in charge of the work in garden flowers and of the winter courses.

HELP

to develop this field of the Retail Florists' business
still more as you will gain by it

the LaSalle Hotel. Our organization was instrumental in the selling of five million dollars worth of
every phase of the business will be discussed. For information and particulars write to

ALBERT POCHELON, Secretary The Florists' Telegraph Delivery, Detroit, Mich.

NEWS ITEMS FROM EVERYWHERE

CHICAGO.

The street carnivals are under way in various parts of the city. They are a stimulus to trade and retail florists are doing their part.

California chrysanthemums are arriving in a satisfactory condition according to some who are handling them and certainly they look fine after their long journey. They are grown in cloth-covered houses and are of the large varieties.

The Pot Plant Situation.

The plant situation in Chicago is not relieving that of the flowers. A few plants of the Celestial peppers lend a little color but these are still too undeveloped to be at their best. While there have been some chrysanthemums for cut flowers it will be a week or so more before the varieties used for pot plants will be out enough to make effective decorations. There are really no blooming plants to offer at this time. Boston ferns have been scarce all summer but the new crop will soon be in which will relieve the situation there. There has been and still is, a good supply of *Dracaena fragrans* and *Massangeana* in small sizes, but large sizes for special decorations have been scarce all summer. Palms thus far have been in good supply but if the same difficulties develop in the Belgium supply as now threaten in azaleas, the outlook will be for future shortage.

The Marshall Field Opening.

The opening of the fall season at Marshall Field's called for the use of thousands of Boston ferns, large palms and cut flowers, the market value of which would mean a year's salary to most men. In addition to these were the artificial ferns in beautiful autumn colorings, and chrysanthemums, which a casual inspection might class as natural. The arrangement of these and the blending of colors, as from the red brown of the ferns up to the yellow of the chrysanthemums made the bouquets, although artificial, an object lesson worth while. Festoons of vines outline the broad main aisle and overhead in the center room are four chariots, suggesting the assembling of goods from the four corners of the earth. These decorations are planned six months in advance and a large force of men and women are constantly working to that end. Mr. Fraser in charge travels everywhere for ideas. Frank Oeschlin's stock of specimen palms was heavily drawn upon for this notable event.

WASHINGTON, D. C.

As examination will be held by the Civil Service Commission on October 17, to fill a vacancy in the position of gardener at Tulalip, Wash., which carries with it a salary of \$720 a year.

It is reported that Mrs. Teresa J. Philipps, who operates The Flower Store at 2820 Fourteenth street, N. W., is to open a branch under the same

name at 134 West King street, in Martinsburg, W. Va. The local business will be looked after by Jack Philipps.

A number of representative business men of Washington have recently formed what is known as the Optimum Club which takes one member from each line of endeavor. Among the first members selected was George C. Shaffer, who will represent the florist industry.

George C. Shaffer has increased his store force by the addition of Miss Fay West and the return of Mrs. Nettie Supper. The former was at one time with the DuPont Flower Shop and also with the Washington Floral Co. The latter has been away from the store for several months.

W. F. Gude was chairman of the judges at the eighth annual flower show of the Brookland Brotherhood. Associated with him were F. L. Mulford, of the Dept. of Agriculture, and Mrs. L. Helen Fowler, manager of the Shaw Gardens. Mr. Gude served in a like capacity during the Petworth Flower Show, with George W. Hess and Mr. Gaylord.

David A. Bisset met with a very narrow escape from death in an automobile accident last Thursday while driving his car in which Mrs. Peter Bisset and Marie, Helen and Paul Bisset were also passengers. The car was overturned after having struck a piece of timber which had been dropped by one of the laborers employed in some street work. The entire party was taken to the Emergency Hospital by a passing automobilist. They were badly shaken up and suffered some few slight injuries.

A visit was made on Tuesday of last week to the rose gardens in Arlington Farms by Robert Pyle and Antoine Wintzer, representing the American Rose Society, and Prof. F. L. Mulford and Dr. Walter Van Fleet, of the Dept. of Agriculture. This trip was in lieu of the regular fall inspection by the members of the Society, for it was found that it would be impossible to get any large number of members together for a visit to Washington at this time.

In future the attempt will be made to keep the new roses pretty well together instead of planting them with the older roses. Each year's additions are to be kept together and only put with the older roses after having been in the garden for a year. It is deemed desirable to get the color combinations good when the plants are permanently placed; and, also, that only the vigorous growing plants are given permanent places. Nearly two hours was spent in the garden, following which a visit was made to the U. S. Botanic Gardens and other places. It has practically been decided upon to make an official visit in the spring when more members can be gotten together.

BOSTON.

Albert Stumph startled the other members of the Bowling League by bowling three record-breaking strings last Wednesday night. The scores were 124, 136, 112.

A local high-water mark for lilies was set this week when the blooms in some instances commanded a price of fifteen cents. This high-wire performance was due to an unusually strong clamor for lilies, with barely enough available to supply even an ordinary market.

Popular "Steve" Green, fresh from Bayersdorfer & Co.'s warehouse has camped in Boston for the week with a line of new fall samples that are catching the attention of the early morning visitors in the flower market district. He is displaying these in the headquarters of the Waban Rose Conservatories in Winthrop square.

Henry R. Comley was elected president of the Boston Retail Florists' Club on Oct. 4. Other officers were chosen as follows: Vice-president, Samuel Wax; treasurer, Julius A. Zinn; secretary, Harry Quint; directors, Henry Penn, chairman; Nathan Silverman, Henry Comley, Julius A. Zinn, Martin Tuohy and Martin Wax.

The Boston Flower Exchange, Inc., is to hold its annual business meeting at Young's Hotel on Saturday, Oct. 28. A dividend of 20 per cent. will be declared and the usual business proceedings will then follow. After the meeting a banquet and entertainment will be in order, and as the committee consists of S. J. Goddard and George Cartwright, those present may be sure of enjoying themselves.

At the meeting of the Horticultural Club of Boston on October 4, E. H. Wilson entertained the members and guests with an elaborate stereopticon lecture on the plants of China. Among the guests present were George E. Barnard, Ipswich, Mass.; J. J. Karins, Philadelphia; W. W. Castle, E. Weymouth, Mass.; Leonard Barron, Garden City, N. Y., and H. J. Patten, Tewksbury, Mass. Resolutions of respect to the memory of Jackson Thornton Dawson are recorded. W. A. Manda decorated the table with large vases of his dahlia novelties.

A series of garden lectures has been arranged by the Women's Educational and Industrial Union for six consecutive Monday afternoons at 4 o'clock at 264 Boylston street, beginning Oct. 9. Miss Jane B. Patten, special instructor in Botany and horticulture at Simmons College, will give the first four talks, which will cover the subjects of outdoor and indoor bulbs, the autumn garden and house plants. The fifth lecture will be given by Fletcher Steele, assistant in landscape architecture, Harvard College, who will speak on the "Intimate Fine Art of Garden Design." F. Schuyler Mathews, author of many books on birds and flowers, will give a talk on birds and their music in garden and forest.

PHILADELPHIA.

Martin Gannon, late with the Leo Niessen Co. started Oct. 2nd with Alfred M. Campbell as manager of the commission department at 1519 Sansom street.

Whetstone & Co., pipe experts, well known among the greenhouse men from their elucidations before the Florists' Club years back have been succeeded by E. W. Koons & Co. at 911 Filbert street, who continue in the same line.

S. S. Pennock and family arrived home from a month's vacation in Rhode Island on Sept. 28th. Mr. Pennock reports that nothing has been heard of Mr. Rankin, who disappeared from his home in Westerly, R. I., Sept. 12, and that the greenhouses consisting of about twenty-five thousand feet and stocked with roses are for sale or rent on very favorable terms. The agents for the property are The Washington Trust Co., Westerly, R. I., and Mr. Pennock.

On Saturday afternoon and evening, Oct. 7, there will be a flower show at the Twentieth Century Club House, Lansdowne—free to the public. It promises to be one of the best of the suburban exhibitions which are doing so much for the advancement of horticulture. Samuel S. Pennock is the president of the Flower Exhibition and he wants as many of his florist friends from outside points as possible to honor the show with a visit. Twenty minutes out from Broad Street Station.

CLEVELAND.

Market conditions remain very tight, there being hardly enough stock available to supply the demand.

Retail florists, who will attend the meeting of The Florists' Telegraph Delivery at Chicago this month, include F. C. W. Brown and H. P. Knoble.

Herb. Bate and Frank Williams, of The Cleveland Cut Flower Co. and Al. Barber of The Jones-Russell Co., will return home this week from a trip up the lakes.

F. J. RITZENTHALER.

Obituary

Reinhardt Cook.

Reinhardt Cook, a well known retail florist of New Orleans, La., died on September 19, at the age of 38 years. His demise while so comparatively young is a shock to his many friends in the trade by whom he was held in loving esteem. He leaves a widow.

Henry Kirke White.

Henry Kirke White, vice-president of the seed firm of D. M. Ferry & Co., Detroit, Mich., died suddenly of heart disease Sept. 23, aged 77 years. Mr. White was born in Unadilla, N. Y. In 1865, he was admitted to the firm, and in 1905 was made vice-president. He is survived by his wife, one daughter and three sons.

Edward Mawley.

We learn from the English journals of the death suddenly on September 14 of Edward Mawley, V. M. H., president of the National Rose Society. Mr. Mawley was seventy-four years of age. He was elected president of the National Rose Society two years ago after serving faithfully as secretary for thirty-seven years. He was a man greatly beloved by his associates. The phenomenal progress of the National Rose Society was in a large measure due to his ability and zeal.

Charles M. Griffing.

In the death of Charles M. Griffing, of the Interstate Nurseries, Macclenny, Florida, the horticultural interests of the state have sustained a severe loss. Mr. Griffing's departure came as a severe shock to his friends, as he was in the prime of life and had been in good health until a few weeks before the end.

Coming to Florida from New York State in early boyhood Mr. Griffing had made for himself an enviable place

in the business life of the state by his industry and honesty. As a member of the State Horticultural Society, the Florida Nurserymen's Association, an active member of the American Association of Nurserymen and of other national horticultural organizations, he was well and favorably known, and in Jacksonville his connection with the Chamber of Commerce and the First Christian Church brought him into close relations with the many phases of work for the upbuilding of the city, in all of which he was deeply interested.

For years Mr. Griffing has been a consistent advocate of diversified agriculture and horticulture. Along this line he had contributed a number of articles to the farm press of the South. At the time his last illness came on he was engaged in the preparation of additional material of this nature, under arrangements which would have given it very wide circulation. The deceased left an aged father, one sister, four brothers, a wife and several children, to whom has been extended the sympathy of a wide circle of friends and acquaintances.

SETTLEMENT OF CLAIMS FOR DAMAGED MAIL

It is expected that as a result of the action taken by Assistant Postmaster General Dockery those florists having claims against the Post Office Department growing out of the loss or damage of insured and C. O. D. mail will have less cause for complaint over apparent unnecessary delays in arriving at a settlement. Mr. Dockery says that examination of applications for indemnity in such cases shows that in a great many instances postmasters are not complying with the provisions of the Postal Guide requiring immediate attention to indemnity claims and to all inquiries received from the department in regard thereto. Employees handling claims are instructed to familiarize themselves with these provisions, and see to it that all documents and required information are complete before sending the claims for final settlement.

Flower Market Reports

BOSTON The shortage of stock that was noted last week has moderated and is felt in a reduced degree and only in the case of certain specialties. Carnations are still very few and they are not of champion quality. Roses have eased up quite a little but prices are in the main still fairly good. The week's sales of American Beauties have been a little above the average price for the season. Gladioli continue to enjoy a strong call with a good supply still in evidence. Lilies have held up well in price. Asters still persist in coming in but are decidedly poor. No large shipments of chrysanthemums have materialized thus far and there are barely enough of them to go around. Lily of the valley is again in short supply.

BUFFALO Business keeps up at a good pace and at times not enough stock can be had. Weddings have kept the white rose growers busy and made a lively call for lily of the valley. The finest Shawyer, Sunburst, Ophelia, Killarney and White Killarney are coming into the market and prices are quite satisfactory throughout. Of course there is still outdoor stock such as asters, marigolds, gladioli, cosmos, etc., although heavy frosts on Friday and Saturday last ended a good portion of this material. Lilies are good and enough are to be had. Dahlias are yet coming in but are not plentiful and have sold at good prices.

CHICAGO The only flowers coming into this market that can be said to be here in quantity are roses and so great is the demand, both local and outside, that there are not enough to go round. The shortage is so general that shipping trade cuts heavily into this market's receipts. Orders are cut in a large proportion of cases and effort is made to divide up as carefully as possible. Chrysanthemums, usually in full swing at this time, are only starting. Carnations for some reason are coming on slowly and stems remain short, even when flower is of fair size. Lilies are very scarce and there are not enough lily of the valley to meet demand. American Beauties are good and a good many are being cut, but not enough to fill orders. Orchids are away up in price owing to scarcity. As one grower remarked "nothing seems to go ahead" and while plants look good, buds do not open fast enough for the trade. Extra demands have been made upon smilax which have placed that favorite green in the scarce class also. Asparagus sprays are plentiful and are mostly from the south.

NEW YORK The progress of the season has its influence on the product coming into this market as well as upon its disposal. Roses show the direct healthy results of the clear,

cool weather which, with brief interruptions has prevailed for some time and while long stems and massive proportions are not yet obtainable the color and substance show a steady improvement over the summer quality. Carnations, also are showing up better but they have to go a good distance yet before they are any considerable factor in the exacting trade. There are still many gladioli of fair proportions, asters of questionable mien and dahlias good and bad. Chrysanthemums are increasing in number and in variety. Lilies hold a stiff place for the time being and lily of the valley refuses to back down. Cattleyas have emerged from their obscurity and down goes the price. Here and there a few violets peer around the corners with a timid curiosity to ascertain whether they are destined to

occupy the grand stand or only the bleachers this season.

PHILADELPHIA Business continues good and is all that could be

expected for this time of year. There is a fair amount of stock arriving and almost everything sells out pretty well. The rose market is in excellent shape with supplies rather on the short side. Russell is still the leader and there are some very fine Jonkheers arriving. Carnations continue to improve and the prices are holding up well. Lily of the valley is a little more plentiful and comes in very nicely for the fall weddings. The same may be said of cattleyas and other seasonable orchids. Gladioli and asters are still to be seen but the latter are short stemmed. Dahlias are in better supply and selling right well.

Flower Market Reports

(Continued from page 485)

WASHINGTON Business has shown considerable improvement. Aside from lily of the valley and asters, there are plenty of flowers. Violets have made their appearance, and chrysanthemums are becoming more plentiful. These latter and dahlias, now coming in large quantities, lead in the day's sales and it is a hard matter to get proper prices on anything else. Roses are much more plentiful. American Beauty moving at good figures. Gardenias are scarce. Orchids are more plentiful and cheaper. Lily of the valley continues to soar.

Mr. B. Progressive, Florist,
Everywhere, U. S. A.

Dear Sir: It will be a decided advantage
as regards prices and quality to place your
order with us.

Soliciting your order through this ad
cuts down the overhead selling expenses
and you positively get lower prices and
better quality. Our terms are liberal and
are a guarantee that you get a square
deal, all bulbs guaranteed true to name or
money refunded.

Write us and upon request we will mail
you our booklet giving prices f. o. b. New
York or Chicago, and we also cheerfully
furnish you with any information that
may be desired. Those of our friends who
will mail us a list of their requirements
will find it has paid them to do so.

Awaiting to hear from you at your pleas-
ure, we remain, Yours very truly,

Westerbeek & Klyn,

Sassenheim, Holland.

TRIALS OF DAHLIAS IN MINNE- SOTA.

Report of Dakota Trial Station Located at University Farm, St. Paul, Minn., Up to September 25, 1916.

Through the courtesy of some seven or eight growers located throughout the United States, about 700 tubers were planted between the 7th and 12th of June. Up to about the middle of July this section had altogether too much rain, making it difficult to cultivate, and being detrimental to plant growth. This was followed by drought up to the first of September. Some very hot weather was experienced a part of this time so that Dahlias planted early were very badly stunted. When the fall rains came on the latter part of August and September many of these plants started into growth, and with good growing weather, would have produced a fair crop of flowers. The weather from Sept. 1 to date has been rainy and cold, with several light frosts. The dahlia gardens were partially injured by frost on Sept. 18, although part of the plantings did not suffer at all.

We set some tubers the first part of July from old stock that we had at the station. These have made a good growth and are filled with buds. The foliage is bright and with a little warm weather, would give a good crop of flowers. Only about ten per cent. of the plants under trial have flowered.

The red spider was abundant during hot weather, although we kept it partly in check during the spring.

Some loss of plants was experienced during the dry weather, although not many. Apparently the tubers stood the drought better than the potted plants. The potted plants started out well in the spring, but were badly hit by the hot, dry weather, while the tubers were not so seriously injured.

Some grafted tubers were received and these did very well. The varieties that apparently have done the best and are at the present producing the best flowers are: Psyche, Uncas, and Geneva 162 F. Other plants are just coming into flower and will probably equal those named. A further report of these will be made when the tubers are dug.

On Sept. 1 the Garden Flower Society held a meeting at the Station and visited the gardens.

I think we have more flowers on our plants than any of the growers in the vicinity, but they have not produced anywhere near as many as they would with an ordinary season.

I hope those who have furnished tubers and others that have promising varieties will think it worth while to continue this work over another season, when climatic conditions may be better.

LE ROY CADY,
Associate Professor of Horticulture,
University Farm, St. Paul, Minn.

It is reported that the Country-side Magazine, published in Harrisburg, Pa., and until recently known as Suburban Life has been sold to The Independent. It is also published by Harper's Weekly.

PEONY FLOWERED DAHLIA MRS. FREDERICK GRINNELL.

We had occasion to mention in connection with the recent Dahlia Show in Boston the handsome new Peony Dahlia, Mrs. Frederick Grinnell, raised and exhibited by John P. Rooney of

New Bedford. We have now to record another high distinction accorded to this sterling novelty, news of which came too late for our issue of last week, in which it secured a first-class certificate from the American Dahlia Society at its New York exhibition. Up to date this new comer has won four certificate of merit, one gold medal, two silver medals, two bronze medals, and one special award, and the end is not yet. In color it stands without a rival and in all the other qualifications it is second to none. The color of the flower is described by Professor F. H. Hall of Geneva, as follows:

The body of the petal is deep rose pink often veined deeper shade, passing to mid-low pink toward tip with point pale amar- anth pink, the latter two areas increasing with age of flower. Base of petal marked lightly with light salmon orange, faintly bronzed. Large center, orange to cadmium yellow. Beautiful by both natural and artificial light. Possesses a distinct fragrance, most marked as the flower ages.

LANDSCAPE ARCHITECTURE EX- HIBIT.

In an effort to stimulate interest in landscape architecture there will be held in the Museum of the Missouri Botanical Garden, St. Louis, during the month of October, an exhibition of plans, drawings, models, and photographs of some of the best of the recent landscape developments in this country. This exhibition will be under the management of the American Society of Landscape Architects and of the Missouri Botanical Garden. Several of the best-known landscape architects of this country will contribute, and the Departments of Landscape Architecture of Harvard University, Massachusetts Agricultural College, the School for Gardening of the Missouri Botanical Garden, and other institutions will be represented. The work shown will include developments of private estates and home grounds, parks, playgrounds, cemeteries, and subdivisions, and a few plans and sketches showing the beautification of civic and neighborhood centers will probably be on display.

MASSACHUSETTS AGRICULTURAL COLLEGE NOTES.

Mr. and Mrs. Peter Fisher, of Ellis, Mr. Shea and M. A. Patten, of Tewksbury, were recent visitors at the college greenhouses.

A. S. Thurston, formerly assistant in the department of Floriculture, has accepted the offer of Iowa Agricultural College, Ames, Iowa, to head the Department of Market Gardening and Floriculture.

S. H. Hall, a graduate of the college last June, is now with S. J. Goddard, of Framingham, Mass. G. A. Read, a graduate of the college in 1914, is now manager of the Peckham Floral Company at Fairhaven, Mass.

The new perennial gardens have shown their great value to the college and the florists of the neighboring country this past summer. There are now over five hundred species of herbaceous perennials and it is expected that this number will be materially augmented in the future.

C. E. Wildon, 1916, has been appointed as assistant in the department of Floriculture to fill the vacancy left by Mr. A. S. Thurston. A. V. Osmun has been promoted to Professor of Botany and Head of the Department of Botany. Paul J. Anderson has been promoted to Associate Professor of Botany.

The M. A. C. Florists' and Gardeners' Club reports a great deal of enthusiasm for the coming year and it is planned to make this year the biggest year in the history of the club. E. Stanley Duffill, of Melrose Highlands, Mass., has been elected president; W. I. Cross, of Hingham, vice-president, and John J. Dizer, E. Weymouth, secretary-treasurer.

The new year has opened with an enrollment of thirty students in the courses in Floriculture. There are also two students entered in the graduate school as candidates for the degree of M. Sc. in Floriculture. These students are L. H. Jones, of Milford, Mass., and C. E. Wildon, of Melrose Highlands, Mass., both having received their B. Sc. in June, 1916.

The annual flower show will be held the second week in November. Plans are being made to make this show the largest yet held at the college. Special exhibits and prizes are being arranged for. The co-operation of the Northampton and Holyoke Florists' and Gardeners' Club has been assured. Prof. A. H. Nehrling is much gratified by the amount of interest and enthusiasm shown.

A FRIEND OF THE DAHLIA.

Editor HORTICULTURE:

Dear Sir:—Your editorial "Mutations of the Dahlia" is very timely and I thoroughly agree with you that something ought to be done to protect this splendid flower and some standard fixed by which new varieties could be judged as it is with the carnation, chrysanthemum, etc. Your editorial hits the nail on the head, and I hope that it may be brought to the attention of all growers and raisers of dahlias so that their efforts may be guided in the right direction.

Very truly yours,

GEO. W. FRASER.

Storrs, Conn.

ASSISTANT GARDENERS' ESSAY CONTEST.

The closing date of the National Association of Gardeners' essay contest for assistant gardeners is drawing near. The prizes offered by President William N. Craig, \$25 gold for first prize, \$15 gold as second prize and \$10 gold for third prize are for any subject pertaining to any branch of horticulture. The essays are limited to twenty-five hundred words and must be signed with a nom de plume, must bear no evidence of the author's identification and be mailed in plain envelope before November 1st (on which date the contest closes) carefully addressed to the chairman of the essay committee, William H. Waite, Box 290, Madison, N. J.

The contestant will also place his name and full address, stating the position he holds, in an envelope writing the nom de plume he signed to his essay on the outside of this envelope and mail same enclosed in an envelope addressed to the secretary, M. C. Ebel, Madison, N. J. This will not be opened until the judges have rendered their decision on the contest.

The successful contestants will be announced at the annual convention of the association which will be held in Washington, D. C., the first week of December.

The rules must be strictly followed to avoid disqualification. The essay must be written distinctly and on one side of the paper only.

PUBLICATIONS RECEIVED.

Book of Garden Plans, By Stephen F. Hamblin—This splendid book is just off the press of Doubleday, Page & Co., Garden City, New York, and it is new in text and illustrations and treatment of its subject, from cover to cover. There are thirty-two pages of illustrations, all beautiful, and twenty full page blue prints with thoroughly practical directions and perspicuous planting lists for each, with photographs of striking examples illustrating the basic idea. To make these plans as real and concrete as possible, the author has in mind an actual piece of property with definite conditions to be met in each case. In this way are described; A Farm Home of Five Acres, Planting for a Small Suburban Lot, Shrub Planting for a Village Home, A Rose Garden, Wild Planting, A Small Informal Garden, A Natural Rock Garden, A Border of Fragrant Flowers, An Annual Garden, A Water Garden, etc. A final chapter gives information on the practical side of gardening—the trees, plants, shrubs, vines, etc., for various conditions, cost estimating, time for planting, and other details. The author is a well known authority and landscape architect formerly associated with Warren H. Manning and at present identified as an instructor in landscape architecture at Harvard University. This book should prove a great help to every gardener, either professional or amateur, and everyone who is associated with a home garden in any way will get through its use a service that hundreds of dollars would not buy. The price is \$2.00 net. Copies may be ordered from the office of HORTICULTURE.

Brooklyn Botanic Garden Leaflet, Series IV, No. 11, published by The

CAMBRIDGE, MASS.
NEW YORK, N. Y.**POT MAKERS' CREDIT ASSOCIATION.**

The Pot Makers Credit Association recently held their second quarterly meeting in Columbus, Ohio, with 95 per cent. of the pottery trade on hand. The credit system established at the former meeting has in a few months shown a considerable saving in losses, proving the beneficial results of a credit system—and that the large losses of the past will be no more. To illustrate, under the methods of the past, a customer of one potter neglects to pay him, and buying from a new firm each year he soon owes all, and he is able to undersell his brother florist. The vital question of long credit was also brought up and after much discussion was held over for the next meeting, when more data would be obtained. However, it was brought out that the long-time credits were undesirable and unfair to the customer as well as to the business man.

Advantages of Hitchings Plan Of Greenhouse Unit Building

J. L. SEVERENCE,
Mayfield Rd., Cleveland, Ohio.

IT'S like starting out with a runabout and ending with a big, high powered seven passenger car.

First you adopt your base plan, based upon which, each unit is built. Starting with, say a workman and two compartment house 18 x 50 as numbered 1, 2, 3 of this plan; then you can add the remaining houses one at a time. As each unit is added, you continue to have an attractive balanced effect. Always your layout will be practical. Always it will give to you the highest productiveness at least run-

ning cost. Each location, each condition, however, requires a special unit plan to meet its requirements.

In planning such a plan, our Service Department is freely at your disposal. At your suggestion, we will send one of our experts to carefully consider with you the best way to meet your conditions.

Our catalog we imagine you will find of unusual preliminary interest.

It will give you rather a conclusive impression of the kind of work we do, and who we are who do it.

PEONY DAHLIA — Mrs. Frederick Grinnell

Seedling 1911. The Most Wonderful Dahlia Introduction. Creates a Sensation Wherever Shown

Its color is pond-lily pink, and like the pond-lily, it will grow in water from a bud just showing color to a full bloom. It keeps anywhere from four to ten days and will show its color in artificial light as well as in sunlight. Grows equally well in shade or sun, does not require rich soil and has a delicate fragrance which is very inviting.

Has received the following awards:

- 1st Class Certificate New Bedford Horticultural Society, September 14, 1911.
- 1st Class Certificate Massachusetts Horticultural Society, August 8, 1914.
- 1st Class Certificate Newport Horticultural Society, August 13, 1914.
- 1st Class Certificate American Dahlia Society, New York, Sept. 27, 1916.
- Bronze Medal Massachusetts Horticultural Society, August 7, 1915.
- Bronze Medal Newport Horticultural Society, August 12, 1915.
- Special award Southern New England Country Fair, September 14, 1915.
- Silver Medal, New Bedford Horticultural Society, September 21, 1915.
- Silver Medal, Massachusetts Horticultural Society, September 9, 1916.
- Gold Medal, Rhode Island Horticultural Society, September 12, 1916.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

"If vain our toil, we ought to blame the culture, not the soil."—*Pope*.

Azaleas

Unpack as received and give the balls of roots a good dipping in a tub of water for at least an hour to soak them through. Pot firmly in 6 to 8-inch azalea pots, using any good potting soil, and stand them in a cool, shady house and keep rather close for a week. Spray lightly two or three times daily. Most of the azaleas are so heavily rooted that it is necessary to trim the roots so that they will go into a pot of suitable size. If the ball is cut down with big, sharp knife, I never saw the least harm come of it. Those wanted for holiday forcing should be gradually inured in a cool house of about 50 degrees, which will get them into shape for a warmer place in two or three weeks. Those wanted for Easter should be stored in a cool pit where they will get sufficient light and where the frost can be excluded in zero weather. On account of the slow importations, scarcity and high price, those who had some azaleas left over from last year and took care of them are in luck.

Care of Summer Flowering Cattleyas

Before starting to repot give the plants a thorough cleaning, but avoid as much as possible breaking the roots. Late summer flowering cattleyas that have had a good rest will now need repotting. It is always better to wait until new growths appear, with renewed root action, before giving them an overhauling. Use clean pans or baskets half filled with clean broken crocks. Small lumps of charcoal intermixed will help to make the drainage more effective. Quite a few growers use nothing but clear osmunda fiber for cattleyas and they seem to do fine in it, but, of course, every grower has his own idea as to compost. Newly potted orchids will only require just enough water at the roots to prevent the compost from becoming dry. When the growths have attained a few inches in length they will begin to make new roots into the compost and then the watering may be gradually increased.

Lilies for the Holidays

We should be able to count the buds the first week in November, if we want to be sure of the lilies being on time for the holidays. It is a very easy matter to hold them back at this season of the year. Plants of *Lilium Harrisii* that are wanted for the Christmas trade should be pushed from now on. Keep them as near the glass as possible and it is advisable to thoroughly damp down the house twice a day, especially in bright weather, also give them free syringing overhead on all good days. When lilies have their pots well filled with roots and are healthy they can stand anywhere from 65 to 70 degrees at night, with ten to fifteen degrees higher during

the day with sunshine. To enlarge the flowers and give color to the foliage, apply liquid manure twice a week. To keep the aphids down fumigate once a week. See that they have enough of room from time to time.

Otaheite Oranges

Give good syringing once a day now as it will be a great help in keeping down scale and mealy bug. By all means strive to keep free of these pests if you want highly finished plants. Give a sunny place with day temperature as near 70 to 72 as possible and from 52 to 58 at night. When pots are well filled with roots give liquid manure once or twice a week and examine them each day to see which ones need to be watered, as some will require a more liberal supply than others. Place them far enough apart and turn them around frequently.

Violets

During the daytime, even in cool weather, it will be necessary to withhold artificial heat and open all the ventilation possible. In a warm atmosphere the leaves will push out very rapidly although scarcely any flowers will appear. Continued warmth above the danger line mentioned is fatal to the production of flowers. The amount of heat will have to be determined by the character of the weather. The main thing is that the temperature must not rise above 45 degrees with fire heat. If leaf spot appears pinch off all affected leaves and then dust with dry Bordeaux mixture. Another good remedy is to syringe with a solution of potassium sulphide to a gallon of water. The violet house should be fumigated once every ten days or two weeks. The soil should be well drained and kept only moist. In applying water do not wet the entire bed unless it is dry all over. In dry places involving only one plant, while the remainder of soil is still moist, the dry places should be watered and the remainder of the bed left untouched.

Reminders

Keep sweet peas at from 40 to 45 degrees at night, with a 10-degree rise during the day.

Where you have not filled up the coal bins yet lose no time in getting in the winter supply.

Give ericas, azaleas, acacias, bay trees, epacris and other cool hardwood stock that you do not need until spring, a cool house of say about 40 degrees.

Keep show pelargoniums on the dry side until an inch of new growth has been made and then repot and place on a sunny bench in a temperature of 50 degrees at night.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Washing Pots

With the summer pots slacked up a little it will be well to stop a while and get all the pots cleaned up and put away so that they will be all ready when potting time comes around again which will be soon enough, although it seems but yesterday that we planted the last bench. It is very important to see that the pots are thoroughly clean on the inside. The most important place is the ring near the top about where the level of the soil will come. There is generally an extra thick scum on this, and if not carefully washed some of this will remain and spread over the new soil when the pot is used again. The old method of washing by hand can only be practiced where help is cheap and plentiful, and even then it will pay to wash the pots with time and labor-saving machinery, such as can be purchased or made at home. To make a pot washer does not require a skilled engineer, and anyone handy with tools will soon make one out of material generally found lying around idle. A shaft and a pulley are the main things, the pulley being attached to one end of the shaft and the brushes to the other end. To save the floors of the sheds, the work can be done outside as there is bound to be some water thrown around and this would never agree with the floors if they are of wood. The best way is to arrange to put a gang of men at the work and clean it up in no time. Where an electric motor is used for power, care should be taken to see that proper protection against water is provided, as no water must come near the motor and positively none into it, as water is as good a conductor of electricity as there is and a little of it in the working parts of a motor would prove fatal to it, not to mention the men around the machine who would likely get hurt by the short circuit that would result. A piece of roofing put over the motor is as good protection as any. Covering with a canvas is good but the motor must have air to keep cool, as otherwise it is likely to heat and wear out fast. Roofing is waterproof and stiff so that it will not hug the motor as much as a canvas would, and in this way the motor will keep much cooler. While the pots are being washed it is well to see that they are all the same size, and if mixed at all they should be properly graded. Also all cracked and broken pots should be thrown out. Before washing the pots should be soaked for several days in barrels full of water to soften all the dirt and thus save a great deal of time and brushes when the washing is done. Last but not least it is best to take inventory of all pots on hand and their respective sizes. Then with a list of plants to be grown and a list of pots it is simple enough to figure out the sizes that have to be ordered and this ordering should not be put off until the plants are in pots and pot-bound but, should be done now, thus giving them plenty of time to come, for if reports are correct the pot manufacturers are very busy and freights move slowly, so order them now and have them when they are needed.

Grading for New Houses

Right now is time to grade for all new houses that are to be built during the winter or early spring. If the work is done now the soil will have a chance to settle before the houses are built and there will be no settling of walls or benches after the houses are up. If the ground is very stony it will be well to watch where the stones are put so that they will not be in line where the columns or posts are to come, and be in the way when the holes are dug. It will be best to lay the ground out properly, and then grade right from one end to the other being careful to fill and cut to within a quarter of an inch. By having the ground ready many dollars and much annoyance will be saved as the building can then go right ahead, and if all is graded as stated above it will be a simple matter indeed to set up the benches, which is quite a proposition on uneven ground. Consider well the lay of the land so that no trouble will be experienced with water later on and the whole plant can be drained, not only the houses but the cellars as well, as there is nothing more annoying around a place than a wet cellar. Care should be taken to consider well all plans for the future, as many a dollar can be saved by careful planning now and avoiding expensive alterations later when more houses are added. If everything is carefully planned an addition should be built to the place without spending one dollar for changing anything on the old plant.

The Sod Heaps

In sections of the country where the soil is very heavy it is necessary to have all the sod heaped up in the fall so that the sod will be in shape to go into the benches in the spring. This work should not be put off too long now, as later the rains will so soak the ground that it will cost at least half as much more to put up the heaps as it would now while the soil is still a little dry. In taking the soil off the fields see that the field is not robbed too much so that there will be a chance for it to recover in as short a time as is possible. This can be done by plowing shallow, and taking the sod up with a fork and not a shovel. All that will drop through the fork should stay right on the field. It will be better for the field and for the roses too, as they want only the fibrous part of the sod. When it comes to manure see that there is plenty of it put into the soil and that the layer of sod is not too thick. Six inches of sod and then manure is right except that the very bottom layer of sod had better be thicker so that it will absorb all the leachings from the soil and manure above. If the layers of sod should be made too thick the manure will not have a chance to work through the soil as it should, and it will not be in as fine condition as it would if the sod layers were made thinner.

Montbretia Syn. Tritonia

(See Cover Illustration)

Indigenous to South Africa, montbretias are mid-summer and fall flowering plants producing beautiful spikes of wax-like flowers in brilliant tints of yellow, orange, orange-scarlet and crimson. Plantations of montbretias survive our winters safely under cover, *providing this covering is heavy enough to keep the bulbs from freezing.* In doubtful cases it is better to take the bulbs up in the fall and overwinter them like the gladiolus. Montbretias planted in spring, however, begin to flower from two to three weeks later than those left undisturbed in the ground. For this reason when growing them for the cut-flower market in masses it is of advantage to overwinter one part of the stock in the ground and lift the other part for spring planting thus getting the main crops apart in time.

We all are familiar with the two old standard sorts—the golden-orange *Montbretia crocosmiflora* and the yellow *Gerbard's Orange* but very few have so far taken real notice of that grand large-flowering type introduced during recent years. Of vigorous growth and very free and productive, the spikes of this new race represent a very desirable material for high-class design work and the filling of vases in refined private homes. The cultivation of montbretias in quantities for the cut-flower business has been so far chiefly carried on in our northern summer resorts. The photograph of the two

large beds of the varieties *Germania* and *Sunset*, reproduced in the cover of this issue, was taken by your correspondent at the Mount Desert Nurseries in Bar Harbor, Me., about seven years ago. It gives us some idea of the crops of flowers which are raised in this famous establishment under favorable climatic conditions and excellent care.

The great popularity of montbretias as choice cut-flowers among the refined society people should induce commercial growers, and particularly private gardeners, to give them more space and attention than has been given in the past. Growing them for cutting it is desirable to start with at least from 250 to 500 bulbs of each variety. Planted for garden effect on the border, 25 of one shade 5 to 6 inches apart is usually sufficient.

As the names of montbretias, especially in European trade lists, steadily increase, I mention a few varieties which have been tried in this country and found distinct and desirable. Ernest Davison is a very good one in rich orange suffused with carmine. The large flowers of Geo. Davison show a bright orange yellow, while *Germania* still leads in orange scarlet. King Edmund is golden yellow, Lady Hamilton yellow with rose shadings in the center. Vesuve is an interesting debutante in rich crimson and Goos & Koeneman's latest introduction, *Rheingold*, with flowers 1½ inches across, rich golden yellow, center marked with crimson brown blotches, will in time prove simply indispensable.

Glenside, Pa.

Richard Rothe

HERBACEOUS PERENNIAL GARDENS AT THE MASSACHUSETTS AGRICULTURAL COLLEGE.

These college gardens are proving of great value to the florists in this vicinity in many ways. Not only is the reviving interest in herbaceous perennials which is spreading over the country being stimulated, but the florists are awakening to a sense of the value of much native material. A good example of this is our native asters. Long before they were heard of as a cultivated plant in this country, England and Europe had taken long strides in their cultivation and improvement. Today the New England aster is becoming more and more popular and its beauty of color and abundance of flower are certainly hard to surpass at any time of the year. New colors, too, are being introduced from time to time. In roses we have a most beautiful rosy pink variety. The most beautiful, however, is Wm. Bowman, a purple form very much like the type, but a decided improvement.

Then, there are also the group of New York asters (*A. novi-belgii*), probably the best known of the aster group, but not nearly as rich and effective as the New England aster. *A. cordifolius*, *A. laevis* and a variety of others—all have great possibilities for some enterprising hybridist. *A. cordifolius* is especially beautiful and very easy to raise.

Another well-known group is the golden-rods. Seldom do we like to admit the truth about ourselves, when it is to our discredit, but it must be admitted we Americans are slow to appreciate art and the beautiful in nature. We are but children when it comes to art. The English prize the golden-rod with its beautiful, stately

Perennial Plant Gardens at Massachusetts Agricultural College, Amherst, Mass.

and graceful plumes and rich yellow color above everything. Their gardens are not complete without it. And they have produced some greatly improved forms. And to think—only recently we were trying to pass legislation to exterminate this pest (?).

Another group of plants that has come in for a great deal of comment this year is the heleniums. *Helenium Hoopesii* for spring flowers and *H. autumnale* for the fall are certainly wonderfully useful plants and the sooner the florists of the country awaken to its value the better for their pocketbooks. One enterprising young florist of the vicinity recently used them extensively in a big wedding decoration. The outlay was

small and the profits very satisfying. And so it goes down the list. Many of these herbaceous perennials make wonderfully valuable material for the retail florist, not to mention the profits from the plants as a side line.

There are four or five hundred species represented in the collection here. The aim of the Department has been to plant the most important species and all the species found in the average nurseryman's catalogue are to be met with here. The value of the garden has been established and it is to be hoped that the collection will be increased from time to time as funds become available. C. E. WILDON.

tryside and wildwoods for the floral gems which Nature has so bountifully bestowed. The extent to which this collecting business is carried is not generally realized. Some of our most beautiful native plants have been practically exterminated from districts where they once abounded.

To revivify
the promologists

We have been interested in reading the series of resolutions adopted by the American Pomological Society at its meeting in Berkeley, Cal., in September 1915, printed report of which has just now been received. We note particularly the official invitation extended to the various national horticultural organizations, including the Society of American Florists and Ornamental Horticulturists, to hold their meetings for 1917 at some common time and place and that there be at least one union meeting to consider topics and questions common to all branches of horticultural endeavor. This sounds good but the proposition to form a "Federation" of all horticultural organizations—state, district and national—under the wing of the American Pomological Society strikes us as in some respects an instance of the tail undertaking to wag the dog, pomology being only one of several divisions of horticulture and so far as our observation goes not exactly one of the most strikingly progressive at the present time. The venerable Pomological Society has been doing some useful work right along, as we all know; but the art for which it stands as the chief exponent can hardly be expected to make much progress while the fact remains as stated by G. C. Roeding of California, that "you cannot get the interest of fruit growers unless you can show them forcibly that it will put money into their pockets. That is the only way to do it." May we respectfully suggest that this was not the spirit that animated the Hoveys, Wilders, Downings and other pomological giants of bygone days, neither is it the dominating influence in the activities of the Society of American Florists and Ornamental Horticulturists or other organizations which in recent years seem to have outdistanced the Pomological Society in tangible evidence of life and progress. The Massachusetts Horticultural Society has been during its entire history a consistent and steadfast ally of the American Pomological Society and a liberal patron of the fruit growing interests. Yet at its annual fruit and vegetable show held last week the only fruit exhibit which the judges found worthy of special award was a dish of apples of a variety introduced from England a generation or more ago, to which they gave "honorable mention." And of the fourteen varieties of apples and fifteen pears listed in the prize classes, all were varieties common from forty to eighty years ago! A circular letter addressed "To All Lovers of Horticulture" sent out by President W. H. Hutt of the American Pomological Society calls for a meeting in Washington, D. C., November 16-18, for the "unification and co-ordination" of the various pomological interests. We ardently hope that these activities foreshadow a big revival in every branch of fruit culture and believe that affiliation with other horticultural bodies should help materially to that end. The Society of American Florists and Ornamental Horticulturists, which is the nearest approach to a National Horticultural Society in this country has in operation a practical system of affiliation which we venture to commend to the consideration of the Washington meeting, for with its numerical and financial strength and particularly its unique National Charter that organization would seem to be in a position to meet the fruit growing interests half-way.

Robbing
Nature

The spoliation of woodlands, meadows and hedgerows by parties who make a business of the sale of collected native plants has been carried to such an extent in Britain that certain of the horticultural journals have refused to accept any longer the advertisements of these people, offering their loot for sale. It will be a good thing for this country also, when similar reproach may be visited on the pothunters who make a business of ransacking the coun-

OCTOBER GLORIES IN THE HARDY GARDEN

Abstract of Address Before the Florists' Club of Philadelphia by William Saville.

Before discussing the question of October glories in the hardy garden, I should like to claim a kind of "poetical license" as regards the exact time these plants are expected to be in bloom. Quite a number of subjects that one would expect to be still with us have—owing to the dry season—not had such a prolonged flowering period as usual; and, on the other hand, other subjects are not so far advanced as might be expected. I take it that when Mr. Watson assigned to me this subject he was thinking of the autumn flowering herbaceous plants—and hardy perennials are the plants in which I am chiefly interested.

To obtain a grand effect with herbaceous plants, there is no better way of planting—to show their best form of growth and color—than the long double border with, if possible, a grass path between; and it is this grass path that gives a greater additional charm, as not only does it make a splendid ground work for the plants, but it is always restful to the eyes, and comes as a relief, on a hot summer day, from hard, sun-baked gravel.

To have small beds of herbaceous plants is, as a rule, unsatisfactory; it is difficult to cover up plants that are past their best. To have the same border always bright—as well as a blaze of color—from April to October is impossible. The only way to have continued bloom in the garden is to provide separate borders for different seasons; and I think it much better not to destroy the beauty of the main border by trying to get it in partial bloom spring, summer and autumn.

When being shown around a friend's garden, one is so often told "you should have been here two weeks ago!" or in a month's time. It is a curious fact—never mind what time of year one is in that garden—there is always some excuse. The reason is, too much has been attempted. The border may look fairly well in May and June; it has a hard struggle in July; and in August it throws up the sponge and decides not to try any more.

To obtain success in the border, one must take particular care to have the ground well-prepared. If this is done properly at first the border will last for several years; though it will, of course, require a top dressing every year, and the dividing and replanting of some of the stronger perennials. It is extraordinary how plants that have been split up each year will withstand a drought; whereas those that have been left in position several years and have grown into hard clumps show very early in any drought that they are in trouble.

The planting is one of those things

that cannot be done in hap-hazard style, and before this is begun it is far better to work out a proper plan than simply to put the plants in, regardless of time of flowering and color; and, what is still more important, to choose those plants that will hide others whose period of bloom is over.

Allow some of the tall plants to come boldly to the front, bearing also in mind that it is more effective to plant in long, irregular clumps than in the round clumps generally seen. The constant repetition of the same kind of plant should be avoided as much as possible. One generally has a particular favorite and likes more than one clump of it; but, as a general rule, plant a generous patch and be done with it. Plant thickly—no ground should be visible when the border season is on. In a thickly-planted border weeds have a poor chance.

It should be the aim in starting (as you enter the border from either end) to have flowers of light coloring and foliage plants of grey-glaucous or bluish leaf. As one passes to the centre the color is allowed to become stronger and stronger, until, in the centre position we have one strong color vying with another. There is a craze—which I have not seen successfully carried out—to have borders all blue; or graduated from white to pink; to golden; to bronze and up to crimson; but, in my opinion, a mixed border is preferable.

September and October are suitable months for planting if the soil is light and friable; but, in heavier land, it is safer to prepare the ground now and plant in spring, as winter mellow the surface and enables the soil to be more closely and firmly pressed around the roots and collars of the plants.

In planting it is important that the roots should be put down to full length and not be curled to fit the hole prepared for them, as it is upon these main roots that the plants rely to stand the summer drought.

We will now presume that the border has been planted. Weak growths have been thinned out; the depredations of slugs and cut-worms have been forgotten; and the plants have been properly staked at the right time. What have we to show for all this work?

The large family of *Phlox decussata* one might describe as opening the season of fall flowering plants; and there is no other family that gives such tone to the border. A few of the best varieties are: *Europa*, *W. C. Egan*, *Elizabeth Campbell*, *Gefion*, *Rynstrom*, *Rhineland*, *Tragedie*, *Wanandis*, *Baron von Dedem*, *Frau Anton Buchner*, and *Rosamund*, and these would make a good dozen. The dahlias and hardy chrysanthemums have had a wide popularity. I will speak of these later.

In yellow-flowering plants we have *Anthemis Kelwayi*, with *Helenium*

pumilum magnificum, *cupreum*, *Riverton Gem* and *Riverton Beauty*; and the large family of *Helianthus*, taking *Multiflorus fl. pl.*, *Wooley Doll* and the stately *Orgyalis* with its medium-sized golden yellow flowers as examples.

The red cardinal flower and *tritomas*; the deep blue of *Echinops Ritro*; the light blue of *Salvia azurea*; the graceful white flowers of *Anemone japonica* and the various-colored Giant marsh mallows (showing wonderful improvement in the size of the flowers and intensified coloring over the native rose mallow) all help to give the border that charming effect we desire.

The best results are obtained with the deep blue *Plumbago Larpentæ* by planting it in poor soil; in a position facing south, and it is, perhaps, curious that this is not more often grown. The blooming period of the border is carried on with the help of such plants as *Sedum spectabile*, spec. *Brilliant* and *atropurpureum*. *Penstemon Sensation*, a beautiful plant bearing spikes of large gloxinia-like flowers in a great variety of bright colors, including rose, cherry, crimson, purple, lilac, etc., until frost, but the plant must be given protection in winter; also *Penstemon barbatus Torreyi*. The newer varieties of *Anemones*, such as *Alice*, *Geant des Blanchés*, *Whirlwind*, *Rosea Superba* and *Loreley* (a neat semi-double flower, 3 inches in dia; of a bright silvery pink) should not be forgotten.

The plants best suited for the front row are many of the silvery *Artemesias*; the silvery foliage of *Santolina incana*; the grey foliage of *Stachys lanata*; the glaucous leaves of *Elymus glaucus* (blye Lyme grass).

The most precious, perhaps, of the hardy autumn flowers are the *Asters* of our American woods, and the improved European varieties. The best of these give a delightful mass of bloom, impressive in September and October. Include the light and deep purple and pink of the *amellus* varieties; the white, lilac and lavender of the graceful, feathery-flowered *cordifolius* family; the small many-colored flowers of the heath-like *ericoides* section; the tall varieties of *Aster Novæ Angliæ*; the numerous varieties of *Novæ Belgii* (included in which are the semi-double *Beauté* of Colwall, the perfect form of *Feltham Blue* and the soft pink of *St. Egwin*). If the border be properly planted and staked, a sea of bloom is visible when viewed from either end; enabling us, in the dull winter months to come to look back with satisfaction on the closing scene of autumn flowers.

To those of you who grow and retail your own plants and flowers and have little ground around your houses to spare, I would suggest that you will find it profitable to pay more attention to perennial plants. Fritz Bahr, in his notes on the week's work, in the Florists' Exchange, has been advising you

to do this for several years. But do not treat perennials as left-overs from spring sales and expect to make a profit; because if you do you will be disappointed and apt to say "Oh, I don't see anything in growing perennials!" Give them the same attention that you do your field-grown carnations, asters, vincas, ivies or other plants from which you expect to make a profit. You know if you do not give the necessary attention to carnation plants in the field you will have very few Beacon to retail at \$2.50 a dozen on December 24th. I believe perennials will pay you as well as asters have paid you—this year, at any rate—but you took a chance on the asters, prepared the ground for them, kept them cultivated and clean. Why not plant a piece of that ground to paeonies or delphiniums now; and when the asters are going off at the neck and the beetles are busy next summer, you can go out and cut belladonna or other delphiniums on three-foot stems, and you will find that your customer will take them, and also, in many cases, leave an order for plants at least a quarter each time.

Do you know that on August 20th this year some spikes of delphinium were sold in New York market at \$2.00 a dozen? They were fine spikes, I admit, but did you get the same price for speciosum lilies at the same time? I have had phone calls from the wholesalers in this town; also from Atlantic City, offering me \$25.00 for 250 spikes of belladonna, which convinced me that the demand was there, waiting to be supplied. I replied that we were not in the cut flower business, and diligently set to work to harvest all the seeds possible, so that you could have a chance. I read with interest the items discussing whether a four-inch geranium can be sold profitably at ten cents straight or a dollar a dozen. Sow digitalis and campanula about a month earlier than you put your geranium cuttings in, get them into 3½ inch pots by fall, keep them in a frame all winter, with a few dry leaves over them as a protection for the foliage, give them air early in the spring, keep them nice and stocky and hand them out to your customers at \$1.50 a dozen—they will get a lot of satisfaction and you will get a better profit. Get acquainted with some of the plants I shall mention, and make your customers feel you are giving them intelligent advice when they ask for suggestions. Your customers are taking a greater interest in outdoor gardening than they ever did before. They are not going to Europe in such large numbers every year, and many of them are using the time to beautify their own grounds.

Look up some of the magazines devoted to outdoor life and country pursuits and note the number of Garden Clubs that have been formed. See the number of demonstrating lessons that are being given actually in the gardens of the members. Result? I will venture to say that many of the stocks of hardy plants in the larger nurseries are lower at the present time than they have been for many years. If you do grow a few more hardy plants than you dispose of in the spring, plant them out; they will give you flowers that will be acceptable before the newly-planted carnations have begun to bloom and when

the first crop of roses opens up too quickly on you. They will also give you a greater variety—and one sale leads to another.

In the autumn you will have noted the flowers that have been in demand. Increase your plantings by division in October or early spring. To-night I am to speak only for fall flowers, but a good plant catalogue and your own good judgment will suggest plants that you can profitably use all through the summer months.

During the past few weeks, I have noted the following hardy plants, in addition to those already mentioned, and most of them are suitable for cut flowers or decorations.

Aconitum Wilsoni is a strong, stately plant, growing five feet high, with large violet blue flowers and is the latest flowering Aconite. The new *Anemone Hupehensis*, a recent introduction of merit from China, grows one foot high and produces flowers of a pleasing pale mauve rose one and one-half inches in diameter, from August until late autumn. The beautiful *Artemesia lactiflora*, four feet high, clothed with elegantly cut dark green foliage and terminated by panicles of hawthorn-scented creamy-white spiraea-like light and graceful flowers, is unlike any other plant in bloom at this time. The native *Boltonias*, with single aster-like flowers, give a showy effect in the fall and produce literally thousands of flowers. The *Buddleia* (or Butterfly Bush, as it is called) is deservedly popular with the florist. This shrub, from a young plant set out in May, will mature to full size the first season. It produces long, graceful stems which terminate in tapering panicles of beautiful lilac-colored flowers that are of miniature size and borne on a flower head which is frequently ten inches long. The second year it generally commences to flower in June and continues until nipped by severe frosts. I venture to predict that the *Buddleia* will become one of the most popular plants ever introduced.

The shrubby *Caryopteris mastacanthus* (or Blue Spiraea) is a handsome plant, about three feet high, carrying its rich lavender-colored flowers the whole length of its branches. *Chelone Lyoni*, with heads of purplish flowers and the white variety, are both useful. The free-flowering *Shasta* daisies, and the varieties *Arcticum*, *Alaska* and *Vermorensis* are among the freest flowering plants of September and October. The dense white spike of *Cimicifuga simplex* is appreciated, and when cut lasts in perfection a long time.

Coreopsis lanceolata, with its rich golden-yellow flowers, is invaluable for cutting and succeeds everywhere. The globular deep metallic blue heads of *Echinops Ritro* remain attractive a long time in a dry condition; and the finely-cut spiny foliage and beautiful amethystine blue heads of the Sea Holly are most ornamental. *Eupatorium ageratoides*, a strong free-growing plant, with minute white flowers in dense heads, is splendid for cutting; and the pretty *Eupatorium coelestinum*, with light blue flowers, similar to *ageratum* is in flower from August until frost. The common native *purpureum maculatum* (or Joe Pye weed) is useful in low ground. The gorgeous colored *Gaillardia grandiflora*

succeeds in any soil, in a sunny position, and is in flower all the time from June on.

The ornamental grasses can be used with telling effect in autumn borders. *Erianthus Ravennae* grows ten to twelve feet high, and throws up numerous plumes, resembling pampas grass, and does not need the same winter protection. *Eulalias*, planted singly where the soil is rich and deep, take care of themselves, and grow rapidly into large specimens. All the grasses do best in a heavy soil, enriched with manure and an abundant supply of water. Among the small growing kinds, *Festuca glauca* has no equal and the giant reed *Arundo donax* will grow 12 to 20 feet high.

Similar in general habit to the *Helianthus*, but commencing to flower earlier, are the *Heliopsis*. They rarely exceed three feet in height and are very valuable for cutting. *Pitcheriana*, *scabra*, *zinniaflora* and the new variety *excelsa* are some of the best varieties. The golden yellow *Hypericum Moserianum* is a most desirable border plant of graceful habit, with stems drooping apparently from the weight of the flowers and buds. The new variety *Hypericum patulum* variety *Henryi* promises to be a very desirable addition to our yellow-flowered shrubs.

Lobelia cardinalis and *syphilitica hybrida* (a selection of our native *lobelia*) if planted in a moist, deep loam, are effective in September. *Lythrum alatum*, a compact plant, with crimson purple flowers, has just finished blooming. *Montbretias* are amongst the brightest of the late summer flowering bulbs, and deserve to be planted extensively and protected in winter. *Platycodons* (blue and white) with cupped, star-shaped flowers, are closely allied to the campanulas, and when they are established each plant will have ten or twelve stalks of lovely flowers and remain in flower a month. *Pyrethrum uliginosum*, the Giant Daisy, has flowers of glistening white on stems four to five feet high, and is most useful for cutting. The Golden Glow are about gone; but *Rudbeckia purpurea*, and the new variety *tubiflora*, with their peculiar reddish purple flowers with remarkably large cone-shaped centers of brown are still in their autumn glory.

The Rocky Mountain *Salvia azurea*, with sky-blue flowers, and the much-admired variety *Pitcheri*, which has larger flowers of a rich gentian-blue color, also the new *Salvia Uliginosa*, a stronger grower than the previous ones (growing five to six feet high and producing freely flowers of a corn-flower blue, with a white throat) are all splendid acquisitions in the autumn border. The carmine-colored flowers of *Salvia Greggii* (a native of the mountains of Texas) are particularly bright from August on.

Senecio pulcher forms a neat tuft of foliage, from which spring up—from July to October—stems carrying clusters of rosy purple flowers. To those of you who have grown the large round-leaved *senecios* of heavy stem and have, after a trial, consigned them to the bog, or the border of a lake, I would recommend this variety. *Silphium perfoliatum*, with its large single yellow flowers, is a good subject for the shrub border. *Solidago* (or golden rod) has finished blooming. I

SHRUBS

This New England and climate produces fine sturdy shrubs. Special trade prices. By the thousands, hardy Native and Hybrid Rhododendrons—transplanted and acclimated. Let us estimate.

BAILEY'S NEW STANDARD Cyclopedia of Horticulture

Six large quarto volumes. More than 3,600 pages. 24 exquisite full-page color plates. 96 full-page sepia halftones and more than 4,000 text engravings. 500 collaborators. Approximately 4,000 genera, 15,000 species and 40,000 plant names.

The new Standard Cyclopedia of Horticulture has been freshly written in the light of the most recent research and experience. It is not merely an ordinary revision or corrected edition of the old Cyclopedia, but it is a new work from start to finish with enlarged boundaries geographically and practically; it supersedes and displaces all previous editions or reprints of every kind whatsoever. It is both an Encyclopedia and a Manual, for with the aid of its Synopsis and Key, amateur and professional alike may quickly identify any plant, shrub or fruit contained within the set, and then receive expert instructions for its cultivation. Price \$6.00 per volume. Five volumes have now been issued and the others will follow in succession. Order from

CLUBS AND SOCIETIES

JOINT MEETING OF INDIANA AND KENTUCKY FLORISTS.

On October 17th there will be a joint meeting of the State Florists' Association of Indiana and The Kentucky Society of Florists, including ladies, at the establishment of Anders Rasmussen, New Albany, Ind. October 18th will be spent in sight seeing, pleasure and the afternoon at the establishment of the William Walker Company, at Ormsby Station, Ky. The business session will be most important. Many interesting questions will come up and A. F. J. Baur will read a paper on and lead the discussion on "False Economy." The Hotel Henry Watterson has been designated as headquarters, and at 7 P. M. on Tuesday a banquet will be served, with the following program: Address of Welcome—President Kleinstark, Kentucky; response—President Vesey, of Indiana; toast—"Our Honored Guests," William Mann, Kentucky; toast—"Goodfellowship," W. W. Coles, Indiana; toast—"The Ladies," August R. Baumer, Kentucky; toast—"The S. A. F. and O. H.," Irwin Bertermann, Indiana; toastmaster—Anders Rasmussen, Indiana and Kentucky. From the close of the banquet until 12 o'clock, dancing.

On Wednesday at 8.30 A. M. there will be bowling contests between Indiana and Kentucky teams; individual contests for ladies and gentlemen. At 1.30 P. M. interurban cars will leave for a visit to the William Walker Company establishment at Ormsby Station, Kentucky, where the afternoon will be spent in looking over the Walker plant, and in games of different kinds. Prizes for the bowling contests and the games have been donated by many friends in all branches of the trade. For further information ask any member of the Kentucky Society or write the Secretary, August R. Baumer, Masonic Temple, or P. O. Box, 295, Louisville, Ky.

FLORISTS' CLUB OF WASHINGTON.

At the regular meeting of the Florists' Club there was displayed a vase of "Mrs. Charles J. Bell," a new rose, a sport from Radiance, by John Anderson, gardener for Mrs. Bell. Mr. Anderson said that he has had it for three years. It is flesh pink, flowers freely and is very fragrant. He said that it is splendid for both outdoor and indoor production, and it does not fade when full open.

A resolution was adopted extending sympathy to J. J. Brickings and hope for an early and full recovery from injuries sustained by him when a street car struck the wagon he was driving and caused him to be confined to a hospital for a number of weeks.

North Shore Horticultural Society, Manchester, Mass.

NEW YORK FLORISTS' CLUB.

There were over one hundred members in attendance at the meeting of the New York Florists' Club on Monday evening, October 9. A general discussion of matters relating to the coming S. A. F. Convention was the main business of the evening. All were enthusiastic, although the date is still far off and other big events will claim attention in the meantime. The most interesting feature was Secretary Young's detailed report on the Convention Garden which is being prepared in the Bronx Park Botanical Garden under the supervision of Dr. N. L. Britton, director-in-chief of the garden. The tract assigned to the Convention plantations comprises about six acres. It is splendidly located and plantings may be arranged for now if desired. W. A. Manda followed with a fervent address on the same subject.

Speeches were made by the newly initiated members, Winfried Rolker, Clifford Lowther and Henry Schmidt, in a style that assures a substantial augmentation of the club's oratorical resources. A red-hot speech by Jos. Manda in favor of a "ladies' night" was received with vociferous approval and the November meeting will be "ladies' night" accordingly, the committee in charge being Jos. Manda, boss, A. L. Miller, Emil Schloss, Jasper Lewis and R. J. Irwin.

Resolutions on the death of W. F. Kasting and Wm. Tricker were adopted as follows:

WHEREAS, It is incumbent upon the New York Florists' Club to record the death of one of its most esteemed members in the person of William Tricker, of Arlington, N. J., who has been called from its membership;

BE IT RESOLVED, That the Club, realizing the loss to American horticulture sustained in the death of Mr. Tricker, in this resolution expresses its deep regard for the deceased, particularly as to his work among aquatic plants, and for his charming personality in his intercourse with his brother horticulturists. The new varieties of plants which he introduced, and his improvements of existing types, will perpetuate his memory, and add to the lustre of our membership roll, of which he was ever most solicitous.

BE IT FURTHER RESOLVED, That this resolution be entered upon our minutes, and that a copy be transmitted to the deceased's family with whom the Club expresses its deepest sympathy.
Signed: C. W. Knight, Peter Duff, Chas. H. Totty.

WHEREAS, We, the members of the New York Florists' Club, are deeply touched by the sudden death of our friend and fellow member, William F. Kasting, who was stricken at the height of his activities.

RESOLVED, That we take this opportunity of expressing our profound sympathy with the family of our deceased fellow member, in their recent bereavement. The community in which he lived, the many societies and associations of men with which he was actively identified, have sustained a signal loss by his demise. His success in life was achieved by the observ-

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Department of Plant Registration.

Public notice is hereby given that J. E. Yeats of Champaign, Illinois, offers for registration the new rose described below. Any person objecting to the registration or to the use of the proposed name, is requested to communicate with the secretary at once. Failing to receive objection to the registration same will be made three weeks from this notice.

Description—"A chance Seedling." Growth rapid, heavy, throwing long shoots from near the ground, needs little if any tying; early continuous bloomer. Foliage—medium, heavy, glossy dark green. Height—stems eighteen inches to four feet. Color—real red velvety. Flower—petals large and thick, large pointed buds opening into a full evenly petaled rose. Fragrance—very dense, fruity fragrance. Name—Mrs. Sarah Yeats.

JOHN YOUNG, Sec'y.

Oct. 7, 1916.

ance of strict integrity, persistent industry, and the Golden Rule, together with a lovable loyal nature that won him friends in all walks of life. His many acts of charity, privately bestowed were known only through the recipients. These and the friends that knew him and loved him, for what he was, will cherish his memory.

RESOLVED, That the resolutions be spread upon the Minutes of the Club and a copy sent to the family of the deceased. Signed: Walter F. Sheridan, Frank H. Traendly, Patrick O'Mara.

The judges made report on the evening's exhibits as follows: Chrysanthemum October King, by Chas. H. Totty, commercial scale, 85 points, exhibition scale, 88 points; Early French varieties, Nonine novelties, cultural certificate; seedling cactus dahlia from Fred Utter, honorable mention; dahlias from P. W. Popp, cultural certificate; chrysanthemum Alex. Guttman from Frank Dinda, vote of thanks; red seedling dahlia from Chas. Weber, very highly commended.

NASSAU COUNTY HORTICULTURAL SOCIETY.

The annual Dahlia Show of the Nassau County Horticultural Society held at Glen Cove, N. Y., Oct. 5th, was a most decided success from both a financial and a horticultural viewpoint. The exhibits were of the very highest quality and in almost all classes competition was very keen. The Dreer cup which for collection of dahlias, 25 varieties, brought forth four exhibitors, each with a top-notch collection. The judges finally awarded the prize to W. R. Coe (Joseph Robinson, gard.), with W. J. Mathieson (James Kirby, gard.), 2nd. The E. M. Townsend cup for collection of outdoor roses was won by Harold Pratt (F. O. Johnson, gard.), John Pratt (John W. Everitt, gard.), 2nd. The North Shore Garden Club silver basket for collection of outdoor flowers was awarded to George D. Pratt (John F. Johnstone, gard.), C. F. Cartledge (William Noonan, gard.), 2nd. The F. S. Smithey cup for gladioli was captured by Mrs. Darlington (P. W. Popp, gard.).

The class for collection of vegetables was one of the most attractive features. There were three exhibitors and so evenly matched that in the final scoring only eight points separated the winner from the second man, while the third entry was only twenty points behind. Percy Chubb (Robert Jones, gard.) was 1st and W. R. Coe, 2nd. The Hitchings cup for outdoor fruit was won by Herbert Pratt (Henry Gaut, gard.) with a superb collection. The dinner tables was another attractive feature. There were seven entries and the honors were carried off by Joseph Adler, Henry Gaut and Herman Miller in the order named.

Mills & Co. of Mamaroneck were awarded a certificate of merit for a large collection of dahlias and C. F. Cartledge received the same award for three vases of seedling dahlias. Mrs. Darlington received a certificate of culture for a vase of gladioli. Other winners in addition to those mentioned were C. D. Smithers, gard. Pierre Charboniad; G. D. Barron, gard. James Linane; W. E. Kimball, gard. Jas. McCarthy; J. R. Maxwell, gard. S. J. Trepass; Wm. Beard, gard. H. Miller, and Frank Petrocchia.

The judges of the exhibition were Thomas Atchison, William Robertson and James Stuart, and many flattering

ing comments were made on the thorough and capable manner in which they performed their duties.

JAMES MCCARTHY, Cor. Sec'y.

Nov. 11-19, New Orleans, La.—Flower show.

Nov. 14-15, Providence, R. I.—Flower show of R. I. Hort. Soc.

MASSACHUSETTS HORTICULTURAL SOCIETY.

The October fruit and vegetable exhibition of the Massachusetts Horticultural Society was held in Horticultural Hall, Boston, on October 7 and 8. Among the prize winners were T. T. Watt, who showed some Chinese yams, South American papaws and a bird of paradise flower; Mrs. Ivan Panin, English walnuts; J. A. Nixon and Mrs. F. C. Upham, culinary herbs.

Chairman Edward B. Wilder of the committee on fruits said that the exhibit of pears was better than in many years. David R. Craig showed a fruited branch not more than four feet long, bearing at least 115 seckels. Mrs. H. F. Fay showed some Peasgood Nonesuch apples, weighing a pound, grown on trees about five feet high; R. E. Welch, a King of the Mammoths squash, so large that a man's arms cannot meet around it; and T. D. Hatfield some beans of an unknown variety, raised from seed found in the crop of a duck shot at Southboro. Dr. F. S. DeLue won a silver medal for his hybrid corn.

Mt. Desert Nurseries were given honorable mention for a superb display of hardy asters and other herbaceous flowers. R. W. Swett vote of thanks for Gladiolus Sherman Sweet.

The distinctions were divided as follows: Three votes of thanks, three honorary mentions, 12 gratuities, 125 prizes, one medal.

H. V. Soule won the second prize, \$20 in gold, for decorated auto at the New Bedford, Mass., carnival last week.

One Week's Imports.

Imports at the port of New York, of horticultural material, for the week ending Sept. 29, were recorded as follows:

Bulbs—France, \$7,524; Italy, \$15; Netherlands, \$256,371; England, \$3,898; Bermuda, \$298; Hongkong, \$2,661; Japan, \$4,287.

Plants—Bermuda, \$114; Colombia, \$800; Venezuela, \$337; France, \$82; Netherlands, \$383.

Red clover seed—France, \$6,552; Russia, \$5,756.

Clover seed—France, \$15,730.

Grass seed—England, \$134; Ireland, \$2,100; New Zealand, \$197.

Other seeds—England, \$1,295; British East India, \$1,807; Hongkong, \$258; Japan, \$14; Cuba, \$250; China, \$29; Canary Islands, \$323.

Nitrate of potash—Dutch East Indies, \$43.

Nitrate of soda—Chile, \$177,818.

Cable news tells us that the Holland gladiolus crop is a failure this year.

PUBLICATIONS RECEIVED.

The Forty-Sixth Annual Report of the Wisconsin State Horticultural Society is received from Secretary F. Cranefield. It is to be especially commended for the diversity and general usefulness of its contents. In addition to the usual reports and papers appertaining to fruit culture which too often monopolize the pages of state horticultural documents this bound volume of 126 pages devotes a fair share of the space to papers on the beautifying of home grounds, shade trees, annual flowers, etc., lists of trees and shrubs that are reliable in Wisconsin, spring flowering bulbs, etc., a black list of shrubs that cannot be depended upon, remedies for the control of plant diseases and insects, spraying tables, etc., all of which goes to make up a book, a copy of which should be in every household in the state. There are several pages of illustrations and it is nicely gotten up throughout.

Bulletin of the New York Botanical Garden, Vol. 9, No. 34. This publication issued under date of September 21, 1916, will be found very interesting and very useful for anyone wishing to acquire some definite knowledge of the layout of the grounds and the various departments of this important and rapidly developing institution. This volume, comprising 112 pages, is issued as a descriptive guide to the grounds, buildings and collections, bringing right up to date the contents of previous issues of like character. It is embellished with numerous full-page half-tone views of much beauty showing the buildings and gardens and the diversified natural attractions of the 400 acres of

The Sensational Pink Sweet Pea YARRAWA

BRIGHT ROSE-PINK

This variety leads all others for color, size of bloom, length of stem and long flowering period. Order the original stock from Boddington's and increase your profit.

NEWS ITEMS FROM EVERYWHERE

CHICAGO.

The Women's Outdoor Art League is mailing price lists of the bulbs for fall planting to club women and others.

Poehlmann Bros have an addition of 5,000 orchid plants to their stock, the work of their collector in the Philippines.

Geo. W. Kay, of the Kay-Diamond Co., Youngstown, Ohio, arrived several days in advance of the Florists' Telegraph Delivery Convention, which he is attending.

Wm. Graham, manager of the Fleischman Floral Co., is visiting his daughter in N. Y. City after which he will go to Philadelphia where his son Hugh is to be married.

Allie Zech received a telegram announcing the death of Andrew Bather of Clinton, Iowa. He was one of the most prominent men in the retail trade in that city. Two sons and a daughter are connected with the store.

Duncan A. Robertson, who left Chicago for his home city, Boston, three years ago, is now back and is manager of O. Friedman's store on Michigan Ave. Mr. Robertson has made several changes in the store, all of which mean greater efficiency in handling their trade.

PITTSBURGH.

John H. Yeaton of Philadelphia has entered upon his duties as bookkeeper for G. P. Weaklin & Co.

The Liberty Florists' shop has recently been converted into a literal autumn bower through the artistic arrangement of quantities of golden rod, sumach and cat-tails.

The Ernest C. Ludwigs have reopened their North Side home after spending their summer on their farm. Edward Earl Ludwig, the younger son who graduated from the Agricultural School at Cornell last June, remains on the farm as superintendent.

Bamboos formed a dominating note in the decorations for the Pontefract-Charnley wedding at Sewickley Heights, last Saturday, which were furnished by Randolph & McClements. There was a background of the bamboos in combination with crotons and cibotiums, with a big bronze and wicker vase of yellow chrysanthemums on either side of the white satin prie dieu, to which an aisle led, marked by bronze-gold standards and blue ribbon. An orchestra in the hall was screened with bamboo, which was again used with discretion in the library, which was adorned with large clusters of American Beauties. Yellow orchids with yellow ribbon were used for the bridal (buffet) table. The bridal bouquet was formed of lilies of the valley and golden rosebuds, while cattleyas were carried by the matron of honor. A blue French basket of golden roses and forogot-me-nots was carried by the little flower girl.

BOSTON.

Welch Bros. Co., have completed their removal from 226 to 262 B. Devonshire street and are rapidly getting things into orderly ship-shape.

Edward Welch of Welch's has returned from a fourteen days' trip through the Provinces. He has also completed arrangements with some of the best commercial growers throughout New England for the handling of their stock and judging from the shipments of roses already received the stock will be of the first quality.

N. F. McCarthy of the Montrose Greenhouses and James Gray, a Cambridge man, have taken over the greenhouse plant formerly of Charles C. Ball, Inc., and will operate it as the Wakefield Conservatories. Minot H. Carter will be manager and his flower store at 376 Main street will be operated in connection with the enterprise.

Supervisor of Administration Burbank has made a report to Gov. McCall and the Council, recommending that they grant the request of State Forester Rane for an emergency appropriation of \$5000 to enable the State to continue its work against the spread of the white pine blister rust. The supervisor says there is danger of the ultimate destruction of much, if not all, white pine in Massachusetts. Continuing, he says the appropriation of \$5,000 would make it possible for the State Board of Agriculture to complete a survey of the State, thus determining what conditions now exist, and enable the officials of the State nursery inspection service to combat small outbreaks of the disease.

WASHINGTON, D. C.

Captain William H. Ernest has just returned from an extended trip South. He attended the Odd Fellows' convention in Chattanooga, and visited Chickamauga, Macon and other places, on a sightseeing trip.

Growers in Anacostia and points in Maryland report the loss of large quantities of dahlias by a frost said to have been the earliest in years to visit this section. The change was very sudden. Two days later, mid-summer weather prevailed.

Samuel Simmons, formerly in charge of the Leiter Estate, has accepted the position of manager of the business to be conducted by Mrs. S. P. Martin, of New York, at the Freeman greenhouses. It is said that these houses contain between 50,000 and 60,000 feet of glass. The crops will probably be marketed through one of the local exchanges.

Newark, N. Y.—Jackson & Perkins Co. have purchased the D. P. Smith farm of 170 acres, located about three miles from their Newark grounds, and will grow roses and general nursery stock.

NEW YORK.

Chas. H. Totty, John Young and W. P. Craig left for Chicago via the Penna Limited on Tuesday. After attending the Florists' Telegraph Delivery meeting in Chicago, they proceeded to St. Louis, where a meeting of the National Flower Show Committee was called for Friday, the 13th.

An interesting and very enthusiastic meeting of the International Flower Show Committee was held on Monday, October 9, at the Manhattan Hotel, Chairman Havemeyer presiding. Committees were appointed to take up the detail work of the show and all auguries are for a huge success. Contracts have been signed up with the International Exposition Co. for three years ahead, which is good evidence of the confidence now established in all quarters as to the future of the flower shows in New York.

CLEVELAND, OHIO.

The Cleveland Plant and Flower Co. have opened their spacious new store.

The Cleveland Florists' Exchange will put on a new delivery car this week.

Albert J. Heil, formerly with Jones-Russell Co., has taken a position at Kirchners as designer.

The Jones-Russell Co. opened on October 10 their submarine store which is a basement addition to their place where they display fancy baskets and pottery.

Last Thursday night about twenty of the Cleveland florists attended a Clam Bake at The Friedley Co.'s plant. As a host Frank Friedley outdid even himself on this occasion.

From a number of salesmen in town one would think there was a florists' supply house convention here. Among those present are A. L. Miller, Jos. Marks, Martin Reukauf, George Hampton and Sam Seligman.

In the near future Mrs. Ella Grant Wilson will give flower talks to the Mothers' and Garden Clubs of this city. The subjects will be: "A Touch of Refinement a Little Money Will Give the Home" and "What Ails My Plants."

F. J. RITZENTHALER.

PERSONAL.

John Hourehan, gardener of Ipswich, Mass., and Miss Margaret Crawford, of Milford, were married at Milford on October 4.

The marriage of Miss Jeannetta Drysdale, of Philadelphia, to W. Atlee Burpee, Jr., will be solemnized Wednesday, November 1st, 1916, at Saint James' Church, Philadelphia.

OBITUARY.

Andrew Bather.

The brief announcement in our Chicago notes this week of the death of Andrew Bather of Clinton, Iowa, is the only information that has reached us of the passing away of this well-known and respected florist.

SOMETHING ABOUT ACCEPTING DEBTORS' NOTES IN SETTLEMENT OF ACCOUNTS.

For a long time I have had on file a memorandum to write something about the loose practice of accepting the notes of a debtor in settlement of an account. Other things have heretofore crowded it out but the receipt of the following letter from a Cincinnati, Ohio, reader who does not wish his name disclosed, gives me the chance I have been waiting for:

Cincinnati, O.

We want some advice in advance about a situation that is likely to arise in the near future with one of our customers—a good buyer, but not always prompt in his settlements. On December 1st he owed us about \$500, most of which was considerably overdue. We had been after him to pay it without result, until about the middle of December he came in and proposed to give us a note in payment for three months, bearing interest. We accepted it, thinking it a good way to put the account on an interest basis, and now we hear that he is in a bad way and only those who get in early are likely to get anything. We would like to go after him right away, but the note is not due until March 16th, and it seems that we must hold off until that time. Please advise us if this conclusion is right and tell us if there is any way to get out of the situation we have placed ourselves in.

This is pretty nearly a typical case. The same thing is happening all the time. Both wholesale and retail dealers, especially the former, when some customer gets behind, will propose a note as the next best thing to cash. And the idea is all right, if it is carried out properly. The proper way to carry it out is never—where there is the slightest question about the present and future standing of the debtor—to accept the note in payment of the account. It should be accepted only as collateral security, with an agreement that in case it becomes necessary in the opinion of the creditor, the latter can immediately begin suit on the original account.

When a note is accepted in payment of the account, you have merely postponed payment that far ahead, and no

matter what happens to the debtor's finances meanwhile, you can only sit down and wait.

The average business man does not understand the difference between the two ways of accepting the note, and he therefore accepts it, as a rule, in a way which could easily be construed into an intent to take it in payment.

The creditor who takes a note in payment of an account is not only no better off than he was before, but he is really worse off because he cannot enforce his claim as soon as he could before he took the note. His original claim on the book account was just as clear and good, and almost as easily proven in court, as his new claim on the note. Therefore he gains nothing by changing the form of his claim from book account to promissory note, but as I have already said, he actually loses.

Everything depends on the way in which the note tendered in settlement is taken. The general rule is that a promissory note given in settlement of an account is not to be considered as having been accepted in payment unless there is an agreement to that effect between the parties. Usually there is never any actual agreement between a creditor and his debtor, that a note given by the latter shall be taken in payment or not in payment. The debtor, who is usually behind in his accounts or he wouldn't tender the note at all, says something like this: "I'll give you a note to fix up (or clean up, or settle, or cover) that account of mine." The creditor takes the note and later the court may have to decide what was meant by "fix up," or "clean up," or "settle," or "cover," or whatever the expression was. Remember that the agreement may be implied from the conduct of the parties, and if the court holds that the note was taken in payment it means that the old account is dead, suit can never be brought on it, the note has been substituted for it, and the only remedy is to try to collect that, which can only be attempted, as I have explained, when it comes due.

Where a note is taken without stipulations of any kind, there is al-

ways the chance that a court may decide in that way. There are many cases in which this made all the difference between losing the account and collecting it in full.

Even where it is clear that a note was not accepted in payment, but only as collateral security, the creditor will not usually be allowed to bring action on his original claim until the note comes due, because when he accepted the note he gave the debtor that much more time and the court will not allow him to go back on his promise.

What is the best way to safeguard one's self against such possibilities? There are two main ways:

First—Make the note payable on demand or at sight instead of at some future date. Such a note can be sued on at any time. Naturally the debtor will not always agree to this, for his reason for giving the note is to gain delay until some future time. He will often agree to it, however, when the creditor gives his word not to negotiate the note or do anything with it before a certain date unless it becomes necessary.

Second—If the note has to be made payable at a future time, then have the debtor sign a memorandum when he gives it that the note is for collateral security only, and granting permission to the creditor, before the note matures if he considers it necessary, to begin suit on the original account. If the creditor does begin suit on the original account before the note matures, he must first give the note back.

The only thing I can say to my friend from Cincinnati is that he can answer his question by applying what I have said above, to the facts of his own case. If he can prove that he did not take the note in payment—although in his letter he says that he did—he can proceed against his debtor at once on the original account. If he did take the note in payment—and the fact that it bears interest is strong evidence that he did—he must wait until its maturity, no matter what happens.

(Copyright, January, 1916, by Elton J. Buckley.)

Flower Market Reports

The trade keeps on "an even keel" at present with little or no change of importance in conditions or values since last week. Quality has improved on everything, especially roses. Carnations are daily increasing. Chrysanthemums are excellent with prospects of an increased cut presently. Violets are very poor as yet, but yellow daisies which have just started are extra good, bringing \$1.50 to \$2.00 per 100. Gladioli are gradually getting down to the gleanings and dahlias have practically vanished as have also the asters. Lilies are in short supply. Lily of the valley is good.

The market is cleaned up daily. Business has been good and the supply of roses has been good and they are now in winter form. The finest Ophelia, Shawyer, Hadley, Queen, Sunburst, Killarney, Ward and White Killarney are seen and have had excellent sales. Golden Glow is the only variety in yellow chrysanthemums, Smith's Advance in white and Nogoya in pink. Lily of the valley has a good demand. Some good asters are still seen. Dahlias from eastern sections are coming in and clean up at good prices.

Conditions are improving. A large supply of roses is coming each week and so far the demand has been sufficient to use them all to advantage. American Beauties are comparatively plentiful, especially in the long lengths. Of the medium and short ones there are more to spare. A very few carnations are seen that have long stems and they would not be considered long later in the season, but so far nearly all have been cut very short, even when the blooms average of good size. Lilies continue very scarce indeed. Lily of the valley about equals demand. Chrysanthemums are still coming slowly, the early yellow ones being about over; white predominates, but another week is expected to bring out some of the other varieties. Quantities of short-stemmed asters are being shipped from Michigan into this market, some of which are good enough to sell for two dollars per 100, but many more for less. There is a good variety in green, common ferns selling for \$1.50 per 1000. Frost has not killed the prairie flowers. One wholesaler remarked that he had never before sold so many "weeds" in a season. The wild asters in white and lavender are especially fine just now and are small enough to make a good filler with larger flowers for bouquets.

RUSSELL

Our growers, realizing what a superb (every day in the year) Rose, Russell is, have planted much heavier this season and are cutting freely some wonderfully choice blooms.

Many dollars are added to the year's income by the gathering of the prairie flowers for the wholesale market.

The market in the CLEVELAND past week has shown a decided improvement. Dahlias and roses are coming in in very good shape. Lilies and chrysanthemums are to be had only in limited quantity. Kirchners have been cutting pink chrysanthemums the first of the season in these parts.

The optimistic feeling among the wholesalers and frequenters of the flower district is an encouraging sign for the trade outlook. The weather, clear and cool, has been very favorable for the roses, which are coming in more plentifully and are of very fine quality. Chrysanthemums are already dominating the market, variety and quality excellent. Violets are still of very poor quality and there is no demand for them. Cattleyas are again plentiful. Other standard flowers are normal in supply and demand.

Buying has continued brisk so notwithstanding the large increase in receipts, prices have kept pretty steady. All along the line there is a good demand, the best sellers being roses and lilies. Russells, Scott Keys, and Ophelias are especially fine and lead the procession although the Beauties are fine also and make a good running. Carnations have showed up better as to flower and stem and are gradually coming into their own again. The chrysanthemum is much more in evidence both as to quantity and quality. The leaders now are Unaka, Polly Rose, Tint of Gold and Smith's Advance. They have bloomed later than usual this year. Dahlias are still holding their own as a strong feature of the market. There is no oversupply of the high-class flowers but more than enough of moderate to poor stock. Asters and gladioli are both under grade and nearly over. They bring very poor returns in competition with other and stronger lines now before the buyers.

Flower Market Reports

(Continued from page 517)

The season of 1916-PITTSBURGH 17 has opened most auspiciously. Even promising to surpass its exceptionally successful predecessor. The representative of one large wholesale cut flower company conservatively sizes the situation as possibly quite a little better, while one from a competing house is most positive in his statement of flattering conditions. Flowers of quality are coming in plentifully—cattleyas are superlatively fine and there are plenty of roses. Chrysanthemums and carnations are of good quality, but not yet in sufficient quantities to supply the demand. Lilies are rather scarce and there are still a few nice dahlias. Summing all up, the market is pretty well covered, with the exception of yellow daisies, and blooms and plants of all kinds are bringing remunerative prices.

The extremely hot WASHINGTON weather of last week brought large quantities of stock into the market, and the bulk of it could be had at the buyer's price. Chrysanthemums are the leaders. The frost of the preceding week thinned out the dahlias, and higher prices prevailed on these. There are more orchids offered than the market can consume and the price has dropped to half of what it was. On lily of the valley, also, the price has decreased. There is a shortage of white roses, but there are plenty of all others, with the exception of American Beauties. The supply of violets is increasing and the flowers look good. Cosmos is very plentiful and sells fairly well in the markets.

Mr. B. Progressive, Florist,
Everywhere, U. S. A.
Dear Sir: It will be a decided advantage
as regards prices and quality to place your
order with us.

Soliciting your order through this ad
cuts down the overhead selling expenses
and you positively get lower prices and
better quality. Our terms are liberal and
are a guarantee that you get a square
deal, all bulbs guaranteed true to name or
money refunded.

Write us and upon request we will mail
you our booklet giving prices f. o. b. New
York or Chicago, and we also cheerfully
furnish you with any information that
may be desired. Those of our friends who
will mail us a list of their requirements
will find it has paid them to do so.

Awaiting to hear from you at your pleas-
ure, we remain,
Yours very truly,
Westerbeek & Klyn,
Sassenheim, Holland.

OCTOBER GLORIES IN THE HARDY GARDEN.

(Continued from page 500)

also hope the ragweed and hay fever have gone. The graceful pretty-flowered *Thalictrums*, with finely-cut foliage, are great favorites, and the new variety *diptercarpum*, growing about four feet high and carrying flowers of lilac-mauve, brightened by the yellow stamens and anthers in September, is a novelty that merits its increasing popularity.

There are few flowers that are more suitable than the *Tritomas* (call them Red Hot Pokers, Flame Flowers, Torch Lilies or what you will). The ever-blooming *Tritoma Pfitzeri*, in bloom from August to October, produces a grand effect in rich orange-scarlet, planted either singly or in masses. Probably most of you will think the best effect is produced in the retailer's store, when My Lady exclaims "What wonderfully gorgeous flame flowers!" and immediately places an order.

Early Flowering Outdoor Chrysanthemums.

If the characteristics of a popular garden plant are hardiness, dwarfness of habit, freedom of flowering, usefulness as a cut flower, and a range of coloring embracing every shade except blue and intense scarlet, then the early flowering chrysanthemum may lay claim to the distinction of being an almost perfect plant, because it possesses these qualities in a remarkable degree.

It is an open question as to when the real Early Flowering chrysanthemum made its appearance, but there is no doubt that it was in the form Pompon section, and that from this class, by judicious hybridising and selection, the present high standard has been obtained. Early flowering in chrysanthemums may be taken to relate to those varieties which come into bloom outdoors in a natural way by the middle of October at the latest.

In 1846 a Pompon variety was introduced from China and this became the basis upon which the French raisers carried on their great work. About 1860 the late Shirley Hibbard mentions some 20 varieties mostly French raised. Afterwards came Little Bob from Cannell of Swanley, Lyon and Mad Jolivat from France, St. Crouts from Guernsey, a white with pink tinge which I remember seeing as a boy in full bloom early in August. The first of the large flowered or Japanese varieties is said to have been raised in Lyons about 1875-6. Mad C. Desgranges was sent to England as a gratis plant by Lemoine in 1876. It was an excellent variety in its way, and large quantities were grown in five-inch pots for Covent Garden Market 15 to 20 years ago. Sports of this variety were Gustave Wermig, Mrs. Burrell and Mrs. Hawkins, varieties also of equal importance.

This marked quite a new era in the cultivation of the early flowering chrysanthemum, and gave a great stimulus to the raising of new varieties, and such enthusiastic cultivators as Nonin, Cannell, Davis, Godfrey, Goacher, Holmes, Wells and Totty will be ever associated with the early flowering

chrysanthemum. While the Pompons held the field for many years, it was certainly the introduction of the large-flowered varieties that popularized the outdoor early flowering chrysanthemum. Mad C. Desgranges and its sports have been referred to but the introduction of Mad Marie Masso about 1891 brought about quite a revolution in the growing of this plant. A new era had dawned upon it, because we had in this an introduction of wonderful constitution, a perfect habit, and most profuse in its blooming qualities, and today it is one of the most popular varieties in general cultivation; and with its sports, Ralph Curtis, Horace Martin, and Crimson Masse covers quite a range of coloring.

The cultivation of the early flowering chrysanthemum is of the simplest kind, and I think that the best results are obtained on moderately rich land. This quality, in addition to the fact that it succeeds in a smoky atmosphere, makes it available alike for the garden of the suburbanite and the millionaire.

A mistaken impression has been given with regard to outdoor chrysanthemums, which is, that all one has to do is to simply plant them in a bed and they will continue to improve from year to year without any further care. That they are entirely hardy and will come up in the spring in most sections is perfectly true, but the best way to produce the greatest quantity of flowers is to take cuttings from the young plants every spring, and as soon as they are rooted plant them out in good soil in rows about two feet apart.

These can be pinched back several times to make them bushy and then in the fall they will produce large quantities of long stemmed beautiful flowers, much superior to old stalks that have been growing for several years, and which are consequently to a greater or less extent exhausted.

CEDAR PLANT TUBS

Our Tubs are made of Everlasting Virginia White Cedar—selected timber, and well manufactured

We use no substitutes.

"ANCHOR" BRAND

These tubs are painted with pure oil paints, a handsome green, and have heavy flat steel hoops.

The larger sizes are trimmed with metal feet and side handles—Large sizes have removable bottoms. Capacity run large enough for a Bay Tree—small enough for a Hyacinth.

Diameter at top from 24 $\frac{3}{4}$ to 6 inches.

Booklet in colors, and prices sent on request.

INDEMNITY FOR DAMAGED PARCEL POST PACKAGES.

It is not necessary to refuse to accept insured or C. O. D. parcel post packages damaged in transit in order to make valid a claim for indemnity, according to a recent statement of Assistant Postmaster General Dockery at Washington, D. C. Many merchants throughout the country, it was said at the Post Office Department, have been laboring under the impression that, in order to make a claim for indemnity, it is necessary to refuse to receive parcels damaged in transit.

Orders have been issued by the Department to its employees, advising them that they must in all cases of damage explain to the addressees that the acceptance of the parcel will in no wise militate against the validity of any claim they may file, but that, instead, their action in refusing the package will subject the sender to additional expense, in that he will be required to pay again the amount of postage required for its transmission, in order that the parcel may be returned to him for examination and determination of the extent to which claim may be filed for damages.

According to a ruling of August 8, 1916, indemnity is payable for partial as well as total damage to packages mailed after that date. The acceptance of damaged parcels by the addressees, it is stated, will enable claim for damage to be filed earlier than would be the case were the goods to be returned to the sender, thus enabling the Department to make quicker adjustment. Recipients of damaged parcels should remember that if they accept them they should at once communicate with the senders and, if a claim is filed, have either themselves or the senders designated as the ones to whom indemnity should be paid.

SOUR SOILS, THEIR CAUSES AND TREATMENT.

This is a subject that applies more to inland courses than those situated by the sea, as the soil is of a heavier nature and consequently apt to get into a sour condition. There are several reasons for soil becoming sour and the following are some of the principal ones:

The first and most important is want of proper drainage. It is absolutely essential, if the soil is to be kept in a sweet condition suitable for the maintenance of a good healthy turf, to have proper drainage. In making a new course this is a very important point that should be carefully gone into and a systematic scheme of drainage carried out.

Grass will not thrive on wet sour soil no matter how much money and labor may be expended on fertilizers, etc. It will gradually and surely go back and weeds of all kinds will soon take its place and in a short time the greens will not be fit to play upon. The second cause of sourness in soils is one that is brought about by injudicious watering.

It is most important to have a liberal supply of water at hand, but this does not imply that it should be used indiscriminately even if there should be a good system of drainage, as time and again even on sandy soils where drainage was perfect I have seen the surface turned into a wet, sour condition simply because the watering had been overdone. As it does not rain every day then why should it be necessary to water every day; it is not natural. It is this sprinkling that does the harm and creates a sour surface. Soak the green well, say twice a week if it should require water, as by thoroughly soaking it the water will get down to where it is wanted, at the

Hammond's Thrip Juice No. 2

REGISTERED

Some common Sucking Insects, magnified.

HAMMOND'S PAINT & SLUG SHOT WORKS, Beacon, N. Y.

roots, and the surface will be kept open.

Another reason for soil becoming sour is too much rolling. Especially when the surface is wet a great deal of harm can be done by rolling. Grass, like a human being, must have air, so if the surface is rolled into a condition resembling cement, sourness will soon appear and the grass, especially the finer varieties, will soon die out.

There is another reason for ground becoming sour. It has been said that worms are the natural drainers of the soil and if exterminated the turf will assuredly suffer. I have proved this to be absolutely wrong and have arrived at this bold assertion from years of experience. Take a putting green or fairway that has been used for a few years and observe how the worms have multiplied as compared with the sides that have had no attention bestowed on them. They have thrown up their casts all over and to make play at all possible sweeping and rolling has to be resorted to. This continual sweeping and rolling must undoubtedly change the character of the surface and sourness will set in if continued. My advice in this case is get rid of the worms and kill them entirely if a good healthy grass is desired. This cannot be obtained if they are allowed to burrow and throw up their casts all over the surface.

In conclusion I may say that if grass is to thrive the ground must be kept sweet and yet so that the air can reach the roots; this can only be done by drainage below and proper treatment above. Roll with light wooden roller if rolling is necessary, use plenty of lime, feed the grass well to keep it strong and healthy and water discreetly. If these points are carefully seen to, no trouble need be feared from sourness in the soil and a fine carpet of turf should be maintained at all times.—*The Golf Course.*

BUSINESS TROUBLES.

The disparity between the assets and liabilities of some of the firms figuring in our "business troubles" notes is often a subject of comment. They seem to have some of the same sort across the water for we read in the English journals of a nurseryman whose statement at the meeting of his creditors discloses liabilities of over \$13,000 and assets of "a metal chain valued at one shilling!" Can you beat it?

Whys and Wherefores of Fall Spraying

is the title of a little booklet, giving seven reasons, official and non-official, why it is the best time to spray. This booklet will be sent out by the B. G. Pratt Co., 50 Church St., New York, manufacturers of the well-known "SCALECIDE" at a very early date. If you are not on their mailing list, send them a postal today giving the number of your trees and your dealer's name and you will receive a copy free. Address Dept. 12

IMP. SOAP SPRAY

Is a scientifically prepared compound that is highly efficient for ALL insect pests. Why bother with several sprays when this will answer every purpose throughout the year?

FLORISTS' AND GARDENERS'
CLUB.**

The regular meeting was held Oct. 3rd at the greenhouses of Butler & Ullman, Northampton. There was an excellent attendance and the meeting throughout was packed full of interest. Prospects are bright for the fourth annual show, to be held in the Northampton City Hall, Nov. 1st and 2nd.

Instead of the customary paper each member brought a question. These naturally covered a wide field of enquiry, but as a sign of the times it was interesting to note that several had to do with the increasing cost of florists' supplies.

Butler & Ullman exhibited vases of Ophelia and Russell roses of excellent quality and H. E. Downer showed flowering plants of Eichornia crassipes. H. E. D.

CLUB AND SOCIETY NOTES.

At the annual autumn show of the National Rose Society (London, Eng.) a gold medal was awarded to Rose Christine, a most gorgeous, deep yellow H. T. variety, described as a glorified Rayon d'Or, for it is much like a richer bloom of that beautiful variety. It was exhibited by S. McGredy & Son.

The 22d annual meeting of the New Hampshire Horticultural Society will be held in Keene, Oct. 25, 26 and 27. This is an event looked forward to by every progressive fruit grower and farmer of New Hampshire with keen anticipation. Programs may be had by writing to Stanley K. Lovell, Goffstown, N. H.

The Oyster Bay, N. Y., Horticultural Society held its fifteenth annual flower show on October 3. Among the gar-

DREER'S "Riverton Special" Plant Tub

No.	Diam.	Ea.	Doz.	106
10	20 in.	\$1.60	\$17.50	\$145.00
20	18 in.	1.45	15.50	130.00

40	14 in.	.70	7.75	60.00
50	12 in.	.50	5.50	45.00
60	10 in.	.40	4.40	35.00
70	8 in.	.30	3.50	28.00

Manufactured for us exclusively. The best tub ever introduced. The neatest, lightest and cheapest. Painted green, with electric welded hoops. The four largest sizes have drop handles.

HENRY A. DREER, Seeds, Plants, Bulbs, and Supplies, 714 Chestnut Street, Philadelphia, Pa.

deners taking an active part in the show are John T. Ingram, James Duthie, Joseph Robertson, Frank Kyle, Andrew Kennedy, John Sorosick, James Duckham, Arthur Patton, Joseph Marmaron, Alfred Walker, Frank Gale, Duncan Beaton, David Hother-soll, James Bell, Henry Gibson, John De Vine.

DURING RECESS.**Washington Bowlers.**

The first victory of the bowling season was won by the Washington Florists' Club bowling team, when it defeated the Perpetuals, taking two out of three strings. Both teams are entered in the Mount Pleasant Duckpin League.

The results of the games were as follows:

Let us send you our catalogue.

ADVANCE CO.,
Richmond, Ind.

It was a good bit before breakfast when I took this one of Mrs. J. J. Kane's at Bar Harbor. A wee bit early for the gardener, so the pleasure of meeting him was missed.

Just a Passing Glimpse At a Few of Our Houses "Up Maine Way"

WHEN the Sweet Pea Society met at Bar Harbor, I took our "picture box" along and snapped a few of the greenhouses we have erected there and thereabouts. Some of the houses have been up for years; others of recent construction.

All are in splendid condition. Here are four.

Later on we will publish
some more.

Some twelve years ago, we erected this one for D. C. Blair, at Bar Harbor. It is but one of the incidents of interest in that estate of exceptional beauty. Mr. J. Mitchell, the gardener, is one of those worth while men with a seemingly endless amount of interesting information about plants, flowers and shrubs. Would have liked to spend the day with him.

The Mrs. J. H. Kennedy range is perhaps the largest in the Bar Harbor colony. It consists of various constructions of various concerns; arriving at the climax with one of our houses. Which fact reminds one of the Gold Medal Flour Ads. which everywhere say: "Eventually — why not now?"

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.
 "If vain our toll, we ought to blame the culture, not the soil."—*Pope*.

Allamandas

If these plants are required for early flowering they should now be kept drier at the roots so as to harden and ripen up their wood. They will rest well in a temperature of 50 to 55 degrees, but when starting them into bloom keep them at 65 and give an abundance of water as soon as they get into active growth. Water may be withheld till they flag but do not allow the wood to shrivel. In fact allamandas can be so managed as to have them bloom at any time of the year by first resting the plants, then pruning them back and encouraging root action. These plants are well worth growing where yellow flowers are wanted; they adapt themselves beautifully to various forms of decorations. Plants that were pruned last spring to within a joint or two and these when they had made two or three whorls of leaves pinched again, and so on during the summer, will have made fine stock by this time.

Carnations

A plant with eight or ten stocky shoots about 6 inches long, is far better than one with five shoots of which three are in flower now. Short shoots with buds on the end of them remove at once and give the other shoots at the base a chance to send up long, flowering stems. A carnation can stand more cold than heat, especially when planted in a few inches of soil indoors, and while getting established 48 to 50 degrees at night is better than 55. Don't worry because the plants are as yet slow to send up flowering shoots, as long as they are full of good foliage and plenty of strong shoots coming from the bottom. Give light fumigations once every ten days.

Young Cinerarias

Cinerarias sown in July should now be nice strong plants in flats. Just as soon as they have made enough growth for a three-inch pot they can be potted off. They like a light and sandy mixture, say three parts fibrous loam, two of not too old leaf mold, and a little sand. They can be kept rather close and shaded for a few days, after which they can be placed well up to the glass in a cool house. Be careful in watering that they do not become dry, and on the other hand that they are not kept soaked all the time. Never let them approach a pot-bound condition until they are in their flowering size. When they have filled their pots with roots, shift them along. They gain vigor and tone in a temperature of about 45 degrees at night.

Planting Shrubs

Every florist who has the ground to spare should make a planting of shrubs and by a plan of careful selection he can have flowers from April until September. The choice of varieties is perplexing because there are hundreds of lovely shrubs, but these embrace some of the best for April and May flowering: Forsythia, Cornus florida, spireas, deutzias, almonds, Calycanthus floridus. For June and July, halesia, lilacs, lonicera, Azalea nudiflora, weigelas, hawthorns, syringas, laburnum, viburnums. For August and September althaea, hydrangea, Desmodium pendulifolium and clethra. All that is necessary is to plow or dig the soil to a depth of 12 or 14 inches and give them a square deal in the way of plenty of manure mixed through it. Give each shrub plenty of room to grow and set them just as deep as they were before. Put high shrubs at the back and the low ones to the front.

Primulas for Christmas

They will stand some feeding now in weak doses once a week. There is nothing better than cow manure and a little soot; this will give them that dark green foliage one loves to see. They should be placed on a light, airy bench well up to the glass. Go over them often and give a little room where required. They should be given a nice equalized temperature of from 48 to 50 degrees at night. The frequency that they will require water can only be determined by going over them three or four times a day. Every florist will have his hands full trying to get his different crops in right shape for the holidays and one of these is primulas. The small stock can be potted up now and grown on. These will make fine stock for mid-winter and spring sales. Give them a rich compost of cow manure, leaf mold and fibrous loam.

Reminders

The more slowly bulbs are forced, the better substance the flowers will have.

Where possible sterilize all soil for seed sowing, to kill weeds and fungus spores.

Keep all young stock of crotons and similar plants well up to the light to ensure good color in the foliage.

Be careful and do not allow green flies to get a foothold on cinerarias, calceolarias or primulas. Give light fumigations every ten days.

Next Week: Begonia Gloire de Hollande; Callas; Lily of the Valley; Paper Whites and Roman Hyacinths; Sweet Peas; Reminders.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Proper Cutting

At this time of year it will be necessary to be very careful while cutting roses to see that the eyes are left on the plant as they should be every time a rose is cut. The winter's cutting will largely depend on the proper cutting now, so it will pay to look the plants over every now and then and make sure no flowers are being cut carelessly. Two good eyes should always be left on all tea roses, and the Beauties the same way, cutting all new shoots two eyes above the first or bottom wire. All special long stems that have been bent down on the Beauties can be cut at the first wire and the remaining piece of wood can be removed while tying. It is also well to instruct the men to take all poor buds with one good leaf only, leaving the rest of the stem on the plant, as it will quickly shoot out and bear a bud and this can then be cut down to the proper place, thus giving a good long stem and making up for the loss of the one poor bud. There should not be many of these but they will be found here and there.

Watering After a Crop

Care should be taken in applying water to the benches after a heavy crop has been cut off. While the plants are still cutting it will be necessary to give them plenty of water so that the buds will not suffer but as soon as the largest part of the crop is cut off, the water should be applied only when the plants are dry. A light dose of lime will also help put the soil into condition, and as soon as the plants start anew water will be used more freely until they are in crop again. As soon as the plants are well started a little feed applied just before watering, or liquid manure used directly after watering will help wonderfully bringing them into crop again. The main thing to guard against after a crop is overwatering. If the plants are watered too heavy, spot will almost surely set in and this will keep the growers hustling for weeks to come.

Leaky Faucets

See that all leaky faucets are repaired as soon as they begin to leak, as there cannot be a greater nuisance in the greenhouse. It will waste a lot of water, thus running up the water bill, and at the same time it will make mud holes in the walks and also make the house damp and unhealthy for both men and roses. It takes only a little time to put in a new washer, and the little time thus taken is well spent. Old worn-out faucets that cannot be fixed should be replaced by new ones, even though brass is very high just now.

The Heating Pipes

It will be well to go over the heating pipes now and test them all to make sure that they will stand the coming winter, and also to note if there are any pipes that are slow circulating or if there are any that will not work. No time like the present for straightening them all out so that good circulation will be insured. Make sure that the pipes are high and see that the covering on the mains is all it should be. There is a great deal of coal wasted every year just by leaving the pipes uncovered, or else lying on the ground where the heat is absorbed much the same as electricity would be. It will not take long to put things into shape once the work is started and the work will be well paid for. To keep the pipes from rusting, a coat of prepared pipe paint or of lampblack mixed with pure linseed oil can be applied to one pipe at a time so that there will be no danger from fumes. After the one pipe is burned out well another one can be painted and so on. In wide houses of course more than one pipe can be painted at a time but even then it should be done in the morning on a clear day so that the fumes resulting will have plenty of chance to escape when the vents are opened. Overhead pipes should be given a coat of aluminum. This will kill radiation a bit but it will brighten up the house so much that it will well pay to do the work. Use bronze powder and bronzing fluid for this work.

Grading

After being very careful as to the growing, growers should pay all attention possible to the proper grading of the roses. Certain rules should be laid to meet the requirements of the place, stock and market, and these rules should be adhered to year in and year out. This will establish a grade of stock for which the place will become noted and buyers will know just what they are getting when they buy from the place in question. Although it is best to be careful to get as many long grades as possible it will not pay to put roses into a certain grade which really belong to a grade lower. Buyers will soon get next to this, and when stock is plentiful the grower with poor stock and short grades will be the one who will get left. While grading it is well to see that the roses are handled as they should be and not banged around any old way. Every bruise will show on the rose bud and may mean several cents less on a whole lot of roses, which is not much, but it may represent the profit and where several thousand roses are shipped out, could run into quite some money.

Tunica Saxifraga

Any seed house carrying hardy perennial flower seeds knows by experience that one of the first questions asked by the amateur buyer is: "Does it flower the first year?" As salesman, I always felt that when now and then I could answer in the affirmative. The number of species, of course, is limited but perhaps not so much so as we usually may think. By early sowing under glass, hardy fall asters, anthemids, boltonias, Chrysanthemum maximum, coreopsis, delphiniums, gaillardias, lychnis, Phlox paniculata, platycodon, Sedum spectabile, Scabiosa caucasica, Stokesia cyanea tritomas and even sometimes astilbes may be brought to bloom the first year. One of the easiest to handle and absolutely sure to produce its full crop of blossoms during the first season is the subject of this note, Tunica Saxifraga. A low creeping genus of the order Caryophyllaceae, hailing from Central Europe, it prefers an open sunny exposure and according to my observation does not suffer by occasional drought. Well adapted for small border, it is even more valuable for the rockery. The plantation depicted by our cut shows the August effect of early March seedlings in a rock garden which the writer built in Maine. The small narrow linear foliage and the great abundance of little pink blossoms gives the whole an admirably graceful appearance. Tunica Saxifraga in a cut state may be used for floral work in a similar way as we use the panicles of the gypsophilas. For this purpose the

TUNICA SAXIFRAGA.

new double flowering form is the most valuable one. The latter is a shy seeder and plants must be propagated by divisions or summer cuttings.

Glenside, Pa.

Richard Rothe

A GLANCE AT ROWAYTON.

The Rowayton Greenhouses of Traendly & Schenck at Rowayton, Conn., are well known to most of our readers. We know of no place where rose growing under glass is carried on with more watchful exactness than at this establishment and the product as in evidence from day to day at their New York salesroom finds favor accordingly among the buyers. Ophelia, Stanley, Mock, Beauty, White Killarney and Ward are the varieties grown most heavily and among those in the experimental class is a seedling which goes under the name of "Red Ward" for the present.

As previously mentioned in HORTICULTURE two mammoth Lord & Burnham houses have been added to this already large range this season and the graceful 125-foot stack of yellow brick recently completed is a landmark seen from afar. Labor troubles all through the summer have seriously hampered all work on this place and the heating system for the new houses has only recently been completed. It is what is known as the "vacuum system" and every modern device for efficiency and reliability has been made use of. Two monster Lord & Burnham boilers are installed in a spacious new boiler house of concrete and steel, which is now approaching completion.

Roses are not the exclusive product at Rowayton as chrysanthemums and carnations are also grown to a con-

siderable extent. The latter, in common with the carnation crops of other growers generally, are backward for the season. Beacon is the most promising variety in its present appearance and presages a fine fall crop. Of chrysanthemums there are many houses, all rather late in blooming. Crystal Gem, Golden Queen, Chrysolora and Oconto are the varieties now leading and the mid-season and late sorts are rapidly developing.

Extensive provision is being made here for the leading essential for up-to-date rose growing—sod—in large fields sowed down to humus producing crops.

CYPRIPEDIUM × POLLETTIANUM.

This pretty hybrid was introduced by Sander in 1891. It is the result of a cross between C. × callophyllum and C. oenanthum, the parentage of C. × callophyllum being C. barbatum × C. venustum. Our illustration is from a photo. by M. J. Pope.

GORDONIA ALATAMAHA.

With the exception of the Witch Hazel, which in this latitude is a shrub rather than a tree, this Gordonia is the last tree of the year to flower in the Arboretum, and its pure white, cup-shaped flowers, resembling a single Camellia flower, can now be seen. This handsome little tree has an interesting history. It was discovered by John Bartram, the famous Pennsylvania traveler and botanist, in 1765 near Fort Barrington on the Altamaha River in Georgia. John Bartram's son William visited the locality in 1778 and collected seeds and roots of this tree, and Dr. Moses Marshall who visited the locality in 1790 was the last botanist who had seen it growing naturally. Many botanists have hunted for it in vain in the neighborhood of Fort Barrington but without success, and this tree has been preserved by the plants and seeds collected by William Bartram and their descendants. Many of these are growing in gardens near Philadelphia and there are large and very old specimens in the neglected arboreta of the Brothers Painter at Medina and of John Evans in Radnor Township, Delaware County. Good plants may be seen in Fairmount Park near the Horticultural Building and in a few private gardens near the city. This Gordonia has been an inhabitant of the Arboretum for many years where it flowers in sheltered positions every autumn. Late in the season the leaves turn orange and scarlet before falling.

training in care of plants; good eyesight; must pass good physical examination.

The quality of many of the men employed in government or experiment station horticultural positions is sometimes scoffed at but what can be expected for the emoluments usually offered for such service?

Combating
 The H. C. D.

When passing through the passenger waiting room of one of the ferry houses in New York our attention was drawn to the flower stand where hung a card inscribed "Wedding and Funeral Designs, \$1.00." One sometimes hears or reads plaintive dissertations on "the High Cost of Dying," etc., but the next time we have to listen to such we shall refer the critic to that ferry florist for consolation. His generosity, as will also be seen, extends not only to the customer in mourning but to those matrimonially interested, and who can say that this florist is not "doing his bit" to discourage race suicide by holding down the "High Cost of Marrying"? But supposing that the young lady most interested in the event should rebel at this economical procedure? We recall a case where a colleen from the Emerald Isle disdainfully rejected a bridal bouquet of full-blown roses with "It's not ro-o-ses I want; it's boods!" We can see trouble ahead for those one-dollar wedding "designs." Funerals are safer for there the victim can't "kick."

The
 growing F. T. D.

The revised constitution and by-laws of The Florists' Telegraphic Delivery as adopted at the special meeting of that organization at Chicago last week shows much care in preparation and in fitting its provisions and requirements to the conditions encountered in the years that have elapsed since the Association was founded with no previous experience on which to draw as a basis for government. The document is lengthy and not necessarily one for reproduction in its entirety in our limited space, especially as copies are available to all who are sufficiently interested to ask Secretary Albert Pochelon of Detroit for same. Article 2, Sec. 1, however, should have much general interest for many of our readers and we reproduce it here, as showing clearly the objects of the Association:

The Association has for its objects: The mutual exchange of orders between retail florists in the different cities and towns in the United States and the Dominion of Canada; to educate its members in the proper handling and promotion of the exchanging of orders by telegraph, telephone, and mail; to give publicity to the service rendered by members of the Association in order to promote the out of town business of each member of the Association; to promote and encourage the exchange, between members of the Association, of ideas, principles, policies, methods and manner of handling and conducting the retail floral business, for the betterment and education of the members; to promote a good feeling and honest dealing between all members of the Association; to insure the prompt payment of all accounts contracted between members of the Association; and to further generally the interest of the retail floral business and encourage the co-operation of retail florists.

That is pretty good doctrine and has a very practical application where, perhaps, the florist trade has lacked greatly in the past. The rules as regards business between members are very carefully drawn with the object of obviating any causes for dissatisfaction such as may have transpired in previous operations and a sufficient advance in dues and payments into the guarantee fund to ensure financial stability under all circumstances. The outlook for the growth and expansion of the class of retail business promoted by this Association is very promising.

The job of nursery inspector under the State Board of Agriculture of Massachusetts for which civil service examination of applicants will be held next Monday, with its minimum salary of \$2.50 per day, ought to draw a big crowd of eager aspirants (?). We can already see, "in our mind's eye" the long line of botanical and entomological experts waiting for their turn! The few qualifications required include such trifles as the following:

One must know how to recognize growing plants and their kindred at a glance; how to recognize insect pests or fungus diseases; what insect pests and fungus diseases they have in foreign countries and not here; must have

What a
 chance!

SOME HANDSOME AUTUMN SUBJECTS.

VIEW IN HIGHLAND PARK, ROCHESTER, N. Y.

The Sassafras.

There is now no more beautiful tree on the margins of New England woods and by New England roadsides than the Sassafras, as the leaves have turned or are turning orange or yellow more or less tinged with red. The autumn colors of several trees are more brilliant but none of them equal the Sassafras in the warmth and delicacy of their autumn dress. The Sassafras is a handsome tree at other seasons of the year. In winter it is conspicuous by its deeply furrowed, dark cinamon-gray bark and slender light green branches; in early spring before the leaves appear it is covered with innumerable clusters of small bright yellow flowers which make it at that season a conspicuous and delightful object. The leaves are thick, dark green and lustrous above, paler below and vary remarkably in shape as they are sometimes deeply three-lobed at the apex and sometimes entire without a trace of lobes. The fruit is a bright blue berry surrounded at the base by the much enlarged and thickened scarlet calyx of the flower and raised on a long bright red stalk. No other northern tree produces such brilliantly colored fruit. Unfortunately there is little time to enjoy it for the birds eagerly seek it as it ripens. The living wood of the Sassafras is not attacked by borers and the leaves are not destroyed and are rarely disfigured by insects. The thick spongy roots of the Sassafras produce suckers freely and these with a little care can be easily and safely transplanted. How many persons now plant the Sassafras and in what American nursery can it be found? It was, however, one of the first North American trees carried to Europe as it was established in England some time before the middle of the seventeenth century. The American tree was believed to be the only Sassafras until 1879 when another species, *S. tzuma*, was discovered in central China. This tree is now in the Arboretum but its ability to grow here has not yet been established.

Crataegus Arnoldiana.

This thorn is a native of eastern Massachusetts and one of the first of the American species raised at the Arboretum where it was found growing wild on a wooded bank. It is a tree with a well developed trunk, erect and spreading branches which are furnished with many long stout thorns, the smaller branches being conspicuously zigzag. The flowers are large in ample clusters and open with the unfolding of the leaves which later grow

A Twenty-one Year Old Planting on the West Side of Highland Park

We present herewith one more view in Rochester's world-famed public reservation. As an example of landscape planting it makes an impressive con-

trast with the subject shown on the cover page of this paper. Formal or natural, each style each has its proper place in landscape art and when so used attracts and satisfies.

to a good size, and are dark green in color. The fruit, however, is the handsomest thing about this tree; it is nearly globose, about an inch in diameter and bright red, and beginning to ripen from the middle to the end of August falls gradually the end of September or early in October. Of the thorns in the Arboretum collection with early-ripening fruits *C. Arnoldiana* is the handsomest, and as a fruit tree it may well find a place in every American garden in which an early autumn display is desired.

Crataegus pinnatifida.

This is a native of northeastern Asia and has long been an inhabitant of the Arboretum. It is a large shrub or small tree with large, deeply divided, dark green very lustrous leaves, large flowers, and bright scarlet fruit which ripens while the leaves are still green. This is one of the handsomest of all thorns, and it is economically interesting because one of the large-fruited forms is cultivated in orchards as a fruit tree in the neighborhood of Peking and in other parts of northern China.

Chinese *Cotoneasters*.

The handsomest shrub in the Arboretum during nearly the entire month of September was a form from western China of *Cotoneaster racemiflora* which has been called variety *soongorica*. It is a tall shrub with spreading and drooping stems, pale leaves, white flowers, and large bright red fruits which completely cover the branches. Some of the Chinese species have more conspicuous flowers and

handsomer foliage, but none of them have yet equalled in the Arboretum this inhabitant of the dry arid river valleys of western Szech'uan in the size, brilliancy and abundance of their fruits.

Cotoneaster divaricata.

Of the large-growing Chinese species this is perhaps the handsomest at this time, for the small bright red fruits which are produced in great abundance make a handsome contrast with the small, dark green, shining leaves. The flowers of this shrub are small and bright rose color. The new Chinese *Cotoneasters* are best seen on the southern slope of Bussey Hill, and the collection will repay careful study as it contains some of the most valuable shrubs for American gardens of recent introduction.

—Arnold Arboretum Bulletin.

LANDSCAPE ART.

The picture which serves as our cover illustration this week is from a photograph taken at the home of Mr. and Mrs. Bayard Thayer at Lancaster, Mass., one of the most notable of New England's private estates, and tells its own story. We have several other interesting views from this estate, showing some of the beautiful trees growing there and which we shall take pleasure in presenting in subsequent issues of HORTICULTURE.

A very useful bulletin on the Egg Plant Tortoise Beetle by Thomas H. Jones, has just been issued by the Department of Agriculture, as Bulletin 422. This is the first comprehensive article thus far published regarding this pest which is somewhat widely distributed over the southern United States.

CLUBS AND SOCIETIES

AMERICAN ROSE SOCIETY.

The Executive Committee of the American Rose Society met in New York City on October 9th, and considerable business was gone over. A report was made in regard to the Washington Test Garden, that it had been materially improved since early spring, and that Dr. Van Fleet was to assume general direction of the same.

Application was received from Howard & Smith of Los Angeles, Cal., for the registration of a new seedling under the name of "California," described as follows:

"The rose 'California' in color is burnt orange shaded with golden yellow at the base of the petals. The flowers full; bud long and pointed; fairly fragrant; a strong vigorous grower in this climate, and practically mildew proof."

This rose has been investigated and the registration ordered.

The place of the next annual meeting was a topic of consideration and the suggestion has taken form to hold a Rose Society meeting in Philadelphia next spring. There were certain offers of a guarantee fund made by five individuals towards making it a success, and the matter by resolution was referred to President Pennock to make preliminary inquiry relative to the rose exhibit in Philadelphia in 1917 at the annual meeting.

Application and correspondence was gone over relative to a Rose Test Garden at Bellingham, Wash., also at College Station, Texas. It was decided to hold a meeting of the American Rose Society at the coming Chrysanthemum Show to be held in Philadelphia during November, when as many members of the American Rose Society as can it is hoped will attend. The fund for Rose Disease investigation by Prof. Louis Massey of Cornell University has been responded to so far by twenty-eight members of the American Rose Society.

BENJAMIN HAMMOND, Secy.
Beacon, N. Y.

FLORISTS' HAIL ASSOCIATION.

A meeting of the Board of Directors of the Florists' Hail Association of America was held at the Hotel LaSalle, Chicago, Ill., on Friday, October 13, 1916. President E. G. Hill of Richmond, Ind., presided, the following officers and directors being in attendance: J. F. Ammann, Edwardsville, Ill.; John G. Esler, Saddle River, N. J.; Anders Rasmussen, New Albany, Ind.; Charles P. Mueller, Wichita, Kan.; J. A. Valentine, Denver, Col.; Samuel Murray, Kansas City, Mo.; C. L. Washburn, Chicago, Ill.; Fred Burki, Gibsonia, Pa.

The only directors absent were J. J. Hess, Omaha, Neb., who was en route to the National Flower Show Committee meeting at St. Louis, and Hon. Jo in the midst of a congressional campaign and therefore unable to attend.

The officers of the past year were

Meetings Next Week

Monday, Oct. 23.

Florists' and Gardeners' Club of Rhode Island, Swartz Hall, Providence, R. I.

Gardeners' and Florists' Club of Baltimore, Florist Exchange Hall, Baltimore, Md.

Tuesday, Oct. 24.

Newport Horticultural Society, Newport, R. I.

Tarrytown Horticultural Society, Tarrytown, N. Y.

Wednesday, Oct. 25.

Oyster Bay Horticultural Society, Oyster Bay, N. Y.

Friday, Oct. 27.

Connecticut Horticultural Society, County Bldg., Hartford, Conn.

Monmouth County Horticultural Society, Red Bank, N. J.

Pasadena Horticultural Society, Pasadena, Calif.

People's Park Cottage Gardeners' Association, Paterson, N. J.

Saturday, Oct. 28.

Dobb's Ferry Gardeners' Association, Dobb's Ferry, N. Y.

re-elected, viz.: E. G. Hill, Richmond, Ind., president; J. F. Ammann, Edwardsville, Ill., vice-president; Hon. Joseph Heacock, Wyncote, Pa., treasurer; John G. Esler, Saddle River, N. J., secretary.

On motion, it was ordered that the Twenty-ninth Assessment to be levied on March 1, 1917, shall be at the rate of twenty cents per 100 sq. ft. on single strength, and eight cents per 100 sq. ft. on double strength glass; the increase over the last assessment being occasioned by the exceedingly heavy hail losses during the past season which necessitated the paying out of an unusual amount.

The charter of the Association which will have been in practical and successful operation for thirty years upon June 1, 1917, will be renewed under an Enabling Act of the New Jersey Legislature this coming winter, and the secretary was authorized to take the necessary steps to that end. The secretary was also authorized to file the list of Hail Association members with the secretary of the S. A. F. & O. H. for the purpose of securing representative upon the S. A. F. & O. Board through President E. G. Hill.

A large part of the day was given over to the discussion of the necessary changes in the by-laws, and J. A. Valentine of Denver, Col., was appointed a committee of one to draft the amendments in accordance with the trend of the discussion for eventual submission to the stockholders. These new amendments are expected to establish a fiscal year under which arrangement the annual meetings of the Association will be held at the call of the President after such fiscal year is concluded at such time and place as he may designate. The members of the Board are to be congratulated upon having successfully accomplished work that will be to the benefit of the Association. JOHN G. ESLER, Secy.

NATIONAL FLOWER SHOW COMMITTEE.

The special meeting at St. Louis on Friday and Saturday, Oct. 13 and 14, was attended by George Asmus, chairman, John Young, secretary, J. J. Hess, treasurer, Chas. H. Totty, W. P. Craig, A. Farenwald, and President-elect R. C. Kerr. Patrick Welch and Thomas Roland were unable to be present.

The committee were welcomed at the Jefferson Hotel by F. H. Meinhardt, J. J. Windler, H. C. Irish, Jules Bourdet, D. S. Geddis, H. J. Fillmore, A. Miller and Chas. F. Hatfield, secretary and general manager of the St. Louis Convention Bureau.

The committee were the guests of F. H. Meinhardt for breakfast at the Jefferson Hotel after which all the exhibition halls suitable for a flower show were visited and inspected. At noon the committee went into executive session at the Planters' Hotel. The final reports of the National Flower Show held in Philadelphia were received and all business in connection with that exhibition was cleared up.

By unanimous vote it was decided to hold the next National Flower Show in the spring of 1918 in St. Louis. By similar vote it was decided to lease the building known as the Coliseum for this exhibition and the dates to be April 6 to 15. The secretary of the committee was authorized to prepare the necessary floor plans showing available spaces for the trade exhibits and if possible to arrange for a scale of prices which would include the cost of booth and signs. This would assist in having one general scheme of arrangement and decoration in the trade section. Chas. H. Totty, Thomas Roland and A. Farenwald were appointed a committee to prepare a preliminary schedule.

The secretary was instructed to communicate with the American Rose, Carnation, and Sweet Pea Societies inviting them to co-operate with the National Flower Show by holding their annual meetings and exhibitions at the same time. The secretary was also authorized to raise immediately the usual guarantee fund of \$10,000.

Mr. Asmus tendered his resignation as chairman of the committee giving his reasons why some other member of the committee should be elected to that office. After being thoroughly discussed Mr. Asmus was induced to reconsider his decision and upon motion of Mr. Totty his resignation was not accepted.

At 6.30 P. M. the committee were the guests of the officials of the Convention Bureau at dinner in the Planters' Hotel. Among those present were Goodman King, president of the St. Louis Convention Bureau, and Chas. F. Hatfield, secretary of the same bureau, representatives of the daily press, Jules Bourdet, president of the St. Louis Florist Club, J. J. Windler, secretary, and A. H. Hummert, vice-president of the same club. Also W. W. Ohlweiler, J. J. Beneke, F. A. Windler, V. J. Gorley, Chas. Beyer,

Fred H. Meinhardt and David S. Geddis. Interesting addresses on the coming National Flower Show were made by George Asmus, Chas. H. Totty, David S. Geddis, Chas. F. Hatfield and Goodman King.

In the evening the committee attended a special meeting of the St. Louis Florist Club in the Coliseum Building. All of the officers of the St. Louis Florist Club were present and in addition there was an attendance of fifty-one members representing the different florists' interests of the city.

The early part of the meeting was presided over by George Asmus who made a rousing address calling attention emphatically to the necessary work attached to a National Flower Show. Each member of the committee in turn was called upon to enlighten the members present as to what was required to make the coming show the success it certainly will be. They also gave a detailed report of the work in connection with previous National Flower Shows and it was made very clear that this coming exhibition would have the benefit of this experience.

The meeting was then turned over to President Jules Bourdet, of the local club, who called upon each member present for a few remarks and all were enthusiastic and promised to assist in every way possible to make the next National Flower Show to be held in St. Louis more successful than any that have been held before.

Frank Robinson, secretary and manager of the Coliseum, who without question is one of the best show managers in this country, gave an interesting talk promising his support and assistance wherever possible. The National Flower Show will have the hearty support of the Business Men's League.

The National Flower Show Committees were very favorably impressed with their reception and were delighted to see the great interest and enthusiasm shown by the florists interests in St. Louis and later on when the local committees are appointed the work of the exhibition will go on with a rush, and there is no question but what the Fifth National Flower Show will compare favorably with any preceding flower shows.

After the meeting in the Coliseum the committee were entertained at supper by President Bourdet and other members of the Florist Club.

On Saturday morning another executive session of the committee was held and many important necessary details were arranged for. A visit was also made to Shaw's Botanical Gardens and the officials of this institution are very enthusiastic and pleased at the coming of the National Flower Show to St. Louis and will give their support both financially and otherwise.

JOHN YOUNG, Sec.

ST. LOUIS FLORIST CLUB.

The St. Louis Florist Club held its monthly meeting Oct. 12th at the St. Louis Cut Flower rooms, about fifty members present. The meeting was honored by the presence of President-elect R. C. Kerr of the S. A. F., who came here to attend the meeting of the National Flower Show Committee. Speeches were made by R. C. Kerr, F.

Coming Exhibitions

Oct. 26-27, Madison, N. J.—Twenty-ninth Annual Flower Show, Morris County Gardeners' and Florists' Society, James Assembly Hall.

Oct. 27-29, Mount Kisco, N. Y.—Fall show of the Northern Westchester County Hort. and Agri. Soc.

Oct. 31-Nov. 1, Greenwich, Conn.—Fall Flower, Fruit and Vegetable Show of the Westchester and Fairfield Horticultural Society.

Nov. 1-5, Boston.—Grand Autumn Exhibition of Plants, Flowers, Fruits and Vegetables, Massachusetts Horticultural Society, Horticultural Hall.

Nov. 1 to 3, Tarrytown, N. Y.—Chrysanthemum show of the Tarrytown Hort. Soc. in Music Hall.

Nov. 2-3, New Bedford, Mass.—New Bedford Horticultural Society, Annual Chrysanthemum Show.

Nov. 8, Philadelphia.—Chrysanthemum Society of America in conjunction with Pennsylvania Horticultural Society.

Nov. 8-10, New York.—Annual Chrysanthemum show of the American Institute, Engineering Society Bldg., 25-33 W. 39th St., New York.

Nov. 9-10, Bloomington, Ill.—Fall Flower Festival, Illinois State Florists' Association.

Nov. 9-11, Lancaster, Pa.—Fall flower show.

Nov. 9-12, New York.—Fall exhibit Horticultural Society of New York at Museum of Natural History.

Nov. 10-11, Cleveland, O.—Second Annual Flower Show, Hotel Hollenden.

Nov. 11-19, New Orleans, La.—Flower show.

Nov. 14-15, Providence, R. I.—Flower show of R. I. Hort. Soc.

C. Weber, Jr., Fred Ammann and others. Frank Gorly spoke on publicity and Mr. Ohlweiler urged co-operation to make the Spring Show of 1917 and the National in 1918 record successes.

PENNSYLVANIA HORTICULTURAL SOCIETY.

The monthly meeting of the above society was held on October 18. There was a good attendance to listen to a most entertaining illustrated lecture by Arthur Herrington on "Spring Bulbs, New Ideas in Planting and Arrangement." There was a nice showing of cosmos and chrysanthemums. After the lecture the business meeting was held in the library.

CLUB AND SOCIETY NOTES.

An Executive meeting of the American Rose Society will be held at the Hotel Breslin, Broadway and 29th street, New York City, on Monday, October 23rd, at 2 P. M., to decide on a place of meeting and to make arrangements for the next annual show.

The October meeting of the Rhode Island Horticultural Society was held Wednesday evening, October 18, 1916, in Manning Hall, Brown University. Professor Albert F. Blakeslee, Cold Spring Harbor, Long Island, New York, gave an illustrated lecture on "The Value of Modern Plant Breeding to the Horticulturist," showing a very interesting set of slides. E. K. Thomas of State College, Kingston, R. I., is secretary.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

An enthusiastic meeting of the club was held on Tuesday evening, October 17, 110 members being present and six new members added. Resolutions on the death of Jackson Dawson were adopted, the committee on resolutions being A. P. Calder, Sr., Duncan Finlayson and T. D. Hatfield.

Herman H. Bartsch lectured on chrysanthemums from the commercial standpoint, and he said to produce chrysanthemums such as the Wm. W. Edgar Company marketed, cost them \$7.00 per hundred to grow, and if they got \$10.00 a hundred for them they considered that a fair profit. He went very minutely into the culture of the leading varieties, etc.

Eric H. Wetterlow of Manchester, Mass., spoke on the growing of specimen blooms from the private gardener's point of view. He found that growing in 8-inch pots was superior to growing in benches, and that they could not be grown for less than \$9.00 per dozen blooms. A lengthy discussion followed the reading of both papers.

On the exhibition table were Chrysanthemums Polly Rose and Oconto from W. W. Edgar Company; vase of chrysanthemums from W. E. Pratt; Chrysanthemums Hortense Malgat and Cranfordiae from W. N. Craig, also Bouvardia Humboldtii and Pure Culture Mushrooms; collection of mounted specimens of our native flowers from W. H. Judd, Arnold Arboretum; also displays of apples from several exhibitors. All these exhibits were awarded a vote of thanks.

There was quite a lengthy discussion on the proper protection of trees and shrubs during the winter from the ravages of rabbits, etc., and the use of burlap and slightly smearing the stems with coal tar was considered to be the best preventive.

It was announced that John Davy, of Kent, Ohio, the original tree surgeon, would give a stereopticon lecture at the next meeting, Nov. 21, his subject being "Trees, Insects, Birds." The club plans to invite several other societies to join them on that evening to hear and enjoy this lecture.

NASSAU COUNTY HORTICULTURAL SOCIETY.

The monthly meeting of this society was held at Glen Cove, N. Y. on Oct. 11. Final arrangements were made for holding the Chrysanthemum Exhibition on Nov. 2 and 3. James Gladstone was appointed manager of the same. It was decided to hold a smoker after our next meeting on Nov. 8. Robert Jones offered a prize of ten dollars for the best table decoration of chrysanthemums by assistant gardeners, to be competed for at that meeting. An essay received from the Association of Gardeners on "Malnutrition in Trees" by Arthur Smith was read and discussed.

ST. LOUIS SPRING FLOWER SHOW.

An "International" Spring Flower Show will be held in St. Louis, March 15th to 18th, 1917. The prizes to be offered will be so arranged that not only professional growers, private gardeners and amateurs may compete, but also the Botanical Gardens, City Parks and Greenhouses in the United States and Canada. All branches of horticulture are considered in the competitive classes. The grower, wholesaler, retailer, florist, nurseryman, landscape gardener and the fruit and vegetable grower, all will have opportunities to exhibit their skill. The competition will also include exhibitions of the different methods of packing plants and flowers. There will be lectures as well as demonstrations, and no trouble or expense will be spared to make this one of the most successful flower shows ever held. The Exhibition Hall is centrally located, easy of access, and not far from the Union Station.

The officers are as follows:

Executive Committee—Jules Bourdet, chairman; W. A. Rowe, treasurer; F. A. Windler, Adolph Jaenicke, G. B. Windler, J. F. Ammann, W. W. Ohlweiler.

Manager of Show—Jules Bourdet.

Executive Secretary—W. W. Ohlweiler, Missouri Botanical Garden.

Chairmen of Sub-Committees—Finance, W. A. Rowe; Premium, A. Jaenicke; Publicity, F. A. Windler; Guarantee Fund, A. H. Hummert; Special Premiums, G. B. Windler; Entertainment, J. S. Carter; Admission, C. Beyer; Program, J. J. Windler; Auditing, H. G. Berning; Patrons, W. W. Ohlweiler; Judges, J. F. Ammann; Reception, J. J. Beneke; Trade Displays, W. J. Pilcher; Growers' and Nurserymen's Display, Frank Weber; Retail Display, F. C. Weber, Jr.; Private Gardeners, L. P. Jensen; Parks and Gardens, E. Strehle; School Exhibits, H. C. Irish; Landscape Gardeners, C. W. Fullgraf; Special Exhibits, W. S. Wells; Exhibition and Hall, W. C. Smith; Decoration, D. S. Geddes.

CATALOGUES RECEIVED.

BAILEY'S NEW STANDARD Cyclopedia of Horticulture

Six large quarto volumes. More than 3,600 pages. 24 exquisite full-page color plates. 96 full-page sepia halftones and more than 4,000 text engravings. 500 collaborators. Approximately 4,000 genera, 15,000 species and 40,000 plant names.

The new Standard Cyclopedia of Horticulture has been freshly written in the light of the most recent research and experience. It is not merely an ordinary revision or corrected edition of the old Cyclopedia, but it is a new work from start to finish with enlarged boundaries geographically and practically; it supersedes and displaces all previous editions or reprints of every kind whatsoever. It is both an Encyclopedia and a Manual, for with the aid of its Synopsis and Key, amateur and professional alike may quickly identify any plant, shrub or fruit contained within the set, and then receive expert instructions for its cultivation. Price \$6.00 per volume. Five volumes have now been issued and the others will follow in succession. Order from

RUTHERFORD, NEW JERSEY

INSECTICIDES PURER.

That the Insecticide and Fungicide Act of 1910 has resulted in marked improvement in the quality of insecticides and fungicides entering interstate commerce is shown by the annual report of the Insecticide and Fungicide Board for the fiscal year ended June 30, 1916. Persistent sampling of four of the leading substances used in spraying shows a marked reduction in the number of violations of the act compared to preceding years. In 1915 only 8 per cent. of the samples of lead arsenate taken were in violation of the act, whereas in 1911-12 60 per cent. violated the law. Similarly the violations found in lime-sulphur solutions had fallen from 94 per cent. to 14 per cent., and Bordeaux mixture from 98 per cent. to 36 per cent. Only 19 per cent. of the shipments of Paris green examined showed any violation, whereas in 1911-12 28 per cent. of these shipments were objectionable.

While these results are probably due partly to the effect of deterrent prosecutions, they are due in even greater measure to the assistance the Department's scientists have accorded to manufacturers in making their products of standard strength and to the growing practice on the part of manufacturers of adapting themselves to improved methods and tests.

In this work during the past year, the inspectors collected 1,487 samples of different shipments. Of these, 190 were of insecticidal preparations for household use and 221 were of disinfectants, germicides, and bactericides for the prevention of diseases of human beings as well as of domestic animals. The Department during the past year has given particular attention to the prevention of the sale in interstate commerce of products recommended for household use which are either impotent or the value of which is misrepresented on labels. Many samples of arsenates, Bordeaux mixtures, sulphur and other preparations also were taken.

In preventing the importation of misbranded or adulterated insecticides, the Insecticide and Fungicide Board collected 35 import samples. In the case of 5 preparations it was recommended that entry into this country be entirely forbidden or that the consignments be released only after being correctly labeled. In 9 other cases it was recommended that future shipments be detained. The remaining samples complied with the law.

The Board devotes considerable attention to investigational work for the determination of the value of various commercial insecticides and fungi-

HAMMOND'S PAINT & SLUG SHOT WORKS, Beacon, N. Y.

cides. It announces that it has under way tests of the merits of commercial dust and liquid sprays in the control of insects and diseases. These will include tests of articles composed of finely ground sulphur in combination with arsenate of lead, with a diluent such as finely ground lime or gypsum. The Board also is investigating the value of different commercial pyrethrum powders, tobacco powders, nicotine solutions, etc., when used as sprays, dusts or fumigants. Experiments have been made to determine the action of potassium cyanide and other substances in the control of insects and plant diseases when injected into the tissues of plants.

TO KILL THE CHRYSANTHEMUM LEAF ROLLER.

A bit of very useful information for plant growers developed in conversation with F. C. W. Brown of J. M. Gasser Co., Cleveland, Ohio. In discussing the greenhouse pest known as the leaf roller, which is often the cause of serious injury to chrysanthemum plants, he gave the following formula for a spray which he said was the result of much study and had proved most effective:

"One level teaspoonful of paris green, mixed to a paste with nicotine, and then diluted with two gallons of water to which had been added one-half pound of brown sugar. This does not discolor the foliage and is harmless to everything except the leaf roller."

PUBLICATION RECEIVED.

A very serviceable document for the use of greenhouse workers is Bulletin 296, recently issued by the New Jersey Experiment Station at New Brunswick, N. J. It treats very fully and practically on the more important of the destructive greenhouse insects, giving pictures showing their various stages, describing their life history, food plants and the injury caused by each, with directions for their control. Harry B. Weiss is the author.

FALSE REPRESENTATION

Never Bring a False Representation Case Without Fullest Investigation.

About six months ago a seed dealer doing business about seven miles from this city, opened an account with us. He came fairly well recommended and made a financial statement which our credit man thought warranted a line of several hundred dollars. We continued to sell him on regular terms, and he paid promptly, until about two weeks ago, when we heard rumors that he was a snide and was getting ready to fail. We investigated this, and found information which indicated that it was true. We then investigated a little further and apparently found that some real estate which the customer had given in his statement as a part of his assets, was really in his wife's name and was not liable, so our attorney advised us, for his debts. Being told this, and in order to forestall what we believe was our coming loss by reason of his failure, we had the man arrested for obtaining credit under false pretences regarding the ownership of real estate, hoping that this might at least get us a settlement of our account. He was held in bail for court, and the case is still not disposed of, but we have learned that we were in error about the false representation. The real estate in question was in his name at the time he set it forth in his statement and is in his wife's name now, but only because his wife exchanged some other real estate for it. This customer was worth what he said he was, and it therefore looks as if we were wrong in having him arrested. What course can he take against us? We hear that he intends to do something.

I withhold both the name and address of the writer of this, because otherwise I should not like to answer it publicly. I want to answer it publicly because it touches a subject of general interest and of much importance.

The very day I received this letter, a Philadelphia court gave to one Isaac Gross, a general storekeeper, a verdict of \$3,075 against a Philadelphia wholesale house—Lichtenstein Bros. & Sons. The facts were similar to those set forth in the above letter. The jobbing house accused Gross of obtaining goods from them under false statements as to his financial responsibility. He denied it, and they had him arrested. He was tried and acquitted, and at once brought suit for damages for malicious prosecution. The verdict of \$3,075 is the result.

There is no doubt that in the case cited in the above letter the customer can bring suit against my correspondent for malicious prosecution. Whether he will win it is of course a different thing, but he has all the elements to work with. He was accused and arrested for a criminal offense, thereby being put to expense and shame. When tried he will doubtless be acquitted, as there will be no evidence against him. I am free to say that if I were his counsel I should advise him that the next step should be the bringing of a suit for malicious prosecution.

It is a malicious prosecution when A brings a criminal action—in most States a civil action also—against B, upon insufficient grounds. It can be knowingly done, it can be recklessly

The Sensational Pink Sweet Pea YARRAWA

BRIGHT ROSE-PINK

This variety leads all others for color, size of bloom, length of stem and long flowering period. Order the original stock from Boddington's and increase your profit.

Arthur T. Boddington Co., Inc.,
128 Chamber St., New York.

Inclosed is list of Sweet Peas to be sent at your earliest convenience.

Perhaps it would interest you to know what result I had from one ounce of Yarrawa last winter. It bloomed continuously from Feb. 15th until the end of June and netted \$77.50, none being sold for more than \$1.00 per 100.

If you know of anyone doing better kindly let me know.

Yours truly,

(Signed) THOMAS DUKE.

done, or it can be carelessly done. Even if the prosecutor thought his ground was good, he is held responsible if it proves to be bad, if he could have found it was bad had he looked the matter up before acting. Nobody is expected to issue a warrant for another person's arrest unless he knows precisely what he is doing.

It will therefore not be enough for this correspondent to say "I acted in good faith, believing I was right." He must further say, "I investigated and had every reason to believe I was right."

That means what the law calls "probable cause." If the prosecutor who is afterward sued for malicious prosecution had probable cause for what he did, he is not liable in damages, because then the law says the act was not malicious. What is probable cause? Any state of facts which after careful investigation would convince the average man that the person whose arrest he was contemplating was guilty. In other words, if the above correspondent carefully investigated all reasonable sources of knowledge, and everything he found pointed to his customer's guilt, then he had probable cause. But if he only partially investigated—in other words, if he was careless, if he jumped at conclusions, the jury would almost certainly hold that he had no probable cause and mulct him in damages.

Before having a customer arrested, or anybody else, for that matter, always consult a lawyer. *Always.* The fact that you acted on an attorney's advice is always considered evidence

in your favor, as showing probable cause and absence of malice.

Every man who obtains money or goods, or anything whatever, under false representations, should be arrested as an example to others. Moreover, it is usually the quickest way to induce him to undo the wrong he has done. But never do it until you have carefully looked up every fact which could bear upon his guilt. In the case submitted by the above correspondent, I should have taken my warrant, and an officer to serve it, to the customer and confronted him with the evidence I had against him. It he had any explanation, I should investigate it before serving the warrant. If he gave none, the case against him would be very much strengthened, and I should serve the warrant then and there. Apparently this course would have prevented the above situation.

(Copyright, October, 1916, by Elton J. Buckley.)

SEED TRADE NOTES.

Wethersfield, Ct.—Hart, Welles & Co., seedsmen, have dissolved partnership. Mr. Welles retiring from the business. The firm name has been changed to the Chas. C. Hart Seed Co.

The many friends of Fred Peterson, now connected with J. F. Noll & Co., of Newark, N. J., will be pleased to learn that he is convalescing satisfactorily from his recent operation for appendicitis. He has not yet been able to return to business, probably will not be for some weeks, but he is on the mend.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Revising Estimates.

Crop estimates this year are undergoing many changes, and these are generally on the declining scale. It thus comes about that estimates made in the field some weeks ago are found, when actual deliveries are made, to be considerably out of line. We understand that this will apply to several varieties of peas, and while no figures have been given as to probable deliveries of beans, the growers themselves had formed mental estimates which they have been obliged to revise because the crops have not come in according to expectations or because weather conditions—frost or otherwise—have damaged crops that looked as if they might make seed some weeks ago. While these remarks are perhaps too general to suit many of our readers, we cannot be any more specific with the information at hand.

Two of the items in beans which were the most abundant last year, and which nearly everyone seemed to have, were the Black Valentine and the Late Refugee. This year these items, particularly the latter, will be among the very short ones, and prices are likely to rule higher than on those varieties which are usually at a premium over either one of these two.

Peas and Beans.

It probably will not be long before the seed growers will send out estimates of their expected deliveries of beans. One of the largest growers of peas and beans has sent out their estimate of deliveries of peas. These estimates show that with the exception of the Dwarf Telephone, on which they will deliver only 20 per cent., all other garden peas will be nearly or quite 100 per cent., the exception being the Pioneer, Peter Pan and Laxtonian, of which they will deliver 75 per cent. Both Black Eye and White Eye Marrowfats will be short, probably not over 50 per cent., and quite possibly less. Canada Field peas will be very short and no percentages are named.

Many weeks ago we expressed the opinion that from reports that had reached us we believed peas would be good property to own this year. This opinion has now been fully confirmed. Alaskas are now selling at about \$7.25 to \$7.50 per 100 lbs. delivered in New York, and the smooth Extra Earlies at close to the same figures, while White Marrowfats are even higher. Practically all garden peas are now selling at from \$1.00 to \$1.50 per bushel above the contracting prices of last spring, and it looks as if the top had not yet been reached. Beans are still a more or less unknown quantity, but as previously stated, it cannot be long before the growers will find it necessary to submit some kind of estimate to their customers.

Vine Seeds and Spinach.

Nearly all vine seeds, particularly cucumbers will be in abundant supply. This applies particularly to the standard varieties. There will, of course, be some odds and ends which will be short. We have mentioned in previous issues that one of these items will doubtless be Early Summer Crookneck and Giant Summer Crookneck squash. Hopes are entertained that through diplomatic pressure the embargo on spinach seed may be lifted so that dealers will be able to get at least a part of the quantities contracted for in Holland. There is a report that a certain Long Island cabbage seed grower has been experimenting with the growing of spinach seed somewhere in the central or western part of New York State. We have not learned the result.

European Demand.

We have referred heretofore to an active demand for peas from Europe, particularly England and France. We understand that a considerable quantity of Extra Early peas have been sold to a leading French seed house, while several prominent British dealers have been buyers of the large podded early and late varieties. They are still buyers, but at last reports had not been able to cover their requirements.

Canners' Shortages.

Now that the crop season for the canners is practically at an end it is known that the shortages in the four leading items in the vegetable line, peas, string beans, corn and tomatoes will be even shorter than some of these items were estimated some weeks ago. Just what the pack of

peas was, became known some weeks ago, but the other three items have been undetermined until very recently. Severe frosts have finished all crops of tomatoes, beans and corn, and it may be said, in a general way, that string beans will not be above 40 per cent. of last year's pack, corn from 40 to 50 per cent., and tomatoes but little over 50 per cent. These points are mentioned because many of the seed trade sell to canners the seeds they use, and are thus indirectly interested.

Potatoes and Onions Very High.

According to the report of the National Department of Agriculture, potatoes are the shortest they have been in five years or more, and it is thought that record prices will be realized by midwinter for fancy clean stock. The onion crop is short and prices are running unusually high for this time of year, and this will apply to onion sets. It looks like another year of high prices for both sets and large onions.

One Week's Imports

Imports at the port of New York, of horticultural material, for the week ending October 6th, were recorded as follows:

Bulbs—Netherlands, \$146,961; England, \$736; Hongkong, \$943; Japan, \$2,523.

Plants—Belgium, \$726; Netherlands, \$2,275; England, \$1,191; Brazil, \$677; Colombia, \$128; Venezuela, \$530.

Clover Seed—France, \$13,237.

Grass Seed—Denmark, \$10,448; England, \$10,431.

Other Seeds—France, \$5,007; England, \$3,833; Hongkong, \$384.

Salts of Potash—Japan, \$5,467.

Nitrate of Soda—Chile, \$640,276.

NEWS ITEMS FROM EVERYWHERE

CHICAGO.

A. Henderson Co. is now receiving Dutch bulbs. As the supply coming is limited, only those who get their orders in promptly will be sure of stock which so far appears fine.

The convention of the Florists' Telegraph Delivery was characterized by one who was present, as a meeting for business, which was conducted by business men in a business-like manner. This sounds well for the retail florists.

The American Bulb Co. is pleased with its beginning and orders are coming in which keeps the hands busy. Just now *Lilium giganteum* is moving fast. A. Miller and S. Seligman are both out after orders in the Middle West this month.

Wm. O'Carroll, head gardener for the University of Chicago, was given publicity in the local papers last week. He is credited with growing 4 lb. lemons and asserting that a \$2,000 greenhouse would average \$3,600 yearly if planted to them.

J. O. Fleischman had a special weekend sale on *Ophelia* roses which he advertised at \$1.50 per doz. stems 24 to 30 inches. This is in line with the suggestion that retail florists give these sales instead of letting stock accumulate till the department stores get it to sell for a song.

Chrysanthemums, cyclamen and *Primula obconica* plants have appeared in the market during the past week, and though they are not yet at their best, they lend a touch of color to what has so far been a season of foliage plants. All the stock is very late this year, attributed by the growers to the fact that the hot summer caused the plants to make extra growth at the expense of bud growth.

A. B. Dick Estate and Arthur Meeker both suffered loss by fire on Oct. 16, full details of which have not been learned at this writing. The superintendent's office was damaged and greenhouses containing valuable plants are said to have been destroyed on the A. B. Dick Estate, while the heaviest loss at the Arthur Meeker place was the damage to the stock house containing several car loads of seeds. Both these places have contributed largely to the success of Chicago's flower shows and in every way helped to foster the love of the beautiful in Nature.

Outing day for the Florists' Telegraph Delivery Convention was on Thursday, Oct. 12, and was planned to be a complete relaxation from the business of the convention, but as on a similar occasion at the convention two weeks ago, a steady rain marred the pleasure. Sixteen automobiles carried those who cared to go as far as the South Shore Country Club and then over the boulevards to the West Side parks, after which lunch was served at the Bismark Gardens. The driving was the worst possible, according to John Michaelson, of E. C. Amling's. The oil of the boulevards caught the fallen leaves and cars slipped until

many cars were injured and serious accidents narrowly averted.

At Zech & Mann's, where a large shipping trade is carried on, were seen some of the best chrysanthemums of the season so far. *Comoleta* is the queen of the yellows with its deep golden color, stiff stem and good keeping qualities and comes just as Golden Glow leaves. *Unaka* has but one recommendation as grown in this vicinity—it comes early for "pink." It has a small flower and usually imperfect. The first Early Snow arrived this week and are large full blooms of clear white. Allie Zech has the opinion that the practice of stripping too much foliage from the stems of *Chrysolora* while in the bench inclines that fine variety to wilt when cut. The bare stems become hard and are not able to absorb water enough to preserve the flowers, which lessens its value for either local or shipping trade. When foliage is left on the stems remain soft and can absorb water and at this point the stems should be cut and no longer.

WASHINGTON, D. C.

The date for the annual chrysanthemum show at the Department of Agriculture is yet somewhat in doubt, but the plants are coming along in fine shape, and it may be that the show can be held the first of November as last year.

The Washington Floral Company is pushing the sale of novelty bowls and flower holders. The bowls are three or four inches in diameter. The holders are china "fish." These are sold at 35 cents each and are proving very popular.

Gude Bros. Co. have on exhibition a number of cotton plants in six-inch pots, in full bloom and attracting the attention of large numbers of school children. They contemplate sending half of them to the public schools for educational purposes.

Florists desiring to continue in business after October 31, next, must promptly renew their licenses, according to a notice just issued by the assessor of taxes, for on that date all licenses covering florist businesses in the District of Columbia will expire.

CLEVELAND

The Friedley Co. are bringing in some very fine cyclamen in seven and eight-inch pots.

H. G. Evans has left the Gasser Co. to take a position with Randolph & McClements at Pittsburgh, Pa.

The Gasser Co. are remodeling their retail store. Carl Lee, designer for the Gasser Co., is on the sick list.

The Cleveland Cut Flower Co. have moved their entire plant from Eddy road to Newton Falls, Ohio. They expect to be operating in full blast within a few weeks. Herbert Bate will take up his residence at the latter place during the next thirty days.

F. J. RIENZENTHALER.

PITTSBURGH.

Dr. Otto Jennings, curator of the Carnegie Institute museum herbarium, and Mrs. Jennings have returned from a five weeks' expedition in northwestern Ontario.

Ralph H. Pinner is having a ten days' business trip in northern Ohio. Mr. Pinner has recently added Howard Andrews of Philadelphia to his staff of landscape men for the A. W. Smith Co.

Berthold Frosch, for a number of years connected with the Bureau of Parks, has been engaged to look after the landscape features of the Tuxedo Land Company, comprising 2,000 acres in the heart of the Sewickley Heights district.

Should weather conditions continue favorable, John W. Jones expects to open his chrysanthemum show at Schenley Park, on the first Sunday of November. Foreman James Moore of the Phipps Conservatory in North Park will probably inaugurate his exhibition a week earlier, as will likewise Anthony A. Leach of "Green-lawn."

Andrew Forsyth, head gardener on the John Daub's Homewood estate, has gone to the employ of Joseph Trees, of North Highland Ave. Fabbazzi Pisquale, who has been in charge of the latter, has returned to his old position on the estate of Michael L. Benedum, succeeding Augustus William Weber, who recently resigned. Mr. Forsyth is the brother of Neil Forsyth, superintendent of "Lyndhurst," the old Thaw estate, now leased by J. J. Fisher. After spending the past year in Detroit on the estate of E. L. Ford, Roderick Fraser has returned to his old position as first assistant to David Fraser on Henry Clay Frick's Homewood estate.

The Horticultural Society of Western Pennsylvania re-opened its sessions for the season of 1916-17, and will continue to meet at the Colonial-Annes Hotel. While dahlias was the scheduled subject, no formal program was carried out, the various members talking informally of the most satisfactory growing methods adapted to this climate. Mr. Adler, a grower on the North Side, exhibited a number of blooms. There was considerable talk in regard to the coming June Show under the auspices of the Garden Club of Allegheny County in which the Horticultural Society will co-operate with the Florists' Club. The next session of the organization will be devoted to an exhibition of chrysanthemums and addresses on the culture thereof.

Raymond Lindsey of J. T. Conger's Hartwell Floral Co., Cincinnati, O., was pretty badly injured on Monday, October 9, when an auto he was driving collided with another auto.

PHILADELPHIA.

The Pansy Flower Shop (Keene & Carter) is now at 624 South Broad street. Their old address was 1351 Lombard street.

Charles Sim has returned all safe from his visit to the old country. He relates many thrills and exciting episodes in the course of his peaceful journey.

Jammed against a tree on the Cobb's Creek golf links last Monday by a motor lawnmower, William Larkins, 52 years old, an employee on the city's golf course, suffered compound fractures of the left leg above and below the knee, a broken shoulder and painful lacerations of the body. He was sent in an auto to the University Hospital, where he is in a critical condition. Larkins was operating the motor lawnmower on the golf links and while in a deserted section closed the clutch and went to the front of the machine to make a slight repair. He left the motor in gear, however, and when he gave the mover a slight jar the clutch slipped and the big machine started forward crushing Larkins against a tree.

George and Alfred Burton engineered a visitation party among the growers in Montgomery & Bucks Co. on the 5th inst. Among those riding in the two Burton autos were: Samuel S. Pennock, David Colfesh, Arthur Niessen, W. H. Engler, Robert Kift, Alban Harvey, J. Wm. Colfesh and Edmund Harvey. The itinerary included the Burton & Myers places at Wyndmoor, Mortensen's at Southampton, Franklin's at Yardley, Heacock's at Roeloffs, Andre's at Doylestown, Lilly's at Chalfont, the Florex Gardens at North Wales, and John Welsh Young's at Flourtown. Returning to Wyndmoor the party was entertained to a bounteous dinner at the residence of George Burton, and left for home about 8 P. M. after a very delightful day's outing.

BOSTON.

On Thursday evening, October 19, the Florists' Bowling League started their series for the season at the Arch street alleys. Scores will be recorded in our next.

The position of nursery inspector for the State Board of Agriculture is open and civil service examination of applicants will be held at the State House, Boston, and at Amherst, simultaneously, on Monday, October 23.

A party of seven jolly salesmen from the Flower Exchange, sailed in Ed. Rojean's boat to Hough's Neck last Tuesday, to fish for smelts, but so rough was the sea that they were glad to go ashore and return by the land route, it being cheaper and more comfortable to buy the smelts in Boston.

Harry Quint was tendered a banquet by his employees and friends on Oct. 5th, at the Hotel Brunswick. The occasion was the fifth anniversary of Mr. Quint's venture into the business world. The toastmaster of the evening was Dr. Harry Belin. Among the employees present were: Julius Quint, Nathan Landerman, William Goldberg and Samuel Freedman.

ST. LOUIS.

Preliminary lists are out for the Spring Flower Show of 1917 to be held at the Amory Building.

Vincent and Frank Gorly, with F. C. Weber, Jr., were in Chicago at the meeting of the Florists' Telegraph Association.

A luncheon was given Thursday afternoon, Oct. 12, by C. T. Hatfield, manager of the convention bureau of the Business Men's League, to the National Flower Show Committee. After the luncheon the committee met the florists of St. Louis and vicinity at the Coliseum. Much enthusiasm was aroused and the success of the National Flower Show of April, 1918, was foreshadowed.

NEW YORK

Walter R. Siebrecht of 114 W. 28th street is doing jury duty at present.

Importers of orchids state that cattleyas will cost ten dollars a case more next year.

Sam. Redstone, with Hitchings & Co., sailed on the S. S. St. Paul, Oct. 14, on a visit to England.

Mr. and Mrs. C. Albert Small celebrated their twenty-fifth wedding anniversary on Friday, October 13.

Sam Woodrow's landscape gardening department grows. This week he is completing a large job at Great Barrington, Mass.

George C. Siebrecht has added a flower basket department to his cut flower business and is now showing a nice line of samples.

There was a severe freeze in this section on Saturday night, Oct. 14, killing effectually all dahlias and other susceptible garden material.

Alex. Guttman is elated over the fact that ever since the early lavender pink chrysanthemum named for him started to come in September, two hundred dozen flowers have been sold at \$6.00 a dozen.

We saw a case of asparagus plumosus opened at P. J. Smith's which had come all the way from California in fine condition, seemingly as good as if locally grown and superior to the Florida stock, which in many instances sheds its foliage badly.

PERSONAL.

A. C. Boje has accepted the position of head gardener for M. J. Whittall, Worcester, Mass.

Flower Market Reports

Indications this week are **BOSTON** for a falling market as, although the sales are excellent, the amount of flowers coming in daily is rapidly increasing, this being most noticeable in the chrysanthemums, as a matter of course. The value of the chrysanthemum is affected accordingly and for a specified price a much superior flower is demanded as compared with the situation last week. Carnations are better and there are more of them than at time of last report, but they maintain the price without effort, so far. Cattleyas are arriving freely, but are not much sought. Violets are slow thus far. Cornflowers of fine quality are seen. Lilies are somewhat on the scarce side and many of the flowers offered are inferior. The first severe frost came last Saturday, closing out most of the outdoor material. Roses are good and enjoy a steady demand.

The amount of business **CHICAGO** being done is still limited by the amount of stock coming, which, with the exception of roses, is none too large. Chrysanthemums are making a great change in the appearance of the wholesale houses, where the empty tables have long had a depressing effect. The season for the big flowers is only well begun and after orders are taken care of not many remain for the late buyers. The stock generally is good. Some of the extreme sizes are arriving this week for the first and bring fancy prices. There is no such thing as fancy carnations yet, but the medium ones are increasing in number and the very short are not quite so much in evidence. Roses overbalance in quantity the rest of the stock and concessions have to be made to induce buyers to take large lots. Lilies are still very scarce; American Beauties are coming nicely now and the quality is excellent. Violets are starting out in the same way as last year and the probable causes make interesting discussion without changing the facts. The demand for them is gone. Home-grown doubles and fine singles sell for \$1.00 per 100 in limited quantity, but the eastern stock brings a small fraction of that price if sold at all.

The market is rather **CINCINNATI** crowded and low prices are the rule. The demand for stock is hardly what it was a fortnight ago. The chrysanthemum cut is now heavy and if the present rate of increase in cut continues the market will be crowded with them before another fortnight is over. Roses are very plentiful and excellent as to quality. Carnations are in a fair supply but more might be used if they were available. Choice lily of the valley and orchids may be had. A few sweet peas are coming in. Other offerings include some excellent lilies and violets.

The market has received a slight setback during the past **CLEVELAND** week as we had a couple of light

frosts which put most of the dahlias and cosmos out of commission. Chrysanthemums are still very scarce. The Cut Flower Co. has been receiving shipments of chrysanthemums from California which are very fair, but of course do not compare with the local product, after being on the road five days.

NEW YORK Chrysanthemums are overwhelmingly in domination of the flower market now. They average better, in our opinion, than ever before, in all the qualities of size, color and development of flowers, as well as in stem and foliage and many of the big crates in which they come to market, when opened, disclose careful packing and flowers in splendid condition. Of course, "there are others," but it is manifest that greater care than formerly is being taken in the matter of packing for market, not alone with chrysanthemums but with flower shipments generally. Cattleyas have in a

few days swung from the scarce column into the overstocked class, and prices have descended rapidly towards the foot of the ladder. Dahlias still linger, also gladioli, where the growers have taken pains to protect their plants on frosty nights. Violets are improving in quality but, as usual at this date, they are practically in the discard and sell very poorly. Carnations improve daily and have sold fairly well. Roses are very fine and there are plenty of them, all varieties. Considering the situation they are holding up remarkably well in demand and price and it looks as though we were now entering upon a season in which the rose will hold a very strong position and the grower of good stock will come in for good returns.

Stock is fairly **PHILADELPHIA** plentiful. Roses are increasing and quality improving. Beauties are

Flower Market Reports

(Continued from page 551)

good and selling well. Russells selling about the best of any. Killarneys are doing fairly well but not so good as the others. Ophelia is one of the leaders. Carnations are showing better stems and there are not too many of them. Chrysanthemums are more plentiful, Chrysolora, Pacific Supreme and Golden Queen being in the van. Of dahlias there are still a few, also some gladioli and asters where they have been protected from frost. There is a lot of cosmos, long and short. Cattleyas good and plentiful and prices are lower. Dendrobiums very scarce. Lilies are also a little scarce, the growers aiming to have only a few at chrysanthemum time. Lily of the valley is good, more plentiful than it was.

The market notwithstanding the cool spell is crowded. Roses are plentiful, good stock finding a ready sale. The same may be said of carnations and they are also improving in quality. Chrysanthemums have started to come in and will be greatly on the increase in about a week. Dahlias are about done, the frost having nipped them. Violets are in but the blooms are small and not in demand. Cosmos are in in profusion. Greens of all kinds are in demand.

Some few exceptionally fine carnations have met with ready sale. There is a heavy supply of both chrysanthemums and roses. While the colored roses are plentiful, good white roses are hard to obtain. Violets are more plentiful but their sale is retarded by the warm weather. Lily of the valley is more plentiful. There is a very heavy supply of cosmos and a great deal of this finds its way to the trash heap. Cattleyas are not quite so plentiful as they have been. Some exceptionally fine orchid pink and white pyrethrum can be had. Yellow daisies and indoor sweet peas are the latest offerings.

Mr. B. Progressive, Florist,
Everywhere, U. S. A.

Dear Sir: It will be a decided advantage as regards prices and quality to place your order with us.

Soliciting your order through this ad cuts down the overhead selling expenses and you positively get lower prices and better quality. Our terms are liberal and are a guarantee that you get a square deal, all bulbs guaranteed true to name or money refunded.

Write us and upon request we will mail you our booklet giving prices f. o. b. New York or Chicago, and we also cheerfully furnish you with any information that may be desired. Those of our friends who will mail us a list of their requirements will find it has paid them to do so.

Awaiting to hear from you at your pleasure, we remain,
Yours very truly,
Westerbeek & Klyn,
Sassenheim, Holland.

Obituary

H. J. Kenney.

Hugh James Kenney, a dealer in florists' supplies, wire designs, etc., in Brooklyn, died on Sunday, Oct. 8, at his home, 1,801 Dean street, Brooklyn, N. Y., aged 63 years. Mr. Kenney was born in Richmond, Va.

Richard Scommodau.

Richard Scommodau, the pioneer florist of 8th avenue, New York City, died at his home, 328 West 34th street, on October 9th, of heart disease. Mr. Scommodau was born in Germany seventy-two years ago and came to this country at the age of eighteen. He was in the florist business on 8th avenue since 1859. He is survived by his wife, daughter and two sons, Alexander, who will continue the business and Herman, who is employed by A. L. Young & Co.

A. C. Oelschig.

August Carl Oelschig, 68 years old, founder and senior member of the A. C. Oelschig & Sons' Floral Company, died on Thursday, Oct. 12, at his home in Savannah, Ga., after an illness lasting about 18 months.

Mr. Oelschig was born in the kingdom of Saxony, Germany, November 27, 1848, and lived there till 1874, when he came to America. On arriving in the United States he secured employment with Gabriel Marc. in Woodside, L. I., N. Y. In 1881 he went to Savannah to grow rose plants for the northern trade, which he continued for a number of years, finally venturing into the retail business, adding in later years the wholesale growing of rubber plants, which he continued with the aid of his sons until his death. He was also the introducer of the wild smilax, palm leaves, southern palms, and pine tops for decorative purposes.

During his many years' residence in Savannah Mr. Oelschig was regarded as one of the leading factors in German social and benevolent activities. He has been for many years a member of the S. A. F. and served several terms as state vice-president. His genial disposition and smile for everyone endeared him to all. His funeral was largely attended and numerous

floral tributes marked his last resting place.

He is survived by a widow, two sons and four daughters. The business will be continued under the management of his sons.

GREENHOUSES BUILDING OR CON- TEMPLATED.

Westville, Ct.—Joseph J. Sokol, one house.

Webster, Mass.—Webster Floral Co., house 29 x 50.

THE RIGHT WAY

Gives Us The Right Of Way

Every Metropolitan greenhouse is planned with an eye to results—successful crops.

Our cares do not cease with the mere mechanical part of the work. And, while we no doubt owe a great deal of our success to the high grade character of our labors, still we base our claims for your consideration, upon our ability to erect the right kind of a greenhouse in the right manner, at the right price.

PUT YOUR GREENHOUSE PROBLEMS UP TO US

We go anywhere in the U. S.
to submit plans and prices.

How the Supply Book Will Help You On Your Heating Problems

WE might "suppose" almost endlessly the heating problems that the Supply Book will make solving easy. That is, if we had room to. But we haven't. So we'll say what we've got to say briefly and pointedly.

Hitchings Supply Book is a short cut to buying what you want, and getting it in the shortest time you want it. It's your sure insurance against having to fuss and fume every time you strike a knotty heating problem. Hitchings Supply Book list describes and illustrates hundreds of fittings. There are now fittings which have never yet even been advertised. Fittings that we have made to solve special problems. Fittings that will in a set cases exactly fill your needs. No space is given up to long winded lorn howling. The whole book is devoted exclusively to **facts and figures.**

Of course, now and then, you may stack up such an unusually unusual heating problem. That even the Supply Book won't point out the solution. It is those unusually unusual heating problems that we want you to put right up to us. We have a corps of heating experts that we'll set right at work on them. Most of them have literally "grown up" with Hitchings Company. All of them know heating from way back. To cope with the unusually unusual is quite the usual thing with them. In fact it's their job. About the Supply Books, we are not going to send them out bit or miss. They cost too much for that. But we want every grover to have one. So just write and say that you want one, and it will come first mail.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

"If vain our toll, we ought to blame the culture, not the soil."—*Pope*.

Begonia Gloire de Lorraine

There can be no doubt as to the superiority of early started plants from leaf cuttings over those propagated later by rooting side shoots in the usual way, though the latter have their uses and are probably as useful as anything expressly raised for a holiday trade. Now is a good time to start propagation of *Begonia de Lorraine* and *Cincinnati*. Stock for next year must spring from early struck leaf cuttings. A steady heat of not less than 70 degrees in the sand with a few degrees overhead, a somewhat close and moderately humid atmosphere, frequent sprinkling and the exclusion of bright sunshine by portable shades will insure a good start and healthy root formation. Well matured leaves but still of a healthy spotless green are taken from the most vigorous plants in such a manner as to cause no disfigurement. Cutting away the stubby end of the leaf is all the trimming needed. This lower end when inserted in the sand will just bring the base of the leaf in close contact with the surface of the sand bed.

Callas

Don't fail to fumigate regularly or greenfly and thrips will get ahead of you. About once a week should keep the plants free. Ventilation should be given on all favorable days. To bloom well, callas require a night temperature of from 55 to 60 degrees. When in continuous flower, they eagerly take up large quantities of plant food from the soil and should have liquid manure regularly once a week and, when spring is nearing, twice a week. Now when fire heat is necessary a sufficient amount of water should be used on the paths and around the house for the prevention of a harsh and dry atmosphere. On all good days give them a syringing after the flowers have been cut. These plants will assure fair returns if grown under anything like fair treatment during the winter and spring. Keep the old foliage trimmed away, which will let more air and light to the rest of the plant.

Lily of the Valley

For early forcing choose the Berlin pips, and the Hamburg pips for late forcing. Cold storage should be relied upon for the supply up to the holidays. The sand bed should have a bottom heat of at least 85 to 90 degrees. Keep them moist with several sprayings overhead during the day until the bells are well formed, when spraying should cease. Shade heavily for the first two weeks, afterwards admit light in a gentle manner for about two days, when all the shading can be removed. If grown in flats they can be stood in the cool end of the house which will give the flowers a fine texture and help their durability. It will be pretty hard to get the normal supply this year.

Paper Whites and Roman Hyacinths

Roman hyacinths should be given 60 degrees at night and allowed six weeks to come into flower, but give them also full light. I have often mentioned that paper whites should be brought in early and given lots of time in a cool house. Pay a little more attention to it: provide a light, sunny, cool house where the flowers can develop slowly. If you have plants which seem a little forward a temperature of about 40 degrees and enough shade to exclude the sun will keep the stock at a standstill. The same can be said of Roman hyacinths, although they will endure a much higher temperature without harm. I have seen paper whites brought in and put down by the side of the path in a warm house where they grew all to leaves. Bring in the flats in the first half of November and put them on the bench in the full light, in a house where it is about 50 degrees at night.

Sweet Peas

To ensure a free healthy growth it is always better during spells of rainy or misty weather to have a little heat and ventilation at the same time. Don't run sweet peas too high, which only leaves them weakened in constitution from which they do not easily recover. While they always like plenty of moisture at the roots they will not stand a continual over moist condition, so let them dry out once in awhile. To grow sweet peas successfully, ventilation is one of the cardinal points. Now that the cool nights have arrived keep a little heat running through the pipes and at the same time have the ventilation open a little at the top; this will give them a cool dry atmosphere which is a good preventive for the dropping of buds. A sowing made now in 4-inch pots will bring in a crop in February which should last for about three months. Keep them well supported from time to time. As the days grow shorter the utmost attention and good judgment should be paid to watering.

Reminders

Lift carefully and pot small shrubs for window and veranda decoration.

Prepare all beds that are to be planted to bulbs and have them in readiness.

Now is a good time to cut up old plants of *Cyperus alternifolius* for propagating purposes.

Clean up shrubs for forcing, by cutting out any unnecessary shoots and give a top dressing with a good compost.

Mark the date of potting or boxing of all bulbs clearly so that it can be seen without disturbing the plunging material.

The
 convention
 garden horizon

We hear much that is pleasing and encouraging concerning the Convention Garden for 1917. The site selected in Bronx Park, New York, is an ideal one for the purpose, beautiful in its setting and being so conveniently reached, will unquestionably prove a great attraction to the convention visitors and to the public, which in New York includes innumerable summer tourists from afar. As a large attendance from remote sections of the country is

always assured at a New York convention, here will be an unexcelled opportunity for displaying not only the best garden material of today but also to present object lessons in effective grouping and artistic arrangement. But, be it remembered, that much of the planting can be advantageously done now—in fact, *must* be done this fall if it is to do full justice to the occasion. It is hoped that a large proportion of the plantings shall be made with the view that they may remain permanently and thus carry forward uninterruptedly the good work and influence of the S. A. F. during the coming years. This is especially applicable to the rock gardens and aquatic exhibits, fine examples of which are understood to be forthcoming. Secretary John Young is particularly optimistic as regards this feature of the big event.

We're
 "getting there"

The trend of interest in the Experiment Stations and State and National horticultural institutions generally is undoubtedly working towards a larger recognition of and fuller cooperation with the floricultural or ornamental departments of horticulture. Amherst, Ithaca, Urbana and other educational centres have been wheeling into line and each year sees advancement in the desire and in the ability to serve the floricultural interests in a practicable and acceptable manner. Our readers will find evidence and encouragement in our notes from Ames, Iowa, in the assurance there given of the laudable desire of the agricultural college of that state to work for the development of the floricultural interests of the community and of the sincere disposition of the florists of Iowa to cooperate with the College in whatever plans and efforts it may undertake to this end. It has been said that "whatever is of permanent value is usually of slow growth." We have long watched this "little cloud like a man's hand." Its growth has been exasperatingly slow but it is big now with the promise of the recognition to be accorded to ornamental horticulture as second to none among the many excellent and reputable commercial activities to which a young man may wisely turn in choosing his life work.

Further
 progress

The flower show period is now close upon us. We hope and believe that these events for which thousands of the country's most enterprising and public-spirited horticulturists have been zealously preparing will all be successful financially, educationally, artistically, socially and in all other respects that can contribute to complete success. As HORTICULTURE has frequently taken occasion to point out, there are certain essentials in which many of the flower shows of the past have been lamentably lacking. There are also many cheering indications that these deficiencies are now quite generally recognized and that sincere efforts are being made for improvement on the line of popular education towards a greater and better use of our products, through the medium of the flower shows as object lessons. Exhibits intended primarily to astonish with a display of cultural skill are of course desirable—we might say indispensable—features of a well-regulated flower show but in these modern days "gaping crowds" gape no more at flower shows if they have to pay for the privilege. The notes in reference to the proposed exhibition at the Massachusetts Agricultural College, which appear on another page of this paper, are suggestive as showing one phase of the tendency away from the stereotyped flower show with which our readers are all familiar. Here and there all over the country the leaven is working and wherever it does work it means *Progress*.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Liming the Benches

Most growers will figure to be a little off crop during this time of the year when the chrysanthemums are in the market by the thousand, which as a rule means that the price of roses drops a little. In order to have the plants off crop it is necessary to cut a crop just before the chrysanthemum season, and if this is done the plants will now be about swelling buds for another crop. At this stage if the soil is as most soils are, getting a little packed so that it does not drain freely, and green here and there, a liming of the benches will help correct the condition and at the same time help the plants a great deal. To do this fresh air-slacked lime should be used. Hydrated lime is ideal but it is more expensive in some sections of the country. Limestone should not be used as it is too slow in action, which may be all very well out in the field but in the rose houses an immediate response is necessary from everything if the grower is to pay himself decent wages and earn a reasonable rate of interest on the money invested. The best way to do is to dump a barrel or two of lump lime right on the ground outside and sprinkle it with a hose until it starts to slack when more water should be added until the lime forms a fine powder. It will be necessary to keep it stirred so that it will not be too wet in places. It will be too hot to use at once but will soon cool off so that it can be applied and it should then be applied without delay if the benches are in shape to take it. It is best to have the plants a little dry at the root and when the lime is applied rub the benches over a little, getting all weeds and yellow leaves off as the work is done. Where time will permit it would be ideal to have the benches thoroughly cleaned before the lime is applied but this is not always possible, although it is much better for the plants to have the benches clean. After the lime is scratched in the plants can get a good watering so that it will get right into the soil. Once in a while there will be a bench that will not dry out at all. In a case of this kind the lime can be applied and rubbed in, and no water applied until after the plants are dry enough. The lime will cake when this is done at times but it can easily be broken up by scratching the benches over, and will not be a loss; in fact it will stay on the benches longer and the plants will take it up as they need it. Care should be taken to have the lime free from unslacked lumps. If there were any they will slack right after watering and care should be taken to go over all the benches and scratch these up so that there will not be too much lime in one place. Care should be taken to apply the lime very evenly and should there happen to be a little more here and there see that it is spread around when the benches are scratched over.

Tying

Go right after this especially in the Beauty houses. Other roses do much better if kept tied but they will not be ruined by being left untied, as Beauties will. It is very hard to syringe or do anything around the Beauties if they are not tied up properly and we consider proper tying a very important thing in their culture. All long stems that are too high above the top wire should be bent down and these should be kept nicely even so that all the tops will look as if they were growing to a tightly stretched line. This will give them all an equal show and prevent one from shading the others too much. Of course all stems that are showing buds should be allowed to remain up as the buds will develop much better and there will be no danger of breaking the stem while bending it down, as the stems get harder after the buds begin to show. All extra heavy stems can be left up, too, as they make a nice showing, and the chances are that if they were bent down they would be broken. In tying Teas, care should be taken not to bunch the plants up too much. To put a string right around the plant and draw all the growth to the stake tightly may be a quick way to do but is far from proper and when the welfare of the plant is considered it is absolutely wrong, as a plant tied thus will lose a good deal of its foliage and will not produce the buds that a properly tied plant will. It will also be impossible to keep spider out of plants thus tied and will be a nuisance while cutting. The proper way is to tie all growths between the first and second leaf from the bottom, so that when the buds are cut off the remaining eyes will be already tied, thus making it unnecessary to tie the coming growth again. When thus tied the plants will look neat and will have all the chance in the world to develop; will be easy to syringe and no trouble to cut, as the string will serve as a guide so the man with the knife will lose no time, as all buds can be cut one eye above the string.

Taxus Cuspidata

(See Cover Illustration)

The Japanese yew is perfectly hardy, does not burn in winter, and in every way is a valuable evergreen for New England gardens. Indeed, Prof. C. S. Sargent has stated that this yew is the finest plant which Japan has contributed to our gardens. Introduced to the Parsons Nurseries, Flushing, L. I., N. Y., in the early '60s of the last century, it is by no means as well known as its merit entitles it to be. It is splendid as a specimen plant on the lawn or elsewhere, and ought to be used as a hedge plant. Fine specimens are scarce, those at the Bayard Thayer estate being among the best. The plant shown on the cover page of this paper is one of eight moved by Superintendent William Anderson to its present location five years ago. It is twelve feet in height and ten feet through.

The Collection of *Nephrolepis* Varieties at the Brooklyn Botanic Garden

Some eight months ago, the writer published in the trade press an account of the *Nephrolepis* collection at the Brooklyn Botanic Garden, together with a suggestion for a means of co-operation between the Garden and florists which would be of mutual benefit. The offer made in behalf of the Garden was to send out small plants of named varieties from a list then published as far as duplicates were available, the purpose being to aid florists in the building up of collections and testing new varieties. Second, the Garden offered to act as a bureau of information regarding these ferns, and, in this connection, offered to send out copies of a reprint of the *Nephrolepis* article from the New Standard Cyclopaedia of Horticulture. Florists were asked in return to send information to correct or supplement the statements in the article, and also to send plants of varieties not on the list. The present statement is in the nature of a report on the results obtained with a further offer of co-operation on the same lines as before.

About two hundred copies of the *Nephrolepis* articles have been sent out, the great majority to commercial growers. Several hundred small plants have been distributed in lots varying from five to thirty different kinds, according to what was available. These have gone to all corners of the United States, and applications have come from Australia and New Zealand. A considerable number of florists have thus been able to build up collections for exhibition purposes, and at least one grower expects to add one form so obtained to the list offered in a mail order catalogue.

The *Nephrolepis* investigation work at the Garden has also profited. The collection of *Nephrolepis* forms has more than doubled. The list previously published included forty named sports of *N. exaltata bostoniensis*. The present list includes seventy. Of varieties of other species, fifteen were given before. Now there are fifty names. It should be noted that I say "fifty names," not fifty varieties. Some of these names are undoubtedly synonyms. The list of actually distinct forms may not be more than thirty, but it is yet impossible certainly to determine the proper names for these varieties or the exact number of different kinds. The difficulty in correctly classifying these forms is due in part to carelessness and inaccuracy on the part of growers and others and in part to the fact that the classification of the original species of *Nephrolepis* is an unusually difficult problem.

Besides the named varieties a considerable number of unnamed kinds have been sent in for experimental growing to the number of at least fifty. When full grown plants of all kinds are developed it will undoubtedly be found that some of these unnamed

forms are duplicates of varieties already in the trade. It is safe to say, however, that the present living collection at the Garden includes at least one hundred and twenty-five distinct varieties of *Nephrolepis*.

About thirty of this increase of sixty odd kinds have been obtained by purchase from English and French growers. The remainder have been received through the co-operation of American growers and botanic gardens. The Bureau of Plant Industry through its Office of Foreign Plant Introduction is now co-operating through its agents in all parts of the tropics, who are collecting specimens of the wild forms to be grown and compared with the types under cultivation.

The writer has continued his visits to commercial establishments through the aid of a grant of one hundred dollars from the American Association for the Advancement of Science. Growers in Columbus and Springfield, Ohio, and in and about Boston, New York and Philadelphia have been visited, some of them several times. A great deal of valuable information has been gained in this way. A partial scientific report of the study of these plants has been published in the May number of the Bulletin of the Torrey Botanic Club and reprinted as Contributions Number 13 of the Brooklyn Botanic Garden. Further reports are in preparation.

In the meantime the facilities of the collection continue to be available for the benefit of florists. Small plants of named varieties will be sent on application as far as the stock of duplicates allow. Definite applications for few and specific varieties will receive preference over general application but all will be served as far as possible. If general applications are made for the purpose of building up collections of varieties, the request for specimens should include a list of the kinds already being grown to avoid duplication.

Not all the varieties listed here are available for distribution, although there is a much larger assortment than last year. Some have only recently been received from England and there has been insufficient time for propagation of small plants. Others, especially some in the second group, are very slow to reproduce, or so large and require so much space that it has not been possible to give them bench room. In general, the varieties in the second group are mostly of little commercial value in the United States except for large collections.

Perhaps the collection can find its greatest value for florists as a clearing house of information about *Nephrolepis* forms. How this might work out was suggested recently by a well known grower of the New York district. As president of one of the local growers' associations he had had

occasional requests for an opinion as to the value and distinctiveness of some supposedly new form of *Nephrolepis* sent in by some florist of the district. The only means of answering such a question would be by reference to some practically complete collection of these forms. The writer will be glad to answer questions along this line and regarding any other phase of interest in connection with these ferns. Visitors are welcome at any time.

NEPHROLEPIS EXALTATA AND ITS VARIETIES ONCE PINNATE FORMS.

exaltata. wild species, tropics generally.

bostoniensis. F. C. Becker, Cambridge, Mass., and others.

Childsi. J. L. Childs, Floral Park, L. I.

Dreyeri. Dreyer Brothers, White-stone, N. Y.

Dwarf Boston. F. R. Pierson, Tarrytown, N. Y.

R. C. BENEDICT.

SELECTING ORCHID SEEDLINGS.

If in former times seedling orchids were few and far between, their presence was a continued source of pleasure to the owner as well as wonderment to the visitor. But the difficulties experienced in the past have given place to results of so satisfactory a nature that in the words of a well known raiser success now smiles upon us.

The amount of success that comes to an individual engaged in the interesting work of seed-raising is judged according to the number of seedlings he requires. Thus an amateur may justly be pleased with 100 seedlings from some particular seed-pod, and if from these he succeeds in growing on and flowering fifty then satisfaction is obtained. But a trade grower with his exhibition needs and wide circle of customers would more likely require 1,000 seedlings, of which 750 might well be expected to ultimately reach the flowering stage.

It is common knowledge that some genera are more easily raised than others, and, further, that certain species are particularly vigorous and

produce seed which germinates rapidly and in such immense quantities that only a small proportion of the tiny seedlings are pricked off for future requirements. Whether it be the amateur who wants but fifty or the trade grower who desires ten or twenty times the number, each class of raiser, in order to keep within the limits of his stage accommodation, generally finds it necessary to select the number he requires and to discard the remainder, which in some seed-pans will amount to thousands and even tens of thousands.

The question of deciding which seedlings to select and which to discard is one of great importance, far more so than it may on first thoughts appear to amateurs. Consider the *Sophranitis* hybrids, in which the intention of the hybridist was to produce large flowers of scarlet color, and with what results, the seedlings vary in size as much as the flowers do in color. One fact, however, always comes out prominently in the general results—when the seedlings resemble the habit of the *Sophranitis* parent then do the flowers show the greatest tendency to inherit the required scarlet color; the seedlings which grow the strongest and most closely resemble the other parent are fairly certain to yield the largest flowers, but they do not carry forward the required color. Hence it is readily seen that in selecting for future cultivation the seedlings from a *Sophranitis* cross it is necessary to pick out not the strongest or largest in size, but those which most closely resemble the habit of the *Sophranitis* parent.

There are several strong distinguishing points which serve as guides to the selection of certain characters. Mention may be made of the long bulbs of *Laelia cinnabarina*, *L. harpophylla*, *Cattleya intermedia* and *C. Loddigesii*; also of the shorter bulbs, as seen in *C. labiata* and others of its section. Then there is the difference in the foliage, some species bearing but a single leaf, while others carry two and sometimes three. Three characteristics are nearly all visible in the early stages of the seedling's existence and the seed-raiser is thus considerably assisted in distinguishing and pricking out the very seedlings which will in the majority of cases produce the anticipated qualities in their flowers.

It is the custom among certain raisers to prick-off the required number of seedlings from any particular sowing as soon as they are large enough to be conveniently handled; the remainder are then thrown away. This method has much to commend itself as regards selecting vigorous plants, that is, seedlings which will rapidly reach the flowering stage and also prove suitable for amateurs, for it is of little use raising fine hybrids if their constitution is so poor that very few amateurs can keep them alive for more than two or three seasons. Hence, in selecting the most vigorous seedlings from the seed-pan, consideration should always be given to the parentage involved. In many instances the qualities desired to be perpetuated belong to a vigorous parent, and in this case the cultivator acts wisely in selecting the strongest seedlings.—*The Orchid World*.

CLUBS AND SOCIETIES

CALIFORNIA ASSOCIATION OF NURSEYMEN.

The sixth annual meet of the California Association of Nurserymen was held in the Convention Hall of the Civic Recreation Building, Santa Barbara, October 26, 27 and 28, 1916. The program of papers and topics for discussion included the following:

Production, Prices, Salesmanship and Credits, by George C. Roeding, President Fancher Creek Nurseries, Fresno.

Horticultural Laws, Pomologists and Plantsmen, by George H. Hecke, State Horticultural Commissioner, Sacramento.

Transportation Freight Rates as Affecting the Development of California's Nursery Industry, by Chas. W. Ward, President Cottage Garden Nurseries, Eureka.

California Native Plants in Our Parks and Gardens, by Theodore Payne, California Wild Flower Specialist, Los Angeles.

The Orange and Lemon in an Art Atmosphere, by F. N. Renfro, Secretary National Orange Show, San Bernardino.

Standardization of Commercial Nursery Products, by Wm. T. Kirkman, Jr., President Kirkman Nurseries, Fresno.

The Proposed California Pure Seed Law, by George P. Weldon, Deputy State Horticultural Commissioner, Sacramento.

Commercial Bulb Growing in California, by Colin H. McIsaac, Secretary Chamber of Commerce, Santa Barbara.

The Latest in Avocados and other Tropical Fruits, by T. U. Barber, Hart & Barber Avocado Company, Los Angeles.

Plant Immigrants in Our Parks and Gardens, by Prof. R. T. Stevens, Landscape and Floriculture U. of C., Berkeley.

The City Beautiful—Its Parks and Boulevards, by Ernest Brauntun, Santa Barbara.

The House Beautiful, Plants for Porch and Interior Decorations, by Mrs. Myrtle Shepherd Francis, Ventura.

New Plants of Commercial Value to the Trade, by D. W. Coolidge, President Coolidge Rare Plant Gardens, Pasadena.

Santa Barbara: A Mecca for Plant Lovers, by Frank Ball, Santa Barbara.

Friday evening was Ladies' Night.

WESTCHESTER AND FAIRFIELD HORTICULTURAL SOCIETY.

The principal features of the October session of this society was the large attendance and fine exhibition of flowers. The judges awarded cultural certificates to Wm. Grehem for bouvardia; high commendation to Robt. Grunnert for carnations, and to Anthon Pederson for roses, also to the

latter a vote of thanks for carnations, miscellaneous flowers and grapes. P. W. Popp was highly commended for gladioli, a cultural certificate having been previously awarded. Everything is in readiness for the Fall Exhibition to be held this year in Greenwich, Ct., October 31 to November 1. A handsome schedule of 121 classes is in readiness for distribution. Valuable prizes of silverware, cut glass, and cash are offered in all classes. J. H. Troy and F. E. Conine who were visitors addressed the meeting briefly. The next meeting will be held Nov. 10 when the nominations for officers for 1917 will be in order.

P. W. Popp, Cor. Secy.

AMERICAN PEONY SOCIETY.

Bulletin of Peony News, No. 3, together with the Proceedings of the American Peony Society for 1916 has been published by the Society and sent out by Secretary Saunders from whom copies may be had on application, and who also, will no doubt be pleased to answer any inquiries regarding the society's work and the conditions of membership. The document is a 30-page pamphlet and contains the proceedings of the society, a report on the New York exhibition and on local exhibitions, a very valuable symposium of the newer foreign varieties, a contribution on *Paeonia lutea* as a basis for cross-fertilization by W. H. Thurlow, a chapter on peony fragrance, notes from the secretary's office and a list of the officers and members of the society.

According to the treasurer's report the society has \$1,722.42 in the treasury. Thirty-four new members were elected at the New York meeting, and the attendance at the exhibition totalled 16,082. The next meeting will be held in 1917 in Philadelphia.

LANCASTER COUNTY FLORISTS' ASSOCIATION.

Thursday the 19th was worse than any Friday the 13th ever heard of, but in spite of all this twenty-two loyal florists turned out to visit the establishments in the vicinity of Lancaster. Five automobiles did the conveying act and everyone enjoyed the trip. The first call was made on Rudolph Nagel, "Chrysanthemum King" of this section. He has all of the good ones in fine shape along with a few that are not living up to their reputation, but this is always the case where one buys all the novelties. Pompons are exceptionally good. Geraniums are grown as a side line and we found sweet peas and mignonette being started to take the place now occupied with chrysanthemums. At the B. F. Barr greenhouses was found everything pertaining to the growing end of a retail establishment. Three houses of roses, three of carnations, sweet peas, daisies and every imaginable variety of pot plant. A number of houses have been remodeled, several new ones added and the whole place has an appearance of prosperity.

From Barr's we went to Thos. R. Fries, where stock is grown for the market in great variety. Next door to Fries is The Wheatland Greenhouses, under the management of the writer, with J. L. Lockard as the grower, and as this stock had been very much deteriorated Mr. Lockard deserves credit for the fine condition we found it on this visit. The output this season will be chrysanthemums, carnations and snapdragon.

At President Harry Schroyer's we found the storeman's usual assortment, with chrysanthemums in the majority. Many things cannot be grown here on account of the smoke from the railroad. At Secretary Frank Kohr's, close by, we found sweet peas and calendulas started for the shipping trade, the balance being devoted to market stock.

At Enos Kohr's we saw over forty thousand carnations, not one plant missing or any dead leaves. Chrysanthemums were not grown extensively, but what he had were immense flowers on ten-foot stems. If there are not a few houses added here next summer it will not be the fault of this winter's crop.

At the next place visited, that of Henry D. Rohrer, run under the supervision of his two sons, carnations are all planted in solid beds and look perfectly at home. Chrysanthemums are also largely grown, a good proportion being Bonnaffon, with a small house devoted to novelties, a good number of which are intended for our show. They also have a house of myosotis for cut flowers and primulas by the thousands. There is never any idle space here, one crop following another in rapid succession.

Lemon Landis grows a variety of stock for the stores and ships quite a bit during the year. He has several

houses of smilax, the only ones around this section.

J. P. Seibold has gotten out of the geranium business and his place is devoted to cut flower stock and it will not be long before some more geranium growers drop out if they continue to sell at the prices current the past few years.

Mr. Wissler has bought the establishment of the late Geo. Goldbach and is working hard to get it into shape for the winter. He has the usual assortment of cut flowers, with several houses devoted to callas, which always were a paying crop with this place.

J. Otto Thilow, of Henry A. Dreer, Inc., who had given his lecture on "Flowers from Snow to Snow" before the Civic Branch of the Iris Club in the afternoon, was entertained at dinner by Mr. and Mrs. Harry Schroyer, Mr. and Mrs. Albert M. Herr, Harry K. Rohrer and Ira Landis at the Hotel Brunswick in the evening, after which he gave his lecture on "The Canadian Rockies and Their Flowers" to the Florists' Club, including ladies, and it was appreciated more than words could express, although an attempt was made in a formal vote of thanks to Mr. Thilow.

This being the last regular meeting before the Flower Show which will be held Nov. 9, 10, and 11 a special meeting will be called for the distribution of tickets and such other matters as they come up.

We were fortunate to have with us on our visiting trip and at the club meeting S. S. Pennock, James Brown of Coatsville and T. J. Nolan, three regular "gloom chasers" who helped wonderfully to make us forget the clouds and rain during the trip around the city.

ALBERT M. HERR.

MASSACHUSETTS HORTICULTURAL SOCIETY

The nominating committee of the Massachusetts Horticultural Society announces the following nominations of candidates for the various offices of the Society to be filled at the annual meeting, November 18:

President, Richard M. Saltonstall; vice-president, Nathaniel T. Kidder; trustees (for three years), Stephen M. Weld, Ernest B. Dane, Edwin S. Webster and Andrew W. Preston; nominating committee, Marcellus A. Patten, William Sim, Nathaniel T. Kidder, John K. M. L. Farquhar and William Downs.

In accordance with the by-laws two weeks are allowed for further nominations should any be desired.

WM. P. RICH, Secy.

SEWICKLEY HORTICULTURAL SOCIETY.

At the monthly meeting of the society on Tuesday, Oct. 10, some fine dahlia exhibits were on hand from R. Taylor, T. Sturgis, J. Carman, H. Rapp, G. Wessenane and M. Curran, which brought forth an interesting discussion on this favorite flower. A vote of thanks was accorded all the exhibitors. The September vegetable and flower show of Sept. 22 and 23 has voted a complete success. Arrangements were completed for the Chrysanthemum Show on Nov. 2, 3, 4 and 5. The classes for private gar-

deners are confined to Allegheny County, but the commercial classes are open. Schedules may be had from the secretary, M. Curran, Sewickley, Pa. The ladies of the Allegheny Co. Garden Club are giving us able assistance and a good show is looked for.

M. CURRAN, Secy.

AMERICAN ROSE SOCIETY.

A meeting of the executive committee was held in New York City on Monday, Oct. 23, present S. S. Pennock, W. R. Pierson, Harry O. May, J. Horace McFarland, L. J. Reuter, Fred A. Howard and Admiral Aaron Ward. Secretary Hammond is absent in Canada. The principal business discussed was the time and place for the next exhibition and a number of committees were appointed. Mr. Howard gave some very interesting information concerning the rose gardens of the Pacific Coast, where the plants make two sets of foliage yearly with resting periods and withholding of water. A committee was appointed to collect a guarantee fund in case the Rose Society should decide to hold a show in Philadelphia and a substantial sum for that fund was subscribed on the spot. The next meeting will be on Wednesday, Nov. 8, in Philadelphia.

FLORISTS' CLUB OF HARTFORD.

The florists of Hartford, Conn., added one more to the lengthening list of florists' clubs, at a meeting held at the City Club on Tuesday evening, October 17. It was an inspiring and enthusiastic meeting participated in by about twenty of the leading florists of Hartford. Meetings will be held every six weeks. Officers were chosen as follows:

President—Joseph Coombs; Vice-President—Joseph McManus; Treasurer—Wallace Thomson; Secretary—Alfred Dixon.

Executive committee—the officers and Andrew Welch, George G. McClunie and Eugene S. Drake.

CLUB AND SOCIETY NOTES.

At the annual exhibition of the Worcester County (Mass.) Horticultural Society, last week, Lucy M. Coulson received a silver medal for superior cultivation of tuberous begonias.

The Associated Retail Florists of New York held their monthly meeting at Young & Nugent's, store, on Tuesday evening, Oct. 17. The annual election of officers will be held on Tuesday, November 21.

A floral art and novelty display will be held in the grand ball room of the Hotel La Salle on Sunday afternoon and evening, Nov. 12th, 1916, under the auspices of the Chicago Florists' Club. Admittance by invitation.

The annual chrysanthemum festivities start off with the show at Lenox, Mass., on Thursday and Friday of this week. A big feature of the exhibition in addition to a splendid display of chrysanthemums is the orchid exhibit by A. N. Cooley of Pittsfield.

Obituary

John S. Brown.

John Skelton Brown, aged 83, for years engaged in nursery business in Rochester, N. Y., died Thursday afternoon, October 19, at his home, in Browncroft just outside of Rochester. He was born in Boston, Mass., but came to Rochester seventy-three years ago. He leaves one son, one daughter and four grandchildren.

John K. Vosburgh.

John K. Vosburgh, aged 33 years, manager of the vegetable department at the seed store of J. M. Thorburn & Co., New York, died at the City Hospital, Newark, N. J., on Tuesday, Oct. 10, as the result of injuries sustained in a fall on the stairs at Park Place, Newark, the previous evening while on his way home from the store. Floral tributes from the firm and his fellow employees, testified to the esteem in which Mr. Vosburgh was held. He was the sole support of a widowed mother.

George L. Huscroft

It was with sincere grief that friends and acquaintances have received news of the death of George L. Huscroft, the well-known Steubenville, Ohio, florist, last Saturday. A number went over from Pittsburgh where Mr. Huscroft had many warm friends, for the funeral services on Monday. Mr. Huscroft's death was the direct result of a rapid series of paralytic strokes, resulting from a tumor at the base of the brain. He was 54 years of age and a native of Steubenville, where he had been prominently identified throughout his adult life.

E. E. Rexford.

Eben E. Rexford, Wisconsin poet and voluminous writer on flower and garden topics, died of typhoid fever at Green Bay, Wisconsin on Wednesday, Oct. 19, aged 68 years. Mr. Rexford began to write for the press at the early age of fourteen and had continued all his life in literary work. He had contributed stories, poems and articles to nearly all the leading magazines of the country. He wrote much regarding flowers and their culture, his productions including "Home Floriculture," "Grandmother's Garden," "Flowers: How to Grow Them," "Four Seasons in a Garden," "The Home Garden," "Indoor Gardening," "Amateur Gardencraft" and "Pansies and Rosemary," (poems). Among the numerous poems written by Mr. Rexford, probably his verses, "Silver Threads Among the Gold" have been the best known and the most widely used. He was educated at Lawrence University, Appleton, Wis., from which in 1908, he received the degree of Doctor of Literature.

THE EXHIBITIONS

BOSTON AUTUMN FLOWER SHOW.

The autumn exhibition of the Massachusetts Horticultural Society will be held at Horticultural Hall, Boston, Wednesday to Sunday, November 1 to 5 inclusive. While chrysanthemums will be the chief feature of this show there will be fine exhibits of flowering and foliage plants from private estates in the vicinity of Boston and from commercial growers in this and other states. The schedule of prizes includes also exhibits of fruits and vegetables. The Bostonia Ladies' Orchestra will furnish music every afternoon and evening from 3 to 5 and 7.30 to 9.30 o'clock.

The commercial growers and florists of Boston and vicinity will find it to their advantage to be represented at this exhibition and their cooperation is requested in order that the show may maintain Boston's prestige in horticultural matters. The admission fee to this exhibition will be fifty cents but tickets to the trade will be sold in lots of twenty-five or more at twenty cents each.

JAMES WHEELER.

Chairman Com. on Prizes and Exhibitions.

IOWA AUTUMN FLOWER SHOW

The Department of Horticulture of the Iowa State College has announced an Autumn Flower Show, which will be held Friday and Saturday, November 10th and 11th.

In connection with the show a special effort is being made to further the floricultural interests of the state. The flower show of the present day is recognized as an influential means of educating people to use more flowers, and it is the aim of the college to stimulate the interest of the people of Iowa by an attractive exhibition.

It is expected that the flower show will have a far-reaching effect since it will be visited not only by the 5000 students who come from all over the state, but by the florists and people about the state, as well as by the townspeople.

The florists about the state are co-operating with the college. Nineteen competitive classes, which are only open to the commercial florists of Iowa, have been provided. Entries in the various classes are now being made. The various exhibits will be judged and awards made by a committee of judges.

In addition to the exhibit of the commercial florists the college will have a large exhibition of chrysanthemums, including many specimen plants and single stem flowers, which will be of interest both to the florists and the public. Several attractive features are to be introduced and some student competitions in floral decoration are being arranged.

A. S. THURSTON.

Coming Exhibitions

Oct. 27-29, Mount Kisco, N. Y.—Fall show of the Northern Westchester County Hort. and Agr. Soc.

Oct. 31-Nov. 1, Greenwich, Conn.—Fall Flower, Fruit and Vegetable Show of the Westchester and Fairfield Horticultural Society.

Nov. 1-5, Boston.—Grand Autumn Exhibition of Plants, Flowers, Fruits and Vegetables, Massachusetts Horticultural Society, Horticultural Hall.

Nov. 1 to 3, Tarrytown, N. Y.—Chrysanthemum show of the Tarrytown Hort. Soc. in Music Hall.

Nov. 2-3, New Bedford, Mass.—New Bedford Horticultural Society, Annual Chrysanthemum Show.

Nov. 8, Philadelphia.—Chrysanthemum Society of America in conjunction with Pennsylvania Horticultural Society.

Nov. 8-10, New York.—Annual Chrysanthemum show of the American Institute, Engineering Society Bldg., 25-33 W. 39th St., New York.

Nov. 9-10, Bloomington, Ill.—Fall Flower Festival, Illinois State Florists' Association.

Nov. 9-11, Lancaster, Pa.—Fall flower show.

Nov. 9-12, New York.—Fall exhibit Horticultural Society of New York at Museum of Natural History.

Nov. 10-12, Cleveland, O.—Second Annual Flower Show, Hotel Hollenden.

Nov. 11-19, New Orleans, La.—Flower show.

Nov. 14-15, Providence, R. I.—Flower show of R. I. Hort. Soc.

HORTICULTURAL SOCIETY OF NEW YORK

It is only a short time now to the Fall Exhibition of this society, which will be held at the American Museum of Natural History, November 9 to 12. Do not forget to make your entries early, thus enabling the manager to make a better display and the secretary to have things in such shape that the manager may work intelligently. Everything points to a large show. Prizes are offered for bush chrysanthemum plants, and other prizes for cut chrysanthemum blooms of all kinds, both for commercial and non-commercial growers. Prizes are also offered for roses and carnations, and for orchid plants and flowers.

The Society's Silver Cup, valued at \$100 is offered as part of the first prize for a group of greenhouse foliage and flowering plants and in addition a cash prize of \$50. Prizes are also provided for bay trees, collections of conifers, begonias, palms and ferns.

Schedules are now ready for distribution, and will be sent on application to the secretary, George V. Nash, Mansion, New York Botanical Garden, Bronx Park, N. Y. City.

GEORGE V. NASH, Sec.

SECOND ANNUAL CLEVELAND FLOWER SHOW.

Two new classes have been added to the Premium List, one of which ought to prove interesting to non-commercial growers and the other to specialists in American Beauties. The new classes read as follows:

- | | | | |
|--|------|------|------|
| No. 1. Group of orchid plants in variety, to cover not over 25 sq. ft.—3'x8'—accessories and greens allowed..... | \$50 | \$25 | \$10 |
| No. 2. Vase 50 blooms American Beauties arranged for effect | 50 | 30 | 20 |

The committee is working on another feature that will prove interesting to the Cleveland public and that is decorated tables arranged by private gardeners or the owners of private greenhouses. This feature has never been developed in Cleveland before. The committees have a few entries at this time and think that a large number of the members of the Ladies' Garden Club of Cleveland and the Ohio Horticultural Society will compete. These tables will be featured on Saturday, Nov. 11.

Frank A. Friedley, chairman of the Show Committee, has mailed a letter to all exhibitors, urging them to send in their entries early so that the committee will show how many exhibits they will have to plan on staging.

CHICAGO TO BLOOMINGTON.

The Fall Flower Show of the Illinois State Florists' Association will be held at the Coliseum, Bloomington, November 9-10. Treasurer Frank L. Washburn of the state organization advises that the Chicago & Alton gives the best service between that city and Chicago. The train schedule from Chicago to Bloomington is as follows:

Leave	Due
Chicago 9.00 A. M.	Bloomington 12.55 P. M.
Chicago 10.15 A. M.	Bloomington 1.20 P. M.
Chicago 12.01 P. M.	Bloomington 3.15 P. M.
Chicago 1.15 P. M.	Bloomington 5.15 P. M.
Chicago 6.30 P. M.	Bloomington 9.40 P. M.
Chicago 9.00 P. M.	Bloomington 12.55 A. M.
Chicago 10.20 P. M.	Bloomington 1.10 A. M.

The fare from Chicago to Bloomington is \$2.54, round trip \$5.08. This is the flat two-cent rate and there is no party or other reduced rate between these points. The train leaving the Union station at 10.15 A. M., Thursday, November 9, has been selected for the Chicago delegation and it is hoped our city and club will be well represented, the Bloomington show being the only one of importance in the state this year.

The regular meeting of the Chicago Florists' Club has been postponed to November 16, especially to permit members to attend the Bloomington exhibition and meeting of the state association.

Luncheon will be served at Bloomington, Thursday evening, November 9, at seven P. M.

MICHAEL BARKER,
Chairman Transportation Com.,
Chicago Florists' Club.

Largest assortment in New England. Evergreens, deciduous trees, both common and rarer varieties. Sturdy, choice stock that can be depended upon. Send for catalog and special trade prices.

The Bay State Nurseries

North Abington
Mass.

SHRUBS

This New England soil and climate produces fine, sturdy shrubs. Special trade prices. By the thousands, hardy Native and Hybrid Rhododendrons—transplanted and acclimated. Let us estimate.

BAILEY'S NEW STANDARD Cyclopedia of Horticulture

Six large quarto volumes. More than 3,600 pages. 24 exquisite full-page color plates. 96 full-page sepia halftones and more than 4,000 text engravings. 500 collaborators. Approximately 4,000 genera, 15,000 species and 40,000 plant names.

The new Standard Cyclopedia of Horticulture has been freshly written in the light of the most recent research and experience. It is not merely an ordinary revision or corrected edition of the old Cyclopedia, but it is a new work from start to finish with enlarged boundaries geographically and practically; it supersedes and displaces all previous editions or reprints of every kind whatsoever. It is both an Encyclopedia and a Manual, for with the aid of its Synopsis and Key, amateur and professional alike may quickly identify any plant, shrub or fruit contained within the set, and then receive expert instructions for its cultivation. Price \$6.00 per volume. Five volumes have now been issued and the others will follow in succession. Order from

HORTICULTURE PUBLISHING CO.

147 Summer Street, Boston, Mass.

REMEMBER!

If it's a Hardy Perennial or so called Old Fashion Flower worth growing, we have it in one shape and another the year round. We have the largest stock in this country, all made in America, and our prices

will average 75c. per doz., \$5.50 per 100.

Why say more here? Send for our Wholesale Price List of varieties and benefit from the opportunities this affords you. Address

NOTES FROM CORNELL UNIVERSITY.

During the past summer one hundred students were receiving instruction in the Department of Floriculture, with an additional fifty enrolled for the work in the six weeks' summer session. Special emphasis is laid on the course in garden flowers during the summer, since this is an excellent time for the study and identification of garden material. For the most part the material for study is grown in the Student Garden, supplemented by material from the trial grounds at Craig Field.

The Student Garden (so-called because it is planted and cared for almost entirely by students), is a plot 96 by 160 feet, running approximately north and south. It is divided into a series of rectangular beds with grass walks, surrounded by a border 12 ft. in width. The site was originally a dumping ground for the rubbish left after the construction of the main building of the College of Agriculture, as is indicated by the boulders, stones, bricks, slate, etc. which are altogether too frequently unearthed by zealous students. The soil used for covering the dump is a heavy clay and, for that reason, is not very desirable from a garden standpoint; nevertheless, on the whole very good results have been obtained with both annuals and perennials. The garden was first laid out in 1914 by A. C. Hottes (now Assistant Professor of Floriculture at Ohio State University) but was replanned in 1915 by Profes-

Partial View of the Student Garden, Department of Floriculture, Cornell University.

sor David Lumsden. Plans for still further revision are under way. Among other changes, these call for a shrub border, forming not only a real garden retreat, but also providing the proper background for showing the flowers to the best advantage. It is intended that this shall be chiefly a garden of perennials, supplemented to a slight extent by annuals where it is necessary to tide over one season of bloom to another.

In addition to the plants grown in the garden, there are also available for study the large collection of peonies, roses, phlox and iris on the departmental trial grounds at Craig Field. These collections, each having several hundred varieties, offer splendid material not only for a study of their comparative value, but also for their adaptability as regards soil and climate conditions in this section.

MASSACHUSETTS AGRICULTURAL COLLEGE NOTES.

The annual flower show of the Department of Floriculture will be held November 11th, 12th, 13th. Several new features will be introduced this year. An exhibit of flowers behind picture frames will occupy one section of the show. At each end of the hall of the first floor will be constructed a pergola as the axial features instead of the massing of palms which was very effective last year. It is the aim to make the whole show approach the appearance of a beautiful garden. Water features also are to be introduced where possible.

The competition for best arranged baskets will be open to seniors and fourteen entries are expected. There is also to be the regular competition open to juniors for the best arranged table decorations. More practice work than ever has been given the classes this year, and some excellent work is expected from the students. Professor Nehrling has been working on the show plans and stimulating interest for the last four or five months, and his work is already showing gratifying results.

At the Northampton and Holyoke Gardeners' and Florists' Club Show, November 1 and 2, a special class has been arranged open to students at the college, for the best flower baskets. The entire senior classes are entered and the competition will be very keen.

The state investigation commission visited the greenhouses during the past week and were well satisfied with the amount of practical work being given the students.

A meeting of the Florists' and Gardeners' Club of M. A. C. was held Thursday evening. A discussion of summer experiences was held.

Delphiniums in the Student Garden, Department of Floriculture, Cornell University.

The Exhibitions

ST. LOUIS SPRING FLOWER SHOW.

The Preliminary Premium List of the St. Louis Flower Show to be held under the auspices of the St. Louis Flower Show Association, Inc., on March 15 to 18, 1917, has been sent out. The classes common to most spring shows are well covered in the list, which is divided into two sections—commercial and private growers, but the prize amounts are not yet scheduled. We note with approval the inclusion of groups "staged for effect" of most of the subjects listed, with optional use of accessories and other plants or flowers as auxiliaries, this particularly in the "commercial" section. Nothing is yet mentioned in the way of decorative work, bridal arrangements, tables, mantels, etc., but no doubt these features will yet be added. The listing of a large number of classes for "specimen" this and that all through the plant schedule is noted. There seems to be a disposition in most large shows at the present day to minimize this sort of competition in exhibitions dependent for success upon public enthusiasm and support, but we presume the St. Louis people who are back of this ambitious project know what they are doing and have the best of reasons for the methods adopted to ensure success.

CHRYSANTHEMUM SOCIETY OF AMERICA

The Chrysanthemum Society of America examining committees will be at the following shows to examine new chrysanthemums for C. S. A. certificates. Not less than six blooms of each variety to be shown and these only such as have been given the second year's trial. All sports of existing varieties must be submitted to three of five committees, the average of three scores to regulate title to certificate. The fee of \$2.00 for each variety submitted should be sent to the secretary previous to the exhibitions.

Cleveland Flower Show, Cleveland, Ohio, Nov. 10th. Ship flowers to Frank A. Friedley, chairman, Hollenden Hotel, Cleveland, Ohio.

Illinois State Florists' Association Floral Festival, Bloomington, Ill., Thursday, November 9th. Ship flowers to C. W. Johnson, care of Washburn & Sons, Bloomington, Ill.

Chicago Florists' Club Chrysanthemum Novelty Night. Date and place of meeting to be announced later.

An additional special prize has been offered for the annual exhibition to be held in Philadelphia, Pa., on Wednesday, November 8th, for the best collection of American-raised seedling chrysanthemums, not disseminated, one bloom each, not less than twenty varieties on short stems—1st prize \$15, 2nd \$10, offered by Wm. K. Harris, Philadelphia, Pa.

The schedule of premiums has been mailed to all C. S. A. members. Anyone else desiring a schedule can have one by applying to David Rust, Secretary, Pennsylvania Horticultural Society, Horticultural Hall, Philadelphia, Pa.

CHAS. W. JOHNSON, Secy.

DURING RECESS.

Boston Florists' Bowling.

On Thursday, Oct. 19, the first games of the season were played on the Arch Street Alleys with the following results:

Penn	368	388	392	1148
Carbone	394	414	393	1201
Flower Exchange	415	419	448	1282
N. E.	417	400	397	1214
Snyder	382	365	384	1131
Robinson	396	389	371	1156
Galvin	416	407	437	1260
Flower Market	428	418	413	1259

The standing of the various teams up to date is as follows:

	W	L		W	L
Carbone	3	1	Penn	1	3
Flower Ex.	3	1	N. E.	1	3
Robinson	3	1	Snyder	1	3
Flower Mkt.	3	1	Galvin	1	3

A few of the St. Louis boys will give a dance to their friends on Dec. 6, at Westminster Hall. Will C. Smith of the Smith Wholesale Floral Co., stands good for the rental of the hall and expects success socially and financially. Paddy Patton the humorist will give some of his special songs and dances.

One Week's Imports.

Imports at the port of New York, of horticultural material, for the week ending October 13, were recorded as follows:

Bulbs—France, \$6,325; Netherlands, \$117,945; England, \$289; Hongkong, \$473; Japan, 18,660.

Plants—Netherlands, \$2,920; England, \$3,707; Panama, \$60; Venezuela, \$481.

Red clover seed—France, \$4,950.

Clover seed—France, \$6,311; Canada, \$4,499.

Grass seed—Denmark, \$31,719.

Other seeds—France, \$11,276; England, \$3,356; Argentine, \$6,048; British East Indies, \$663; Japan, \$4; Mexico, \$1,170.

Nitrate of potash—England, \$81,635.

Other fertilizers—Scotland, \$384; Argentine, \$1,833.

GREATNESS ACHIEVED.

"Some men are born great, some achieve greatness and some have greatness thrust upon them."

Mr. Shakespeare undoubtedly was thinking of none other than W. F. Therkildson, advertising manager for the W. Atlee Burpee Co., when he penned those immortal words.

It is hard to believe—but it is true—that one man could achieve the greatness in five days that fell the lot of W. F. Therkildson. This is what happened to him between Friday, the 13th of October, and Wednesday, the 18th.

First of all, he was unanimously elected secretary of the Poor Richard Club, the organization that has taken the lead in Philadelphia clubdom since it put over the convention of the Associated Advertising Clubs of the World last June.

Then he was elected a director of the Ohio Society of Philadelphia, an organization of high type Philadelphians who were born in or lived in the Buckeye State for a long while.

Then he was elected a trustee of the Philadelphia Salesmanship Club, a new organization whose membership will be 2,000 before Christmas.

Then he was chosen to sit with a group of 40 of the city's leaders to consider plans for advertising Philadelphia and from that group of 40 he was chosen to be one of seven men to consider plans for holding a World's Fair in 1926 to mark the sesqui-centennial of the signing of the Declaration of Independence.

Then he was called in by the Pennsylvania Horticultural Society to help stage the Chrysanthemum Show on Nov. 7.

PUBLICATIONS RECEIVED.

The Forty-Seventh Annual Report of the West Chicago Park Commissioners, for the year ending December 31, 1915, is an attractive volume of 212 pages abundantly embellished with full-page engravings devoted largely to depicting the various features of the parks, playgrounds, gymnasiums, etc., for the children's amusement and education. It is an impressive presentation of the manifold uses of public reservations in a great city. The total areas under the jurisdiction of the West Chicago Park Commissioners is approximately 813 acres of parks and 445 acres of boulevard. The total length of boulevards is 29½ miles.

"Pruning Shade Trees" is a very timely and useful bulletin issued by the Agricultural Experiment Station at Columbia, Missouri, as Circular 81. H. F. Major is the author. There are cuts showing the right and the wrong way.

CATALOGUE RECEIVED.

King Construction Co., North Tonawanda, N. Y.—Illustrated booklet on "Some Seasonable Subjects."

Bird lovers will be glad to read the report that a treaty for the protection of insect-destroying birds on both sides of the Canadian boundary has been entered into between the United States and Great Britain. Its administration will be left to local authorities. It is said that this is the first treaty of its kind.

NEWS ITEMS FROM EVERYWHERE

PITTSBURGH.

Albert A. Berlin, formerly of Baltimore, is an addition to the sales staff of the McCallum Floral Co.

O. C. Parker and family, have returned from an extended sojourn at Prout's Neck on the coast of Maine.

Miss Margaret Burns, a saleswoman for the A. W. Smith Company, has returned from spending a fortnight at Fairmount and Elkins, W. Va.

The Ludwig Floral Company has just completed four greenhouses for roses and carnations, aggregating 30,000 feet at the Castle Shannon plant.

Mr. and Mrs. De Forest W. Ludwig have gone to Los Angeles, Cal., where they will spend the winter. Mrs. Ludwig was formerly Miss Irene Collins of Meyersdale, Pa., where the wedding took place on Oct. 12 in the Methodist Episcopal Church. Both the church and the Collins home were lavishly decorated with yellow chrysanthemums, lillies and American Beauty roses.

Owing to the untimely absence of the correspondent of HORTICULTURE from the city the splendid Dahlia Show of Kaufmann's Floral Department under the management of Ray J. Daschbach, was unnoted at the time. Seven large display windows were utilized for the purpose, each containing a shadow box with a large basket of gorgeous blooms. At the same time, 60,000 catalogues were distributed. The purpose of the exhibition was to permit customers of the firm to select with discrimination their bulbs for next spring's planting. The varieties were all labeled and thousands of dollars' worth were paid for in advance, which will be delivered next May. Adolph Kneppers, who has been Mr. Daschbach's first assistant since the opening of the department last spring, has returned to his former position with George L. Huscroft of Steubenville, Ohio.

CHICAGO.

Walter Amling, son of the well known grower, Wm. H. Amling, of Maywood, Ill., was married Oct. 26, at Holgate, Ohio.

John Poehlmann is again back at his office, making regular time for the first, since his father's long illness, during which he overtaxed himself.

A special sale of ferns, palms and decorative plants is given this week by one of the department stores in which thousands of plants will be sold at a small fraction of profit.

Property is being rapidly bought up at Lake Forest, the popular north shore town where many of Chicago's millionaires have their summer homes, and where the landscape gar-

dening is carried to a high degree of effectiveness.

Quite a number of the large retailers are getting chrysanthemums from California as is also an occasional commission house. It is said that this stock can be sold at prices that the home grower will find it hard to compete with, being grown out of doors and cared for largely by foreign labor.

The first azaleas to reach Chicago this year came in on Monday, Oct. 23, when 98 cases were received by Frank Oechslein. This allays the fear that these plants would not arrive this year. It is said by eastern importers to be the first shipment of the season from Belgium. Others are on the way, however.

The J. C. Moninger Co. is very busy getting out orders for greenhouses. Among them is a 56 x 250 ft. "bolted through the pipe" frame house for Wiedemann Floral Co. of Wilsonville, Oregon; another 42 x 200 for J. J. Fallon, Lynchburg, Va.; and two 28 x 100 for Harry E. Saier, Lansing, Mich., with steel frame service shed 28 x 40 ft. Three of the University of Chicago greenhouses are being extended by this company to meet the increased demand for the horticultural course.

The rock gardens are few in Chicago but their popularity is growing.

Section of Rock Garden at Frank Oechslein's

The dead level of this city makes these gardens appeal to the owner of a lot large enough to hold even a small one, and the height and depth of the miniature caves, the tall shrubs at the back, the overhanging vines and the falling water finding its way to the lily pond at the base, all give a variety which even a beautiful lawn and flower beds often need. The cut shows a section of the one just made on the grounds at Frank Oechslein's new residence.

Philadelphia. Commodore Westcott went to Waretown on the 21st inst. This will probably be the last trip of the season as the bungalow is usually closed about this time each year and the old homestead—half a mile inland—is used for winter quarters. Next week he goes to Long Island to visit his old friend, James Dean, for a few days.

BOSTON.

James Ward, of Peabody, pleaded guilty in the United States District Court to using the mails in a scheme to defraud the Fairfield Nurseries of Rochester, N. Y.

The Boston Record is responsible for the following witticism:

"C. Fine of the Massachusetts Ave.-Boylston St. neighborhood is not an oculist, but a florist. Still, with the delightful daily spectacles in his windows he ought to see fine, and probably does."

Miss Annie Montgomery, daughter of Alexander Montgomery of Waban Rose Conservatories, and Dr. E. G. Baum, of Natick, Mass., were married at Natick on Wednesday evening, October 25, and are now on a honeymoon auto trip through Maine.

Robert S. Peabody, landscape architect and civil engineer, was confirmed by the Civil Service Commission as a member of the Park and Recreation Department. Peabody resigned as a member of the Park and Recreation Commission a year and a half ago, and was succeeded by Charles Gibson. Gibson resigned five months ago, and Peabody, therefore, obtains his old position.

The Boston Co-operative Flower Market held its 10th annual meeting and dinner at the Quincy House on Saturday night, Oct. 21. President William H. Elliott presided. The officers elected included, treasurer, Donald Carmichael; secretary, John McFarland; directors, William H. Elliott, Norris F. Comley, Robert Montgomery, James Lester, John McFarland, Edwin Wood, Elijah Cartwright, Donald Carmichael and J. W. Simpson.

ST. LOUIS

The Episcopalians who met here in convention were entertained at Shaw's Botanical Garden last Friday.

Henry Ostertag was recently appointed police commissioner and is well qualified for any duties entrusted to him. He has always been a successful business man.

Ray Young, of Young Bros., on Waterman avenue, was married to Miss Juliette R. Meyer and has now returned from his honeymoon, prepared for the opening of fall business.

H. G. Berning, St. Louis Wholesale Cut Flower Co., C. A. Kuehn, Windler Wholesale Floral Co., Geo. H. Angermueller, Wm. C. Smith Wholesale Flower Co., are the big six of the wholesale cut flower trade of St. Louis. High grade roses, fancy chrysanthemums, carnations, orchids and American Beauties are among the specialties now in the foreground and buyers anywhere within shipping limits need seek no further for good stock and right prices.

J. H. Playdon, of Andover, Mass., the well-known florist, has returned from Nova Scotia where he has been spending a vacation.

NEW YORK.

Andrew Eckrich succeeds to the business of the late C. E. Grunewald at 924 Madison avenue.

An outdoor chrysanthemum exhibition is being held at the Prospect Park flower garden this week. Some of the plants reach a circumference of fourteen to seventeen feet.

The nominating committee of the N. Y. Florists' Club meets on Friday, Oct. 27 at W. F. Sheridan's. The committee on Ladies' Night met at Tradendly & Schenck's office on Tuesday.

On or about November 1 the George W. Crawbuck Co., Inc., will move from 57 W. 28th street to 47 W. 28th street, where they will have more ample room and facilities for their wholesale cut flower business.

Customers will note that Johnson & Millang have made a change in their regular sales days. This firm reports an exceptionally successful sale of locally grown and imported stock last Monday.

A. L. Miller, S. A. F. vice-president elect is already "on the job" with characteristic zeal, hustling towards making preliminary arrangements for the S. A. F. Convention next August. This includes a vigorous campaign for new members.

To better handle their increased European business R. M. Ward & Co. have established a branch at Rotterdam, Holland, with J. Henry Thomas as director. This favorable location to the fields—particularly Holland bulbs, plants and nursery stock—assures them an advantage to know crop and market conditions, to secure novelties, as also to personally inspect stock of their growers.

"I ordered some flowers sent to Miss Redbud and I'll be hanged if the florist didn't send them C. O. D."

"Phew! Did she pay for them?"

"She did, and now, deuce take it, I've got to pay her."

No evading that bill.

—*Boston Transcript.*

WHERE ORCHIDS AND GARDENIAS FLOURISH.

We had the pleasure recently of inspecting what is reputed to be the largest cattleya growing establishment in the world—that of Beechwood Heights Nursery, owned and operated by Thomas Young, Jr., at Bound Brook, N. J. That it holds the premier position accorded to it not only in orchids but in gardenias will not be questioned by any one who has had the privilege of inspection. All the way from 500 to 1,000 cattleyas have been cut daily during the height of the labiate season. Gigas, Mendelli, Trianae, and all the other desirable species are grown in almost unbelievable numbers. Then there are the rarer sorts, the Laelio-Cattleyas, Brasso-Cattleyas and unique forms beloved of orchid fanciers and these are all assembled in one large house as soon as identified. The raising of hybrids has also been under way for some time and there are myriads of pedigree seedlings in the various stages from seed pans to individual pots. A start has been made in the culture of odontoglossums for cut flowers on a commercial scale—something not easy of accomplishment in this climate but Mr. Young is a man who does not care to bother with things that are easily done.

Gardenias—there must be acres of them. House after house with the beds as uniform and vigorous as though they were simply privet plantations, big glossy foliage glistening in the sunlight and tall stems bristling with buds. There is a range of rose houses also. Among the varieties grown is Hadley, of which there are 12,000 plants.

Altogether the Beechwoods Heights greenhouses present a scene of exotic splendor and one can hardly realize that this whole estate was nothing but a cornfield up to 1907. It is a fine property, a perfectly level stretch to the range of hills, known as the Watching mountains, which dominates the landscape. The establishment is a model one in the character of the

glass ranges, the heating features, etc., which includes a big battery of modern heating outfit. The orchid houses are heated by hot water propelled by steam and the rose and gardenia ranges by steam direct.

WASHINGTON, D. C.

The business formerly conducted by the late L. A. King, in Charlottesville, Va., has been taken over by Walter H. Page and William S. Holloway.

The S. S. Pennock-Meehan Co. is showing some very excellent Teddy, Jr., ferns. The plants are very well grown, compact, and are attracting a great deal of attention.

Washington merchants are endeavoring to capture a share of the trade from nearby Maryland points and last week half a hundred men in all lines of trade participated in an automobile booster trip. Among the merchants were William F. Gude and Walter Hawley. The trip ended at Leonardtown, where a banquet was held.

An opportunity to sell American flower seeds and living plants, especially roses, pinks, and dahlias of all kinds, is announced by the Bureau of Foreign and Domestic Commerce, of the Department, under File No. 22750, reporting that a firm in Brazil informs an American consular officer of its desire to receive catalogues on the above commodities. Catalogues may be in English, but Spanish is preferred, and correspondence should be in Portuguese, if possible.

Florists are to join in the effort to entirely eliminate the bad check evil which is causing so much trouble in Washington. The Retail Merchants' Association is issuing a request to business men to send in the names and addresses of all those who have given bad checks, together with the amount and the name of the bank on which they were given. All information thus gathered will be held in strictest confidence, and, when desired, collections or prosecutions will be brought.

BEAUTIES

There is a reason why you should send your order to us. We are Headquarters for Beauties in this market, as we handle the cut of 100,000 plants.

Flower Market Reports

The flower market has gone to pieces in double-quick time. It is the usual autumn smash which invariably follows the chrysanthemum influx, but for suddenness and severity this week's record has rarely been equalled. The prices obtainable for the best chrysanthemums cannot be but a fraction of what it cost to produce them. Roses are coming in heavy and so light is the sale for them that they remain in storage day after day until \$6.00 and \$8.00 grades are willingly disposed of at \$1.00. Carnations are accumulated also and sales are few. Lilies are again in overstock but quality is excellent. Violets are fluctuating as to quality but whether good or bad they find a very cool reception thus far. Yellow daisies are quite plentiful now and snapdragon of fair quality is in sufficient supply. One would hardly expect to see asters at this date but there are plenty of them in evidence at present writing. Outdoor material has been practically cleaned up for this year by a series of frosty nights.

The past week has been **BUFFALO** a busy one. Autumn wedding decorations and other floral work caused a heavy demand. Chrysanthemums are coming in more plentifully and have cleaned up well. Sales have been good on everything, especially carnations which are slow in coming forward. Beauties and other roses are plentiful. Lily of the valley, violets, orchids and other stock have shared in the demand. Lilies are a little slower in sales. Asparagus and greens plentiful.

Everything is fairly satisfactory in the **CHICAGO** market as October means the end. Probably as large a proportion of growers and retailers were pleased with the daily sales of the past week as is possible at any time. Of the three great staples, roses and chrysanthemums are in good supply and moving at fair prices, and carnations, while not sufficient in number, are selling, every one for all it is really worth. There is a large cut of roses now and the only ones in excess of demand are white, a condition that may change quickly. Chrysanthemums are still in the early part of their season. A large proportion of the daily cut is in yellow which has reduced the prices on that color on some days. Pompons are coming slowly but surely. Carnations have some of very fine size and quality now included in the daily offerings. Lilies are very scarce and lily of the valley is also very limited. American Beauties are fine in quality and sell readily. There is a limited supply of good sweet peas coming now and they are quickly sold. Green is inclined to be in oversupply.

The cut that comes into the wholesale houses is large and sufficient for all present needs. Ship-

ping business, particularly in greens and supplies, is large. Roses are in a good supply but have only a fair market. Carnations are not any too plentiful. Chrysanthemums are in a heavy supply. A fair cut of lilies is coming into the market. Lily of the valley and orchids come in regularly. Other offerings include callas, violets and sweet peas.

Trade is far from being satisfactory. Conditions are unsettled as is usual at this period every year and the pressure from the chrysanthemums which are everywhere in enormous quantities has simply submerged the market. The chrysanthemums are of very fine quality, superb flowers, but the best of them realize only insignificant returns and all other flowers have been forced very low in sympathy. Carnations are at last in strong evidence and quality is now approaching normal for the season. Roses generally are of splendid quality but owing to the chrysanthemum pressure they are sold in bulk at low figures. Cattleyas have receded considerably in quantity offered and are

Violets are a superfluity, with no set market value. Gardenias move a little more steadily than they did. The first paper white narcissi have made their appearance. However, the situation does not very materially differ from that of former seasons at a corresponding juncture.

There has been no marked change in the cut flower situation here. Business has continued fairly brisk with an ample supply of good stock in all the seasonable staples. The chrysanthemum is cutting more of a figure as the days roll by and now rivals the rose in popular favor. The buyers seem to feel that they are getting more show for their dollar in chrysanthemums for the time being than they do in roses. Carnations are much better and demand ahead of supply. Orchids have tightened up again after a season of much plenty. Violets are very good for so early, both single and double. New crop bouvardias and callas are in. Lilies are scarcer.

Flower Market Reports

(Continued from page 58.)

Flowers of practically all kinds in season are coming in "fine fettle," so to speak. The market, however, is not over crowded, the supply at present just about paralleling the demand, which is about as to be expected at this season.

The frost arrived and with its outdoor stock with but few exceptions has come to an end and everyone is glad of it. Chrysanthemums are now arriving in quantity and wide range of quality, but there are but few of the extra quality stock. Violets are improving. California shipments have already started and they carry well, but the fragrance is not there. Carnations are improving in color and in length of stem. There is good demand for greens of all kinds.

The present week opened with the weather considerably colder and the growers look for stiffening prices with less stock on the market. Dahlias and cosmos have been shutting off the sale of all other flowers. Roses and chrysanthemums are plentiful and good. Carnations continue scarce. Plenty of violets are now to be had, preference being given to singles. There are a few sweet peas and good yellow daisies offered. Snapdragon is good. Lily of the valley is again at \$6 per hundred. American Beauty roses, as good as ever seen in the Washington market, sell readily at up to \$4 per dozen.

PATENTS GRANTED.

1,201,259. Weeder and Vine-Turner. Levin B. Collins, Sharptown, Md.

1,201,823. Flower-Pot. Frederick Holtke and Frederick Schaffert, Jr., Caristadt, N. J.

Hartford, Conn.—Defendant's motion for a more specific statement and defendant's demurrer to the complaint in the suit of Charles K. Swenson against the Charter Oak Brick company have been denied and overruled by Judge M. A. Shumway of the superior court. Swenson is a florist in West Hartford, and he claims damages from the brick company, which has its plant in the next lot to his greenhouses, his claim being that the fumes from the brick kilns and poisonous and noxious gases were wafted onto his plants and they were killed. The defendant wanted a list of the plants injured, their names and their value set up.

[Mr. Swenson's attorneys, if they have not already done so, should get a copy of the records of the successful suit of M. H. Walsh of Woods Hole, Mass., against the N. Y., N. H. & H. R. R. for damages of a similar nature. Ed.]

THE RIGHT WAY

Gives Us The Right Of Way

Every Metropolitan greenhouse is planned with an eye to results—successful crops.

Our cares do not cease with the mere mechanical part of the work. And, while we no doubt owe a great deal of our success to the high grade character of our labors, still we base our claims for your consideration, upon our ability to erect the right kind of a greenhouse in the right manner, at the right price.

PATENT LAWYERS

Box 9, National Union Building
Washington, D. C.

Chas. Young, the gardener.

The Jesse Straus Layout At Mt. Kisco, N. Y. Chas. Young, Gardener

Glimpse in corner of show house.

IT was one of last Spring's first glorious days that lured me away from the office, and found me with camera in hand, heading for Mt. Kisco, and the Jesse L. Straus houses, where Chas. Young has the reputation of successfully courting the Goddess Flora.

Location conditions considered, the greenhouse as laid out, fits its place admirably.

Naturally, one expected to find palms in the palm house, but instead it was "chock-ablock" with Easter plants in their height of bloom.

The sight made me wonder why more gar-

deners didn't use their palm house for show use.

The growing houses you notice, altho curved eave, have continuous over bench side ventilation. In this case the sash are hinged to an angle iron, and the gutter is at the sill. But now, with our new modified Curved Eave Construction, the gutter is above the sash where the curve starts, and having a longer sweep than in the old one, it gives higher sides and makes a neat and thoroughly architectural way to take care of the side sash and side ventilation.

When you are ready to build, say when and where, and we'll be there to talk it over with you.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

"If vain our toll, we ought to blame the culture, not the soil."—*Pope*.

Dracaena indivisa

Seed sown now will germinate quite freely. It should be sown in light sandy soil and kept in a temperature of 60 to 65 degrees. When large enough they can be put in 2 or 2½ inch pots and grown during the first season under glass, and the second season they can be planted out in the field. When lifted in the fall they will make fine plants for 5 or 6-inch pots. Pot bound *Dracaena indivisa* should be shifted now. Use a little care and pot them according to their size from a 3-inch to a 5-inch and place in a cool house or a deep cold pit. The latter will make a good place for them for the next four or five weeks. Keep them well-sprayed and they will soon become re-established. Give them 50 degrees at night during the winter and keep them well syringed on bright days.

Ericas

In ventilating beware of piercing winds that we are sure to have at this changeable part of the year, but always try to keep the atmosphere from becoming in any way stagnant, which is very injurious to this class of plants. They will not require much pushing to be in at Christmas and anywhere from 45 to 48 degrees night temperature will hold them in good shape. If there is any plant that likes a lot of air it is Erica. Should mildew show itself on any plant, remove the plant at once as it is very contagious, and blow sulphur through and over the plants until the attack is checked. These old favorites are coming to the front more and more as pot plants. For the Christmas holidays there is nothing better than *Erica melanthera*, *E. gracilis*, *E. Wilmoreana* and *E. regerminans*. Be very careful about watering. The only rule is to keep them in an even state of moisture at all times.

Forcing Gladiolus

The smaller flowered section of the *Colvillei* has many beautiful varieties. These small bulbs can be planted and forced in flats. Then there are the large-flowered kinds such as *Augusta*, *America*, *May*, *Shakespeare*, and *Silver Trophy*. Before starting to force them be sure that the corms are thoroughly cured. With ordinary weather conditions most varieties will flower in from 14 to 15 weeks after planting. When planting in benches the corms should be placed at least two inches below the surface and if you have room for six inches of soil plant them three inches deep. When planted deep they are not so liable to bend when coming into bloom. Give them at least five inches between the rows. If given a temperature of from 50 to 55 degrees at night they

will come along all right. Give them some liquid manure as the flower spikes are forming. This is very beneficial in producing fine blooms.

Smilax

To sustain vigor there is nothing better in the way of feeding than a mulch of rich compost spread between the rows. Syringe frequently as a preventive for red spider. Pay constant attention to the stringing. Good strings can only be raised by the unremitting attention of a guiding hand. When cutting begin at one end of the bed and clear off all the strings as they come along. A vigorous new growth will follow and the stringing of these new growths should take place before there is a mass of entangled vines that will be hard to straighten out. Little water will be needed until the new growth starts. In cutting always save any young growth as they can be strung and will give just so much headway. See that the night temperature does not go below 60 degrees.

Veranda Boxes for Winter

These should be filled early so the soil can have a chance to become somewhat settled before the real cold weather sets in. Give the boxes good drainage so that when the ground is not frozen hard the water can run off. A somewhat heavy soil rather than a sandy mixture, and one but sparingly enriched, should be used for this work. Bay trees, hollies, aucubas, boxwood, junipers, spruce, pine, arborvitae and biota, which are most attractive, all can be supplied at reasonable prices from our nurseries at home. There is no doubt but what the larger cities are more in need of something green during the winter months. Yet even in the suburbs and smaller towns there are occasional calls for stock of this kind, and in most cases it will require but little pushing on the part of the local florists to do a most profitable business in this line. When planted they can stand out of doors in some sheltered position until wanted.

Reminders

The earliest bulbs may now be brought into gentle heat.

It is time now to sow seed of shamrock for St. Patrick's day.

Take advantage of all good days and ventilate all departments.

It pays to spend some time in collecting leaves for leaf mold at this season.

Watch carefully for aphid on carnations; fumigate directly as soon as seen.

Next Week: Cult. of Carnations; Violets; Orchids; *Spiraea japonica*; Sweet Peas; Reminders.

Horticulture

Publicity among the kind of readers reached
by this paper is THE SORT OF PUBLI-
CITY THAT PAYS.

Silene

Of the garden species of silene those of my readers with a European training will recall the very handsome biennial forms *Silene pendula* and *pendula compacta*. Raised from seed and grown in the same manner as *digitalis*, *dianthus* and Canterbury bells they were freely used for spring bedding. Their dense green cushion-like foliage appeared nearly covered with attractive pink or white flowers which made a beautiful showing during May and June. So far I have not had any opportunity to try them in this country nor have I seen any in cultivation.

Of the hardy perennial kinds *Silene alpestris* and *S. Schafta*, both mountain denizens of Europe, merit special mention. As alpines of low habit of growth the pocket of the rockery offers ideal conditions for their full effect. On the herbaceous border their position is near the edge. Perfectly hardy, they withstand the hot summer climate of our Middle Atlantic States in full sunlight admirably well. In partial shade I notice they flower less than in the open. The appearance of a plantation of the spring-flowering white species *Silene alpestris* is of that modest charming gracefulness characteristic to many alpines. *Silene Schafta* producing bright pink blossoms, one of the few midsummer and fall-flowering rock plants, is as indispensable for keeping up the floral effect of the rock garden during the latter part of the season as *Plumbago larpentae*.

The common name of silene is Catchfly, alluding to a viscid exudation on stems and calices of some species.

SILENE ALPESTRIS.

for instance those of our native *Silene virginica*, a vernal representative flowering scarlet red. *Silene acaulis*, *Asterias grandiflora*, *Elisabethae*, *maritima* fl. pl. and *vallesica* are more or less capricious in our climate and therefore chiefly of interest to advanced amateurs and collectors.

Methods of raising and propagation of silenens: spring sowing, cuttings and division of old plants. A light leaf covering is the protection for winter.

Richard Rothe

Glenside, Pa.

Lilium regale

LILIUM REGALE AT MR. DESERT NURSERIES, BAR HARBOR, ME.

If one were confined to growing only one lily a very wise choice would be made in selecting *Lilium regale*. Although only a few years have elapsed since Mr. Wilson brought this lily prominently before the public it has amply demonstrated the many good qualities one must look for in a popular plant suitable for all gardens.

As a hardy border plant I do not know of any lily better adapted for general cultivation. In addition to its usefulness for the hardy flower garden I see no reason why it should not be of great value for forcing purposes, and as an Easter lily I believe it has great possibilities. Its beauty, easy cultivation and freedom from any sort of disease mark it

Arthur. E. Thatcher

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Spraying with Copper

The weather lately has been exceptionally fine for roses, but just how long it will last is a question. It will therefore be well to keep the plants copper plated, which will be a great preventive of blackspot. Just after a crop is cut off is a fine time to apply the copper in the form of the ammoniacal copper carbonate. With only a few buds here and there, growers will have an excellent chance to get at the lower leaves with the copper, which is very important as it is usually these that get the spot first, and from these it is bound to spread to the others. To prepare the mixture we dissolve two ounces of copper carbonate in ammonia, using just enough of the latter to thoroughly dissolve the copper. Then the mixture is added to two gallons of water or about enough for one tank full. Care should be taken when mixing to keep away from cut roses or plants, or not to prepare it in the greenhouse, as the strong ammonia fumes would surely damage the leaves or buds. If the mixture is prepared in the sink, care should be taken not to pour any of the ammonia down the waste pipe, unless all waste pipes connected to the sewer have traps in them, as should be the case, but often the pipes have no traps and the ammonia fumes are very penetrating and will back right up and enter any room or building to which the pipes may be connected. We know a case where an ice box was installed and the drain from it was connected to the sewer which accommodated the greenhouse sink and other plumbing. No traps were put on this drain from the ice box, which was kept cold by a modern ice-making machine. One operation in running this was to draw off any ammonia which would find its way into the oil. This was done by drawing it off into a pail of water through a waste pipe. This pail of waste water and ammonia was poured into the sink as was proper, but there being no traps on the ice box drains, the fumes got into the ice box and ruined a hundred dollars worth of choice flowers. It was thought that the pipes in the cold storage leaked, but this was not the case. Needless to say traps were at once put on all waste pipes from the icebox to the sewer. When applying the mixture to the plants, make sure that the tank is in good condition, and that the hose is good and securely fastened, for if the hose should blow off when the tank is pumped up, the operator would likely get the mixture into his face and might be blinded. Use a

fine nozzle and as much pressure as possible, for the spores of spot are very small and the finer the spray the better.

Cutting Roses

As it is no longer summer, care should be taken not to cut the roses too tight, as they will not open as readily as they did when the weather was warmer. Be careful to get all the buds cut at about the same stage, so that they will be as near alike as possible. They can be allowed to remain on the plants much longer. The larger the buds the greater their value in the market. When cutting, keep the buds together rather than the stems if this is possible. If the ends of the stems are put together there will be some short roses that will get bruised, or punctured by the big thorns of the longer stemmed buds. Where it is impossible to grade right after cutting, and the stems have to be kept together in order that the roses may be put right into water, see that the bunches are not made too big and do not try to crowd too many roses into each vase. When cutting heavy it will pay to cut twice, getting all the long stems first, and then cutting the shorter grades the second time. This will help grading later and prevent the short roses from getting all bruised among the longer stems.

Fresh Water for Vases

Nothing will make roses go back faster than bad water in the vases. Where time will permit it is best to empty the water daily, and then refill with fresh water, giving the jars a good scrubbing about once every week. There is no better time to do this than Saturday morning when all the roses have been shipped and the ice box is empty. Some good soap or washing powder should be used with warm or hot water, and then if possible set the jars out in the sun to dry, being sure that they are well rinsed first. This will sweeten them wonderfully, which is as it should be. All jars should be clean enough to drink out of, and then flowers stored in them will keep fresh. Stagnant water in the vases will kill all the bottom leaves on the cut blooms thus greatly reducing their value. Then, too, roses that have been in bad water are dangerous to handle as the thorns pricking the hands are likely to give blood poisoning, of which there have been several cases in the history of the flower market.

A commendable move

The floral art display planned by the Chicago florists, of which advance information is given in our columns this week, has the merit of novelty, as it certainly has that of sound up-to-date business sagacity and enterprise. Every move made by the horticultural interests in the direction of wider publicity for the florists' art and products should be enthusiastically supported by every one connected with the trade, for

only in this manner can this business hold its own and attain its natural growth in the race with other commercial activities of today. Obscurity is about the worst infliction that can be visited upon any industry under prevailing business conditions. Hitherto, most of the effort for publicity in the flower trade has been individual and entirely selfish—and even of that there has been but little. Broader vision and united purpose must now be brought to bear upon the situation, and the upbuilding of the flower trade as an institution rather than of the individual florist must be the objective point. We regard the Chicago project as an admirable one and an example worthy of emulation by the florists of every community in the land.

Maltreating the laurel

From time immemorial it has been the custom to hang garlands of laurel in celebration of great and joyous events in the progress of civilization and to crown with laurel the victor in games of strength and endurance or in recognition of genius. But now, according to the newspaper stories, it appears that another and baser use has been found for this time honored tree. The statement is made that thousands of tons of laurel which up to early August of this year was imported from Italy into Germany ostensibly to make wreaths for the soldier dead, were really employed in the manufacture of asphyxiating gas for use against the allies. So this "mede of mightie conquerors and poetic sage," once a symbol of victory and peace, has in these strenuous modern days been diverted from its former position of honor and instead of serving to decorate the victor has been compelled to assist in dispatching the enemy! Humiliating, indeed, for the venerated laurel and harrowing to the feelings of humanity when not calloused by the awful savagery of mortal strife. May the time quickly come when the peaceful laurel may resume and thenceforth retain for all time its traditional place in civilized life.

Pinched

In a general way, the flower market should be in better condition this season than one year ago when freezing weather held off exceptionally late. Gardens were bright with flowers well into November last year, cannas, salvias, cosmos, ageratum, dahlias, marigolds, petunias and other things of like nature among flowering garden plants being still in fairly good form in the vicinity of Boston at a considerably later date than present writing. Naturally the existence of garden bloom in quantity must affect unfavorably the market price of florists' indoor material and to that extent the present season is favored, but there are other factors which dominate the situation and the low values and depressed demand which a large section of the country is experiencing just now is due probably to several causes, among which the approaching presidential election may properly be included. Fluctuations in the market value of the perishable products of the florist are inevitable and there is a well defined period in fall when a decided sag in prices must be faced every year, yet it is productive of uneasiness to see the values go up in every item entering into the cost of carrying on a greenhouse business while there appears no way in which the returns from the produce can be proportionately advanced. The man who raises wheat, potatoes, dairy products or other food material is now enjoying an enormously enhanced income from his industry which puts him at once in the auto-owning class, but his brother who devotes himself to the ornamental end of horticulture "gets it going and coming," with no means of redress in sight through politics or otherwise.

THE EXHIBITIONS

THE MADISON, N. J., SHOW.

The Twenty-first Annual Flower Show of the Morris County Gardener's and Florist's Society, has passed into history. It was held at James Assembly Hall on October 26 and 27 and was a great success in every way. The weather was ideal, the attendance large, and the quality of the exhibits was of a very high standard. Among the special features was the group of chrysanthemum plants and foliage plants put up by Robert Tyson, supt. for H. McK. Twombly Estate. The blending of colors and the artistic arrangement elicited comment from every side. The big class of vegetables had their exhibitors—Robt. Tyson of Twombly Estate, James Fraser of Kahn Estate and J. G. Walker, Hamilton Farm, Gladstone, N. J. They were three grand settings of vegetables, quality very high and artistic arrangement in each, though differing, was the work of a master hand. The 6 variety classes were none the less attractive; Lewis Barkman, Bernardsville, Thomas Dower, Morristown, and Geo. Fisher were in this class. The stage setting by C. H. Totty was fine, also a corner group by Albert Baldwin. The table decorations were another attractive class. This is judged every year by a committee of ladies. This year the judges were Mrs. Gustav E. Kissel, Mrs. E. C. Fraser, Mrs. W. D. Vanderpool and Mrs. R. H. Williams, and the decisions gave general satisfaction.

The prize schedule contained 93 classes, all of which were competed for with the exception of 13. The first 22 classes were for chrysanthemum blooms. The Bunyard special for 36 blooms 6 var. was won by W. H. Duckham, and Pierson U-Bar special for 12 blooms went to George Fisher. Mr. Duckham also won in the class for 24 blooms 24 var. The Hitchings cup went to Jas. Fraser. Other winners of 1st in the cut bloom classes were Otto Shoch, David Francis, C. H. Totty, Wm. Huckvale, Peter Duff, Robt. Tyson, J. G. Walker and Ernest Wild. C. H. Totty won in all four of the commercial classes.

For roses there were ten open classes, and five for private gardeners. The Traendly & Schenck special was won by L. B. Coddington and Carter's Tested Seeds prize by Robt. Tyson. Other winners in the open classes were L. A. Noe, L. M. Noe estate, C.

Coming Exhibitions

Nov. 8, Philadelphia.—Chrysanthemum Society of America in conjunction with Pennsylvania Horticultural Society.

Nov. 8-9, New London, Ct.—New London Horticultural Society. Annual Chrysanthemum and Fruit Show.

Nov. 8-10, New York.—Annual Chrysanthemum show of the American Institute, Engineering Society Bldg., 25-33 W. 39th St., New York.

Nov. 9-10, Bloomington, Ill.—Fall Flower Festival, Illinois State Florists' Association.

Nov. 9-11, Lancaster, Pa.—Fall flower show.

Nov. 9-12, New York.—Fall exhibit Horticultural Society of New York at Museum of Natural History.

Nov. 10-12, Cleveland, O.—Second Annual Flower Show, Hotel Hollenden.

Nov. 11-19, New Orleans, La.—Flower show.

Nov. 14-15, Providence, R. I.—Flower show of R. I. Hort. Soc.

Nov. 14-18, Baltimore, Md.—Annual Exhibition Maryland Horticultural Society.

Nov. 15-17, Dallas, Texas.—Texas State Flower Show, under the auspices of the Texas State Florists' Association.

H. Totty and Springfield Floral Co. J. G. Walker, Ernest Wild and Wm. Huckvale cleaned up the private classes. Winners in the eighteen carnation classes were A. MacDonald, Ernest Wild, J. G. Walker, Wm. Huckvale, Robt. Sloane, each having several to their credit. Ernest Wild was 1st on violets.

In the plant classes, the Heather-home trophy for group went to Robt. Tyson. Other winners were Peter Duff, specimen chrysanthemum; David Fraser, 6 plants; C. F. Barnet, Lorraine begonia; Lager & Hurrell, orchid table. The Lord & Burnham table decoration awards were: 1st, Samuel Golding; 2nd, David Francis; 3rd, Robt. Tyson.

There were seventeen vegetable classes. The premier prizes for arranged collection went to the following: 1st, Robt. Tyson; 2nd, Jas. Fraser; 3rd, J. G. Walker. The Peter Henderson prizes for arranged collection of six, to Lewis Barkman, Thor Downer and Geo. Fisher, respectively; the four Boddington prizes to Lewis Barkman, Geo. Fisher and Jas. Fraser; the five Thorburn prizes to L. Barkman and W. A. Carter; the five Stumpp & Walter prizes to Jas. Fraser and W. A. Carter. Winners in the fruit classes were Wm. Reid, Wm. Bunny and Wm. Huckvale.

The judges were J. W. Everitt, Glen Cove, L. I.; Peter Duff, Orange, N. J.; John Downing, Reading, Pa.; John Dunn, Lansdowne, Pa., and Frank Traendly, New York city.

LENOX EXHIBITION.

The annual fall show of the Lenox (Mass.) Horticultural Society was held in the Town Hall, October 26th and 27th. The numerous classes for fruit, flowers and vegetables were well filled with produce of the highest quality. One of the most notable features was the fine and extensive display of orchids. Each year sees an increase in the number of exhibitors of these favorites. In the large group class, A. N. Cooley, Pittsfield, Mass., was first with an artistic arrangement which contained many rare and valuable hybrids. A very effective arrangement on a round table won first prize for W. H. Walker, of Great Barrington, who also won in the class for six *Cattleya labiata* and six distinct kinds.

Both in quantity and quality roses and carnations surpassed anything staged at previous exhibitions. Mrs. Parsons, Elm Court Farm, and W. E. S. Griswold were the leading winners in these classes. Mr. Cooley won the society's cup for 10 blooms of chrysanthemums, and was 1st in the class for 24 distinct. Giraud Foster was 1st for a vase of 24 also for 12 distinct kinds. Mrs. Parsons had the best singles and large specimen plants. Elm Court Farm arranged a large circular group of foliage and flowering plants. Specimen foliage plants were well shown by Charles Lanier and M. Salisbury. Mrs. Parsons was 1st for white grapes and Giraud Foster had the best black.

Vegetables and salads were as usual of very high quality. Mrs. Winthrop, Count de Heredia, and Giraud Foster were winners in the principal classes.

There was a large attendance on both days.

The judges were Jas. Stuart, Mamaroneck, N. Y.; E. Beckett, Purchase, N. Y.; H. J. Allen, Hyde Park, N. Y.; J. Tansey, Tuxedo Park, N. Y.; John Marshall, Newport, R. I., and Wm. Scott, Elmsford, N. Y.

J. H. F., Asst. Sec.

MARYLAND WEEK.

This great festival will open at the Armory in Baltimore on Tuesday November 14 at 8.15 P. M. The addresses of welcome will be delivered by Hon. James H. Preston, Mayor of Baltimore, and His Excellency, E. C. Harrington, Governor of Maryland. On Wednesday, at 9.30 A. M. the 19th annual meeting of the Maryland Horticultural Society will be opened. Addresses of value to orchardists will be given throughout the day and on Wednesday. On Thursday, November 16 the Maryland Crop Improvement Association will hold sway and the Maryland Agricultural Society is scheduled for an affiliated meeting. Friday night will be devoted to the Boys' and Girls' Club, following the session of the State Dairymen's Association. Saturday will be monopolized by the Beekeepers' Association.

The exhibition this year will sur-

pass any previous show made by the affiliated associations. The great Fifth Regiment Armory, containing 60,000 square feet, will be crowded with agricultural exhibits of all kinds. The floor plan has been completely changed for this year's show, and it is believed will add to the general attraction of the exhibition. The floral display made by the Baltimore florists under the direction of Chairman George Morrison, will be an especially attractive feature. In addition, a special section will be set apart for the amateurs in Baltimore City and suburbs which will be quite interesting. The exhibit by the members of the respective associations in fruits, vegetables, cereals, dairy products and honey will, it is believed, surpass previous years.

The packers of canned goods in Maryland will make an exhibit in the Armory and on Wednesday evening, discuss questions of mutual interest and importance to the grower and packer of canning crops. This is an enormous industry in this State. A joint meeting of packers and growers for the purpose of discussing questions of mutual welfare is planned.

Postmaster Swenn has kindly consented to install a temporary Post Office in the Armory during "Maryland Week," so that all visitors to Baltimore may have their mail directed to the Fifth Regiment Armory.

The State Board of Forestry will co-operate with the organizations as in the past, and make an especially attractive exhibit, showing the different phases of the Board's work in the State.

The Conservation Commission, State Weather Service and allied organizations will make special exhibits.

IOWA STATE COLLEGE EXHIBITION.

The Annual Fruit and Flower Show of the Department of Horticulture of the Iowa State College will be held Friday and Saturday, November 10th and 11th.

In connection with the show this year a special effort is being made to further the floricultural interests of the state. Florists believe that the people should be educated to use more flowers and it is aimed to teach the people to have a greater appreciation of flowers, which will result in more business for the florists. At the present day the flower show seems to be a very influential means of educating people in the use of flowers. Such a flower show as the college is planning for seems to offer great opportunities for accomplishing such an object, because of the free admission, the great number of students here from all parts of the state and the effort which is to be made to attract people from a wide area.

With this in view several competitive classes are provided which are only open to the commercial florists of Iowa. This plan has already received the approval of some of the florists, who have said they would enter in all classes.

In addition to the classes exhibited by the commercial florists the department is planning on several unique features. Of course there will be an exhibition in the greenhouses Mr. Reardon's fine specimen chrysanthemum plants.

Also there are to be special competitive classes provided for the senior girls in Home Economics, in which the various ways of using flowers in the home will be brought out. For this purpose such classes as Table Decorations, Vase Arrangements and Basket Arrangements are introduced in the schedule. Other interesting exhibits will also be staged with the idea of educating the public. Also disseminators of some of the newer varieties will be asked to send in exhibits of the same.

An effort is being made to make this the best flower show possible. We are all working to a common end—a more general use of flowers. The show will be given wide publicity in the papers in an endeavor to attract as many people as possible.

All entries should be made at once, in order that the final plans may be made for staging and accommodating exhibits. All material for exhibition may be sent express collect. Shipments of flowers should be sent so that they will be received not later than Friday noon, November 10th. Address them to A. S. Thurston, Department of Horticulture, Iowa State College, Ames, Iowa.

MT. KISCO SHOW.

The annual flower show of the Northern Westchester Horticultural and Agricultural Society opened at Mount Kisco, Oct. 27, with the largest showing of flowers and vegetables ever had at an exhibition under the auspices of this society. The award for the best twenty-four cut chrysanthemum blooms exhibited Friday was won by Mrs. E. S. Bayler, who also captured the prize for the largest bloom in the show. Mrs. Bayler won the society's cup for the twelve best chrysanthemums and for the best collection of fifteen varieties of vegetables.

Mrs. A. W. Butler won the prize for the best collection of fruit. Mrs. F. E. Lewis, of Ridgefield, Conn., received the prize for the best eighteen blooms of chrysanthemums. She also was the winner for the best collection of roses. The prize for the best display of single cut chrysanthemums went to Mrs. Eugene Meyer, Jr. Mrs. Meyer also won the award for the best display of eight varieties of vegetables. Other awards were to Mrs. W. J. Sloan, for the best display of twelve varieties of vegetables, and to Mrs. Moses Taylor, for the best dinner table decoration. Among the exhibitors were Mrs. Morton F. Plant, of Groton, Conn.; Mrs. J. H. Flagler, of Greenwich, Conn.; Mrs. J. C. Brown, of Mount Kisco; Mrs. H. J. Hammond and Mr. Maurice Brill.

CATALOGUES RECEIVED.

John Lewis Childs, Flowerfield, N. Y.—Trade Catalogue, season of 1916-1917 of Choice Gladioli, and other summer-flowering bulbs and plants. An up-to-date descriptive list, illustrated.

W. A. Manda, Inc., South Orange, N. J.—Novelty and General Catalogue. A progressive, freely illustrated catalogue of plants, both hardy and tender. Also Bulb Catalogue, including other seasonable stock for fall planting and forcing.

CHICAGO FLORAL ART DISPLAY

THE Chicago Florists Club extends to you and your friends an invitation to attend the Floral Art and Novelty Display, to be held under the auspices of the Chicago Florists Club in the Grand Ball Room of the Hotel La Salle, Madison and La Salle Streets, Chicago, Sunday afternoon and evening, November 12, 1916. The exhibition will consist of a beautiful collection of the newest varieties of cut flowers, chrysanthemums, roses, carnations, flowering and decorative plants, also charming and dainty floral arrangements for all social occasions.

CHICAGO FLORISTS CLUB,

Alex. Henderson, President.

Several thousand invitations like the foregoing have been sent to Flower Lovers of Chicago and vicinity by the Hotel La Salle, Horticultural Society of Chicago, Chicago Florists' Club, the retail florists of Chicago, and a large attendance of the right people is assured.

The retailers of Chicago have been invited by the Chicago Florists' Club to make an exhibit. There will be absolutely no charge for space—no prizes—no awards—no exhibits for competition.

This is to be strictly an Art Show to give the retailer an opportunity to display to the public, novelties in flowers and plants, and feature their adaptability for dainty and charming floral arrangements for all social occasions.

The Grand Ball Room of the Hotel La Salle is an admirable place to hold this exhibition. The room is 46 ft. wide by 140 ft. long, decorated in ivory, gold and old rose. The lighting effect is superb.

The flower show management has arranged to locate all retail exhibits in the center of the Grand Ball Room which will afford the exhibitor every advantage to display his art.

This is the retailers' opportunity to show what is possible with flowers and plants. Only natural flowers and plants are to be used but all kinds of accessories will be permissible.

Why not make this the occasion to name new varieties of cut flowers and plants for the newly elected President and the First Lady of this Grand Land, the U. S. A.?

Growers of novelty plants and cut flowers send us your exhibits, and we shall have artists on hand to arrange same.

The Chicago examining committee of the C. S. A. will be on hand to score new chrysanthemums. Growers sending flowers for this purpose should address same to N. J. Wietor, Chairman.

Novelties of other flowers and plants should be addressed to C. W. Johnson.

Have all shipments for exhibits arrive Saturday afternoon, Nov. 11, or Sunday morning, Nov. 12, sending all shipments express prepaid to the gentlemen mentioned above, in care of The Floral Art and Novelty Display, Grand Ball Room, Hotel La Salle, Chicago, Illinois. Our representative will be on hand to take charge of all shipments upon arrival.

F. LAUTENSCHLAGER—Publicity.

Members of the executive committee of the New Jersey State Horticultural Society and the local reception committee have completed arrangements for the annual convention in Burlington, Dec. 12, 13 and 14. Efforts will be made to attract south Jersey fruit and truck growers to compete.

AZALAEA INDICA AND HOLLAND BULBS**At Auction on WEDNESDAY, NOV. 8, 1916****AT TEN O'CLOCK, A. M.****Also PALMS, FERNS, DRACAENAS, ETC.****The MacNiff Horticultural Co.****52 to 56 Vesey Street, NEW YORK****THE LARGEST HORTICULTURAL AUCTION ROOMS IN THE WORLD****BOSTON AUTUMN EXHIBITION**

The annual display of plants, flowers, fruits and vegetables, formerly known as the Chrysanthemum Show, of the Massachusetts Horticultural Society opened on Wednesday, November 1, at noon and continues until Sunday night, Nov. 5.

It was a "showy show" as regards the plant groups, and in this department the rivals in past shows again "went the limit" in their struggle for supremacy. In Davenport's winning group of foliage and flowering plants covering 300 sq. ft., there was material enough to stock a large greenhouse, and if there is any plant blooming at this date that was not represented in the collection we can't recall it. With the exception of Galen L. Stone's specimen of Garza, the trained chrysanthemum plants were very ordinary. On the other hand the commercial size plants were exceedingly good, those staged by W. H. Elliott being the best finished little beauties we have ever seen in the hall. In all the large plant groups close massing was the rule with the exception of the group covering 150 sq. ft., competition limited to private gardeners, in which Mr. Thatcher, gardener for Mrs. J. L. Gardner, displayed exquisite taste in a graceful arrangement in which specimen lilies and bamboos predominated.

The exhibit which attracted greatest interest and excited most admiration from gardeners and florists particularly was the magnificent group of winter flowering hybrid begonias staged by W. C. Rust, gardener for Mrs. C. G. Weld. It was both novel and magnificent. A fine group of these begonias was shown by Mrs. Montgomery Sears also. Wm. Downs, gardener for E. S. Webster, staged six splendid plants of the hybrid Begonia Optima, which won for him a silver medal. Winter flowering begonias were also staged by Janiten & Wollrath Co., of Waltham. Thomas Roland showed camillias in bloom, and what we feel safe in saying was the most finished group of small crotons ever shown here by a local grower. Eric Wetterlow, gardener for Mrs. Lester Leland, showed Lorraine begonias in grand form and won a silver medal for Begonia Mrs. Peterson.

A. W. Preston was the recipient of a silver medal for Cattleya Lord Rothschild.

schields alba, one of several gems in his orchid group.

The chrysanthemum cut blooms were as a rule of very high quality. The classes for specimen show blooms in which Galen L. Stone swept everything before him with the largest, most uniform and best finished blooms ever shown here were good throughout. C. H. Totty and A. M. Pierson were extensive exhibitors in all classes of collections, with no local exhibitors to compete against them. The pompons and semi-doubles were very nice in these exhibits but there is room for much improvement in the method of displaying these, here as elsewhere.

Among the new chrysanthemums shown were October Herald, Miss Anola Wright, Smith's Imperial and several pompons, from Nathan Smith & Sons, Adrian, Michigan. Wm. H. Waite, a new bronze with monster bloom, was shown by C. H. Totty. Another novelty well shown by Mr. Totty was Golden Champion.

The class for best display showing the various ways in which flowers can be used in home decoration, prize \$50, was entered only by Caplan, the Florist, but the prize was well awarded to his display of neat baskets and other pretty arrangements.

The vegetable and fruit department was a surprise to many, not only in its great extent and the wonderful quality throughout, but also in the manner of staging and the exceeding taste displayed in arrangement. It was by far the most attractive exhibition of fruits and vegetables we have seen put up by the Massachusetts Horticultural Society. Thos J. Grey Company's collection of vegetables was an "eye opener," extending the entire length of one side of the small hall. The carnation exhibits scheduled for Friday, we cannot report on until next week.

List of Prizes and Gratuities Awarded

PLANTS AND FLOWERS. Plants, Foliage and Flowering Plants, group covering 100 sq. ft.: 1st, A. M. Davenport; 2d, W. W. Edgar. Group covering 100 sq. ft. (for private gardeners only): 1st, E. S. J. L. Gardner. Specimen Orchid: 1st, A. W. Preston; 2d, N. T. Kiddler. Orange plants: 1st, W. W. Edgar. Group of Chrysanthemum plants to cover 200 sq. ft.: 1st, A. M. Davenport; 2d, Mrs. J. L. Gardner. Six trained specimen plants: 1st, J. S. B. B. Trained specimen, white: 1st, Galen L. Stone, Garza; 2d, Mrs. C. G. Weld, Garza.

Trained specimen, bronze: 1st, W. H. Wellington, Hortus Tolosanus; 2d, W. H. Wellington, Mrs. William Duckham. Display, arranged with foliage plants (for commercial growers only): 1st, W. H. Elliott; 2d, Kamayama & Sorada. Kentias: 1st, Mrs. J. L. Gardner. Begonias, Gloire de Lorraine or any of its varieties, six plants: 1st, Mrs. Lester Leland; 2d, Galen L. Stone. Any other winter flowering variety, six plants: 1st, E. S. Webster, Optima. Best Chrysanthemum plant on exhibition: Galen L. Stone, Garza.

Flowers.—Henry A. Gane Memorial Fund. Vase of blooms of Chrysanthemum Mrs. Jerome Jones or the Yellow Mrs. Jerome Jones: 1st, James Nicol. Best new seedling Chrysanthemum originated by any other grower: 1st, Nathan Smith & Sons, Miss Anola Wright.

Society's Prizes. Chrysanthemums. Twenty-five blooms, of twenty-five varieties, named: 1st, Galen L. Stone; 2d, W. H. Wellington. Twelve blooms, Japanese, named: 1st, Galen L. Stone; 2d, W. H. Wellington. Twelve blooms, Japanese, incurved, named: 1st, Galen L. Stone. Twelve blooms, Reflexed, named: 1st, Galen L. Stone. Twelve vases, Pompon, distinct varieties, six sprays in a vase: 1st, C. H. Totty; 2d, A. K. Butler. Vase of twenty-five blooms, one or more varieties: Mrs. Alice Sias. Collection of sprays of single Chrysanthemums filling twenty-five vases: 1st, C. H. Totty; 2d, Scott Bros. Best display showing the various ways flowers can be used for home decoration: Caplan, Florist.

Gratuities: Thomas Roland, group of foliage and flowering plants; Miss Cornelia Warren, foliage and flowering plants; Galen L. Stone, trained Chrysanthemum Cheltoni; Mrs. C. G. Weld, trained Chrysanthemum Garza; A. N. Pierson, collection of cut Chrysanthemums; Mrs. J. Montgomery Sears, collection of winter-flowering Begonias; Waban Rose Conservatories, Roses Mrs. Charles Russell and Hadley.

Silver Medal: A. W. Preston, Cattleya Lord Rothschild alba; Mrs. C. G. Weld, collection of winter-flowering Begonias; E. H. Wetterlow, Begonia Mrs. Peterson; E. H. Webster, Begonia Optima.

Honorable Mention: Mrs. J. Montgomery Sears, Begonia Sylva.

Vote of Thanks: S. J. Goddard, Carnation Doris; T. T. Watt, cut flowers in variety; Janiten & Wollrath Co., Begonia Mrs. Heil.

AWARDS FOR FRUITS. Samuel Appleton Fund, Apples, Baldwin: 1st, A. B. Howard & Son; 2d, S. A. Schwartz. Hubbardston: 1st, A. B. Howard & Son; 2d, J. M. Schwartz.

Benjamin V. French Fund.—Apples.—R. L. Greening: 1st, Derby Farm; 2d, David R. Craig.

Benjamin H. Pierce Farm. For new seedling apple of merit: M. J. Cain, seedling of Grayenstein.

Society's Prizes.—Apples.—Bellflower: 1st, C. S. Smith; 2d, W. H. Stone. Delicious: 1st, Derby Farm, McIntosh; 1st, Derby Farm; 2d, A. B. Howard & Son. Northern Spy: 1st, E. R. Farrer; 2d, H. A. Clark. Palmer Greening: 1st, H. C. Fuller; 2d, E. F. Adams, Pound Sweet: 1st, C. V. Fletcher; 2d, Alfred H. Prouty, Roxbury Russet: 1st, M. S. Wheeler; 2d, H. C. Fuller Estate, Sutton: 1st, A. B. Howard & Son; 2d, G. V. Fletcher. Tolman Sweet: 1st, E. R. Farrer; 2d, W. H. Atkins, Tompkins Co. King: 1st, M. J. Cain; 2d, L. L. Cole. Winter Banana: 1st, F. F. Adams; 2d, E. Clifton Whit. York Imperial: 1st, M. S. Wheeler; 2d, M. J. Cain. Any other variety: 1st, Derby Farm, Blue Pearmain; 2d, A. B. Howard & Son, Bailey's. For the best collection of winter fruit.

The Sensation of 1916

Thenanthos

The Wonderful New RED CARNATION

COLOR—Brilliant scarlet of uniform shade.

SIZE—Average over 3½ inches in diameter.

FRAGRANCE—Strong and pleasing.

STEM—Strong, graceful and long.

KEEPING QUALITIES—An excellent keeper and shipper.

SALES—Demand always in excess of supply.

GROWTH—Habit of Scott, but stronger stem.

PROLIFIC BLOOMER—Averaging 30 flowers per plant.

PRODUCTION—Strong producer of cuttings; easy to root, average 90%.

HEALTH—Free from rust or disease.

SEASONABLE—Blooms heavily in December.

FOLIAGE—Grows a bushy, large plant.

PARENTAGE

Enchantress x Red Seedling
This Red Seedling was a cross of

Nelson x Lawson

Every one of these carnations is of such well known excellence that no comment is necessary. The characteristics of SCOTT are very marked in THE NANTHOS.

Evolved by JOHN THEN of Chicago

Winner of the Silver Sweepstakes Cup and First Prize Medal and Ribbons awarded by the Horticultural Society of Chicago for the best seedling carnation on display. These prizes constitute all the possible high honors.

THENANTHOS cuttings will prove an unusually good investment for the up-to-date grower. So nearly perfect is it that it took sweepstakes cup for best seedling as well as medal, certificate and first prize at the last Chicago Flower Show less than a year ago.

PRICES AND DELIVERY

Thenanthos cold grown cuttings will be ready for delivery January 1st, 1917. The demand will prove a heavy strain on the supply. All shipments made in the order received, so let us book your requirements early. **Thenanthos** cuttings, f. o. b. Chicago, Per 100, \$12.00; per 1000, \$100.00. 250 cuttings at the 1000 rate. Write for list of other cuttings.

NO EMBARGO ON BELGIAN PRODUCTS

Wm. F. Gude, Washington representative of the S. A. F. received on Monday, Oct. 30, from the State Department the letter of which the following is a copy. This letter, it will be noted, is in reply to Mr. Gude's communication to the Honorable Secretary of State under date of Sept. 15th last, since which time he has not heard a word. Anyhow the azaleas are coming and Mr. Gude's efforts seem to have been fruitful.

Department of State
Washington
Oct. 27th, 1916

Mr. William F. Gude,

Sir:—Referring to your personally expressed desire for information relative to the importation of Azaleas and similar goods of Belgian origin, you are informed that the Department has received a report by cablegram dated October 25th, 1916, from the American Embassy at Berlin stating, in substance, that the German foreign office has received a statement from the Governor General in Belgium that no objection exists to the exportation to the United States of horticultural products. Only a small quantity remains for shipment this year as, according to a report from economic committee at Ghent, several hundred thousand francs' worth of flowers were shipped to this country some six weeks ago.

The statement that this year's exportation was not allowed by German authorities is reported to be due to a misunderstanding. This year's exportation was effected through individual applicants and not through the intervention of the Syndicate des Horticultures Belges.

Very truly yours,

MARION LETCHER,
Acting Foreign Trade Advisor.

NEW FORESTRY OFFICE.

Practical forestry management has been developed to such proportions in Massachusetts, under the administration of State Forester Rane, that it has been decided to establish a state forestry office in the western part of the state for the convenience of land owners in that section. C. R. Atwood, who is a graduate of the University of Maine, and for some time has been an assistant to Paul D. Kneeland in the Boston office of the state forestry, has been selected for the position. He will have

headquarters in Springfield, in the office of the Hampden County Improvement League, free of rental, and will be at the service of the entire western part of the state for the improvement of the forests. His work will come under the general direction of Assistant State Forester Cook in the Boston office.

It is believed that through this new office prospective thinnings and scientific lumbering jobs, which are undertaken in part for the immediate utilization of the matured or undesirable trees, and in part for the improvement of the forest stands, may be supervised more economically than through the Boston office.

NEW DAHLIA AND CHRYSANTHEMUM TYPES.

During the dahlia season just closed among the really good breaks from the established forms is a ruby red seedling raised by W. A. Manda, which he regards with sufficient favor to name for himself. It is apparently the forerunner of a new class of dwarf bedders which, as soon as Mr. Manda's ambition to develop white, yellow and scarlet varieties of the type has been attained, should fill a very useful place in garden work. Plants from cuttings made in August were at the time frost struck them, in middle October, two feet high and two to three feet through, each bearing a number of enormous blooms about 9 inches across. The flowers show decorative

and cactus blood with a strong Jaurez character. The stem is very short-jointed, the flower facing upright and nestling in a mass of strong foliage somewhat after the fashion of a Mrs. Jerome Jones chrysanthemum. Visitors at South Orange are much impressed with the possibilities of this new dahlia. Mr. Manda is also working up a new breed of dwarf hardy chrysanthemums, with Garza as a seed parent and already has a good collection with the desired habit and very interesting.

OCTOBER SONG.

Across the heaven white clouds are sailing,
And winds are walling among the trees;
All southward flying, the birds are calling,
And leaves are falling with every breeze.
The dry reeds rattle, the dead leaf quivers,
The hoar frost shivers across the lawn;
The thrush and catbird that erst made riot
Now sadly quiet await the dawn!
Deep in the woodlands in noisy caucus,
With voices raucous convene the crows;
Across the meadows, like parting lovers,
The killdeer plovers wail out their woes.
Here where the flicker, of home enamored,
All summer hammered, at last intrudes
The graceless sparrow, who lights and chatters
Of ribald matters, and useless broods!
And yet my outlook is not uncheerful,
Nor wholly tearful are autumn days;
Though flowers are faded and birds are going,
My glad heart glowing can sing their praise;
While in my heart, dear, your voice is ringing,
The birds are singing all winter through
And in your face, love, earth's loveliest flower,
Through each dull hour is mine to view!
Ted Robinson, Cleveland Plain Dealer.

CLUBS AND SOCIETIES

NEW YORK AND NEW JERSEY ASSOCIATION OF PLANT GROWERS.

The members of this association enjoyed their annual visit of inspection to the various establishments of the New Jersey members on October 25. The party numbered twenty-three and the usual good time was had. All the places visited were found to be in elegant shape and promising for the coming plant season. These included the following establishments:

F. H. Dressel, Weehawken; H. C. Steinhoff, West Hoboken; Henry Baumann, West Hoboken; J. H. Fieser, North Bergen; H. Schmidt, North Bergen; Herman Scholzel, New Durham; Paul Rickert, North Bergen; Lehnig & Winnefeld, Hackensack; Madsen & Christensen, Woodridge; Julius Roehrs Co., Rutherford; Bobbink & Atkins, Rutherford; Paul Fischer Woodridge; Emil Savoy, Secaucus; Carl A. Woerner, Secaucus.

CHRYSANTHEMUM SOCIETY OF AMERICA.

The following report of new chrysanthemums exhibited at Cincinnati, Ohio, Oct. 28, has been submitted by the committee appointed by the society:

By The E. G. Hill Co., Richmond, Ind.: Name of variety, Richmond; color, yellow; Inc.: points com., 87; name of variety, Nephotos; color, white; Inc., Jap; points com., 86.

By Elmer D. Smith & Co., Adrian, Mich.: Name of variety, Yondota; color, pink; Jap. Inc.: points com., 86. Name of variety, Smith's Imperial; color, white, Inc.: points com., 95. Name of variety, October Herald; color, golden bronze; Jap. Refl.; points com., 90.

By C. C. Pollworth Co., Milwaukee, Wis.: Name of variety, Mrs. C. C. Pollworth; color, yellow; Inc.: points com., 86.

CHAS. W. JOHNSON, Sec'y.

AMERICAN ROSE SOCIETY.

The following described rose has been offered for registration by Fred. Breitmeyer, Mount Clemens, Mich.:

Raiser's Description.

"Rose, Pink Ophelia. Color, a beautiful shade of rose pink. A sport from Ophelia, but a stronger and more vigorous grower than the parent. Originated with us two years ago."

There is to be a guessing party in Washington Tuesday evening, November 7, when the members of the Florists' Club get together for the regular monthly meeting. In-as-much as the date of the meeting is also the date of the national election it is not expected that there will be very much other than politics discussed at that time. The members are to be invited to submit their guesses on how the elections will go.

CLUB AND SOCIETY NOTES.

Secretary Ammann of the Illinois State Horticultural Association informs us that all the indications point to a grand exhibition at Bloomington on November 9 and 10. Flowers for this event should be shipped to the Coliseum, in care of Washburn & Sons.

The Horticultural Club of Boston had as guests at its monthly meeting at the Parker House on Wednesday evening, Nov. 1, H. A. Barnard, representing Stuart Low & Co., England; W. C. Stickel, president of the Flower Exchange, and Col. W. W. Castle. The table decorations of chrysanthemums, roses and carnations were by Peter Fisher.

At its meeting on October 25, the Newport (R. I.) Horticultural Society declined the invitation of the Newport Garden Club to hold a joint exhibition next summer, with the Newport Garden Association and the Garden Club, the Garden Association having already declined the invitation on the ground that it had already made its plans for the summer. James Robertson, gardener for Mrs. T. O. Richardson, exhibited a seedling dahlia, named Mrs. Otis P. Chapman, and the society awarded it a first-class certificate.

THE BOY SCOUTS IN AGRICULTURE.

The requirements as listed below, for a Boy Scout badge of merit in agriculture show a well devised plan for encouraging boys to attain proficiency in practical things. To obtain a merit badge for agriculture, a scout must:

1. Explain the nature of soil, its texture, its need of water, of air, and of plant and animal life; what the soil does for the plant, and how the soil may be improved.
2. Make a seed tester and test the germination of three chosen varieties of seed—100 seeds of each variety.
3. Identify and describe ten common weeds of the community and tell how best to eliminate them.
4. Identify six common insect pests, tell what plants they usually infest, and how best to control them.
5. Have a practical knowledge, for his locality, of plowing, cultivating, harrowing, disking, draining, and harvesting, and the purposes of each. Describe also the farm implements used in each case.
6. Tell how plants are propagated—by seeds, roots, cuttings, tubers, buds and grafts. Explain where plants get their food and how they grow.
7. Explain how to read a weather map, know weather signals, and the making of local observations.
8. Name and distinguish ten common birds of his locality, and state their value to the farmer.

Obituary

Fred W. Biermaas.

Fred Biermaas, who died in Philadelphia on October 26th, was a graduate of the John Burton establishment at Chestnut Hill. Later he was connected with Charles E. Meehan.

James Arado.

James Arado, for many years manager of the cut flower department at C. Young & Sons, St. Louis, Mo., passed away after a lingering illness. Many friends among the florists sent floral tributes.

Thomas Franks.

Thomas Franks, founder of the firm of Thomas Franks & Son, florists, Champaign, Ill., died Oct. 18. He was born in Westbury, Eng., seventy-two years ago and came to this country at the age of 21. He was at one time gardener of the University of Illinois, also Park Commissioner at Champaign. He was a charter member of the Society of American Florists.

BAILEY'S NEW STANDARD Cyclopedia of Horticulture

Six large quarto volumes.
More than 3,600 pages. 24
exquisite full-page color
plates. 96 full-page sepia
halftones and more than
4,000 text engravings. 500
collaborators. Approx-
imately 4,000 genera, 15,000
species and 40,000 plant
names.

The new Standard Cyclopedia of Horticulture has been freshly written in the light of the most recent research and experience. It is not merely an ordinary revision or corrected edition of the old Cyclopedia, but it is a new work from start to finish with enlarged boundaries geographically and practically; it supersedes and displaces all previous editions or reprints of every kind whatsoever. It is both an Encyclopedia and a Manual, for with the aid of its Synopsis and Key, amateur and professional alike may quickly identify any plant, shrub or fruit contained within the set, and then receive expert instructions for its cultivation. Price \$6.00 per volume. Five volumes have now been issued and the others will follow in succession. Order from

Henry Schwarz.

Henry Schwarz, the well known Cincinnati and Norwood florist, died on Saturday, October 28th, after an illness that has lasted for some time. The burial was Tuesday, October 31st, at Evergreen Cemetery. Mr. Schwarz was born on December 8th, 1864, in Germany. In 1882 he came to this country. After eight years spent in working at Knightstown, Anderson and Richmond, Indiana, he went to Cincinnati and settled on Price Hill where he started a florist business. In 1901 he moved his business to Norwood where he was established up to the time of his death. Mr. Schwarz was very enterprising and thorough and very successful in business. His kindness and consideration toward others made for him numerous life-long friends who mourn his death. In the Cincinnati Florists' Society he was prominent and had held the presidency and other offices. He is survived by his widow, Mrs. Ophelia Schwarz, and Ed. Schwarz, his son.

NEWS NOTES.

Philadelphia, Pa.—The florist shop of M. J. Callahan, 3924 Market St., was damaged by fire on Monday, Oct. 23d. The loss is estimated at \$500.

Salem, Mass.—James Ward of Peabody was sentenced to four months in the House of Correction on Nov. 1 by Judge Morton in the United States District Court for using the mails in a scheme to defraud. Ward endeavored to collect commissions from various nurseries in New York State on fictitious orders for plants and shrubs.

Springfield, Mass.—There was a \$4,000 fire in the basement of Mark Aitken's flower shop on Oct. 26. The fire was seemingly put out, but in the evening a second alarm was sounded. The fire had crept up in the walls into the second and third stories. The firemen had a real battle this time. Capt. William Boss of the fire department sustained serious injury when an axe slipped from the hands of a fireman and cut the artery of his right thumb. Mr. Aitken was the heaviest loser. The total loss is estimated in the neighborhood of \$4,000.

The Recognized Standard Insecticide.
A spray remedy for green, black, white fly, thrips and soft scale.

An Important Court Decision.

The following is a copy of the U. S. Court decision which has just been handed in the suit for damages against the J. Chas. McCullough Seed Co. of Cincinnati for the use of the trade name "Acme." It will no doubt be of considerable interest to the seed trade.

In the District Court of the United States, Southern District of Ohio, Western Division.
No. 19

OPINION.

E. W. Conklin & Son, Inc., Plaintiff,
vs.

The J. Chas. McCullough Seed Company,
Defendant.
Hollister, J.

Action for infringement of trade mark and for unfair competition.

At the close of the argument, the court expressed the opinion that the defendant's claim of prior use of the word "Acme" and the letters "J. C. McC." in connection therewith upon bags and other receptacles in which timothy seed had been sold by J. Chas. McCullough, whose rights in 1913 were transferred to the defendant, was clearly established. A decree for defendant would have been entered then, but counsel for plaintiff urged earnestly the point that the use by defendant and its predecessor of the word "Acme" and the initials of "J. C. McC." was shown by the testimony to indicate merely grade or quality.

There was much testimony on the part of defendant's witnesses that the word and the initials did indicate the best quality and grade of timothy seed. If the evidence disclosed nothing else than that, the plaintiff would be entitled to a decree. But it discloses a great deal more. The use of the word "Acme" and the initials of "J. C. McC." indicate also source or origin, as well as excellence, and they were known to the trade as indicating both quality and origin. This being so, the plaintiff's case cannot be successfully maintained and the bill will be dismissed at plaintiff's costs.

The respondent used "Acme" and the initials "J. C. McC." for all kinds of grass seeds, while the plaintiff used "Acme" and the initials "E. W. C." only as a trade mark for timothy.

In view of the conclusion reached on the merits of the case it will not be necessary to decide the question whether or not the allegations in the bill of complaint used

"Acme" with the initials "E. W. C." for all kinds of grass seeds, since it is untrue, would warrant a dismissal of the bill for that cause.

One Week's Imports.

Imports at the port of New York, for horticultural material, for the week ending Oct. 20th, were recorded as follows:

Bulbs—France, \$1,290; Netherlands, \$201,614; England, \$419; Bermuda, \$6; Japan, \$24,649.

Plants—Belgium, \$6,469; France, \$980; Netherlands, \$5,676; England, \$1,338; Scotland, \$176; Bermuda, \$1; Trinidad, \$102; Colon, \$1,475.

Red clover seed—France, \$13,571.

Grass seed—Ireland, \$3,840.

Other seeds—France, \$8,529; Netherlands, \$90; England, \$10; Japan, \$12,559.

Nitrate of soda—Chile, \$77,708.

Other fertilizers—England, \$16,591.

High Vegetable Prices in Wisconsin.

Wisconsin cabbage growers are receiving about \$35 a ton, as against \$6 to \$10 a ton last year. A steady advance has been noted in the onion market. Growers are getting at wholesale from 75 cents to \$1.50 a bushel for first grade. Squash is rated now at about \$40 a ton, while turnips are

selling at from \$2 to \$2.50 a barrel. Three grades of navy beans, the marrowfat, medium, and pea, are quoted at \$5.70 a bushel—a price not recorded in recent years. The prevalence of "anthracnose" disease and the hot weather, which kept the beans from setting properly, is said to be one of the causes for the high prices.

The high price of vegetables in general is given by J. R. Hepler of the University of Wisconsin, as one of the causes for increased potato prices. "Last year 'average' to 'low' prices prevailed in the vegetable market," explains Mr. Hepler, "and as a result many growers quit raising vegetables, which sent prices up again this season. Probably next year will see another reaction to low prices following a larger crop, induced by better market conditions this fall."

Notes.

Grand Rapids, Mich.—A. J. Brown Seed Co. has purchased the business of the Jones Seed Co.

As is generally known in the seed trade there is a temporary embargo on grass seed from Holland, ever since July 31, 1916.

BUSINESS TROUBLES.

Of Interest to Retail Florists

A MODEL CITY FLOWER STORE.

It has been our pleasure and privilege to call attention in previous issues to the new floral establishment of J. H. Small & Sons on Madison avenue, New York City, as a model of serviceableness and exemplifying the highest measure of dignified elegance in modern flower store equipment. One notable feature not heretofore mentioned is the method of caring for the series of plant boxes which adorn the facade of the building as shown in our cover illustration in this issue. The watering of such arrangements conveniently and without damage to property or persons below is in most cases a problem. In this instance a system of perforated pipes has been installed with holes about four inches apart. These pipes are perforated and valves, on the inside of the building, control each tier, with a drip arrangement to guard against freezing up of the water in the pipes. This system affords an even distribution of the water and obviates the use of hose or ladders. It has worked out with excellent results.

NEWS ITEMS FROM EVERYWHERE

CHICAGO.

P. J. Foley, of the Foley Greenhouse Manuf. Co., is taking a business trip through the East.

The ten-cent stores are selling large, fine looking chrysanthemums. The fact that they are without foliage indicates long distance shipments.

The American Bulb Co. has added G. Marshut to its sales force. This firm has received a word that a shipment of hardy lilies had reached this country.

The A. L. Randall Co., who are handling the *Thenanthos* carnation report splendid sales of this great new red variety. Many Chicago florists, who have no time in securing stock. See advertisement with prices on another page.

This season the arrivals of stock from across the water are of more than passing interest owing to the extra hazard in ocean traffic. A car load of bay trees has just reached Chicago from Boskoop, having been just one month en route.

J. Mangel's store window attracted such a crowd that it was difficult to learn the cause. Beautiful specimens of live ducks were wading in the water which Mr. Mangel keeps running there a large part of the year, and it is the one thing of which passers by never seem to tire.

J. A. Budlong Co. has signed a lease for the corner store adjoining the one they have occupied, and the partition has been removed. They now have a very light corner store with sufficient floor space to make work easy, and can easily take care of their large shipping trade.

Mrs. A. Fulsinger, who has been in the retail store of J. Steinmetz, is purchasing stock for the opening of a flower store for Mrs. Wiedabech, Racine, Wis., of which Mrs. Fulsinger will have charge. A store was formerly operated in this building and since the death of the proprietor, J. Dourgoise, last summer, Mrs. Wiedabech has had it overhauled and improved, and is going into the business herself.

Some new phases of the subject of the respective rights of wholesalers and retailers to buy and sell as they please have been freely discussed this week when the chrysanthemum market was ruined by California flowers. The consensus of opinion seems to cling to the old adage that "It's a poor rule that won't work both ways," and if "red violets" is wrong for wholesalers it's equally wrong for retailers to buy direct from the growers of the western coast.

The Foley Greenhouse Manuf. Co. has just completed further improvements in their offices. The entire factory has been practically built within the three years they have occupied it and is now equipped to handle work with all possible dispatch. Among the recent work completed are two houses 40 x 225 ft. for Frank Schramm at Crystal Lake, Ill., a duplicate of which they built one year

ago; two houses, 40 x 200 ft., for Elmer Sigwald at Arlington Heights; one house, 40 x 200 ft., and one 40 x 54 ft., and propagating house 12 x 50 ft., for L. C. Busse, Mt. Prospect, Ill. Material is now being shipped to Gregg Station, Ill., for seven houses, 28 x 300 ft., for Bassett & Washburn. All have the Foley channel gutters with their bar clips.

WASHINGTON.

C. L. Jenkins & Son, of Suitland, are commencing to cut some fine *Delphinium belladonna*. They report that their crops of mignonette and stevia are showing great promise.

The annual chrysanthemum show of the Department of Agriculture was held during the week. As in previous years a large army of Washingtonians and people from nearby cities visited the exhibition. There is also a display of cactus plants, many of which came from the Border where militiamen of the District of Columbia are now doing duty and for this reason they also attracted a great deal of attention.

The State of Florida having designated Gainesville, Fla., a place of terminal inspection of plants and plant products under the provisions of existing law, postmasters have been informed that packages containing plants or plant products may be accepted for mailing only when plainly marked so that the contents may be readily ascertained by an inspection of the outside thereof. The law makes the failure so to mark such parcels an offense punishable by a fine of not more than \$100.

Gude Bros. Co. furnished the decorations for the wedding of Margaret Preston Draper, daughter of the late General William Franklin Draper, and Prince Andrea Boncompagni, of Rome, Italy. From the entrance to the ball room the guests passed through a lane of flowers, palms, and ferns, numerous white chrysanthemums and American Beauty roses, combining to reproduce the Italian national colors. Asparagus and southern smilax studded with white chrysanthemums and American Beauty roses faced the balcony in the lower hall. Standards of American Beauty roses marked the approach to the stairway. Farleyense ferns, studded with purple orchids banked the mantels in the halls and drawing room suite and towering ferns filled every corner. In the ballroom, temporarily converted into a chapel, the ferns threw into relief the white marble altar and priedieux. Ferns and American Beauty roses banked the face of the altar and the platform and there were standards of the roses on the altar. In the ante room an organ was ensconced in a bower of ferns. The bride carried a shower of lilies of the valley and white orchids, and the maid of honor carried a bouquet of pink orchids.

PITTSBURGH.

William M. Turner of Penn avenue, Wilkesburg, has returned from his annual week's hunting trip in Cameron County.

W. F. Hutchison of Sewickley, florist for the Pennsylvania Lines West, left last Tuesday night for Xenia, Ohio, to supervise the landscape features and planting for the new station there. He has just completed extensive work for the company's new stations in Canton, Ohio, and Chicago, Ill. Mr. Hutchison succeeds his father, Robert W. Hutchison, who died on July 17 at West Palm Beach, Florida.

In honor of the city's charter centennial this week, a downtown shop has decorations distinctive for elegance and at the same time, simplicity. Maidenhair ferns and large clusters of specimen chrysanthemums are intermingled, a few of the more conspicuous clusters being caught with broad ribbons of rich texture in Pittsburgh's black and yellow. A patriotic touch is given the whole by the red, white and blue background formed of medium sized silken flags.

Randolph & McClements made a special Hallowe'en display, distinctive without being grotesque. The essentially All Saints' pumpkin appeared in the center and again on each end of the wide window ledge, but cleverly "subdued" by overhanging autumn foliage. The "centerpiece" held a large burning wax candle, and nearby was an unusual touch given by a few seemingly carelessly arranged cattleyas; and on the window ledge and floor conspicuous space was given to oblong dominoe boxes and variegated foliage. Chrysanthemums, largely in bronze tints, prevailed.

ST. LOUIS.

Wm. C. Smith Wholesale Floral Co.'s delivery truck caught fire and was entirely demolished. Another car will be in service in a few days.

Foster, the florist, is advertising in the daily papers a chrysanthemum show, October 30 and 31, at his store on Ohio street. Music both days.

Publicity in regard to the coming Flower Show is being pushed to the front. Frank Windler, of the Windler Wholesale Floral Co., is especially active.

Lawrence, Mass.—A. H. Wagland, the Broadway florist, is preparing a petition to be presented to the city government, asking that the Arlington mills be compelled to abate an alleged smoke nuisance. Mr. Wagland and residents of the vicinity of the mills, claim that the Arlington has a blower equipment on the mill chimneys which spreads the soft coal soot all over the district. According to city hall officials there is a statute covering such a smoke nuisance, but it must be adopted by the city council before it can be enforced. The penalty is \$100 a week as long as continued.

Boston Cut Flower Exchange

No more enjoyable event comes to the Boston flower growing fraternity in the course of the year than the annual banquet of the Flower Exchange which is an adjunct of the annual meeting of that corporation. As customary the festival was held in Young's Hotel, on Saturday night, October 28, this being the 24th anniversary, and there were about 120 members and invited guests present during the evening. The hotel outdid itself in the quality of the banquet and a fine orchestra did its part to make the affair a finished success, not to mention president Stickel, perennial toastmaster, who gets more and more mellow in his ripe experience as the years jog along.

The business meeting was sandwiched in between the more festive proceedings and did not take long. Officers and directors were re-elected by an unanimous vote for another year. The financial statement showed a prosperous year for the corporation and the establishment of a surplus fund of \$10,000 against future needs was unanimously approved. As an interlude a "straw ballot" of the gentlemen present was taken to ascertain the sentiments of the flower people on the coming national election. The result showed 77 for Hughes and 15 for Wilson with a few scattering and humorous.

The speakers as called upon by President Stickel were in genial mood and nothing very serious was superposed to check the flow of merriment and abandon which held sway. Remarks were made by Billie Carr, recently married and somewhat apologetic; W. H. Elliott, representing the other market and deeply concerned about the coal situation; J. K. M. L. Farquhar, representing the Horticultural Club and full of optimism as to the business outlook; Secretary Thurs-

ton full of satisfaction as to the past and confidence as to the future; President Methven of the Gardeners' and Florists' Club, who urged a larger interest in that organization by the commercial people; "Billie" Paterson, vice-president of the club, in approval thereof; E. S. Morse, auditor of the accounts of the Exchange who asserted that the organization is almost too prosperous and advised an increase of surplus funds as preferable to excessive dividends; J. T. Butterworth, full of humor and sage advice; W. N. Craig, congratulatory and earnest; W. J. Stewart, who agreed that his limitation was "Annie Laurie" and proceeded to prove it with the assistance of the orchestra. Songs and recitations by Mr. Mahoney were interspersed with happy results. The tables were handsomely adorned.

Boston Florists' Bowling League.

On Thursday evening, October 26, scores were recorded as follows:

M. & M.	401	418	433	1282
Penn.	397	377	415	1171
Robinson	431	405	389	1225

Flower Mkt.	426	456	431	1313

Washington Bowlers.

The Florists' Club bowling team slipped back a notch last week for they lost three games in a row to the Park team. Gouldman scored highest for the Florists although his totals were nothing to boast of. Despite the setback they are beginning to make a very good showing. The score was as follows:

MOUNT PLEASANT DUCKPIN LEAGUE.

Whittlesey	88	97	84
Downing	132	83	90
Kelley	86	84	90
Inrle	105	98	115
Pardoe	95	112	84
Totals	506	471	472

Florists.

Gouldman	85	86	100
Shaeffer	80	101	85
Redmond	82	79	100
Cahill	78	80	83
Scheeps	86	96	84
Totals	411	442	452

PERSONAL.

Joseph Goatley has been appointed head gardener on the Walter Bliss estate, Bernardsville, N. J.

Paul F. Brigham of the Westboro conservatories and Helen I. Adams of Waverley, Mass., were married Oct. 26th.

Arthur Jackson is in charge of the new estate of J. B. Schlotman, Grosse Point Shores, Detroit, Mich. He was formerly gardener for A. E. Newbold, Chestnut Hill, Pa.

Frank Brunton, formerly superintendent of the Edward McQueeney estate, Fine Creek Mills, Va., is now superintendent of the Vander Kamp farms, Cleveland, N. Y.

Andrew McKendry succeeds James Bell as head gardener on the C. K. G. Billings estate, Oyster Bay, N. Y. Mr. McKendry is succeeded by Fred Falconer on the Harkness estate, Glen Cove.

Paul Maillard, gardener for several years past at the estate of Mrs. Chas. Stedman Hanks, West Manchester, Mass., has accepted a position at the country estate of Joseph Leiter, in Virginia, about seven miles outside of Washington.

Ardsley, N. Y.—Griffen, Prince & Ripley have sold fourteen acres of the Amzi L. Barber estate at Ardsley-on-Hudson to John F. Havemeyer, president of the Concrete Steel Company. The property has been used for gardening, greenhouses and the raising of grapes. Mr. Havemeyer will continue this use. It was held at \$30,000.

BEAUTIES

There is a reason why you should send your order to us. We are Headquarters for Beauties in this market, as we handle the cut of 100,000 plants.

Flower Market Reports

BOSTON Every corner of the storage and display space in flower markets and wholesale houses is crowded with flowers. Chrysanthemums are, of course, the major part of the material, but if every chrysanthemum could be wiped out of existence there would still be an overstock of other things. Roses are very plentiful and there is nothing which cannot be supplied at once in response to any reasonable call. The situation is worse than last week, as the shipping trade then enjoyed has stopped the surplus conditions evidently having spread well over the whole country. Goods are disposed of at buyers' prices when sold at all.

A great change has **CHICAGO** come with the past week. Bright weather has brought out a large supply of nearly all kinds of stock, and light demand has resulted in an over accumulation that at this writing leaves the counters full. But the greatest surplus is in chrysanthemums, caused by the heavy shipments from California, coming when local stock was filling the market. The last of the early varieties are now coming and the mid season is here with all the largest blooms to meet an over filled market, which unless conditions change, will mean financial loss. Carnations have been more in evidence this week than before this season. Roses are of all grades and during the past week special low quotations have been made to move large quantities. Sweet peas are of very good quality, but demand is light. A few violets are coming but they are not much sought for. American Beauties are fine. Demand has been good and prices are holding up well. Lilies, so long not equal to the demand are selling slowly. All kinds of green goods are plentiful.

The market is more **CINCINNATI** than well supplied in all lines and with a rather indifferent call. The prices of most flowers are very reasonable from the retailers' view point. The demand from out of town is good, and particularly for greens and supplies. Roses are very plentiful. The same is true of chrysanthemums and lilies. Carnations are in a fair supply. Orchid and lily of the valley have been meeting with a good market. Other offerings include callas, snapdragon, a few sweet peas and a few dahlias and cosmos that escaped the recent frost.

The wholesale market is struggling under a veritable avalanche of chrysanthemums, roses, carnations, lilies and everything else that can be made to blossom at this season of the year. It is not so much a question of price as it is of getting the stuff moved at all. Chrysanthemum boxes in which a good-sized man might comfortably stretch himself come in enormous truck loads, and filled with flowers that in many instances are marvels of skillful culture, and between these and the rose crates which are also piled high on all sides

SPECIALS

A special must be a special in every sense of the word, so much so that every customer will have the utmost confidence in these specials, knowing they are being offered something of unusual value.

locomotion in the wholesale district during the receiving hours of the morning is a difficult undertaking. The demand from the stores is very light and even the street men find no outlet for the stock, which they can buy at their own price.

The market here **PHILADELPHIA** is rather disappointing. Too many flowers and not enough business. This condition is probably the result of the unusually warm weather which has given outdoor flowers a new lease of life and also stimulated indoor production. American Beauty roses are not so plentiful as they were, the growers evidently having begun to pinch for the Christmas crop. Russells are still very fine quality and bring good prices. Ophelia is also among the leaders. Too many carnations for the demand. Among the new arrivals in the chrysanthemum world are to be noted some very fine Marigold, Chieftain, Strafford and Bonaffon. Cattleyas are still plentiful but the demand being good they re-

main normal as to price. A limited supply of oncidium, dendrobium and phalaenopsis is to be seen around. Lilies are more plentiful and price has dropped back to normal. Gardenias are now of excellent quality and move off at good prices. Sweet peas much improved lately and some really elegant stock is to be seen now.

There is little **PITTSBURGH** change noticeable in the market. Blooms of all kinds in season are coming in nicely with chrysanthemums improving daily in quality and quantities. Lilies, orchids and American Beauties are lessened in numbers. Some nice violets have begun to come from the Hudson river section, and all-round, the market is "comfortable" for the time of year.

Chrysanthemums are **ST. LOUIS** now holding considerable sway on the market. Roses and carnations of good quality are selling well. Trade in general, however, is slow and election

Flower Market Reports

(Continued from page 15)

time is liable to keep away would-be buyers till things are settled and quieted down. Roses are coming in of fine quality and clean up fairly well. Violets are going slow owing to warm weather and influx of chrysanthemums. Green is in demand. Lilies and smilax are scarce. Lily of the valley is also on the scarce side. Grand opera this week is expected to help some on the sale of flowers.

Local business is showing the effects of the coming election and the absence from the city of large numbers of people. Added to this there is a large quantity of stock in the market working to the demoralization of prices. Orchids and gardenias are scarce; they are exceptions. American Beauty roses are very fine, and carnations have improved materially. Violets are selling better. Chrysanthemums are at their height, forming a glut on the market with dahlias and cosmos. Sweet peas and yellow and white daisies of good quality are more numerous. All fine flowers have been in better demand for wedding decorations. Delphinium is again to be had.

the specifications, copies of which as well
as copies of approach plans of the several
buildings may be had upon application to
the respective Custodians of the Buildings,
or at this office. Make application only
for the specifications and drawings for the
buildings for which you intend to submit
proposals. Jas. A. Wetmore, Acting Super-
vising Architect.

Plant Propagation, Greenhouse and Nursery Practice

By M. G. KAINS

We have had many inquiries from
time to time for a reliable and up-to-
date book on plant propagation, but
were always at a loss to find any pub-
lication that we could recommend. The
subject has been dealt with in fragmen-
tary manner only in books that have
come to our notice. So it is well that
this new work has been issued, especi-
ally as it is both comprehensive and
practical, and it should meet with a
ready sale among plantmen, nursery-
men and gardeners. There are nineteen
chapters covering in detail topics of
germination and longevity of seeds,
propagating by buds, layering, cuttings,
grafting, etc., fruit tree stocks, clones,
etc., and there are eight pages of con-
densed cultural instructions in tabu-
lated form, covering annuals and peren-
nials from seed, woody plants, ever-
greens, vines, bulbs and tubers, green-
house and house plants, ferns, palms,
water plants, orchids and cacti. The
illustrations are numerous, comprising
213 figures and half-tone plates. There
are 322 pages well bound and on heavy
paper, teeming with helpful information.
It is a book which no cultivator can
afford to do without. It is worth many
times its price. Copies can be supplied
from the office of HORTICULTURE at
the publisher's price, \$1.50.

NEW YORK, N. Y.**COMBINATION VEGETABLE AND
FRUIT CELLAR**

Editor, HORTICULTURE

Dear Sir: The writer has to build a combination vegetable and fruit cellar. Could you advise him where he could find out just how to go about it? Would like to know what is considered the proper location and aspect. Also how about ventilation, and all and every kind of information pertaining to a building of this kind.

Michigan

W. B.

A combination vegetable and fruit cellar should not be installed in the same room. There should be a very thoroughly insulated partition between the two cellars. It is always advisable to build a root cellar separately below the ground, and a fruit house above ground.

The plan followed by Vermont people who use no ice, for a fruit house, is to build an insulated house with heavy refrigerator doors. Fruit put in there in the fall is exposed to the night air by leaving doors and windows open during the night. The doors are closed in the early morning and the temperature is kept equal.

The root cellar, built partially below ground, may be constructed of almost any material from cement to sods, but should be protected thoroughly against freezing, either by covering with loam or leaves, and a ventilator should be put in, coming not more than two feet from the ground and extending well up through the roof.

In Bailey's Cyclopedia of American Horticulture will be found a good description of a root cellar, and Waugh's "Fruit Harvesting, Storing, Marketing" gives details for a fruit house.

**NON-KINK WOVEN HOSE**

In any length (one piece) with couplings, 14c. per foot. Unequaled at the price. Remnants, shorter than 50 feet, 10c. per foot, with couplings.

**HOSE VALVE—70c.**

All brass except the hand wheel. Has a removable leather disk which is easily replaced to keep water tight. Stuffing box prevents leaks at stem.

King Greenhouses

KEEP SUMMER WITH YOU THE WHOLE YEAR ROUND

On account of their sturdy special construction which permits of great strength without the need of heavy shadow casting supports, these houses are so warm and sunny that they are filled with a riot of bloom and fruit when Jack Frost has stripped the garden of its beauty.

The ventilating and heating systems are the result of years of experience in building for professional growers. Things just have to grow in a King.

Write today for Bulletin No. 43. See how beautiful and how productive a greenhouse can be erected for the price you want to pay.

MASTICA

For Greenhouse
Glazing
USE IT NOW

F. O. PIERCE CO.
12W. BROADWAY
NEW YORK

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

When writing to advertisers kindly mention HORTICULTURE.

This picture was taken right after a storm, and proves conclusively that our style of construction is positively weathering.

This full iron frame, curved eave JACOBS' GREENHOUSE, was completely erected, including ventilation and heating system, by our own expert mechanics, for Mr. Chas. Bradley at Convent, New Jersey.

This greenhouse is 25 x 85 ft., and has a partition in the middle, making two distinct and separate compartments, with separate heating systems, so that different temperatures may be maintained in both sections.

WE KNOW WHAT TO DO AND WHAT NOT TO DO

If you contemplate building a greenhouse write us—we can save money for you.

Evans 20th Century Arm

Most up-to-date arm on the market. Proved that it is better than any other is that others tried to imitate it. Write for our 1916 catalogue out.

JOHN A. EVANS CO.
Richmond, Ind.

No. 1 is the gable truss stiffener. No. 2 is the pipe brace running from center of gable to the ridge. No. 3, the pipe brace running from the gable rafter to the first column and then on down into a concrete footing in the ground.

The stiffening of the first two sections is accomplished by running an angle iron from eave to sill. Stiffening at this point, we consider very necessary.

This shows you how No. 3 is tied to the first column, on its way to the concrete footing.

How We Put "The Starch" In Our Gables

THERE has been much talk and many claims about rigid gables. The wind pressure against their direct upright surfaces is terrific.

After very careful investigation, and a series of rigid tests, we have come to the definite conclusion that much of the loosening of glass in the big houses is largely due to the lack of rigidity of the gables.

To make the gable so there is no movement in and out—is not enough.

There is a tremendous pressure exerted by the gable against the entire frame. The more rigid it is; in fact with the more force, is that pressure passed along.

Upright strength rigidity is not enough.

There must also be a bracing that shall convey the winds' thrust to the foundation and footings, and take all possible away from the frame.

This is how we accomplish it.

First the gable rafters and purlins are made amply strong.

Then the broad end is stiffened by a truss running parallel with one of the purlins. See No. 1.

Extending from the center of the gable, a pipe brace runs to the ridge. See No. 2.

From two of the gable rafters, we run a pipe brace to the first column, and down into a concrete footing beyond. See No. 3.

On two of the side sections we put angle iron bracings, from the eave to the sill. See No. 4.

From the description and the enlarged points of views of the picture, it might seem that such bracings might be rather noticeable, but they are not.

If you do notice them, it is only to be impressed that here at last is a gable that is rigid, and will preserve the rigidity of the entire house. A gable that will not transfer the wind pressure directly to the entire framework, sooner or later, causing glass loosening.

LILY BULBS

A business house owes its reputation more to what it gives than to what it gets. In other words the merit of the thing sold outlives the money involved in the transaction. We give our customers the best in lily bulbs there is and get the least consistent with a legitimate reward for our services. Some think that because we are the largest handlers of lily bulbs in the world, we should be able to compete in price with anyone. Our answer is that our aim is not price at all, but quality, and we do compete there with anyone in the business. Horseshoe Brand Giganteum will average more flowers year in and year out than any other brand in the market. Lily bulbs of prime quality—from the best fields never go begging—price never gets them—it's the other kind that make price attractive. The wise florist, however, will get Horseshoe Brand bulbs and he can then feel sure he is getting bulbs that are at least from good healthy fields, well cured and properly packed. The present prices are as follows, and deliveries can be made in nearly all the sizes immediately:

GIGANTEUM

The Best White Lily for Easter—Plant Now

Size 6 x 8 in.	\$5.00 per 100;	\$18.00 per case of 400
Size 7 x 9 in.	7.00 per 100;	18.00 per case of 300
Size 8 x 9 in.	8.00 per 100;	19.00 per case of 280
Size 8 x 10 in.	9.00 per 100;	20.00 per case of 250
Size 9 x 10 in.	10.00 per 100;	19.00 per case of 200
Size 10 x 11 in.	13.00 per 100;	18.00 per case of 150

Prices quoted upon application for Cold Storage Giganteum delivered any time during 1917. Send for a Planting Table, showing planting and flowering dates. State quantities required per week or month.

FORMOSUM

For early flowering and for those who have insufficient heat for forcing Giganteum for Easter.

Size 6 x 7 in.	\$5.00 per 100;	\$16.00 per case of 380
Size 7 x 9 in.	7.00 per 100;	18.00 per case of 270
Size 9 x 10 in.	10.00 per 100;	16.00 per case of 160
Size 9 x 11 in.	12.00 per 100;	16.00 per case of 150
Size 10 x 11 in.	13.00 per 100;	16.00 per case of 140
Size 10 x 12 in.	14.00 per 100;	16.00 per case of 120

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

"If vain our toll, we ought to blame the culture, not the soil."—*Pope*.

Care of Carnations

Carnations will do well with a night temperature of 48 to 52. The day temperature should be governed by the weather, not allowing it to rise above 60 degrees on cloudy days or 72 on bright days. Nothing will be gained by getting a few extra flowers in winter by running the houses a few degrees higher, as the plants will be sure to suffer. Where carnations are showing plenty of buds they should get some light top dressing. Examine the benches every day for the dry places which should be watered. After the new year, if the plants are still doing well they will need more food and if available a good lot of rotted stable manure, which also will help to keep the beds from drying out too quickly. Liquid manure can be used to advantage about once a week, or top dressing can again be resorted to, using dried blood or sheep manure or shredded cattle manure in heavier doses.

Violets

Violets are air-loving plants, so see that they have plenty of ventilation. The spraying overhead should not take the form of very heavy spraying now, and from now on should only be done during forenoon. Damping down the houses and wetting down of walks and dampening of approaches should be done only on sunny days. I suppose that everybody who planted a house of violets last spring for the coming season has been painstaking and thorough in the care of same. However, do not think that they are in such good shape that you can afford to neglect them. Look over and thoroughly clean every crown to make sure that no insects or black spot on leaves are carried through the house and look out closely that no aphids of any kind gets a foothold. Violets like to be moist at the roots at all times, but they will not stand anything like a soaked soil all the time.

Orchids

With all orchids now in their winter quarters, some time must be given to cleaning them, and any spare moments are well spent in this way. Temperatures should now be lowered. Few orchids want a close, stuffy atmosphere, so ventilation should be given at all times when possible in greater or less quantity, according to the outside conditions. Watering should now be done early in the morning and the amount of damping down of the floors will, of course, depend on the weather and the amount of fire heat being used. Most orchids will stand full sun now, so let them have it. During sunless weather water should be given with caution.

Next Week:—Care of Fuchsias. Paffodils for Early Forcing; Forcing Ixias; Japan Lilies; Propagating Crotons. Reminders

Spiraea japonica

Unpack the clumps at once when received, as they are sometimes found to be in a very dry state. Soak them well after unpacking and leave them outside to freeze before you pot them. They can be stored in any frames, putting a little earth between the roots and some over the crowns. Let them have the benefit of rain or snow, as it does them good. The imported roots of spiraea or astilbes will soon be here. It takes from ten to fourteen weeks to flower them. Astilbe compacta and Gladstone are popular forcing varieties. When wanted they can be potted into six or seven inch pots, and stood under a bench for the first three weeks, after which they can be given a place on the bench in from 55 to 60 degrees at night.

Sweet Peas

Fire heat is now a necessity, but the plants must have full ventilation. Avoid, however, cold draughts, which may result in an attack of mildew. The night temperature for flowering peas should be kept about 50 degrees and a couple of degrees lower is better as winter progresses. Sweet peas that were planted the end of July will soon be coming into flower. While the demand for sweet peas is not especially vigorous until after the chrysanthemum season has passed, there are customers who want them earlier. Go over the benches carefully before watering, and if the soil is in need of water give it good and plenty. On the other hand, don't water soil which is not really in need of it. An overwatering once in a while might not show bad effects, but a continuation of it will ruin the constitution of the stock in a few days. Look over the early plants every five or six days and give them necessary ties. Syringe on all good days early in the morning so as to keep red spider down.

Reminders

Syringe bouvardias regularly on all good days, and should green they appear give several light fumigations until they disappear.

Mignonette is easily injured by over-watering, either in pots or on benches, so do not be careless about this.

Increase the water supply to callas as the root and top growth extends.

Place crotons where they will get all the light and sun possible, as it helps to give them better coloring.

Watch feeding with liquid manure in all departments. When possible give it only on clear days.

The laurel folly and the florists' interests

The Society for the Protection of Native Plants makes a fervent appeal through the columns of the Boston newspapers asking the public to exercise discretion in the use of laurel for decorative purposes—this, of course, referring to the native "Mountain Laurel," *Kalmia latifolia*. Attention is called to the fact that this is the most beautiful of our native shrubs, not only in its flowering period, but as a striking feature of the winter landscape. The public are warned that the inroads being made on this typical feature of the New England woods for Christmas dressing of churches and the festooning of ball rooms, buildings, etc., must soon deplete the laurel supply to the extent of near extermination and regret is expressed at the wasteful destruction of floral beauty by the winter cutting of the green laurel boughs which carry the embryo flowers for the coming summer. We heartily concur with the sentiments and applaud the efforts of the friends of the mountain

laurel to preserve it for the beauty of our woods, swamps and pastures and the enjoyment of future generations. One ally they should have is the florists' trade. Floriculture is not advanced nor its interests promoted in the slightest degree by the use of this wild material. More artistic, appropriate and effective results are attainable by the use of florists' and nurserymen's products for every purpose to which the laurel is put. For that reason as well as for the more altruistic one, florists' organizations should join forces with horticultural societies and others in a vigorous crusade against this laurel folly.

A fair deal for the ladies

If there is any one feature more noticeable than all others in connection with florists' organizations and florists' recreations of the present as compared with those of a few years back it is the custom of providing social entertainments in which the ladies are invited to participate. The innovation is a most excellent one and worthy of even wider observance than has yet been given to it. We have noticed that wherever the plan has been given a trial it inevitably becomes a permanent habit, which is just as it should be, for the florists' business is greedy and inexorable in its demands upon his time, depriving his home circle of his companionship in a manner and to an extent equalled in but few other occupations. So it is very proper and right that such consideration as is possible should be given to those who are so often deprived of their rights to his society by the exactions of his vocation.

Sentiment in floriculture

We have read with much interest an article by a correspondent of the Providence Journal on "Why Americans Are not Natural Florists." The correspondent, who states that he had interrogated several successful florists on this question, expresses his convictions that the reasons for the small percentage of American-born men in floriculture are that this is a business where emolument is subordinate to fondness for the avocation and that "sentiment in a matter of business is altogether incompatible with the American inborn spirit of business, which leaves no room for anything but business." He further submits that "to the American grower a plant merely represents a producer of commercial articles, each of which will bring him as many cents as the market will decide." Again the writer avers that "The work simply does not appeal to the American boy." In all of this there may be a modicum of truth, but the sentiments here given currency are simply traditional and habitual as regards American character and as mere repetitions carry little weight. We have the privilege of a large acquaintance with the floricultural people of America and while it is true that a considerable percentage are of foreign birth yet it is also true that among these who have come to us from across the sea one finds many whose money-making proclivities and mercenary estimate of the goods they produce is fully up to the limit of the shrewdest Yankee ever born. It is probably well for the stability of the flower industry that this is so, for "business is business." Yet if it comes to a "show-down" on young men of American birth having a sincere love for their chosen calling, combined with business aptitude, we would suggest a little scrutiny of the young men now studying horticulture at Amherst, Cornell, Urbana, and other institutions of like character and we feel confident that the American-born boy who aspires to a floricultural career will not be found wanting in his devotion to the art, apart from his business instincts. All we need is time and we'll "get there."

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Feeding

As soon as the plants begin to show a large number of red shoots, it is a good sign that they are beginning to come back, and that there will soon be another crop of buds. To help lengthen the stems it will be necessary to feed the plants, as nearly all the plant food that the new crop will take should come out of what is put on and not out of the soil in the benches, as replanting time is a long way off, and the soil must be kept rich or the plants will begin to go back. Care will have to be taken, however, not to overfeed, for they can easily be ruined by large doses of strong manure or fertilizer when not in condition to take it all. Some varieties will take more and stronger feed than others, which fact should be borne in mind when applying mulch or when feeding. Then, too, there may be some benches that are not at the right stage of growth to get the feed. It is not right to go over the place every so often with feed applying it heavy all over. The proper way is to ascertain which benches have a crop just beginning to come, and these only should receive additional feed, in such form as is available and suitable. Never use pure nitrate of soda on rose benches except in rare cases on the harder growing varieties such as Radiance, Stanley, etc. Other strong fertilizers the same way. If applied too heavy, a weak, soft growth is sure to result and a dose of mildew almost sure to follow. Bonemeal is an ideal feed, and no one can go very far from right in applying this. Do not apply too heavy a dose; a light sprinkling is plenty, and for best results should be applied very evenly so that all the plants will get an equal share. Tankage, sheep manure, blood and bone are all excellent things to use at times, but we advise growers to experiment with them before using either extensively. If there is a good supply of cow manure, liquid manure can be made, and this, with a light dose of bone now and then, will give the plants enough to eat. Keep enough mulch on to protect the roots and to have the surface of the soil quite rough at all times.

Soil for Potting

Now is the time to think about the supply of soil for potting, and if there is none put away for the winter it is about the right time to do it now. If there is no

shed handy to store the soil and thus keep it from freezing hard, a large heap can be covered over with leaves or clean straw. The leaves if used should also be clean, raked out in the wildwood if possible, so that there will be little danger of their being affected with some fungus that might get into the soil. If the latter method is to be used it will be best to wait until the ground freezes a couple of inches, and then cover up the heap desired. This will make it better for if it should be covered with the leaves too soon the soil would get wet and stay wet, and getting no air it would soon lose a goodly portion of its "life" and plants potted in this soil would not respond so readily as in soil bubbling over with life. When storing the soil in a shed make sure that it is well ventilated. The left-over soil heaps will make excellent potting soil and these should be chopped down and brought in now if the work has not been done already.

The Sod Heaps

In sections where the soil is heavy, work on the sod heaps should go right on until they are all put up. If things keep as they are it will be difficult to get the heaps up next spring, so if there is any chance at all go on with the work now. The soil is still in a fairly dry condition, and is not so hard to handle as it will be later. If the manure for the heaps is not on hand now, what there is can be made to go further by putting in only very thin layers and later on when manure is plentiful it can be hauled and stacked right on the heap. Then if the winter should be mild the sod heap can be cut down after enough manure is put on top, and the whole business turned over. Or the work can remain until early spring. It should, however, be done some time before the soil is to be used in the benches so that the manure will have plenty of time to work through and put this into condition for the plants.

Working Ahead

With help scarcer it will be well for growers to work ahead as much as possible. Thus the soil that is taken in for potting can be screened, sand can be screened also for the propagator next month and many other things may be done in advance if time will at all permit.

THE EXHIBITIONS

WESTCHESTER AND FAIRFIELD HORTICULTURAL SOCIETY.

The exhibits at the sixth annual autumn exhibition of this society, in Greenwich, Conn., were of marked superiority. There was keen competition throughout the entire schedule of 121 classes and the affair was a social and financial success. Noteworthy features were the numerous trade displays (eight in all), the scarcity of the "big blooms" and the increasing prominence of single and pompon types of chrysanthemums, also the unusual display of outdoor flowers. The increasing interest of the amateurs who do not employ paid assistance is gratifying to note. The marked tendency towards better decorative effects as evidenced by the numerous groups of cut flowers, decorated dinner tables, baskets of flowers, centerpieces, etc., is also worthy of note. Manager J. B. McArdle was ably assisted by Thos. Ryan, to whom the society is indebted for the staging of a very effective exhibit. The judges were Jas. Blair, Staatsburg, N. Y., Wm. Turner, Oceanic, N. J., Geo. Middleton, Tarrytown, N. Y., and Ernest Wild, Morristown, N. J., whose fair and impartial decisions were received with universal satisfaction.

Among the novelties noted was a display of seedling chrysanthemums, anemone flowered type, exhibited by Scott Bros., Elmsford, N. Y.; the new yellow rose Mme. Collette Martinet from A. N. Pierson, Inc., attracted a great deal of favorable attention and was highly commended. This new rose is of elegant form and of rare fragrance. J. B. McArdle exhibited the new double-flowered cosmos. This should prove valuable for the florist as well as for garden decoration. Certificates of merit were awarded to Baldwin & Co. for orchids; Lager & Hurrell, for orchids; Mills & Co. for dahlias; Chas. H. Totty, for chrysanthemums; A. N. Pierson for seedling chrysanthemums and roses; Scott Bros. for anemone flowered chrysanthemums. J. B. McArdle was highly complimented for general display, and Stamford Seed Co. for display of sundries. Special awards to private growers were: certificate of merit to Alex. Geddes for seedling single chrysanthemum; cultural certificate to Wm. Morrow for *Eucharis amazonica*, also C. of M. for *Cycas Rumphii*; special prize to P. W. Popp for basket of pompon chrysanthemums; 1st prize for group of chrysanthemum plants went to Robt. Grunnert; 1st for cut chrysanthemums went to Wm. Graham, gard. for Mrs. E. C. Converse; 1st for foliage and

flowering plants to Robt. Allen, gard. for E. C. Benedict; sweepstakes for largest bush plant, W. J. Sealey, gard. for Chas. Mallory; 1st for table decoration, Wm. Whitton, gard. for Mrs. J. H. Flagler, who also won the prize for the largest bloom of the show. The principal winners in the decorative classes were Fred Lagerstam, gard. for J. Topping, and Thos. Aitchison, gard. for Mrs. Nathan Strauss. P. W. Popp, gard. for Mrs. H. Darlington, was 1st for outdoor flowers; Wm. Smith, gard. for Robt. Mallory, 2nd, who was also 1st for specimen orange tree. In the potted chrysanthemum classes the chief winners were W. J. Sealey, gard. for Chas. Mallory; Thos. Ryan, gard. for John Downey; John Orr; G. D. Sullivan, gard. for Mrs. W. G. Nichols; C. Hankenson, gard. for A. G. Smith; J. B. Andrew, gard. for Mrs. L. C. Bruce; Wm. Whitton, gard. for Mrs. J. H. Flagler; Fred Metzler, gard. for Mrs. A. M. Zabriskie; Fred. Lagerstam, gard. for F. A. Topping. In the cut flower classes the most successful were Mrs. Flagler; Mrs. Ernest Iselin, gard. Duncan McIntyre; Mrs. E. C. Converse; Mrs. J. D. Barron, gard. Jas. Linane; A. G. Smith; Geo. Lowther, gard. Emil Johnson. In the pompon and single classes the honors were shared by Adrian Iselin, Jr., gard. Jos. Tiernan; Mrs. H. Darlington; Mrs. E. C. Converse; Mrs. F. A. Constable, gard. Jas. Stuart. In the carnation classes the principal winners were Mrs. Converse, Robt. Grunnert, Mrs. Nathan Strauss and J. B. Cobb. In the rose classes Chas. Smith, gard. Anton Pederson; Mrs. Oliver Hoyt, gard. Jas. Foster, and Mrs. Flagler. In the miscellaneous cut flower classes the prizes were divided by Robt. Grunnert and P. W. Popp; in the orchid classes E. C. Benedict, Mrs. Darlington, Mrs. Oliver Hoyt, Mrs. H. O. Havemeyer, J. B. Cobb and Mrs. F. A. Constable. On ferns and palms the winners were Mrs. O. Hoyt, Robt. Mallory, Mrs. Havemeyer and John Orr. Fruit and vegetable and classes for amateurs were all well filled.

P. W. Popp, Cor. Sec

NORTHAMPTON (MASS.) FLOWER SHOW.

The fourth annual flower show of the Northampton and Holyoke Florists' and Gardeners' Club opened in city hall on Nov. 1, when Mayor and Mrs. William H. Feiker were presented by President A. C. Butler with a handsome bouquet of flowers. The Mayor responded in a gracious manner and the show was declared officially opened. The show this year was the biggest and best ever held here. Some wonderful large blooms were exhibited, William Turner carrying off the honors. Not even at the Boston show were there to be found such blooms, not only of Turners, but of the other exhibition chrysanthemums. Although the show was much smaller than the Boston show, its quality was decidedly better and in all classes there was keen competition. James Whiting, foreman of the greenhouses at the Mass. Agricultural College, received first award, the Skinner cup, for a vase of twelve blooms of William Turner. The class for the best specimen bloom was captured by F. D. Keyes & Son of Florence. An exceptionally good display was shown in the carnation classes, with Butler & Ullman leading. This firm also carried off the honors in the rose classes and for group of decorative plants. The latter was arranged with strips of bark, artificial moss, water feature, begonias "Gloire de Chateleine," and adiantum, with a few palms and a centre of *Cibotium Scheidei*.

In the basket classes there were a large number of entries and the workmanship and choice of materials was remarkable. Several dinner tables also added attractiveness to the show, the winning table being one of yellow and white pompon chrysanthemums, arranged by G. S. Sinclair of Holyoke.

In the class of wedding flowers Gallivan Bros. of Smith's Ferry carried off first honor. Special mention should be made of the exhibit of evergreens by E. J. Canning and also the exhibit of economic plants by the Smith College greenhouses.

Winning exhibits other than those mentioned were various plant groups by G. S. Sinclair & Son, R. S. Carey, F. D. Keyes & Son, Butler & Ullman, Mass. Agri. College, Smith College and Gallivan Bros. Chrysanthemum blooms were well staged by James Whiting, Butler & Ullman, G. S. Sinclair & Son, F. D. Keyes & Son, and Gallivan Bros. The carnation winners were substantially the same exhibitors.

Special exhibits were made of roses by H. M. Robinson & Co., Boston, F. P. & P. M. Pierson, Scarborough, N. Y., and A. N. Pierson, Cromwell, Conn., also carnations by S. J. Goddard. Other exhibitors were D. O. MacGregor, gard. for H. R. Lyman estate, Geo. Strugnell, gard. for C. E. Mackintosh estate, Carl Hammond, gard. at State Hospital and Alex. Parks.

NEW BEDFORD SHOW.

The sixth annual Chrysanthemum Show of the New Bedford Horticultural Society, Nov. 2-3, was a marked advance over previous exhibits. The local florists came forward much more liberally than ever before and their groups of chrysanthemums interspersed with foliage plants helped amazingly in breaking up the set effect produced by row upon row of cut blooms. Peter Murray, H. A. Jahn, R. H. Woodhouse and James Garthly each had very attractive tables of this sort, the latter producing the finest effect with the smallest number of plants and flowers, due, no doubt to the touch of the female hand, his wife taking charge of the arrangement. The display of chrysanthemums and foliage plants occupying 40 sq. feet of space was closely contested by the old-time rivals, Mr. Roy and Mr. Griffin, as was the class for 18 blooms, Mr. Roy winning by a narrow margin.

Personally, I think the judging was excellent in all classes provided for in the schedule, but where displays were not classified some of the awards were lamentable. Following the custom so prevalent among the minor horticultural societies, awards of merit were distributed indiscriminately to exhibits where no award whatsoever was deserved. Simply because no provision is made for certain displays is no excuse for minimizing the value of this form of award.

The displays in competition were works of artistic arrangement and the cut flowers, if one likes monstrosities, were grand. A vase of six blooms of H. E. Converse was simply great, and a vase of pink of medium-sized flowers attracted much attention.

The finest blooms shown were the following, ranking in the order named: Mrs. A. S. Watt, Melton, Master Rese, Earl Kitchener, Onunda, Lady Hopetoun, Mrs. Boggs, Mrs. G. Drabble, Daily Mail and Mrs. Mitchell. Among the amateurs Louis Macy had a very attractive display and F. G. Tripp put up an unusual display for this season of the year consisting of upwards of 100 dahlia blooms in prime condition. W. F. TURNER.

THE TARRYTOWN SHOW.

Exhibitors from big estates up the Hudson, including many well-known New Yorkers, contributed to make the eighteenth annual flower show of the Tarrytown Horticultural Society, which opened in the Music Hall, Tarrytown, on Nov. 1, one of the best that has ever been given. The Tarrytown shows are not large as flower shows go, but the promoters boast that they are second to none in the country in quality. The competitors are private estates, the few commercial growers who exhibit not competing. Mrs. Finley J. Shepard, Sam'l Untermyer, John D. Rockefeller, Jr., Wm. Rockefeller, F. A. Vanderlip, David L. Luke, P. M. Warburg, W. B. Thompson, F. C. Luckenbacher and other names widely known in the world of commerce and finance appeared on the list of prize winners, through the cultural skill of their respective gardeners. As usual, F. R. Pierson made a superb display of his products. A splendid table of hot-house fruit from Mrs. F. E. Lewis, of Ridgefield, Conn., was a potent attraction. There were dinner table decorations on the closing

days but the results of the rivalry have not been communicated to us yet. Most of the prizes offered were specially contributed.

SEWICKLEY HORTICULTURAL SOCIETY.

The Chrysanthemum Show of The Sewickley, Pa., Horticultural Society was held on Nov. 2-4 and was a great success in every way. The attendance of the public taxed the hall to the utmost for the three days and a larger hall would have shown off the exhibits to better advantage. The following are some of the awards: 18 blooms in 6 varieties won by Mrs. E. M. Horne, gard. Manus Curran, with good flowers of Mrs. R. C. Pulling, Odessa, Wm. Turner, Elberon, Meudon and Daily Mail. H. L. Mason, gard. J. Murphy, was 2nd and H. J. Heinz, gard. A. A. Leach, 3rd. Nine blooms in 3 varieties, 1st, Dixmont Hospital, gard. Carl Becherer; 3rd, W. P. Snyder, gard. Wm. Thomson.

Twelve blooms, 12 varieties, 1st, Mrs. E. M. Horne, 2nd, H. J. Heinz, 3rd, R. B. Mellon. In the color classes for three blooms the winners were R. B. Mellon and Miss W. T. Thaw, gard. John Jones, with Mrs. R. C. Pulling, Wm. Turner, Nerissa and W. Meise in their respective colors. R. H. Boggs, gard. R. Taylor won on pompons and singles. For any variety not in commerce Mrs. E. M. Horne won out with a seedling from Dorothy Davis and was also 1st in several other important classes. On display of cut blooms Dixmont Hospital was 1st and the McCallum Co. won in the class for 50 yellows with fine Mrs. Morgans and in white carnations with White Enchantress. Winners in the rose classes were H. C. Frick, gard. Jas. Fraser, Watson Estate, gard. Herman Rapp and R. H. Boggs.

On group of 100 sq. ft. foliage and flowering plants Mrs. C. E. Horne was winner, also on specimen chrysanthemum and group of bush plants. Other leading winners in various plant classes were R. H. Boggs, Mrs. Wm. Thaw, C. D. Armstrong, gard. T. E. Tyler, Mrs. W. P. Snyder, gard. Wm. Thomson, H. J. Heinz, C. D. Armstrong and Farmhill Estate. On vegetables Mrs. J. D. Lyon, gard. John Barnet, Mrs. J. F. Byers, gard. A. E. Bousey, Mrs. J. B. Oliver, gard. John Reig.

The table decorations on Saturday brought out five competitors, and the winners were Mrs. E. M. Horne, gard. M. Curran, 1st, R. H. Boggs, 2nd and Mrs. J. D. Lyon, 3rd. Chas. H. Totty of Madison sent an exhibit of chrysanthemums including White Doty, also Wm. H. Waite a fine gold and reddish flower, Louis Pockett, incurved white, and Golden Champion an immense flower on the Rose Pockett color. E. D. Smith & Co. sent some novelties including Miss Wright, Calumet and Smith's Sensation. The exhibit of The Pittsburgh Cut Flower Co. was a great attraction, outstanding being five vases of roses and collection of single and pompon chrysanthemums. The Valley Greenhouses exhibited snapdragon Helen Walker and Wm. Allen of Homewood Cemetery had on view a brownish sport of Lilian Doty. Farmhill Estate displayed stove and flowering plants. The judges were Jas. Wiseman, Fred Burki and Alex Davidson.

GLEN COVE SHOW.

The twelfth annual Chrysanthemum Show of the Nassau Co. Horticultural Society, which was held in Glen Cove, N. Y., on Nov. 2 and 3, was one of the finest this society has ever held. The cut blooms were of the very largest size and finest finish, while the various specimen plants and plant groups showed an acme of perfection that reflected the greatest credit on the skill of their growers. The roses, carnations and vegetables were of an equally high quality and competition in practically every class was of the keenest kind. The various exhibits were artistically arranged under the capable direction of Show Manager James Gladstone, ably assisted by James Holloway and Harry Goodband.

There were two groups of plants most tastefully arranged, one a group of chrysanthemum plants by Robert Jones, gardener for Percy Chubb, the other a group of flowering and foliage plants by Robert Marshall, gardener for J. R. Delamar. The four classes for double and single chrysanthemum bush and standard were each won by Robert Marshall with James McCarthy gard. for W. E. Kimball and Harry Gaut gard. for Herbert S. Pratt 2nd respectively. Other winners in the plant classes were Robert Marshall, Geo. Ferguson, gard. for Payne Whitney, and Robert Jones. In the cut flower classes Robert Jones was almost invulnerable. He was 1st winner in seventeen class and won 2nd in six. His vase of twelve flowers arranged for effect was probably the finest in the show, immense blooms of Mary Mason, perfectly finished and beautifully arranged with autumn foliage. His Wm. Turner was the largest flower in the show. Several 1st prizes went to Henry Gaut, George Ferguson and Jos. Robinson, gard. for W. R. Coe. Geo. Ferguson, Robert Marshall, James McCarthy, Henry Gaut, John Everitt and Thos. Flynn, gard. for J. H. Ottley, were among the winners of 2nd honors. In the vegetable classes Robt. Jones, Wm. Norman, Frank Petroccia and Jos. Robinson were winners.

There were eleven entrants in the class for the best table decoration and the ladies who judged this class had a difficult task to select a winner, as all were very beautifully executed. They finally decided to award the first prize to George Ford, assistant gardener for John T. Pratt. 2nd to George Ferguson, 3rd to William Noonan. The rest of the exhibition was judged by Walter Angus, Ewen McKenzie and Howard Nichols. A vase of double flowering cosmos exhibited by Harry Goodband attracted favorable attention and was awarded a certificate of merit. Robert Marshall received a cultural certificate for a specimen chrysanthemum plant.

JAS. MCCARTHY, Cor. Sec.

Redwood City, Cal.—W. E. Eglington won the glass and silver vase offered by the Aphine Manufacturing Co. for the best table of orchids covering sixty square feet, arranged for effect, at Forester's Hall, Redwood City, at the Fall Flower Show of the Menlo Park Horticultural Society, held on Oct. 27, 28 and 29.

THE PHILADELPHIA FLOWER SHOW

The Annual Fall Exhibition of the Pennsylvania Horticultural Society took place this week lasting four days. Both in quantity and quality of exhibits it was better than last year's show and reflected credit on the exhibitors and the management. The main attraction of course was the chrysanthemum and rarely have we seen finer flowers, especially in the cut bloom section. The pot plants were good also—many of them remarkably fine—although we cannot say that on the whole they were quite up to what has often been seen here. In the hardy chrysanthemum classes, there was an especially fine showing. These are yearly increasing in popularity and the annual exhibitions are largely responsible in educating the public taste to their great value.

Next in importance to the chrysanthemum came the orchids. There were three splendid displays of these, the most spectacular being the Widener decoration on the stairway landing—staged for effect—and it certainly was effective. The mirrors, and the fountain in the center of the picture, gave it the finishing touch that made the visitors go into ecstasies of admiration. Nothing finer than this has ever been done here and we all bow to William Kleinheinz for this masterpiece. From a different standpoint, Louis Burk deserve equal credit. He put up an educative collection of orchids consisting of over eighty varieties—the rarest and choicest the world affords, beautifully staged and correctly and legibly named so that every passerby could instantly "read, learn and inwardly digest." A very good showing of orchids was also made in the Wanamaker display of foliage and flowering plants. Mr. Dodds in this connection was particularly proud of one fine specimen of *Laelia*—the *Basil Enid* × *Mantini*—one of Stuart Low's new seedlings.

In foliage plants and ferns Wm. Robertson and Thomas Long carried off the premier honors. John Hobson's big eight-foot crotons occupied the center of the upper hall and well deserved this prominent position. The croton is Hobson's Hobby and we have still to see the man who can beat him at it.

In the commercial exhibits there were some fine displays, especially the stage front of Dreer's ferns, palms and foliage plants, and Michell's rotunda display of hardy chrysanthemums and other seasonable features. Thomas Meehan & Sons put up a nice exhibit along the same lines as did also the Strafford Flower Farms and John Kuhn. The Robert Craig Co., made a fine showing of their croton culture in commercial sizes. Adolf Muller exhibited an in-

teresting collection of trained box-
roosters, chickens, peacocks and so forth. We did not see any of them named John L. Sullivan, Lily Langtry or Jim Corbett so there is no suggestion intended here as a stimulus to the boxing game; but just a hint to the possibilities in the Italian style of landscape adornment. But probably the most interesting of all the commercial exhibits was the Burpee display of their new strain of large-flowering gladioli, grown from seed sown but five months ago. They showed not only great size of flower but splendid form and substance and a wide range of most magnificent colors. George Kerr, Burpee's superintendent who has had everything to do with this wonderful development was kept busy telling the story of the origin, the crossing and the selecting which has finally attained this wonderful result. Just think of it; gladioli equal to the finest we know—from seed the same season as sown. We used to think of them as a three-year proposition—now with this strain we get as good results in five months or less.

And, speaking of novelties, we must not forget to mention the new strain of winter-flowering begonias, shown by William Kleinheinz. The flowers are three times the size of *Lorraine*—graceful and open in habit and with quite a range in color, one being a beautiful brilliant crimson. There is also a double form in red which is very fine.

The center of the lower hall was occupied by an aquarium exhibit. Another of the same kind was shown in the rotunda. Not being gifted with the usual reportorial brilliancy we confess being unable to tell a fish story—so we will simply pass this part of the show over by saying that it seemed to please the multitude. But how such exhibits can be conducive to the advancement of horticulture, for which the Pennsylvania Horticultural Society was founded we leave for wiser heads than ours to expound. There was also a ginger ale exhibit. (That pleased the Ginger Jar) so you see we are getting along. By and by we may have trained bears and talking pigs and Annette Kellerman in her diving acts. (Isn't she the Water Lily?) Hosea Waterer made a very nice display of high class bulbs and sundries. The Lord and Burnham Co. were in it. The King Construction Co. were there. The Davey Tree Doctors showed up. So taking it all in all it was a pretty good show.

One of the greatest features of the show was the surprise party the outside exhibitors gave the local boys on Wednesday morning. Some wonderful exhibits came along. Chrysanthemums, roses and carnations—for the second day's prizes. One of the bright particular stars was William Duckham with flowers of such perfection in varieties like *Turner*, *Nerissa*, *Rigby*, *Hopetown*, *Converse*, *Pulling*, etc., that the local experts almost had a fit

when they saw what they were up against. Charles H. Totty also showed up strong. Among the most notable in the latter's exhibit was a collection of new anemone-flowered seedlings raised by Paul Schaefer. These were very fine indeed and so remarkable in size, form and color that they are bound to be heard from in future. Wallace R. Pierson was on hand with an exhibit of the new yellow rose *Mme. Martinetto*, a 1916 *Pernet-Ducher*, which seems full of promise, and a new dark red carnation. The Cottage Gardens Co. made a beautiful exhibit of their new pink carnation *Cottage Maid*. Among the out-of-town visitors to the show we had the pleasure of greeting W. A. Manda of South Orange, N. J., Earle Mann of Richmond, Va., E. Allan Pierce, of Waltham, Mass., L. J. Reuter, of Westerly, R. I., W. R. Pierson, of Cromwell, Conn., Paul Dailedouze of Flatbush, N. Y., Charles H. Totty and Wm. Duckham of Madison, N. J. and many others of high renown.

Postscript: Charles L. Seybold, supt. of Parks Wilkesbarre, sent down a most interesting collection of hardy cyclamens, including a number of new and fine ones never seen here before. We hardly expected an up-state-burg to make the metropolis sit up and take notice like that. Also Elmer Smith came down from Michigan and showed us some new things in his mild but effective way, and that makes us say "quit, or else you'll be saying the postscript is getting lady-like—the most interesting part of the letter." We could make this story shorter if we had the time to go over it again. Excuse the length.

GEORGE C. WATSON.

THE BOSTON SHOW.

In addition to the main list of prizes awarded at the Autumn exhibition of the Massachusetts Horticultural Society, which we published last week, the following awards were made on the last days of the exhibition:

Chrysanthemums.—Vase of ten blooms on long stems, pink: 1st, Mrs. Lester Leland; 2d, R. E. Traiser. Ten blooms, red: 1st, Mrs. Lester Leland. Ten blooms, white: 1st, James Nicol; 2d, R. E. Traiser. Ten blooms, yellow: 1st, Mrs. Lester Leland; 2d, R. E. Traiser. Most artistic vase of chrysanthemums, with any foliage: 1st, W. W. Edgar, with Robert Halliday; 2d, W. W. Edgar, with Chieftain. Carnations—Six vases, fifty blooms each: 1st, Strout's; 2d, A. A. Pembroke. One hundred blooms, mixed varieties: 1st, J. W. Minott; 2d, A. A. Pembroke. Twenty-five blooms (for private gardeners only): 1st, W. H. Wellington; 2d, Mrs. Alice Slas.

Gratuities. Kameyama & Serada, group of flowering and foliage plants; Mrs. C. G. Weld, display of winter-flowering begonias; C. H. Totty, collection of chrysanthemums; Blue Hill Nurseries, seedling evergreens.

Silver medal.—Mrs. C. G. Weld, display of winter-flowering begonias. First class certificate of merit: A. W. Preston, *Cattleya Folia alba*. Honorable Mention: Mrs. C. G. Weld, *Begonia Apricot*; Charles E. Holbrook, seedling rose, *Christy Miller*; N. Richmond; C. H. Totty, chrysanthemum, *W. H. Waite*; A. A. Pembroke, carnation, sport of *Behara*; Strout's seedling carnation, No. 9; Blue Hill Nurseries, seedling evergreens.

CHRYSANTHEMUM SOCIETY OF AMERICA

The annual meeting of this society was held this week in Philadelphia in connection with the exhibition of the Pennsylvania Horticultural Society. The address of the president and reports of other officials follow:

Annual Address of President William Kleinheinz

Gentlemen and Fellow Members of the Chrysanthemum Society of America:

Once more we are assembled to honor the Queen of the Autumn, and to consider means and ways to increase the general interest in cultivation, and to improve the high standard of the Chrysanthemum. As your President, it gives me pleasure to welcome you at this convention in the City of Philadelphia, and I hope that you will not regret that you have selected Philadelphia for this meeting.

The exhibits at this meeting speak for themselves. The large-flowering varieties seem to be at their highest, and the raisers of new varieties have to be wide-awake to keep in line with the present sorts. It seems almost im-

possible to improve on the existing varieties, but, our hybridizers are never idle and keep on improving with astonishing results. Not only the large flowering types have the attention of our scientific breeders, but the pompons, singles and decoratives have also been taken care of. Great improvements have been made during the past ten years.

Again I must make some remarks about the membership of this society. I have referred to this at the past two meetings, and have pointed out what good the Chrysanthemum Society of America does to the chrysanthemum growers, but the number of new members is mighty small. I again call on every one interested in chrysanthemums to give us their support, and join our society. The dues per year are only two dollars, and the members get well rewarded by the work this society does. I hope my successor as president will have the pleasure to see the membership passing the five hundred mark.

Since our last meeting, one of our most successful hybridizers and introducers of new chrysanthemums has passed away, William Wells, of Mersham, Surrey, England. His products are known over the whole world, and

for many of our best varieties we have to thank Mr. Wells.

To the trade press, I wish to express my thanks for the many courtesies extended to the officers of the society during the past year. I also feel it my duty to thank all the donors of handsome prizes, enabling us to work out such a fine schedule for competition. To the various committees who examine seedlings and sports, I must express the thanks of the society for their prompt and correct work.

To the officers and members, I extend my thanks and appreciation for their support during my three terms as your president. Our society must prosper while our members continue to support and back up our officers. I regret very much that I am not in a position today to announce a great financial prosperity during my terms, I assure you that if it would be within my power this society would be the strongest of all in membership and financial standing. I close with best wishes to my successor, may he be able to accomplish and finish the work started and carried on by the officers in the past for the good of this society.

Secretary Chas. W. Johnson's Report

Our Society continues to make progress and though we do not get the increased membership we should, the work of the Society along the lines of improving the standard and popularizing the Chrysanthemum is being recognized more each year. Your Secretary notes this particularly by the increased correspondence that comes to him throughout the year in comparison to the first years of his work. The interest in the new va-

NEW CARNATION COTTAGE MAID

A Sport of Mrs. C. W. Ward

A splendid new carnation with the same habit of growth, quality of flower and keeping and shipping qualities as its parent.

Winner of first prize in its class at Cleveland, fall of 1915 and winner of the prize for keeping qualities after being shipped from New York.

Winner of first prize in its class at the St. Louis Carnation Show 1916, and Sweepstakes as the best one hundred vase in the Show. These carnations were shipped from New York in warm weather and were in the box nearly forty-eight hours.

Winner of first prize at the Grand Central Palace Show for two years and other prizes and certificates too numerous to mention.

ieties continues and the work of the examining committees is being greatly appreciated, and a seedling that has the endorsement of the committees is recognized by the commercial growers as being worthy of a thorough trial.

The reports of the examining committees were sent to the trade papers each week as they were received and a final summary of the season's work was published. The trade press very generously printed these and other notices sent to them from time to time for which we owe to them our vote of thanks.

A ticket of admission to the National Flower Show held in Philadelphia, April, 1916, was mailed to all members in good standing on the secretary's books.

You will notice a change in the class for the C. S. A. silver cup. Our president kindly offers a silver cup for a class similar to the C. S. A. class of other years, thus making the change necessary. Class B is arranged according to the suggestions of the committee appointed at the last annual meeting.

Your secretary appreciates the kindness of the following firms and individuals for offering the special prizes at this exhibition:

Wm. K. Harris, Henry A. Preer, Hosea Waterer, Robert Craig and Henry F. Michell, Philadelphia; Hitchings and Co. and Lord & Burnham Co., New York; Chas. H. Totty, Madison, N. J.; E. G. Hill Co., Richmond, Ind.; Elmer D. Smith & Co., Adrian, Mich.; President Wm. Klendenz, Ogontz, Pa.; Philip J. Foley, Chicago, Ill.; Wells & Co., Mersham, Surrey, England; H. E. Converse, Marion, Mass., and National Association of Gardeners.

Owing to the intense heat during the past summer the growing season this year was a hard one on the plants and Mr. Totty reports that the growers in the eastern states are having a great deal of trouble with a disease which seriously affects the growth of the plants. It would be a good thing if any member having this or any other trouble with the plants would give us the benefit of his experience so that it may be included in the annual report.

The routine work of the secretary's office, consisting of sending out the statements to the members, recording the varieties disseminated, getting out the report of the fourteenth annual meeting and the solicitation of the special premiums was attended to in due season.

The secretary wishes to acknowledge the kindness of Elmer D. Smith in furnishing him with a complete list of varieties disseminated in 1915

Obituary

George Cartwright.

George Cartwright, secretary and treasurer of the Boston Flower Exchange and well known in the cut flower trade of Boston for almost half a century, died at his home in Roxbury, Mass., on Thursday, Nov. 2, at the age of 71 years. Mr. Cartwright was born in England, coming to this country with his parents at the age of 12 and settling in Wellesley, where his father, James Cartwright, carried on a florist business. As a young man he

GEORGE CARTWRIGHT.

started in business for himself in Dedham, Mass., making a specialty of Niphotos roses. Next year would have been his 25th anniversary in office with the Flower Exchange, where he also at one time filled the office of vice-president. He had been in failing health for a year or more, but was at his post in the flower market until two days before his death.

About 38 years ago he married Miss Anna Seitz, of Roxbury, who survives, with a daughter, Mrs. Emma Taggart, of this city, and two sons, Edward S. Cartwright, of California, and F. J. Cartwright, of New York; also one sister, Mrs. Annie S. Morgan, of Boston, and four brothers.

Mr. Cartwright was a man of rare qualities of graciousness, unselfishness and fidelity. He was moderate in speech always, never censorious, harsh with none. Universally loved for his unswerving integrity and sympathetic heart, his death brought sincere grief to a wide circle of friends. His funeral, on Sunday, was attended

by sixty or seventy of his associates in the flower trade. The floral tributes were many and none finer have ever been seen in Boston. The testimonial from the Flower Exchange was a massive wreath of cattleyas, Hadley roses and lily of the valley and palm leaves about five feet across, most creditable to the good taste of Sam'l Beck, who was the designer.

Wm. F. Molloy.

The Boston flower trade lost one of its sterling men in the passing away of William F. Molloy on November 7, at the Morse Hospital in Natick, Mass., after a painful illness lasting about two months. Willie Molloy, as he was familiarly known, has been the Boston representative of the Budlong Company for many years. He was born in Wellesley 57 years ago. His father was long in the employ of Edmund M. Wood, Waban Conservatories, and William started as a boy with Mr. Wood, later acting as his salesman in Boston, his sister who afterwards became the wife of Robert E. Berry being bookkeeper at the greenhouses. Leaving Mr. Wood's employ he was a member of the wholesale flower firm of N. F. McCarthy & Co. for several years, but later sold his interest to Mr. McCarthy and returned to his old job for a time, finally taking the position of sales agent for Budlong. He never married. The cause of his death was internal malignant tumors.

No more honest, straight forward and likeable man than William F. Molloy has ever been identified with the florist trade of Boston. His friends included every one in the business with whom he came in contact. In the words of his old partner, N. F. McCarthy, "he was truly one of God's noblemen." The funeral on Thursday, Nov. 9, was largely attended by members of the trade.

Nellie R. Thoires.

Daughter of James M. Thoires, the leading retail florist of Camden, N. J., died on Nov. 4. From almost childhood she had been delicate, and as early as fifteen almost succumbed to rheumatism. Years later she had other attacks of the same kind (nearly taking her off), complicated with heart trouble. Little Nell was the dearest, sweetest, most courageous little spirit! She was keenly intellectual and made all who came in contact with her bow to her wit, wisdom and common sense. No one knew her but to love her. Dear little Nell. Good bye. We shall all miss you.

G. C. W.

William Good.

William Good, well-known for thirty years or more in the retail florist trade of Boston died at the City Hospital in Boston on Wednesday, Nov. 8, as the result of being struck by an automobile the previous night while

attempting to cross Commonwealth avenue, which fractured his skull. Mr. Good, who was 55 years of age, had been employed by several of the leading flower stores of Boston as salesman and designer and at the time of death was with Sidney Hoffman. He has a brother in New York, Frank Good, also in the florist business.

Thomas J. Gannon.

Thomas J. Gannon, one of the victims of the South Boston trolley car accident on Nov. 7, was a native of Ogdensburg, N. Y. Up to early last October he was employed as a gardener by Joseph S. Williams of Jamaica Plain. Nothing is known of his present address by his late employer, Mr. Williams. When he left it was supposed

WILLIAM F. MOLLOY.

he would return to Ogdensburg as he had stated such were his intentions. Gannon was unmarried and about 32 years of age.

Michael Donovan.

Another of Newport's veteran gardeners, Michael Donovan, died on Nov. 1, in his 75th year. He had lived in Newport the greater part of his life, and for many years was gardener and caretaker of the estate of the late Thomas Winans, and afterward for his son, Ross Winans. Mr. Donovan is survived by a brother and by several nephews and nieces.

John Skelton Brown.

John Skelton Brown, aged 83, for years engaged in the nursery business in Rochester, N. Y., died on Thursday, Oct. 19, at his home in Browncroft, just outside of Rochester. Mr. Brown was born in Boston, Mass. He leaves one son, one daughter, four grand-

Fall Spraying "SCALECIDE" Does the Work Controls Leaf Curl Cleans up the Trees

Don't put off the dormant spray until the spring rush. The weather may be bad or the ground too soft. Spray this fall and make sure of controlling peach leaf curl, San Jose scale, pear psylla, apple canker, collar rot, etc. You can save trees now that would die before spring. Use "Scalecide." Better and cheaper than lime sulphur—cuts the labor

cost. Never injures trees, hands, face or pump. Cost of spray materials will advance before spring. Order now and save money. Write today for free booklet, "The Whys and Wherefores of Fall Spraying." B. G. PRATT CO., Manufacturing Chemists. Department 12. 50 Church Street, New York City.

children. Interment was on Sunday, October 21, at Rochester.

Frank Mitseh.

A collision between a street car and an automobile in which he was riding caused the death on last Saturday night, of Frank Mitseh who is well known to many of the Chicago florists as a builder of green houses. He erected among others the Frank Oechslin houses. He lived at 1934 Estes Ave., Evanston, Ill.

Charles R. Panter

Charles R. Panter, well known as a florist and secretary of the New Orleans Horticultural Society, died at his home in New Orleans on Oct. 25. He was a native of Bedford, Eng., having come to this country over thirty years ago. His age was 54 years.

Frank Sobicek.

Frank Sobicek, employed by a florist in Blue Point, N. Y., was found dead in the cellar of his home on Nov. 2 by his wife under circumstances which District Attorney Ralph Greene and Coroner Edwin S. Moore believe indicate feud murder.

TEXAS STATE FLOWER SHOW.

November 15-16-17.

As the dates for the Third Annual Flower Show to be conducted by the State Florists' Association draw near, interest in the event increases. Numbers of the florists from over the state have reported that they will be present with exhibits, and several large florists out of the state will be there with large exhibits. The premium list has been completed and mailed out, and it covers a wide range of subjects and entries in all classes, and competition for the prizes is expected to be sharp.

Those out of the state who have re-

served space for exhibits, who have not been previously reported are: Joy Floral Company, Nashville, Tenn.; Denver Wholesale Florists' Company, Denver, Col.; Stuppy Floral Company, St. Joseph, Mo.; Poehlmann Bros., Chicago, Ill.; Furrow & Co., Guthrie, Okla.; Gullett & Sons, Lincoln, Ill.; H. S. Ely & Company, Neosho, Mo.

The following firms have made donations of the items mentioned, for the benefit of the Association in conducting the show. These items to be used as premiums, and will be placed on exhibition during the flower show:

E. C. Amling Company, Chicago, flowers; Ralph M. Ward & Co., New York, case of Liliun Giganteum bulbs; Foley Greenhouses Manufacturing Company, Chicago, 12 sash; Sefton Manufacturing Company, Chicago, flower boxes; Denver Wholesale Florists' Company, Denver, Col., flowers; Vaughan's Seed Store, Chicago, 12 baskets; Baker Bros., Fort Worth, Tex., \$12.00 worth of shrubs; H. Kaden, Gainesville, Texas, 12 two year old roses; Texas Nursery Company, Sherman, Texas, 25 new roses valued at \$10.00. A cash donation has been made by Kroeschell Bros. Company, Chicago.

There is yet room for several more exhibits and florists in every section of the state are urged to send their flowers and plants for exhibition even if they can not attend in person. All flowers or plants that may be sent will receive the closest attention. Florists out of the state are also invited to send their flowers and plants, and everyone far and near is invited to attend the show. Any information will be gladly given by Henry Greve, Dallas, Texas, chairman of the Flower Show Committee.

Ample publicity is being given this show in Dallas and surrounding territory and a very large attendance is expected.

Clover seed—France, \$9,534; Canada, 4,747.

Grass seed—Denmark, \$15,437; England, \$316; Scotland, \$292.

Other seeds—Netherlands, \$493; England, \$6,022; Trinidad, \$6; Argentine, \$42; China, \$43; France, \$748; Hongkong, \$157.

Nitrate of soda—Chille, \$164,565.

MASSACHUSETTS AGRICULTURAL COLLEGE.

Last week the senior class planted the violet house. The variety planted is Princess of Wales.

The junior classes are receiving practical work in potting cuttings and bulbs for forcing. The reglazing of a part of one of the houses has already been finished by the class.

The special class at the Northampton Show open to students of M. A. C. resulted in a very close competition. There were 14 entries, and the judges agreed it was the most difficult class of the whole show to judge. 1st prize was won by H. G. Clancy, of Natick, with a small basket of Peter Pan chrysanthemums, ribbon to match, and Asparagus sprengeri. 2nd prize was won by H. S. Saidel, of Worcester, for a basket of Golden Queen chrysanthemums adorned with yellow chiffon. Another particularly good basket was one of Russell roses.

The Annual Flower Show of the floricultural department will take place this week (Nov. 11, 12 and 13). In addition to the local display, several of the florists of Boston—including H. M. Robinson & Co., Penn the Florist and Thomas F. Galvin have volunteered to send exhibits. There are 80 odd classes, 20 of which are open to the florists of the Connecticut Valley. The department extends a cordial invitation to all the florists of the state to visit the show. Those who are fortunate enough to possess an automobile will find a trip to Amherst to be full of surprises, wonderful scenery and much pleasure. On Monday evening there will be a joint business meeting of the Holyoke & Northampton Club and the M. A. C. Club, followed by a lively social with a good time for all. Prof. Nehrling, Mr. Whiting and Mr. Wildon are hard at work on the details of the show, which include the construction of a pergola, water feature and floral art frames.

LILIUM CANDIDUM.

(See Cover Illustration)

The Annunciation or Madonna Lily has for centuries been one of the most honored occupants of European gardens and in this country also it has received its full mead of attention. Although one of the easiest of all lilies to grow there are some essential points in its culture which must be carefully observed if one is to have continued success. This lily delights in an open, sunny, fresh air situation. It needs no specially prepared soil and is perfectly at home in ordinary garden soil but it must have thorough drainage. In England it is seen at its best when planted by the side of cottage or garden walks among an edge-

ing of rocks or other material conducive to good drainage.

Our illustration shows this beautiful lily planted on a gravelly hillside at the Mt. Desert Nursery, Bar Harbor, where there is a small amount of loamy soil and no opportunity for water to stay around the bulbs at any season.

NEWS ITEMS FROM EVERYWHERE

CHICAGO.

A. E. Hunt, well-known grower of Evanston, is opening a retail store in that suburban town.

Miss L. A. Tonner is in Baconton, Ga., where she and her two sisters each have pecan groves.

Paul Manzie, of Wilmette, had the misfortune to lose a part of his place by fire on Oct. 30. Loss \$800.

F. W. Matthiesson, of LaSalle, Ill., has purchased valuable lake property at Oconomowoc, Wis. Simmons & Co., of Chicago, landscape architects, will have charge of the grounds.

A dense fog last Sunday morning caused several accidents. Among those who lost their lives were two north shore gardeners, John Andrews and Wm. Swanson, of Glenview.

In order to stimulate a more lively public interest in the carrying out of the plan for the City Beautiful the illustrated lecture has been named "The Tale of One City," a bright idea and one that bids fair to succeed.

The Chicago Florists' Club will hold its regular meeting this month on Thursday, Nov. 16, instead of Nov. 9, on account of the State Florists' Association. The nomination of officers will take place at this meeting.

The new departure in giving a flower show in which several new features are combined, is calling forth a diversity of opinions. On the whole it is regarded with favor. Attendance by invitation, the ball room of a large hotel, and a distinct aim at the artistic arrangement rather than the perfection of the individual flower or plant, puts this show in a new class.

Paul Klingsporn, manager of the Chicago Flower Growers' Association, is one of many to voice the sentiment of a better education for the flower buying public, so they will know the difference between the fresh flowers that are worth the money, and the kind of stock sold at the department and ten cent stores. But the knowledge might be used to advantage when buying in the flower stores also!

The committee composed of J. Wietor, George Asums and Thos. Head met at Wietor Bros.' wholesale house, Nov. 4, and passed upon the pompon Jas. Hamilton Lewis sent by Peter Reinberg. It is a very pretty yellow with narrow rim of pink and the flower is full and round. E. G. Hill sent in a large pure white chrysanthemum called Snowbank, but it was so injured in transit as to be worthless.

The work of educating the public in the use of flowers is being helped along by some of the women's clubs, which have programs devoted to floral topics. The "Ridge" is a street upon which are located many large greenhouse establishments, and the Ridge Woman's Club has a floricultural department which had Miss Lena McCauley for its speaker on Wednesday last, subject, "Historic Gardens." Miss McCauley is secretary of the Horticultural Society of Chicago.

NEW YORK.

H. W. Thomas, of the D. C. Arnold Co., has returned to his post with health much improved.

Ladies' Night at the New York Florists' Club Monday evening, November 13. See notice elsewhere.

As we go to press the American Institute Chrysanthemum Show is near its closing and the exhibition of the Horticultural Society of New York is opening.

Mercantile properties in the Fifth avenue zone, above Forty-second street, valued at \$1,000,000, have been transferred to the Oceanic Investing Company of this city. One is the six-story building at Fifth avenue and Forty-sixth street, which is under a twenty one year lease to Thomas F. Galvin Co., of Boston and New York.

The management of the International Flower Show has offered a prize of \$100 for the best poster depicting the attractions offered at the show, to be held March 15 to 22, 1917, at the Grand Central Palace. Mrs. Edna Woolman Chase, editor of "Vogue"; Theodore A. Havemeyer, of the Horticultural Society of New York; John Young, of the New York Florists' Club, and R. G. Hollaman, president of the International Exposition Company, will act as judges.

WASHINGTON, D. C.

The flower shop in the Arcade building has been purchased by C. E. Jenkins, who has for the past two years been managing the business for C. E. Brooks.

Experiments with curcubita and waterlily diseases are being conducted in New York and Greenpoint, N. Y., by Frederick V. Rand, of the Bureau of Plant Industry.

Ben. Diedrich had a narrow escape from serious injury last week when he drove his automobile delivery wagon into a horse-drawn vehicle, running afoul of two large railroad ties which protruded from the sides of the latter. The automobile was badly damaged.

C. E. Brooks is now located in his new quarters at 1527 Fourteenth street, N. W., a store vastly superior to the former one. The icebox and wrapping counter are located in the center of the store, dividing the space so as to provide a workroom in the rear. Mr. Brooks is very well pleased.

ST. LOUIS.

Grimm & Gorly had the decorations at the Busch wedding. The flowers were very costly, including orchids, lily of the valley and Beauties.

Shaw's Garden has opened its annual chrysanthemum show to the public. An endless variety of the finest greets the visitor. The special sensation is the Wm. Turner, white, blooms measuring 12 inches. The show will continue all month.

PITTSBURGH.

Both the Ludwig Floral Co. and the E. C. Ludwig Co. had handsome floats in the parade for the Pittsburgh charter centennial.

Albert F. Vick of the Pittsburgh Cut Flower Co. has returned from Rochester, N. Y., where he was called owing to the serious illness of his father, Frederick W. Vick, the veteran florist. At the time of writing Mr. Vick is slightly improved.

DURING RECESS.

N. Y. & N. J. Plant Growers' Outing.

The second inspection outing of the N. Y. & N. J. Plant Growers took in the Long Island district. A. L. Miller was manager of the exercises, and that settles its quality. Among the places visited were W. H. Siebrecht, T. W. Langan, Philip Haas, Anton Schultheis, Louis Dupuy, J. M. Keller, Dreyer Bros., Knight & Struck, A. L. Miller, John Scott, Peter Wagner, Louis Schmutz, Jr., Chas. Koch, Louis Schmutz, Sr., and Alfred Zeller. Among the participants from New Jersey and New York City were J. H. Fiesser, Julius Roehrs, C. Madsen, H. C. Steinhoff, J. Austin Shaw, Chas. Schwake, R. J. Irwin, Chas. Loechner, H. Baumann, Jos. Baumann, Paul Fischer and John Burnie. The majority made speeches at the "symposium."

MAX SCHLING'S PHILOSOPHY.

An article entitled "What My Business Has Taught Me," by Max Schling, illustrated with photographs, appears in the November number of *System*, published by A. W. Shaw Co. of Chicago. The paper is in Mr. Schling's inimitable and forceful style. *System* which makes good claim to the title "The Magazine of Business," commends Mr. Schling's philosophy and says that "while his ideas are by no means new, somehow or other he gives them a new twist." Regarding values and profits, Mr. Schling says:

"Cheap stuff does not mean a poor quality of stock. Cheap stuff means a flower or plant of good stock at a cheap price; and if a florist buys cheap stock of the kind I think of, he will never take advantage to sell it otherwise than in accordance with the standard of honest business men—to sell it at fair profit, regardless of petty expenses like packing, care and such."

Concerning the relationship of a man to his business and his employees, Mr. Schling says:

"We have to do our work and oversee their work at the same time. We should have untiring ambition when we make up a bouquet or a wreath or a basket. We should not wrong ourselves by asking 'Isn't it pretty?' We must ask them: 'How do you like it?' We can listen to criticism and ask ourselves if this is warranted. We should try to improve our work from day to day, and when we make something, no matter how pretty we may think it is, we should ask ourselves. 'Is it well enough made. Can't we make something better?' And this spur to ourselves to do better will improve our knowledge and will certainly show in our work."

"Our business—does it belong to us or do we belong to it?"

"A business man who feels himself the proprietor and nothing else, loses his hold on his business sooner or

later. A business man is only proprietor or owner of his business in his own private life. The moment he steps into the business surroundings where his activity is necessary to keep the business in progress, where his mind is really the soul of the business, he is not less an employee than any of his other employees. He is there to see that the goods sold, are sold right. He must teach his salesmen, if they do not know it, how to do it right. He must instruct his buyers. He has to understand book-keeping and do bookkeeping. He has to be a gardener, a florist, a designer. It does not harm him if he knows how to sweep his own place and to deliver his own orders.

"A business man should be able to replace any of his workmen and

should in the average small business be able to match the knowledge of every one of his employees. What they all know together he has to combine in his own self, and his ambition should be to know it better than the others, so that when he gives an order he can look straight into the eyes of his employees and not blush over his incompetency."

He puts up a forcible argument on how to make friends and permanent customers through liberality, fairness and broad-gauge policies in serving the public and explains in detail the methods which he has found successful in the conduct of his own business.

We should gladly give room to Mr. Schling's article in full but our space is too limited. It will pay any florist to peruse it carefully.

"How Do You Like It?"

BOUVARDIA

The double pink and white variety, stems 18 to 24 inches long. Something exceptionally fine. The best stock \$6.00 per 100.

Flower Market Reports

The flower market is BOSTON "standing pat" at present in nearly every item.

Early in the week the carnation emerged temporarily from the monotony of inactivity which has fallen upon the market and stiffened up a little in price for a day or two. Other than that there has been no movement worth chronicling. Dullness pervades every department of the trade as usual at this particular juncture and this condition is further aggravated by the spell of warm weather which increases the blooming, but decreases the demand for flowers.

The Chicago market is CHICAGO a most discouraging proposition just now.

What began a week ago has continued day by day and not much light is ahead. The sudden dropping off of demand explains the situation in the minds of some and the great influx of chrysanthemums, by local growers and from California, which has forced the prices down to a marked degree, is the reason offered by others. Probably both causes contribute, for the demand is very light and confined almost exclusively to funeral work, and the supply is very great, with a large proportion of inferior quality. Carnations are meeting the same fate and fine stock will not move at any price. Shipping trade is lighter because every outside florist is just now supplying his trade with his own chrysanthemums which are naturally preferred to other kinds of stock in November. Roses are worked off to the street fakirs or go into the barrel as the wholesalers have opportunity, and the stocks today literally "blossom as the rose." Every wholesale counter is a flower show of itself and the proprietors and their assistants have plenty of time to discuss causes and effects.

There is very little NEW YORK to be said concerning the flower trade this

week other than that the huge avalanche of chrysanthemums continues unabated and the low ebb of business and values recorded last week shows no sign of turning. Cattleyas are moving somewhat better than of late. There seems to be an increasing demand for boxes of mixed orchid sprays which is interesting and should serve as a pointer for the future as the quantity of spray orchids commercially grown in this country is very small. Everything else is in the dumps, although quality is generally good on all varieties of market flowers. Even lily of the valley finds but small demand.

The doctor's report on the market here is that

the patient remains about the same—pretty low. Circulation sluggish; appetite poor; even the finest delicacies failing to excite eager interest. Very sad state of affairs indeed. This statement is mild compared to the short and sharp bucolic expressions used by the leading market magnates in de-

Sweet Peas

Rather early to talk about Sweet Peas, but we have them and choice stock they are—Pinks, Whites and Reds, the Spencer type.

scribing the situation. But having regard for the high literary tastes of the readers of HORTICULTURE the situation is described with moderation and decorum, as befits the refined atmosphere of the Quaker City. Hope to be able to send you a better story next week.

PITTSBURGH "Prices are away down out of sight," significantly said a representative of one of the downtown wholesale houses, when interviewed early in the week. As a matter of fact the market is overstocked with practically all varieties of cut blooms. Exceptionally fine cattleyas are coming in, as are also snapdragons. Roses are fair, both as to quality and quantity, and just about paralleling the calls. Carnations are again more plentiful, while chrysanthemums are none too many. Pompons are fine. There are practically no home grown lilies of the valley, all being utilized coming in from Chicago. Violets are fairly good in quality, but few in numbers.

Very warm weather ST. LOUIS has been with us all week, causing the market to be much overcrowded. On Saturday, by downtown stores had special sales on roses and chrysanthemums. Violet sales are light. The roses coming in are very fine. Some grand chrysanthemums are seen, but the medium-price blooms sell best. There is a fair demand for pompons. Greens are in demand and cleaning out well. Orchids have sold universally well. Before election trade is generally slow, but if everything goes right a revival all around is looked for. Thermometer over 70 at time of writing.

Conditions in the WASHINGTON local market remain slow, as they have been during the month of October, and retailers, wholesalers and growers are glad that election is over and people have returned to their homes here. It is now hoped that business will settle down to that level

expected of it when the social season should be at its height. Chrysanthemums continue to crowd all other stock from the market, and as the warm weather has brought in the late varieties in advance of their usual time there are so many of these flowers that the price has been forced down to little or nothing. Pompons are sold without count. Roses have been as good as could be desired and carnations have shown a marked improvement. There is more lily of the valley than there has been. The few sweet peas that come in meet ready sale. Good snapdragon is offered. There are few lilies, but the scarcity is not felt.

NEW YORK FLORISTS' CLUB.

Monday night, November 13, will be "Ladies' Night" at the Club headquarters in Grand Opera House Building. The House and Ladies' Night Committee assures us that it's not to be like any other Ladies' Night they have ever had. In addition to a choice entertainment to be given by professional talent there will be a happy care-free dance in the spacious ball room below the meeting room. The music will be none less than several pieces from the Grand Opera House Orchestra. The refreshments will be furnished by one of New York's celebrated caterers.

George Hildenbrand, chairman of the House Committee, and Joseph Manda, chairman of the Ladies' Night Committee, are making special arrangements for the entertainment of the ladies.

George T. Schuneman has promised an exhibit of sweet peas. Nomination of officers for 1917 will be made.

SITUATION WANTED by single man, 17 years' experience on private estates. No trifles answered. "G. D.," care HORTICULTURE, Boston.

Plant Propagation, Greenhouse and Nursery Practice

By M. G. KAINS

We have had many inquiries from time to time for a reliable and up-to-date book on plant propagation, but were always at a loss to find any publication that we could recommend. The subject has been dealt with in fragmentary manner only in books that have come to our notice. So it is well that this new work has been issued, especially as it is both comprehensive and practical, and it should meet with a ready sale among plantmen, nurserymen and gardeners. There are nineteen chapters covering in detail topics of germination and longevity of seeds, propagating by buds, layering, cuttings, grafting, etc., fruit tree stocks, clones, etc., and there are eight pages of condensed cultural instructions in tabulated form, covering annuals and perennials from seed, woody plants, evergreens, vines, bulbs and tubers, greenhouse and house plants, ferns, palms, water plants, orchids and cacti. The illustrations are numerous, comprising 213 figures and half-tone plates. There are 322 pages well bound and on heavy paper, teeming with helpful information. It is a book which no cultivator can afford to do without. It is worth many times its price. Copies can be supplied from the office of HORTICULTURE at publisher's price, \$1.50.

Horticulture Publishing Co.

Pittsburgh—Ernest S. King, repr. Gude Brothers Company, New York City.

**GIPSY MOTH APPARENTLY ELIM-
INATED FROM OHIO, NEW
JERSEY AND NEW
YORK.**

Colonies of gipsy moths, which some years ago in nursery stock or quarry products found their way to Bratenahl, a suburb of Cleveland, Ohio, to Rutherford, N. J., and to North Castle, N. Y., apparently have been exterminated by State officials and the U. S. Bureau of Entomology working in co-operation, according to the annual report of the Chief of the Bureau of Entomology just published. While the trees in the neighborhood of Bratenahl were sprayed again as a precautionary measure, no infestation has been found in this site during the year. Similarly in New Jersey no indication of the presence of the moth has been found.

In New York the entire park system of Rochester has been carefully examined for fear that moths may have gained a foothold from nursery stock shipped in during the last few years, but no infestation was found. In the colony which was located at North Castle a large amount of work has been done, but only 8 egg clusters were found during the year and all of these were outside the area which was sprayed last year. Work is being continued at this point in co-operation with the State of New York, and the entire area and a surrounding strip has been sprayed this year.

NEW CORPORATIONS.

Houston, Tex.—Southern Floral Co., capital stock, \$100,000. Incorporators, A. E. Kutschbach, August Bering, Sr., and Walter Retzer.

Spencer, Ind.—National Show Gardens, growers, capital stock, \$50,000. Incorporators, E. A. Barnes, H. L. Freking and John H. Smith.

**NON-KINK WOVEN HOSE**

In any length (one piece) with couplings, 14c. per foot. Unequaled at the price. Remnants, shorter than 50 feet, 10c. per foot, with couplings.

HOSE VALVE—70c.

All brass except the hand wheel. Has a removable leather disk which is easily replaced to keep water tight. Stuffing box prevents leaks at stem.

MASTICA

For Greenhouse
Glazing

USE IT NOW

F. O. PIERCE CO.
12W. BROADWAY
NEW YORK

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

The Florists Hall Association rate of insurance from Nov. 1st, 1916 to Nov. 1st, 1917 will be twenty cents per hundred square feet of single thick glass and eight cents per hundred square feet of double thick glass. For particulars address
JOHN G. ESLER, Sec., Saddle River, N. J.

This picture was taken right after a blizzard, and proves conclusively that our style of construction is positively ice-clearing.

This full iron frame, curved eave **JACOBS' GREENHOUSE**, was completely erected, including ventilation and heating system, by our own expert mechanics, for Mr. Chas. Bradley at Convent, New Jersey.

This greenhouse is 25 x 85 ft., and has a partition in the middle, making two distinct and separate compartments, with separate heating systems, so that different temperatures may be maintained in both sections.

NEW CARNATION COTTAGE MAID

A Sport of Mrs. C. W. Ward

A splendid new carnation with the same habit of growth, quality of flower and keeping and shipping qualities as its parent.

It is flesh-pink slightly darker than Enchantress.

Winner of first prize in its class at Cleveland, fall of 1915 and winner of the prize for keeping qualities after being shipped from New York.

Winner of first prize in its class at the St. Louis Carnation Show 1916, and Sweepstakes as the best one hundred vase in the Show. These carnations were shipped from New York in warm weather and were in the box nearly forty-eight hours.

Winner of first prize at the Grand Central Palace Show for two years and other prizes and certificates too numerous to mention.

Price for rooted cuttings

\$12.00 per 100; \$100.00 per 1000

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

"If vain our toil, we ought to blame the culture, not the soil."—*Pope*.

Care of Fuchsias

Shorten the tops back to firm ripe wood and place them where they will be near the glass. This will induce them to make strong cuttings for propagation. Plants which have had a good rest can now be placed in a temperature of from 55 to 60 at night, with 10 to 15 degrees on sunny days. When they have made a growth of two to three inches you can take off a batch and insert them in a propagating bed with a bottom heat of about 65 degrees and 10 degrees less top heat. Keep them moist and shaded and they will root in two or three weeks. Syringe on all fine days and keep the atmosphere moderately moist. When potting use either 2½ or 3-inch pots, giving turfy loam three parts, well-rotten manure one part, and leaf mold one part. Keep shaded for a little while until they begin to take hold of the sod when they should be given all the sun and light possible, well up to the glass.

Daffodils for Early Forcing

Give these about 55 degrees at night and in three or four weeks they should have 65 degrees. To induce length of stem they should be kept in complete darkness for two or three weeks, but after that they should have the shading removed a little at a time, until they are exposed to full light. If there is a batch in flats well rooted it is not too early to bring them in, so as to flower during January. The grower who has a cellar that is just clear of frost can utilize it to good advantage for all such bulbs. Where you have some room below benches in a cool house you should bring in a good number of flats and place them here. It will save a lot of disagreeable work later on when weather is very cold. See that they do not have too much heat from the pipes. Look them over each day so none become dry at the roots.

Forcing of Ixias

Don't ever think of hurrying these bulbs along with a high temperature, as they will then prove a failure. The forcing of these bulbs for either decorations or for cut flowers can be made a paying venture. Use either 5 or 6-inch pots or pans for six or eight bulbs. Provide efficient drainage and use a compost of fibrous loam three parts, old manure one part, and leaf mold and sand one part. It is always a good plan to have the compost moderately moist when planting the bulbs, then no water will be required until they commence to grow. Press the compost firmly about the bulbs and plunge in coal ashes in a frame, where they can have protection from hard freezing. When they show good signs of advancement they should have from 50 to 55 at night with an increase of ten degrees more with sun heat.

Japan Lilies

The bulbs can be left in the frames until about the middle of December by which time they should have made plenty of roots, with a little top growth. They can then be brought into a house at about 45 degrees at night and kept there during December. Those intended for Easter and that are out in a cold frame should be protected from the severe weather and also from any long-continued rain. There is time yet to pot up lilies of the *Harrisii* type for Easter. Give them 6-inch or 7-inch pots at once. It is a good plan to place the bulbs low in the pot as there are numerous roots that start from the base of the flower stems which can later be given a liberal top dressing of good soil. The Japan lilies are always in good demand for Memorial Day. To have them in flower for that day they should be in a cold frame well protected until the middle of January. They can then be removed to a very cool house and carried through with little artificial heat. In order to have a supply on that date it requires more retarding than forcing.

Propagating Crotons

Nice young plants may be had by making incisions in good, shapely shoots. Keep open with toothpicks, bind with sphagnum and keep constantly moist and roots will be emitted in a month or less, when the tops can be cut off and carefully potted. With a little shade and careful handling large and well finished plants in small pots may be had in this way. From November to February, when firing is the heaviest and the propagating sand is most likely to be steadily warm is perhaps the best time for rooting crotons. Half ripened wood is the best to use. Water freely. Usually a good damping will be needed daily, in addition to occasional light sprayings. Protect from all sunshine. The best condition for successful rooting is when we can maintain a bottom heat of 80 to 85 degrees, with top heat 10 degrees lower, but they will root in a top heat even 20 degrees lower. When rooted pot in a mixture of soil, leaf mold and sand in equal parts.

Reminders

Record the names of all good chrysanthemums that you would like to try next year.

Moderate feeding with liquid manure will be of great assistance to cyclamen now throwing up their flowers.

Move lilies on to a bench as soon as they are nicely above ground. Be careful as to watering until they have filled their pots with roots.

Sow *Chrysanthemum* or *Chrysanthemum* in the cold beds where there is a chance for them to flower, or give a separate piece of bench to them in a cool house.

Sweet pea society prospers

The financial statement of the American Sweet Pea Society which appears in this issue will greatly please the many friends of the dainty flower in the interest of which this organization is maintained. To have a fair balance in the treasury and all bills paid in full after nine years' uphill work in these times of society multiplying is very encouraging, and insofar as this condition is due to the keen inspiration of the Maine atmosphere, last summer the Bar Harbor

meeting was certainly a wise move. No doubt the meeting of 1917, should it take place in Boston as planned, will add still further to the strength and stability of the society and to the popular interest in the flower for which it stands.

A good example

We learn from our news clippings that on Thursday afternoon of this week the florists of Fort Worth, Texas, have agreed to close their places of business so that all may be able to attend the meeting of the State Florists' Association and visit the flower show on that date. There was a time, years ago, when similar recognition was occasionally accorded to such events, as well as annual picnics and the like, in some of the older floral centres, but the custom appears to have entirely died out. In fact it often happens that the employees in flower stores in towns where flower shows are on, are very often unable to give information to a stranger as to date or locality even of the exhibition and seem mildly surprised that they should be expected to know. We think the course of the Texas florists is a most excellent one and not only well calculated to promote pleasant fraternal relationships but to develop greater respect for the florists' calling, both from outside and from within.

What modern business demands

The cut flower wholesalers of New York City who, by united action have within a few years effected a salutary advancement in the matter of credit giving and account collecting, have now, as mentioned in our local notes, put in force another much-needed reform which requires that boxes in which flowers are taken from the wholesaler must be paid for or else returned when emptied. As in the case of the aforementioned innovation, the retail trade will probably give general approval to this edict which seems to be another step in the direction of a code of trade ethics for a business which, considering its size and importance, has been far behind the times in that respect. Other flower trade centres have talked in an idealistic sort of way about the need of these reforms and others that are sure to come eventually, but so far they seem to lack the cohesion or the courage to put their wishes into effect. New York has started a wholesome and incisively defined example for the trade elsewhere and those who refuse to adopt regulations of like character will find in the long run that they have made a serious mistake.

A question of money and methods

Printers' Ink, for November 2, in an editorial note under the caption of "War Cries Without War Chests," arraigns the Florists' Telegraph Delivery Association for attempting to inaugurate a national campaign to influence the public, with an inadequate amount of money and an antiquated and discredited method. It particularly warns the Association against the "press agent" method of publicity which it says "died a natural death shortly after the demise of its parent—Mr. Something-for-Nothing." It agrees that there is a glowing opportunity to increase the per capita consumption of flowers by showing the people when and how they can use more flowers, but "it will require all the skill and experience of a trained advertising organization to do it." According to *Printers' Ink*, if the florists of this country are really serious about increasing the use of flowers they should set out seriously to raise a "war fund," which it asserts would need to be several times the proposed amount of \$10,000, and anything less would be like trying to "dig the Panama Canal with a toy spade." Many of our readers will probably agree with

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers will come with any of the topics presented on this page, and will be received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the Editor of HORTICULTURE.

Mice and Rats

These pests will now be moving from the fields and woods into buildings, and as a rule they are especially fond of a greenhouse, making themselves perfectly at home around the boiler rooms, chewing up paper in the packing room, to say nothing of the damage they do when they take a notion to make their nests in the greenhouse benches, picking out the place where the choicest roses are growing, and undermining several plants over night. Cats are worse than useless as they are a great nuisance themselves unless they are the right kind, and this is seldom the case. It will, therefore, be necessary to be ready for the invasion with traps. There is nothing better than the ordinary flat trap made of a piece of wood and a strong wire spring. It comes in two sizes, one for mice and one for rats. The mice can usually be caught without any trouble, but the rats are real foxy. The best way is to set the new trap with a pair of new canvas gloves on, baiting the trap with bacon, and when it is set wrap the gloves around the bacon and put away for future use. After a rat is caught, scald the trap with hot water or else use a new one, and set again, using the gloves again, which by this time will be saturated with the smell of bacon, so that the rats will not smell the touch of human hands. Before the traps are set it will be necessary to drill a small hole in one corner and run a wire through, fastening this to a piece of pipe or something heavy so that the rat when caught will not be able to get away with the trap. If the traps are kept set continually there should be no trouble to keep the place free from both mice and rats. It certainly is no credit to a place to have it overrun with the pests, and as mentioned before it often costs quite a little, even more so with the gardener who has expensive bulbs, seeds, etc., to look after. Rats are very fond of carrying things away to eat later, and it is not always the men stealing when bulbs, etc., are missing. A rat will carry off a great many bulbs in one night. Have the traps set, and catch the pests as they come in, before they get acquainted with the place, as it is easier to do it then than it will be later.

Clean the Boiler Flues

With a spell of cooler weather it has been necessary to fire a little more than ever before this season, and as coal is way up in the air it will not be a bad idea to save as much of it as possible. To begin, all boiler flues should be cleaned at least once a week, and if possible it will pay to do it every other day. The way the modern boilers are built it is very little trouble to run a brush through the flues or to blow them out with steam. Whichever method is used, see that it is done often

enough to keep the boilers clean so that there will be no wasted heat. Even a thin coat of ashes or soot will prevent the iron or steel from absorbing heat, and that is what it is supposed to do, transferring it to the water, making either steam or hot water as the case may be.

Last Chance for Repairs

Winter will soon be here with its cold winds, snows and blizzards; it is, therefore, advisable to repair everything that will have to be repaired before the bad winter weather sets in. All broken glass should be repaired the very first thing, as not only is a lot of heat wasted by letting the wind blow in, but the plants are bound to suffer some time because of a draft or drip. All pipes should be gone over to see that they are in condition to stand the winter. With these it is much as with benches. It does not pay to patch. If the returns are leaky, repair all that is absolutely necessary, and then as soon as opportunity will come, repipe certain benches or houses, using all new pipes. The system will then last for many years without any worry. If a new piece is put in here and there now, later on there will be another piece to put in here and there and this will keep up indefinitely, greatly adding to the expense of running the place. If there are any places where the pipes touch the ground, see that the soil is scraped away so as to leave the pipes free and clear. When the pipes come through the soil anywhere, the soil will absorb the heat much the way it absorbs electric current when the wires are grounded. See that the main trenches are well drained so that the mains will not be in water getting chilled while the fireman is straining to make steam. Cover the mains wherever it is possible. It will pay, as the saving in heat will be considerable. Houses with wooden sides which are pretty well gone had better get a coat of tar paper. This will not cost so very much and the coal saved will soon bring the money right back.

The Christmas Crop

With Christmas only five weeks away all roses that will be in for Christmas will now be seen on the plants in the form of nice red shoots. Every possible precaution should be taken to see that these come right along and that they come clean and healthy. If the plants carry quite a number of these shoots a little extra feeding will help push them along and lengthen the stems out a bit more. Bone can be used for this purpose to good advantage, for it is a good plant food and if the weather should turn out very bad and dark, the plants will not suffer from overfeeding as much as they would if some of the quick-acting fertilizers were used. Keep the plants well fumigated and syringed so there will be no blemish or insects on the buds to decrease their price.

Printers' Ink. To a certain extent HORTICULTURE agrees with it. But when it comes to handing over \$50,000 or \$75,000 to a "trained advertising organization" to increase the sale of flowers we rather think the florists will

be inclined to spend a little time in discreet meditation and silent prayer. In this connection, the account of Chicago's retail exhibition experiment, in another column of this issue, is suggestive and is well worth reading.

THE EXHIBITIONS

CHICAGO FLORISTS' ART AND FLOWER SHOW.

Something new in flower shows has been tried and successfully carried out. It was distinctively a retailers' show and the public plainly indicated its approval. The attendance was pretty evenly divided between the afternoon and evening, a steady stream of people passing in and out from two till eleven, and at no time was the number so large that the exhibits were injured. The 19th floor of the Hotel La Salle was a beautiful place for the affair, the flowers looking so much more attractive than with the usual barn-like setting of the coliseum. Variation was given by the use of platforms and tables upon which smaller vases and baskets were placed. Groups of green plants enhanced the beauty of the cut flowers, and blooming plants in groups and in hampers added much to the good effect. All kinds of corsages, arm bouquets, bridal bouquets, etc., were exhibited by Chicago retailers and the wholesale commission house of M. C. Gunterberg had carried out an original idea with success, the different wedding anniversaries being suitably designated by flowers, combined sometimes with little gifts, and this table was always the center of an interesting group.

The baby table led in the display of flowers arranged for special remembrances. The stork looked down upon cradles of many kinds, each filled with choicest miniature roses and the work was dainty in the extreme. Dinner tables were made beautiful with flowers and one long table showed something new for a wedding. Down the center of the table was a broad runner of pink ribbon, crossed by eight white arches, each trimmed with the smallest roses, while under the arches was a tiny bridal party, complete even to the flower girl and all carrying natural flowers. The needs of debutantes were well cared for, with every conceivable kind of basket, and the height of the florists' art was shown in the arrangement of these. The usual tall vases filled with the largest chrysanthemums made imposing displays.

The retail trade turned out well to view the exhibit but only a small proportion took part in it, the south-side florists being entirely without representation. Among the downtown florists exhibiting were Geo. Wienhoeber, who far exceeded any other retailer in the number of displays staged, A. Lange, J. Mangel, L. Bohannon and Miss Leslie whose store is the latest addition to the Loop florists. From north side were Ernst Wienhoeber, W. W. Adams and Schiller. Miss Edna Frauenfelder ably upheld the honor of the west side. A big vase of the new red carnation, *Thenanthos*, originated by Anton Then and disseminated by the A. L. Randall Co. showed up well and called forth much admiration for its size,

color and stem. The Deerfield Nursery, Deerfield, Ill., showed a new red rose and the Thompson Carnation Co., a collection of seedling carnations. An exhibit of seedling chrysanthemums was made by the Growers' Cut Flower Co. of Redwood, Cal. A. Schneider of Oak Park, Frank Oechslin and Vaughan's Greenhouses furnished the plants.

TUXEDO (N. Y.) HORTICULTURAL SOCIETY SHOW.

The annual flower show held in the ball room of Tuxedo Club House was one of the finest displays of flowers ever shown at Tuxedo. The entries far exceeded those of any previous show. The groups were again a feature and chrysanthemums were very good. Singles were shown to advantage and are no doubt slowly taking the first place in chrysanthemums both for their usefulness in decoration and their beauty on the exhibition table. Roses were the best ever shown here with a big increase of entries. Carnations were of excellent quality and fine color. The classes for vegetables in the past years have been falling off but this year they came up to the front again with some fine collections. The great feature was the table decoration of chrysanthemums which brought out thirteen entries. 1st prize was won by Mrs. S. Spencer, gard. Emil Barth. H. M. Tilford, gard. Joseph Tansey, carried off 1st in both the miscellaneous and chrysanthemum groups. He was also the winner of the Knight & Struck Co. cup for single chrysanthemums. Mrs. John Murray Mitchell, gard. Thos. Wilson, won the J. Scheepers & Co. cup for six cold storage spires and the Metropolitan Material Co. cup for singles and anemones. Mrs. A. Carhart, gard. C. Costicki, won the Hitchings & Co. cup for the best flowering plant. G. G. Mason, gard. D. McGregor, won the Vaughan bronze medal for the largest flower in the show. A. Monell, gard. C. Davidson, was 1st with the fern group. R. Mortimer, gard. C. D. Schaeffer, staged a very nice collection of seedling anemones which was awarded a certificate of culture. The judges were R. Speirs, Dalton, Mass.; John Canning, Ardsley, N. Y.; Jas. Robertson, Newport, R. I., and Thos. Page, Great Barrington, Mass., whose judgment met with the entire satisfaction of all the exhibitors. A few of the out-of-town visitors were F. Seeley and J. Muller, of Julius Roehrs Co., J. Morrison of Weeber & Don, Geo. Strong, C. H. Totty, R. J. Beers of A. N. Pierson, Inc., W. Scott, W. H. Lutton, C. Peterson, J. E. Lager, Jos. Manda, Thos. Knight and W. Sperling.

The principal prize winners for chrysanthemums were Jos. Tansey, D. McGregor, W. Hastings, C. Davidson, Thos. Wilson, T. Lyons and Mrs. Mac Machan.

The principal prize winners in roses

were: Wm. Brock, J. Tansey, D. McGregor, Thos. Wilson, C. Davidson and C. Costicki.

In carnations: J. Tansey, W. Brock, D. McGregor, W. Hastings, Thos. Wilson, C. Davidson, Thos. Lyons, C. Costicki. Vegetable winners were D. S. Miller, Emil Barth and D. McGregor.

In the orchid classes Geo. F. Baker and H. H. Roger, gard. P. Venezic, were the principal winners. The commercial exhibits were from Lager & Hurrell, table of orchids, C. H. Totty, collection of single and pompon chrysanthemums and roses, A. N. Pierson, Inc., single chrysanthemums and a new yellow rose, Scott Bros., collection of single and anemone chrysanthemums.

THOMAS WILSON, Sec.

LANCASTER COUNTY FLOWER SHOW.

A special effort was made to have a good amateur display and the result was very encouraging. A half dozen vases of exceptionally fine dahlias demonstrated the abnormal weather conditions existing in this section. Two years ago high class chrysanthemums were hard to find here. The display then made by our out-of-town friends educated us up to the possibilities and for this show the display by local growers was the equal of those exhibited anywhere. The Lord & Burnham prize for the best display of chrysanthemum blooms was won by H. D. Rohrer. His display was some 200 vases of specimen blooms, filling four tables and three vases of extra long-stemmed blooms towering over them in the center of the table group. These three vases were M. Louiseau-Rousseau, Nerissa and Wm. Turner.

Best display of cut flowers other than chrysanthemums was made by Chas. M. Weaver with a table of sweet peas and mignonette that equaled the stock shown last spring at the National Show. The prize was awarded by the King Construction Co.

The Michell bronze medal was awarded to Elmer Weaver for the best display of plants and cut flowers. The Michell silver medal for table decoration was awarded to B. F. Barr Co.

Blue ribbons were awarded as follows: Rudolph Nagel for display of chrysanthemums artistically staged; Maurice J. Brinton for table of lilies; Amos N. Rohrer for carnations; E. F. Campbell for vase of chrysanthemums.

Honorable mention was made of the following: Ira D. Landis, table of carnations, daisies and pompons; W. B. Girvin, table of chrysanthemums and carnations; Lemon Landis, for chrysanthemums and lilies; Frank Kohr, cut flowers, plants and straw flowers; H. A. Schroyer, for an excellent retail display, part of which was a basket of his new chrysanthemum, Mrs. H. A. Schroyer.

Other exhibitors almost as good as those getting awards: E. P. Hostetter, yellow daisies; A. F. Strickler, pom-

[illegible]

NEW YORK EXHIBITIONS

AMERICAN INSTITUTE CHRYSANTHEMUM SHOW.

New York enjoyed two shows last week. The first to open its doors was the American Institute Show, held at the Engineering Building on West 39th St., on Nov. 8, 9 and 10. The exhibition was decidedly the best ever given by the Institute and Secretary Eagleson with his right bower W. C. Rickards were justified in their pride over the results of their labors. There were eighty-eight plant and flower classes in the schedule and awards were made in 83 of them.

One of the most admirable entries was that of new Japanese Anemone seedlings by C. D. Shaeffer, gard. for Richard Mortimer, Tuxedo Park. The flowers were of enormous size and splendid finish. A diploma was awarded. Among the big guns in the cut chrysanthemum classes were Chas. H. Totty, W. W. Vert, gard. for Howard Gould, Port Washington. Robert Jones, gard. for Percy Chubb, Glen Cove, Ernest Robinson, gard. to Mrs. M. F. Plant, Groton, Conn., George Ferguson, gard. to Mrs. Payne Whitney, Manhasset. Totty had six 1sts, Jones 13 1sts and two 2nds, Robinson four 1sts and seven 2nds, Vert four 1sts and three 2nds. Other winners in cut bloom classes were, Scott Bros., Elmsford, R. E. Tyson, gard. for Mrs. H. McKay Twombly, Convent Sta., N. J., Fred. Hitchman, gard. for Ralph Pulitzer, Manhasset, Frank Black, gard. for C. E. Chapman, Oakland, N. J., Max Schneider, gard. for Peter Hauck, Jr., E. Orange, N. J., G. J. Wilson, supt. for C. K. G. Billings, Oyster Bay, Wm. Cameron, gard. for Thos. N. McCarter, Rumson, N. J., Wm. Lackey, gard. for David Guggenheim, Elberon, N. J., Chas. Young, gard. to Mrs. J. I. Straus, Mt. Kisco, Geo. Fisher, gard. for Morris Kinney, Butler, N. J., J. G. P. Kennedy, gard. for Mrs. Lyle Samuel, Tenafly, N. J., J. Cook, Hackensack, E. D. Smith, Adrian, Mich., H. Gaut, gard. for H. L. Pratt, Glen Cove, Wm. Brown, gard. for C. W. McAlpin, Morristown, N. J., and P. W. Popp, gard. for Mrs. H. Darlington, Mamoreneck. No finer blooms have ever been shown in all the prominent varieties, but the variety Wm. Turner took the lead here as elsewhere for spectacular effect.

On plants, Peter Duff was the principal winner. Frederick Hitchman, R. M. Johnston, gard. for W. B. Thompson, Yonkers, A. MacDonald, gard. for D. E. Oppenheimer, Yonkers, F. Hitchman, and Charles Young were winners in this section. Garza still holds its precedence as a pot plant. Mr. Hitchman had a great specimen of this old favorite.

L. A. Noe, Chas. H. Totty, Wm. W. Vert and Wm. Lackey were winners in rose classes. Chas. L. Stanley, Thos. B. Wilson and Robert Grunert in carnations. Wm. W. Vert in begonias, F. Hitchman in violets. There were some excellent fruit and vegetables, for which munificent prizes were awarded.

Medals were given as follows:

Robt. E. Tyson, best collection of chrysanthemum varieties, silver medal; Frederick Hitchman, best specimen chrysanthemum plant, silver medal; Robert Jones, best vase of chrysanthemums, medal of superiority; Robert E. Tyson, best collection of vegetables, medal of superiority.

Many special awards were made to exhibits not in schedule competition. Among these were a collection of pompons from R. Vincent, Jr. & Sons Co., Whitmarsh, Md.; E. D. Smith & Co., seedling pompon Little Gem; A. N. Pierson, group of chrysanthemums and novelty roses; C. H. Totty, displays of chrysanthemums and roses; Wm. Tricker, Nymphaea Mrs. Woodrow Wilson; Max Schling, floral decorations.

The judges were Eugene Duille-Gouze, John G. McNicoll, William Turner, Peter Duff, George Middleton, Alex. Mackenzie.

EXHIBITION OF THE HORTICULTURAL SOCIETY OF NEW YORK.

The attendance at the big show of the Horticultural Society of New York in the Museum of Natural History totaled 199,993 persons for the three days, thus breaking the record made last year. On Sunday afternoon the crush at the building was so great that policemen formed the crowd in two columns and required them to retain this formation. The waiting line to enter extended at four o'clock from the entrance of the Museum east in Seventy-seventh street almost to Central Park West. Automobiles, as on the previous day, were not allowed to enter the driveway on account of the crowd, but had to leave their passengers at the street entrance.

The central attraction was the group of trained specimen plants grown by John Canning, supt. for A. Lewisohn, Ardsley. These, as before, were placed in the spacious rotunda and roped off. They were in 20-inch tubs and marvels of symmetry and size. Our judgment was that they were even finer than last year's plants, if that were possible. There were four in bush form, the varieties being Lady Lydia, Wells Late Pink (white sport), Ella Scoville and R. F. Felton. Two others were trained in the form of pillars, ten feet high and two in fan shape, the latter being in two colors. J. W. Smith, gard. for F. E. Lewis, Ridgefield, Conn., had some plants in competition, which received 2nd prize but would have taken 1st in any other show in the country. W. J. Sealey, gard. for Chas. Mallory, Port Chester, R. M. Johnston, gard. for W. B. Thompson, Yonkers, James Linane, gard. for G. D. Barron, Rye, and Robert Marshall, gard. for J. R. De Lamar, Glen Cove, were the other giants in the specimen plant classes.

In chrysanthemum cut blooms the exhibits were very extensive and quality superb. In the commercial section Charles H. Totty was supreme in all classes, Scott Bros. being 2nd. Non-commercial growers competed heavily

in the various classes assigned to them, A. Lewisohn, Duke's Farm, Mrs. Payne Whitney, Fred'k Sturges, gard. Thos. Bell, Fairfield, Conn., G. B. Schley, gard. Wm. Huckvale, Far Hills, N. J., Mrs. E. S. Bayer, gard. Alex. Thomson, Mt. Kisco, H. M. Tilford, gard. Jos. Tansey, Tuxedo, E. L. Meyers, gard. W. G. Ellis, Huntington, and A. Iselin, Jr., gard. Jos. Tiernan, were the principal winners. For dinner table decoration, chrysanthemum flowers only, with any appropriate foliage, Mrs. Payne Whitney was 1st, W. B. Thompson, 2nd, Thos. Aitchison 3rd.

Of exceeding interest and beauty were the groups of greenhouse foliage and flowering plants, 150 sq. ft. W. B. Thompson won 1st with a lovely arrangement in which lilies and crotons were prominent components; 2nd was awarded to Mrs. F. A. Constable, gard. Jas. Stuart, whose arrangement was also a gem, with spray orchids, begonias, lilies, fuchsias, etc.

Next in interest and value were the orchids. In the commercial classes Julius Roehrs Co., were 1st with a noble collection and got a silver medal for novelty not shown here before with *Cypripedium Alma Gaewart*. J. A. Manda won on twelve plants and six plants and Lager & Hurrell with fine collection of cypripediums. In the non-commercial exhibits there were some beautiful things. The Clement Moore special was won by A. N. Cooley, Pittsfield, Mass., with *Laelio-cattleya Firminii*. This plant also won the sweepstakes prize as the best orchid plant in the show. Clement Moore, gard. J. P. Mossman, Sam'l Untermyer, gard. Geo. H. Janes, were orchid winners also.

In the commercial classes for roses, Chas. H. Totty won the silver medal for variety not in commerce. Other winners in various rose classes were F. R. Pierson Co. and L. A. Noe. Cottage Gardens Co., won the silver medal sweepstakes and diploma for finest vase and new variety of carnations. The non-commercial rose and carnation classes were hotly competed for by a large number of private gardeners. On vase of fifty roses arranged for effect Rudolph Heidkamp, gard. for Mrs. Pauline Boettger, Riverdale, was the winner. Unfortunately our space is insufficient to record the various classes in this section and in decorative foliage and flowering plants. A large number of "specials" were awarded, of which the following are some of the most important.

John Scheepers & Co., Inc.: superb collection of winter flowering begonias, gold medal.

Adolph Lewisohn: group of bush chrysanthemum plants, gold medal.

Albert Crane, Stamford, Conn., gard. Alex. Geddes: collection of seedling chrysanthemums, certificate of merit.

H. Gaut, Glen Cove, N. Y.: seedling chrysanthemums, certificate of merit.

R. Mortimer, Tuxedo Park, N. Y., gard. Carl D. Schaeffer: Japanese anemone seedlings, certificate of merit.

Mrs. Wm. Barr, West Orange, N. J., gard. Emil Pannuska: seedling chrysanthemums, certificate of merit.

George Glatas: *Nephrolepis King Constantine*, certificate of merit.

Mrs. H. Darlington: display of dahlias, silver medal.

Young & Nugent: basket, diploma. Duke's Farm: grapes and melons, silver medal.

The judges were: Wm. Robertson, W. H. Waite, Wm. Mackay, Geo. Foulsham, Alex. Robinson and Thos. Wilson.

CLUBS AND SOCIETIES

AMERICAN SWEET PEA SOCIETY.

A meeting of the executive committee of this society was held at the Hotel Breslin, N. Y., on Friday, Nov. 10, there being present Geo. W. Kerr, president; Harry A. Bunyard, secretary; Wm. Sim, treasurer; J. Harrison Dick, Wm. Gray, Edward Jenkins and W. A. Sperling.

A report was received from Geo. W. Kerr and W. A. Sperling, who were appointed an auditing committee at the annual meeting last July. They reported the books in good order, with a balance of \$147 in cash on hand and all expenses and bills paid. Their report as set out in the following paragraph was accepted and they were discharged with thanks.

TRIAL BALANCE, NOVEMBER, 1916.

Dr.	
L. 10, Vases	\$220.24
L. 40, Guarantee Fund	25.00
L. 67, B. H. Show acct.	420.50
L. 25, Expense	265.01
Cash 45, Cash on hand....	147.99
	\$1,157.74

Cr.	
L. 1, Membership	\$152.00
L. 41, Guarantee Fund	260.00
L. 51, Prize Donors	306.00
L. 52, Prize Donors, outsiders ..	85.00
L. 75, Receipt, gate	75.00
L. 110, Surplus Fund	259.74
When \$20 received from B. H. Horticultural is posted.	20.00
	\$1,157.74

A warm vote of thanks was passed to Chas. H. Totty, Madison, N. J., and John Stalford, Bar Harbor, Me., who between them had procured subscriptions for a special fund, amounting to \$276; Mr. Totty having obtained \$160 and Mr. Stalford \$116. It was through their efforts that the society's finances were put on a sound basis at this time.

It was proposed that all members whose dues were three years in arrears be dropped. An urgent letter of appeal will be sent to those who are delinquent. There are 75 members in good standing at the present time, and 10 life members.

A long general discussion took place in regard to ways and means of assisting the society and enlarging its membership. It was eventually resolved that some publication, to be called a bulletin, be prepared containing useful articles on varieties, cultivation and so forth, this to be published together with the schedule early in January. Advertisements will be solicited to help pay the cost of the bulletin. The schedule, with minor alterations, it is hoped, will be on the same lines as that of last year. Edwin Jenkins proposed that the next show be held in Boston, Mass., the date being the first Saturday after the 4th of July. Wm. Gray seconded, and it was agreed to. Wm. Sim was appointed a committee of one to interview the trustees of the Massachusetts Horticultural Society with a view to obtaining a guarantee from that society of assistance toward the prize fund for the show.

Meetings Next Week

Monday, Nov. 20.

Detroit Florists' Club, Bomb Floral Hall, Detroit, Mich.
Houston Florists' Club, Chamber of Commerce Rooms, Houston, Tex.
New Jersey Floricultural Society, Orange, N. J.

Tuesday, Nov. 21.

Gardeners' and Florists' Club of Boston, Horticultural Hall, Boston, Mass.
Gardeners' and Florists' Club of Ontario, St. George's Hall, Toronto, Can.
Minnesota State Florists' Association, Minneapolis, Minn.
Pennsylvania Horticultural Society, Horticultural Hall, Philadelphia, Pa.

Wednesday, Nov. 22.

Oyster Bay Horticultural Society, Oyster Bay, N. Y.

Friday, Nov. 24.

Connecticut Horticultural Society, County Bldg., Hartford, Conn.
Monmouth County Horticultural Society, Red Bank, N. J.
Pasadena Horticultural Society, Pasadena, Calif.
People's Park Cottage Gardeners' Association, Paterson, N. J.

Saturday, Nov. 25.

Dobb's Ferry Gardeners' Association, Dobb's Ferry, N. Y.

An invitation to meet with them had been received from the officers who are arranging the National Flower Show at St. Louis in 1918, and who are offering \$250 as prizes for sweet peas. It was resolved to suggest that this sum be at least doubled, since few growers, it was thought, would be induced to send displays unless liberal prizes were offered. General satisfaction was expressed at the prospects before the society, and it is hoped that a successful year lies ahead.

HARRY A. BUNYARD, Secy.

NASSAU CO. HORTICULTURAL SOCIETY.

At the monthly meeting of this society Wednesday evening, Nov. 9th, the principal feature was the competition by assistant gardeners for the best table decoration for prizes offered by Robert Jones, James Holloway, Samuel Trepass and Daniel Coughlin were appointed as judges and they awarded 1st prize to James Waite, 2nd to George Ford and 3rd to Arnold Gattiker. Cut chrysanthemums comprised the other exhibit of the evening and for these classes John Johnstone, Joseph Adler and Frank Watson acted as judges. They awarded 1st prizes to James McCarthy, and to John Dombrowski certificate of culture for single chrysanthemum Emma, and honorable mention for a seedling anemone. After the meeting a most enjoyable smoker was held. Our annual meeting will be held the second Wednesday in December at 2 o'clock in the afternoon. Election of officers will there take place.

JAMES MCCARTHY, Cor. Sec'y.

NEW YORK FLORISTS' CLUB.

In the call for the regular meeting, Monday evening, Nov. 13, Secretary Young gave a mild intimation of the joyful time in store for the members and their ladies, and the attendance was of a size and character to well attest the wisdom of this Ladies' Night festival. Our account of the affair should properly go in the "During Recess" column, for business was quickly despatched and everybody flocked to the spacious dance hall on the floor below the club rooms, where they found the band and the caterer and the house committee all ready for big doings. So seductive was the entertainment and dancing that the clock struck 1 A. M. before the merry revellers were ready to go home. It certainly was one glorious celebration and pleased everybody. At the short business meeting which preceded the entertainment, nomination of officers was put through with the following result:

For President—Chas. Schenck, Henry Weston, Frank R. Pierson, Thos. B. De Forrest, G. E. M. Stumm.
Vice-President—J. H. Flosser, Max Schling, P. W. Popp, W. G. Badgley.
Secretary—John Young, J. Harrison Dick (declined), M. C. Ebel.
Treasurer—W. C. Rickards, Wallace R. Pierson, James McHutchison.
Trustees—Roman J. Irwin, Christian Madsen, John Canning, A. Kottmiller, Chas. H. Brown, Victor Dorval.

George T. Schuneman, of Baldwin, sent a handsome exhibit comprising fifteen varieties of sweet peas. Frank Dinda showed seedling anemone chrysanthemums and Paper White narcissi.

NATIONAL ASSOCIATION OF GARDENERS.

President W. N. Craig, of the National Association of Gardeners, has appointed the following committee on Convention Publicity: George W. Hess, Washington, D. C.; William Kleinheinz, Ogontz, Pa.; David Fraser, Pittsburgh, Pa.; Robert Cameron, Cambridge, Mass.; John Canning, Ardsley, N. Y.; P. W. Popp, Mamaronck, N. Y.; Thomas J. Wilson, Tuxedo Park, N. Y.; Anton Bauer, Deal Beach, N. J.; James Duthie, Oyster Bay, N. Y.; John Barnett, Sewickley, Pa.; Edw. Jenkins, Lenox, Mass.; William Gray, Newport, R. I.; Thomas W. Head, Lake Forest, Ill.; Albin Martini, Lake Geneva, Wis.; L. P. Jensen, St. Louis, Mo.; Percy Ellings, Menlo Park, Cal.

The convention will be held in Washington, D. C., December 5 and 6 and in addition to an interesting program, which has been provided for the meetings, entertainment of the visiting members has not been overlooked. There is to be an auto trip through the park system of Washington, a visit to the White House, Capitol and the various departmental buildings, and to the country estate of George Washington at Mount Vernon. A large attendance both from the east and west is looked for.

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

Chrysanthemum Night, Nov. 7, was well attended. We have had larger exhibitions, but in quality this one was unsurpassed. In exhibition blooms the private gardeners were in the lead, the commercial men making no attempt to compete in size.

M. Curran, from the estate of Mrs. E. M. Horne, Sewickley, showed doubles Daily Mail, Mrs. H. J. Jones, Gilbert Drabble, Wm. Rigby, Odessa, Elberon; also pompons and singles, including Excelsior, and some seedlings, and was awarded a first-class certificate. A. A. Leach, gardener for H. J. Heinz, received a certificate of merit. Wm. Thomson, gardener with W. P. Snyder, Sewickley, received a cultural certificate for fine blooms. Thos. Sturgis, gardener with Mrs. A. Laughlin, Sewickley, was given honorable mention for singles. Bureau of Parks, Jno. W. Jones and Jas. Moore, foremen, received first-class certificate for the best double white chrysanthemums ever shown before the club. C. H. Godwin & Sons, Bridgeville, Pa., showed commercial doubles and singles, and received a cultural certificate.

Single and pompon chrysanthemums were in very good form and pleasing colors, and the general opinion seems more and more in favor of them, not only for their intrinsic beauty but for commercial purposes. It may be that the time will come when the present monster bloom will be displaced by the artistic, graceful and reasonably priced singles. The judges were Neil McCallum, Fred Purki and Walter Jordan.

The chairman of the committee having in charge the banquet in celebration of the 25th anniversary of the founding of the club, reported the date as the 21st of November and the place as the Fort Pitt Hotel. A good deal of interest is being manifested in this banquet, and the members are looking forward with great pleasure to an evening of feasting, gladness and song and reminiscences of the old days. H. P. JOSLIN, Secy.

LENOX HORTICULTURAL SOCIETY.

The annual meeting and election of officers of this society was held November 8th. The evening was given over entirely to business. Reports were submitted and recommendations made concerning the fall exhibition which proved a big success. It was voted to purchase for the use of the society a die, together with six silver and six bronze medals to be awarded for exhibits of special merit.

The retiring vice-president, E. W. Edwards, supt. to A. N. Cooley, Pittsfield, was unanimously elected president for the ensuing year; Alex. McLeod, supt. to A. R. Shattuck, was chosen to fill the vice-president's chair. The resignation of the secretary was accepted and H. Heeremans selected in his place. Ed. Jenkins, S. Carlquist and A. J. Loveless (treasurer) made a few remarks for the good of the society, recommending a get-together of members to endeavor to make the season's meetings still more interesting and instructive, also to obtain as many new members as possible. J. H. FRAMPTON, Asst. Secy.

AMERICAN ROSE SOCIETY.

The Executive Committee of the American Rose Society held two sessions in Horticultural Hall, Philadelphia, Pa., during the chrysanthemum show. Provisions were made to hold the next annual exhibition and rose show in Philadelphia next March. The prizes allotted for the show were—\$750 for plants and flowers; \$1000 for rose gardens; \$2000 for cut flowers. The schedule committee is Messrs. E. Allan Peirce, Waltham, Mass., Thomas Roland, Nahant, Mass., J. K. M. L. Farquhar, Boston, Mass.

A letter was read from John Young, Secretary of the National Flower Show committee, inviting the American Rose Society to join with them in an exhibition in St. Louis in 1918.

Messrs. Kallen & Lunnemann, Boskoop, Holland, have sent six specimens of roses for test in the Hartford Rose Test Garden.

At the evening meeting there was an attendance of over fifty. E. Allan Peirce stated the work of the show, and a letter was read from the Philadelphia Chamber of Commerce, inviting the American Rose Society to come to Philadelphia "The World's Greatest Work-shop and Convention City" promising every co-operation for its success. The following gentlemen spoke in favor of the exhibition going to Philadelphia—Messrs. Farenwald, Eisele, Simpson, Kleinheinz, Brown, Mills, Dodge, Cartledge, W. R. Piereson Skidelsky, W. A. Manda and others.

The guarantee fund as pledged so far is \$4565, fifty-one firms and individuals making up the amount.

BENJAMIN HAMMOND, Sec'y.

Beacon, N. Y.

WESTCHESTER AND FAIRFIELD HORTICULTURAL SOCIETY.

A well attended and interesting meeting of the Westchester and Fairfield Horticultural Society was held in Greenwich, Conn., Friday evening, Nov. 10. An interesting display was on the exhibition tables and the following awards were made: Roses from John Forbes and grapes from Anton Pederson, highly commended; seedling chrysanthemums from Jas. Foster, certificate of merit; single chrysanthemums from Carl Hankenson, cultural certificate; Solanum capsicastrum from H. F. Bullpitt, honorable mention. A pleasing feature was the presentation of the prizes won at the recent Fall Exhibition, Oscar Addor acting as spokesman. A social session with refreshments was provided by the principal winners that proved a happy ending for the exhibition season of 1916. Another interesting feature was the discussion of the various exhibitions attended by several members, including Lenox, Mass., Tuxedo, N. Y., Glen Cove, L. I., and Tarrytown, N. Y., in addition to our own as well as those in N. Y. City. The next meeting will be held Dec. 8, when the election of officers will take place.

P. W. POPP, Cor. Secy.

MASSACHUSETTS HORTICULTURAL SOCIETY.

The annual meeting of the Massachusetts Horticultural Society will be held at Horticultural Hall, Boston, on Saturday, November 18, at twelve

o'clock. The principal business of the meeting will be the election of a president, a vice-president, four trustees, and a nominating committee of five members.

The voting will be by Australian ballot and the polls will be open from twelve to three o'clock.

WM. P. RICH, Secy.

CLUBS AND SOCIETY NOTES.

The November meeting of the Cincinnati Florists' Society was held Monday evening at Hotel Gibson. President Wm. Schumann appointed a preliminary flower show committee to formulate plans for a fall show next year and report to the society at the December meeting.

Politics occupied the entire evening on the occasion of the meeting of the Florists' Club of Washington, D. C., this being a subject of exceptional interest to the local trade. It was stated at the meeting that there will probably be an inaugural ball next March. When President Wilson was elected for the present term he refused to consider this and thousands of dollars' worth of business was lost to the trade. It was also predicted that, under the present Mrs. Wilson, social activity at the White House would be revived.

Plant Propagation, Greenhouse and Nursery Practice

By M. G. KAINS

We have had many inquiries from time to time for a reliable and up-to-date book on plant propagation, but were always at a loss to find any publication that we could recommend. The subject has been dealt with in fragmentary manner only in books that have come to our notice. So it is well that this new work has been issued, especially as it is both comprehensive and practical, and it should meet with a ready sale among plantmen, nurserymen and gardeners. There are nineteen chapters covering in detail topics of germination and longevity of seeds, propagating by buds, layering, cuttings, grafting, etc., fruit tree stocks, clones, etc., and there are eight pages of condensed cultural instructions in tabulated form, covering annuals and perennials from seed, woody plants, evergreens, vines, bulbs and tubers, greenhouse and house plants, ferns, palms, water plants, orchids and cacti. The illustrations are numerous, comprising 213 figures and half-tone plates. There are 322 pages well bound and on heavy paper, teeming with helpful information. It is a book which no cultivator can afford to do without. It is worth many times its price. Copies can be supplied from the office of HORTICULTURE at publisher's price, \$1.50.

THE LARGEST HORTICULTURAL AUCTION ROOMS IN THE WORLD

MASSACHUSETTS AGRICULTURAL COLLEGE.

Nov. 11, 12 and 13 saw the biggest and most successful flower show ever staged at the Massachusetts Agricultural College. Close on to 4,000 visitors viewed the displays, which were largely chrysanthemums, but roses, carnations, etc., were not by any means overlooked. Penn the Florist, of Boston, sent a basket of violets, and Thos. F. Galvin sent a large colonial bouquet, both of which received a great deal of attention.

An exhibit of chrysanthemums from California, was sent in by H. M. Robinson & Co., and considering the journey they had taken, were in good shape. E. D. Smith, of Adrian, Michigan, also sent in an excellent exhibit. E. A. Richards, of Greenfield, Mass., made a very fine display of carnations, for which he received a certificate of merit. Especially fine was his new deep-pink carnation seedling No. 110. An exhibit of evergreens by E. J. Canning, of Northampton, also received an award. The commercial men's classes were very successful. A team of six senior students judged these exhibits. Butler & Ullman, Sinclair & Son, Galivan Bros. and R. S. Carey took the greater part of the awards in these classes.

In the students' competition some very excellent work was shown. In the junior competition for table decorations F. A. Woods, of Groton, took the first prize with a table of Ophelia roses and Cocos palms. L. H. Lawrence, of Falmouth, was placed second with a design of allamanda and bouvardia, while Miss Adaline Ferris took third on a table of single yellow chrysanthemums. R. L. Clapp, of Salem, and G. J. Duncan, of Arlington, received honorable mention. In the basket competition open to seniors, J. C. Campbell, of Gardner, took first in both small and large baskets. In the large baskets H. C. Lydiard, of Hartford, Conn., and H. A. Pratt, of Shrewsbury, placed second and third. In the small baskets, M. R. Lawrence, of Falmouth, and A. N. Schwab, of Yalesville, Conn., took the second and third prizes.

A collection of house plants shown by the college attracted much attention and comment from the public. The pergola details worked out by Prof. A. H. Nehrling and Mr. Whiting proved very pleasing. Prof. Nehrling

UNHEALTHY PRIMULA OBCONICA

Mr. John J. M. Farrell,

Dear Sir: I am sending you under separate cover a few leaves taken from *Primula obconica* and if you will kindly let me know what is the trouble with the plants I will be greatly obliged. It is not only the lower leaves which are turning this way but it seems to extend over the entire plant. They are not pot bound but have been in the same pots for about three months and I thought perhaps the soil was sour so yesterday I watered them all with lime water but came to the conclusion that I had better not do anything more without your advice. I have not been feeding them at all up to this time. They are in four inch pots. Last year I brought them on in this size and did not have any trouble with them turning yellow. In case the leaves do not arrive in good shape I will say that the whole outer edge turns yellow first and then extends over the whole leaf. They are given full light every day but I notice that some which are in partial shade are turning the same way. If you will help me out it will be greatly appreciated.

Thanking you for past and present favors, I am, Very respectfully yours,

New Jersey.
P. S.: I would like to state that without your articles in HORTICULTURE I would hardly know how to get along in this business. A. S.

In answer to Mr. S. I would say there are many causes that would tend to make the foliage turn yellow. Too much water at the roots, or too little, will cause it and the nature of the soil plays a big part with the foliage of all plants. It can also be caused by too heavy fumigations, especially with tobacco stems. May be that you are feeding them too heavily; this also will cause it. All you can do is try to nurse them back to good health by giving them 50 to 52 degrees night temperature with 10 to 15 degrees higher with sunshine and 55 to 58 degrees during dull weather. Keep the soil in an even state of moisture and if you have them plunged look them over and see that the drainage hole in the pot is kept clear.

Obituary

Katharine Elizabeth Freeman.

Katharine Elizabeth Freeman, daughter of Mrs. Mary E. Freeman and the late J. R. Freeman, passed away after an illness of four months, at the age of twenty-four years. Miss Freeman was the sister of Joseph and Louis Freeman, who have been conducting the business founded by their father, for Mrs. Freeman. The sympathy of many of the florists was evidenced by handsome floral offerings. Prior to her illness, Miss Freeman was a familiar figure around the Freeman greenhouses.

Trueman Lanham.

The sudden death of Trueman Lanham, superintendent of trees and parkings of the District of Columbia for thirty-one years, came as a great shock to the gardeners and florists of Washington, to whom he was very well known. About a week prior to his death Mr. Lanham, then in good health, went to Fort Howard, Md., to visit his son. He took cold shortly thereafter and his heart became affected, death resulting on November 11. Since Mr. Lanham's appointment when the first parking commission was provided for in April, 1885, he has done a remarkable work in beautifying the city. He was born in Prince Georges county, Md., February 13, 1940, and is known as the founder of Lanham, Md., where he has been making his home. One of his sons, Clifford Lanham, is assistant superintendent of trees and parkings. In addition, he is survived by his wife, Paul Lanham, Mrs. A. L. Fitz Simons, and Mrs. F. B. Haskell.

George Bird.

Pathetic circumstances surround the death, on November 6, of George Bird, 67, a florist of Brockton, Mass., who passed away after twelve days of suffering at the Brockton hospital where he had submitted to an operation for ruptured appendix. In a Boston hospital lies his widow, Mrs. Mary Pierce Bird, who is unaware even that her husband has been ill and knowledge of whose death must be kept from her for the present owing to her own serious condition. Typical of a life of devotion to his afflicted wife, whose care and comfort for years has been first in his thought and chief in his consideration Mr. Bird wished final news from her bedside before giving himself up to the operation. Cheering reports of her condition gave him courage for his own ordeal. It was his request from the first that news of his illness be kept from her as he feared its effect upon her in her weakened condition. The couple have no children and have lived a retiring life for over thirty

years in the house at 1147 Pleasant street, Brockton Heights, which was built by Mrs. Bird's parents. They conducted a small greenhouse and for years have left their home but seldom.

Fred. W. Vick.

After an illness dating back for several months, Fred. W. Vick died at his home in Rochester, N. Y., on Sunday,

FRED W. VICK.

November 12. Mr. Vick was born at Rochester in 1855. He began his career as florist and grower with the late James Vick, and during the last few years he was superintendent of the greenhouses. It was while with this firm he was instrumental in introducing Vick's Caprice rose. About 1892 he, with his brother E. H. Vick and John Hill, formed the Vick & Hill Co. He remained at the head of this concern until about three years ago when he disposed of his interest and took up the growing of flowers for the wholesale market. He introduced Vick's Daybreak and Purity asters as well as several other good varieties of flowers, among them Vick's Ruffled petunia. Mr. Vick was one of the

VEGETABLE GROWERS' ASSOCIATION OF AMERICA.

Report of the Committee on Nomenclature and Varieties by Prof. C. E. Durst.

The principal work of the Committee on Nomenclature of the Vegetable Growers' Association of America the past year has been done in connection with a similar committee appointed by The American Seed Trade Association for the express purpose of co-operating with us. In handling this subject your committee has taken the same position that the American Pomological Society took over fifty years ago. We believe a variety name should contain as few words as possible. It should be distinctive and, if possible, suggestive of the variety for which intended. The rights of the originator and introducer should be fully recognized and conserved. A name already in use for one variety should not be used for another variety. The name of the variety, once given, should not be changed. In the last analysis, the whole proposition revolves around the point as to whether or not the seedsmen should exercise absolute control over the name. In other words do they own it? Your committee, after long and careful thought, believes that so long as a seedsman, or any other person for that matter, has a variety under test, or is growing it for his own personal use, he may call it anything he wishes or may change the name as often as he desires. However, when a variety is once introduced to the trade, it automatically becomes a matter of concern to the general horticultural public, who should be entitled to some interest in the form and stability of the name.

Your committee feels it is almost futile to expect any important results in standardizing existing nomenclature. It is our hope that the seedsmen will be induced to drop off some of the superfluous descriptive adjectives. We hope also to dissuade them from renaming varieties now on the market. Beyond this, we hardly expect to accomplish much with existing conditions. If we can begin at the present point and secure the co-operation of the seedsmen in regulating and standardizing nomenclature for the future, we feel that the present complicated conditions will take care of themselves in due time.

In all of the correspondence and discussions, your committee has strongly contended that a duly authorized board or committee should be given charge of the testing, describing, establishing of types and certification of varieties. It is our idea that this committee or board in co-operation with the originator or introducer, would decide upon a name that typifies the variety, and at the same time recognizes the advertising value of a name to the dealers, protects the originator or introducer and conforms to

an established system of nomenclature to make buying easier for the consumers. The proposed introduction would be offered to the above board or committee for test, it being understood that no portion of the seed or stock should be given to other parties or used for any purpose other than testing. In order to further protect the introducer, he may offer the proposed variety to the trade at the same time it is offered for test. If, after due trial, the proposed new variety proves meritorious, it would be duly registered or certified.

We firmly believe that a policy of testing and certification will go a long way toward establishing and maintaining the rights of the originator and introducer. A man who originates or introduces a meritorious plant variety does as great a service for mankind as he who invents an improved machine, and certainly he should receive full credit for the same, and his rights should be conserved. With conditions such as have prevailed in the past, the identity of the originator and introducer are soon lost in the maze of names given a variety in the catalogues. The better the variety the more this is true, and the longer it takes the variety to work itself into favor.

The proposed testing certification, we believe, should be placed in charge of an authority who would have no interest or purpose other than be of service to all parties concerned. At the same time, this authority should be such that its findings and decisions would command respect by all parties concerned, and, of course, it should have a full understanding of the details necessary for conducting comparative tests. The U. S. Department of Agriculture, either alone or in conjunction with state experiment stations, should meet such qualifications, and the question remains as to whether or not it could be prevailed upon to conduct this important service. Your committee feels, however, that before any public institution should assume this responsibility, it should be duly authorized for the same. This feeling on the part of your committee, coupled with the fact that our relations with the seed trade people have suggested the great necessity of carefully working out all details before attempting and testing, led us to delay the testing which we hoped to start this year and which we stated we expected to do in the last year's report. Our thanks are due to the experiment stations who offered to co-operate in this work. We regret to have asked this favor of them and not to have taken advantage of it at once.

In regard to the length of the name, it is our idea that it should consist of not over two words, including that of the originator or introducer, if it is desired to prefix that. The seed trade people contend that a liberal use of descriptive adjectives is necessary

for the small home grower, who is not so familiar with varieties as the commercial grower. These people, they claim, can often get a more accurate idea of the characteristics of a variety from a number of descriptive adjectives than if they read the fine print. This view seems plausible on first thought, but the trouble about the matter is that one seed dealer goes one way in the choice of adjectives, and others go in other directions. Soon, they are so far apart that it is almost inconceivable that they had a common starting point. For instance, Prof. Tracy, in his study of best varieties, found the variety Early Blood Turnip (the original name) varying all the way from that name to Improved Extra Long Deep Blood Turnip, with practically every combination between. How could any grower, we ask, be certain that beets grown from seed sold under such widely different names would be of the same variety?

The members of the American Seed Trade Asso., it appears, feel that home growers know little about varieties. This contention needs qualification, we believe. Take the old standard Stone tomato, The Evergreen sweet corn. The Early Ohio potato and many others which might be named. What home grower is not familiar with these? No long string of adjectives is needed in these cases. Why should they be needed in other cases?

On the other hand, we admit that the home growers may not be so well acquainted with the introductions of recent years, but we feel that this is due largely to the fact that the names are not usually left long enough in the same form to enable these people to become acquainted with them.

As to the changing of names, your committee has held consistently that the name once given to a variety should not be changed. The American Seed Trade Asso. state it is necessary to change the name in some cases because they find a variety does not sell well under one name, that is, they allege that the name has no advertising value. For instance, at the Seed Trade Convention, one member stated that Golden Bantam sweet corn was formerly sold under another name, but that there was little demand for it. Mr. Burpee it was stated, recognized the value of the variety, renamed it, and from that time onward, the sales rapidly increased. This the member held, was the result of choosing a better name. Now, it will be remembered that the Burpee Seed Co. conducted a most strenuous advertising campaign in connection with Golden Bantam sweet corn, and we are inclined to feel that Mr. Burpee's genius in the field of advertising was more responsible for the increase in popularity than the mere changing of the name. With us, it is an open point whether or not the variety would not have met the same success

under the former name with the same advertising.

Now, we all recognize there is a great deal in a name, but we believe the most careful thought should be given this matter in the beginning so that changes will not be necessary. A firm concerted policy by members of the American Seed Trade Asso. toward retaining a name without change would prove beneficial to them in other directions that would more than offset any loss in advertising value because of having selected in the beginning a name that did not prove out well.

Your committee believes that multiplicity of names is in most cases brought about in the following manner. One seedsman introduces a new variety. It proves to be valuable. Other seed firms recognize its value and desire to profit by it. But they hesitate to put it out under the original name, not wishing to appear to follow in the other firm's footsteps so they secure seed of the variety and sell it under a new name. In fact, we have been told by seedsmen that this practice is often followed. The better the variety the more abuses of this kind occur. While it may mean the sale of some seed at high prices for a time, we believe that the other policy would be the better one, for plain business reasons, in the long run, since it would tend to re-establish the confidence of the growers in seedsmen, which we must admit is not the best at present.

Your committee has pointed out to the members of the American Seed Trade the advantage of advertising under a special strain name of a variety, rather than renaming. Take the Earliana tomato, for instance. It is probably sold under thirty or forty different names. On the other hand, there are a few firms who have not changed the name at all, but who have emphasized in their advertising their particular strain of this variety, using such names as Adirondack, Floracraft and Sunnybrook to designate the strain named. This method not only gives the vegetable grower some assurance as to what he is likely to get, but would seem to be better advertising policy for the seedsmen as well. The firm which emphasizes a particular strain of a variety has something tangible to build upon, whereas the firm which changes the name entirely has first to make the new name known and then must establish a reputation for the variety under that name. Being the only firm which is selling the variety under the name, it has an uphill job on its hand.

A number of other points have received consideration in the discussions and conferences between the two committees, but it is not possible to discuss all of them here. To summarize, your committee has asked that the superfluous descriptive adjectives be dropped; it has insisted that the practice of renaming be discontinued; and it has contended for greater uniformity in the catalogues of different seedsmen. So far as present nomenclature is concerned, we are not entertaining hopes of accomplishing a great deal, since too much friction would probably follow for the results likely to be attained. For the future, however, we are hopeful that a system of procedure can be worked

MICHELL'S BULBS

We have just received several late shipments of bulbs, all in fine condition.

out that will prevent further confusion. Mistakes of the past, we believe, will remedy themselves in due time if allowed to follow their natural course. If the seedsmen will adopt a system along the lines proposed with modifications, perhaps, as further experience will suggest, we feel certain that it will serve the interests of both parties. For the vegetable growers, it will mean easier buying and fewer disappointments, while for the seedsmen it will simplify business, decrease mistakes, and prove to be better policy from a business and advertising standpoint. The result would be a feeling of confidence between the growers and seedsmen, which is absolutely necessary for complete success in any business.

Buffalo—Buffalo's first free municipal flower show opened on Saturday evening, Nov. 11, at Elmwood Music Hall, the products of the various park conservatories maintained by the city being here assembled in a magnificent galaxy of color, which gave delight to thousands of enthusiastic visitors. The show continues all through the present week.

SEED TRADE.

One Week's Imports.

NEWS NOTES.

Cambridge, Mass.—The greenhouses
owned by P. O'Brien & Sons, 1022 Mas-
sachusetts avenue, were destroyed by
fire November 9.

Cincinnati—Both the E. G. Hill
Flower Co. and E. A. Foster gave
flower shows at their respective
stores last week. Each was a suc-
cess, particularly from an advertising
standpoint. Mr. Foster had on dis-
play at his store an elegant assort-
ment of chrysanthemums while his
large 9 by 23 glass ice-box was filled
with choice roses. In the Hill store
was shown all the novelties in chrys-
anthemums as well as an excellent as-
sortment of other seasonable flowers.

NEWS ITEMS FROM EVERYWHERE

CHICAGO.

Growers of American Beauties say the buds of the Christmas stock are starting nicely now.

The students in the horticultural department of the University of Illinois, have charge of the decorations of the auditorium in which the Illinois Federation of Women's Clubs are holding their annual meeting this week, in Champaign.

The American Bulb Co. has just received two more cars of Japanese lilies. Samuel Seligman of this firm is back from a business trip and will remain here till after the holidays, looking after the sales of the large stock of Christmas novelties they have ready for the trade.

A cold wave has reached here and the thermometer registers but a few degrees above zero, much to the dismay of the florists who are not ready for winter. There are seven car loads of azaleas in cars in the Chicago yards, whose owners would much prefer to have safely housed.

Iles Cole is in the city looking up new stock and ideas for the holidays. He reports business in Springfield good. At the exhibit at the State Association last week, Mr. Cole had a fine collection of cyclamen, chrysanthemums and carnations, which they grow for their retail trade.

The Floral Art and Novelty Display given Sunday under the auspices of the Chicago Florists' Club seems to have made a good impression on the writers for the city papers. Monday's Herald includes in its write up, a picture of the little twin daughters, Mary Louise and Margaret Virginia, of Mr. and Mrs. Fred Lautenschlager, sitting in the big basket of flowers on the baby table. The Tribune was even more liberal with its praises of the show and gave a picture of Susanne Leslie, wearing one of the ankle bouquets. Miss Edna Frauenfelder, daughter of the big west side florist, also received commendation from the city press and well she deserved it. For the generous amount of space given to the display, those who stood back of the affair feel very appreciative of the help the local papers have been to them.

Among those who represented Chicago at the State Florists' Association at Bloomington, last week was A. Kohlbrandt of the E. C. Ambler Co. He described the exhibit as very good indeed and the attendance and interest in the meetings most encouraging. The exhibitors included growers from all over the state as well as Hill & Co., from Richmond, Ind., Crown Point Floral Co., Crown Point, Ind. and Robt. Craig Co., Phila. They were entertained at A. Washburn's, Edwardsville, Ill., by a luncheon and with an auto drive by the Commercial Club of Bloomington. A special feature of the meeting was the exhibit made by the school chil-

dren of chrysanthemum plants which they have grown themselves and for the best of which a prize of \$50 had been offered. Among the Chicago exhibits was a large bed of palms and decorative plants by Poehlmann Bros. Co.

WASHINGTON, D. C.

Dr. Walter Van Fleet has gone to Boston, New York and points in New Jersey to secure rare rose species.

Prof. F. L. Mulford has been spending considerable time in Norfolk and other Virginia cities studying chrysanthemums and ornamental plants.

Carpenters are again at work on the store of Marché & Co. A lease was consummated by Mr. Marché whereby he secures possession of the entire building in which the store is located.

The many friends of M. J. McCabe, of Good Hope, D. C., are welcoming him back after an absence of several weeks with relatives in New York endeavoring to overcome a nervous breakdown.

Southwick C. Briggs has sold his entire orchid collection consisting of in the neighborhood of 12,000 very valuable plants. It is expected that all of the stock will have been moved by December 25, after which time local florists must look to out-of-town sources for their orchid supply as none will be grown in this city hereafter.

William F. Gude was among the visitors at the Philadelphia and Lancaster, Pa., flower shows last week. He considers these to have been the best exhibitions that he has seen for some time. He declared, however, that the retailers of these sections were overlooking a big bet in failing to take advantage of the activities of the growers in making exhibitions advertising themselves at the same time.

The colored chauffeur employed by the Leo Niesson Co. had a very narrow escape from death last week when a touring car hit the delivery wagon which he was driving. His car turned a somersault and was thrown fourteen feet. The chauffeur emerged from the wreck badly scared but holding aloft an order of American Beauty roses which he had protected during the acrobatic proceedings of the machine.

PHILADELPHIA.

In our notes last week on the Philadelphia show, hurried proof reading was responsible for the word "cyclamen" appearing instead of chrysanthemums in reference to Mr. Seybold's exhibit.

The flower show wound up on Friday night with a good attendance and, all things considered, it was a very creditable exhibition. About the only thing not already reported on was the vegetable display staged on Thursday. This was unusually high grade and well staged—showing that even the vegetable growers are slowly beginning to realize that it is possible to put a little of the artistic touch into even their prosaic product.

NEW YORK.

L. A. Noe has gone away for a period of two weeks.

Angelo Dentale has opened a cut flower wholesale office at 41 West 28th street.

Wm. H. Long, of Columbus avenue, is in the hospital after undergoing two serious surgical operations.

The Wholesalers' Protective Association will have a banquet at the Hotel Breslin on Saturday night, November 18.

W. L. Trumpore has resumed his old position as buyer for J. H. Small & Sons, leaving his son in charge of his Staten Island store.

H. M. Robinson Co. are adding a department of florists supplies, sago palm leaves, etc., to their cut flower establishment in the Coogan Building.

Stumpp & Walter Co. have made extensive improvements in the arrangements of their various offices and departments in their Barclay street building.

In all the wholesale flower establishments holding membership in the Protective Association a notice is displayed announcing that from November 15 a deposit is required on all boxes, which will be refunded on return of the empties.

The annual chrysanthemum exhibition of the Park Department, Borough of Queens, opened last Saturday in greenhouses in Forest Park, Myrtle and Woodhaven avenues, Glendale. Nearly one hundred varieties are shown, some of them grown in soil brought from Japan. The exhibition will be open nights until 10 o'clock.

BOSTON.

Mr. and Mrs. Patrick Welch are in New York and Washington this week, celebrating their 25th wedding anniversary.

Frank J. Dolansky has donated a huge silver cup as a trophy to promote keen competition in the annual gridiron clashes between English and Classical High schools of Lynn, Mass.

Penn, the Florist, are holding their annual fall flower show commencing Thursday morning, to continue three days. The judges include William Nicholson, James Wheeler, W. N. Craig and Robert Cameron. Cash prizes will be awarded.

A. E. Kunderd, of Goshen, Ind., who has been visiting gladiolus growers in and about Boston, the past week, states that despite the weather conditions which existed during the spring season, his gladiolus bulbs came through all right and he has harvested one of the best crops in recent years.

PITTSBURGH.

The E. C. Ludwig Floral Company has just completed a storage house 68 by 25 feet, of concrete and tile, on their plant at Mars, Pa.

The A. W. Smith Co. has the contract for the landscape engineering on the recently purchased Sewickley Heights estate of Harold N. Van Voorhis.

J. M. Johnston, the McKeesport florist, has for some time been experimenting with girls for the light work in his greenhouses, and reported their services highly satisfactory.

Some of the finest William Turner chrysanthemums grown in this section are to be seen in the greenhouse of the old Thaw estate now leased by J. J. Fisher, where Neil Forsyth has supervision.

Mayor Joseph G. Armstrong has ordered Park Supt. Burke to contribute the floral decorations for the farewell reception to be held next Wednesday evening for Dr. John A. Brashear, who will leave on Thursday for a trip to the Orient.

Miss Corry De Pries has returned to Amsterdam, Holland, owing to the illness of her father. Miss De Pries has for several years been private secretary to Berthold Frosch, prior to which she was foreign correspondent for one of the large Dutch bulb houses.

At a recent dinner at the Allegheny Country Club, the dining room was transformed into a charming Japanese garden. In the center of

the room was a huge gazing ball in a bed of crotons from which led a path overgrown with tropical plants. A high handled gilt basket filled with assorted chrysanthemums was used on each of the twelve tables.

During the Western Penna Exposition just closed, about 25,000 pieces of literature were distributed by Norman S. Grubbs, assisted by Alexander R. Chambers, who has just entered the agricultural department of State College. The booth exhibits, which occupied about 1,000 square feet of floor space, included models of up-to-date lawns and gardens, fruits and vegetables, etc.

ST. LOUIS.

The Chrysanthemum Show at Shaw's Garden has drawn large crowds.

The St. Louis Florist Club met on Thursday, Nov. 9, at Odd Fellows Hall. Attendance small. Spring flower show committees reported progress.

F. C. Weber's store on Olive street has always an attraction for passers on the main Olive street car line. His window displays are artistic and very attractive.

Flower Market Reports

BOSTON The cold snap of the present week has had very little effect on volume of business or prices thus far. There is an abundance of everything in the market. Beauty roses are not in oversupply but there seem to be enough for all needs. Quality is good on everything. Calendulas, daisies, snapdragons, sweet peas, pansies and similar items which go to make up miscellaneous stock are becoming more plentiful and find as good a sale as usual at this early date.

BUFFALO The past week was chrysanthemum week. There was a heavy supply and the largest portion was the cleanups of the early varieties. The late varieties are coming in and the quality is excellent. Roses have been in heavy supply and the demand greatly fallen off. The same may be said of carnations, lilies and other stock. Saturday saw a fairly good cleanup, except on roses. Violets are good, but no special demand. There is about enough lily of the valley, etc., to supply the need and there is plenty of green of all kinds.

CHICAGO The unusual quiet that has hung over the Chicago market for the past two weeks is expected to be over soon. It is true the receipts of chrysanthemums will be heavy for several weeks to come, but it is expected that, with the coming of cold weather, the demand will be such as to move the stock. Roses are shortening up and not so many go to the street corners. Carnations are too plentiful to sell to the advantage of the grower and the best stock goes for two cents. Lower grades are often sold for anything they will bring. If the Thanksgiving sales are not good enough to make up for losses of the past month, then growers will be deeply disappointed. American Beauties are getting quite scarce, especially in the fancy lengths and a good Christmas supply is expected.

CINCINNATI Very heavy receipts, together with a steady but only fair demand has caused somewhat of a glut in the market. Prices are down to a low point and even at this level it is impossible to clean up all receipts. Chrysanthemums are in a supply that undoubtedly is as large as this market has ever known. All sizes and varieties are selling at prices below what they should bring. Roses are very plentiful and generally are excellent. Carnations are now more than sufficient for present needs. Lilies also are plentiful. Paper White narcissus and callas add to the general crowded condition of the market. Orchids, lily of the valley and sweet peas find a fair market.

NEW YORK The market in New York has been in a very desperate condition but all are hoping that the cold wave now prevailing may help to improve the situation. The wholesalers and growers have been hit hard. This is to be expected every year at the height of the chrysanthemum cut but this year has been exceptionally severe. Some of the retail stores seem satisfied, however, with the amount of

business coming in. They certainly cannot find fault with the cost of material. Roses have been of very excellent quality. White carnations are also fully up to the best winter standard. Cattleyas are shortening up. There are still some labiatas in sight and Percivalliana is coming in quite freely already and prices run easy on the ordinary quality of these. Trianaes on the other hand are very few and they bring big figures, even up to \$1 apiece for select blooms. Lilies are very abundant and cheap. Violets are still in limited supply and of only fair quality, with the exception of Gov. Herrick, of which some good bunches are seen. Chrysanthemums dominate everything. There are lots of paper white narcissi and calendulas, also some nice sweet peas and the first cuts of stevia.

PHILADELPHIA Roses and carnations moved a little better last week. The supply was not so redundant, prices held fairly firm, and there was not so much of a surplus.

The chrysanthemum was, of course, the thunderer, right, left and rear. Orchids are scarcer and going up. Cypridiums have made their appearance in limited quantity. Gardenias are also a little bit on the scarce side. Lily of the valley moves fairly well, but lilies go slow. Greens are moving a little better, although the autumn foliage still butts in on them and limits demand.

PITTSBURGH Business continues fair, although it is not sufficient to utilize the wealth of practically all kinds of flowers of fine quality, which continue to come in continuous flow, as it were. Chrysanthemums are fewer in quantity than other blooms. There are excessive quantities of splendid carnations and roses.

ST. LOUIS The past week have St. Louis a glut in all kinds of flowers. The wholesalers, in order to unload, had to make prices low. With the change at time of writing, to cooler weather

Flower Market Reports

(Continued from page 77)

it is hoped that stock will curtail and the market become normal. The retailers had special sales, particularly in the downtown district, offering stock at "slaughter" prices. Can anyone tell us how to handle the glut and prevent the demoralization in prices?

Last week was one of the slowest of the year. Outside chrysanthemums still continue plentiful, because there has not yet been a frost sufficiently severe to kill them. Chrysanthemums rule the market to the detriment of all other stock. Sweet peas sell well, probably because they are scarce. Lily of the valley is more plentiful than for some time. Violets have not yet come into their own. Tip Top, Baby Doll, Sweetheart and other roses of the same type are reported to be increasing in favor among seminary girls who are large purchasers of corsage bouquets.

POT FAMINE HERE.

A recently published item stating there was a "pot famine" coming, was correct as far as it went; but if the manufacturers of flower pots had their say I believe they would have said "pot famine here." I hear of one pottery facing an 8-hour day, with no reduction in weekly wage—with Saturday afternoon off; another facing their third 10 per cent raise; another with lack of coal, due to freight congestion; another being delayed in delivery of a new boiler; another had to change to coal as fuel because of prohibitive cost of natural gas, and several others of like nature; each are having their own new troubles in addition to their old troubles of coal, labor and material costs. The munition factories have taken all available labor and the demand for machinery has of course increased the costs of machine supplies.

The whole trouble is this—labor being scarce during the past spring and summer made it impossible for the pottery to make up the necessary stock usually made during the spring and summer of former years and with no stock on hand when the season opened, the demand for pots, with a depleted working force working as it were from hand to mouth, orders piling up, men quitting, almost daily notice of advancing prices of material with continual demand by employees for more money and less working hours—it has come to such a condition of affairs that one potter says

he feels as though he is no longer "Boss" and that he must shake hands every time he goes through the factory, take his hat off and be extra nice to all employees and, between visiting trade, pleading for additional time for delivery of orders, chasing railroad freight agents for delayed shipments, looking for new labor, and then trying to figure out that his books show balance on the right side, the potter certainly has his hands full.

However, I am sure that all the potteries of the country are well equipped and willing to do more business; the labor situation and coal are the only doubtful reasons why you have to wait for pots.

P. M. READ, Sec'y,
Pot Makers' Credit Association

PERSONAL.

S. J. Reuter, the veteran florist of Westerly, R. I., who has been ill for some time, is reported to be very low.

Edward J. Norman, Jr., formerly foreman on the Alfred G. Vanderbilt estate, has taken a position as landscape gardener with A. N. Pierson, Inc., Cromwell, Ct.

Assemblyman Arthur Cowee, who led the ticket, practically had a walk-away in his race for re-election to the Assembly from the Second District, Rensselaer County, N. Y., winning by the handsome plurality of 2,031.

Carroll N. Bond, a Brattleboro, Vt., florist, met with an accident recently which cost him the loss of one eye. Mr. Bond was clipping a wire with some cutters when one of the wires sprung back and struck him in the eye. It became necessary to remove the eye in order not to impair the sight of the other eye.

**GREENHOUSES BUILDING OR CON-
TEMPLATED.**

Austin, Minn.—W. T. Hanscome, 305 West Maple street, house 28x75.

Ansonia, Conn.—J. O. Raab, 420 North Main street, house 14x27.

Columbus, O.—Mrs. A. J. Allwood, River road, two vegetable houses.

Jamaica Plain, Mass.—Edward A. Clark, range of King houses completed.

St. Louis, Mo.—Joseph Haemmerl, Kings Highway, two houses completed.

NEW CORPORATION.

Madison, N. J.—The Noe & Ruzicka Co. Inc. Incorporators, L. A. Noe, Jos. F. Ruzicka. Capital \$75,000. The above firm purchased the plant of the Brant-Hentz Floral Co. and after some changes will continue to grow roses. Mr. Brant is leaving Madison to devote his time to the extensive plant of Brant Bros. at Utica, N. Y.

**STANDARD FLOWER
POTS**

If your greenhouses are within 500 miles of the Capitol, write us; we can save you money.

W. H. ERNEST

29th & M Sts., Washington, D. C.

The Florists Hall Association rate of insurance from Nov. 1st, 1916 to Nov. 1st, 1917 will be twenty cents per hundred square feet of single thick glass and eight cents per hundred square feet of double thick glass. For particulars address JOHN G. ESTER, Sec., Saddle River, N. J.

Note the way the cypress vent header is supported by the purlin and the way the purlin is secured to the rafter by a good husky fitting.

Whether solid glazing or side sash are used, we always use a cypress member beneath the plate. The sash are hinged to it. We will gladly tell you why other methods are not what they are cracked up to be.

Some Differing Differences In Our Wide Spaced House

BY wide spaced, we mean that the distance between rafters is 12 feet 6 inches instead of the old 8 feet 4 inches.

There are several concerns who have now followed our lead in this wide space, but none of them construct their construction to take care of the shift of strains the way we do.

None of them feel they can safely use glazing with 20 inch glass. They stick to 16 inch. So they have nine bars between rafters, while we need only seven.

If there was the least doubt about the practicalness of our method of using 20 inch glazing; the growers who have given it several years test certainly would not have built additional houses as they have year after year.

Surely a careful, surely sure man like L. B. Coddingdon wouldn't build four houses this year each 61 feet x 500 feet, if those four we built for him several years ago were not entirely satisfactory.

Knowing full well the additional strain put on the extra length purlin used in the wide spacing, we designed a special long extended knee fitting that

bolts to the rafter and the purlin, giving it the additional supporting strength that our engineers proved was needed.

Then instead of using excessively heavy purlins to prevent a sag downward towards the eaves, we put in our intermediate pony rafter between the vent purlin and ridge and then from it ran a sag rod to the eave; anchoring each purlin to it. You can see it on the fourth spacing above.

When it comes to making a decision about whether you will buy our house or some other; don't allow the argument of weight or quantity of iron to over-influence you.

It is not so much how much iron, as how that much is used.

For example, a wooden automobile wheel looks a lot stronger than the wire ones; but tests prove that one is exactly as strong as the other.

Our Supply Book goes thoroughly into every construction point of our construction. Send for it.

You know we go anywhere for business. Or to talk business.

CHRYSANTHEMUM NOVELTIES

1917

Our Novelties for 1917 are the best we have ever had. The finest of the year in the large flowering type will be —

LOUISA POCKETT

Mr. Pockett, who raised both varieties says that Louisa Pockett will easily displace Wm. Turner as the best white in cultivation. From our knowledge of it I can endorse this statement.

In 1906 I distributed Beatrice May which remained our standard white for years. Five years later in 1911 I distributed Wm. Turner and now after a lapse of five years, in 1917 I will distribute this sensational white that surpasses all others—**LOUISA POCKETT**.

This is a seedling from Turner but a larger flower and heavier grower.

Other splendid Novelties for 1917 will be:

NAG-IR-ROC; W. H. WAITE; PRES. JOHN EVERITT; OCTOBER KING and BOL D'OR. January delivery, 2½ in. pots, \$16.00 Dozen; \$100.00 per 100.

We will also distribute Schaffer's
PHENOMENAL JAPANESE ANEMONES

And our new **SINGLES** for 1917, are as usual
THE FINEST IN THE WORLD

BOGOTA (Chapinero) COLOMBIA

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE

"If vain our toil, we ought to blame the culture, not the soil."—*19c.*

Cyclamen

Keep the house fairly moist by damping down the walks night and morning. Place the plants well up to the glass so they will grow stocky. Do not syringe over head and use the watering pot in lieu of the hose. Look over the watering as early in the day as possible as they should become dry by night. The cyclamen does nicely in a little over 50 or 55 degrees at night. Additional greenhouse space will soon be at liberty as chrysanthemums are cut out. Cyclamen in two or three inch pots will still do in frames for a few weeks, if well looked after and protected on severe nights. Plants that are fairly well pot-bound and in good health will stand liquid once a week from now on. See that the hole in the bottom of the pot is kept clear.

Flowering Plants for Christmas

Ventilate freely, but beware of cold, piercing air striking flowering plants as it will prove a quick despoiler of their beauty. With the increased fire heat and sudden bursts of bright sunshine now and then pot plants will want liberal watering. Give all that show proper expansion of bloom cooler quarters, not necessarily well-lighted. When treated this way they will finish up in fine shape and will handle better in every respect than if kept in strong heat up to the last. With Christmas only about 25 or 30 days away much can be accomplished in properly preparing stock for the occasion. All plants that are a little behind, but justify a hope that they can be brought in on time will stand a week of hard forcing, anywhere from 60 to 70 degrees at night according to the kind of plants. So be up and doing, for every day counts now.

Hybrid Perpetual Roses for Easter

If you have not grown your own stock in pots all summer—which is the best—go to some near-by nurseryman and get a supply without delay. Well-grown hybrid perpetuals in pots will attract many buyers for this spring holiday and now is the time to begin on this line. When potting them use from a 7 up to a 10-inch pot, according to the size of the plants. Use any good rose soil and give each pot good drainage, for later on they will require plenty of water at the roots. Pot quite firmly so that every root will be compactly surrounded with soil. They can then be put in a deep frame and enough strawy manure put over them to keep the frost from breaking the pots until it is time to bring them in for forcing.

Poinsettias

Poinsettias in pans or pots should neither be over-watered nor allowed to become dry at the roots, as either extreme will cause the foliage to turn yellow. Stock fully developed will be better for having the temperature lowered to about 55 degrees four or five days before they are wanted, as it will help them to harden up. Those not yet well developed in their bracts should be given anywhere from 65 to 70 degrees at night with an increase of from 15 to 20 degrees during bright weather. To have cut poinsettias in perfect condition they should have the ends cauterized by being dipped in boiling water for about twenty seconds, which will prevent their wilting, and the stems then immersed half way in water. The best temperature to keep the bracts in after they are cut is from 45 to 48 degrees, leaving them here from 12 to 18 hours which will put them into fine shape to stand up for the holiday use.

Tulips and Von Sions

It happens often that a portion of the main crop of these bulbs intended for spring trade, is neglected until too late, for lack of time or other reasons. Main crops of narcissi, hyacinths and tulips should be planted now without delay. It is well to have these bulbs outside until about the middle of December, when they can be brought in and stored under a bench in a house of 50 to 55 degrees. The necessary condition to force tulips from December until March is some place where they can have a strong top heat, with only a mild heat at the roots. Two or three times daily spraying will be necessary for the earliest ones. Eighty to eighty-five will not be any too high a temperature when the sun shines. See that they are kept moist at the roots at all times. If you want to keep the flowers for some time before they open place in a shaded and cool place.

Reminders

Now is the time to sow canna seeds. Give them a thorough soaking and chip lightly before soaking.

Plant antirrhinums as the chrysanthemums are cleared away. Sweet peas can also be planted for a successional crop.

Put gladiolus Colvillei, and any of the nanus section in flats as soon as bulbs are received.

Sow cyclamen again for succession; obtain the best strain, as it does not pay to grow poor seed.

Next week: Holiday Suggestions; Lilies for Christmas; Lillium speciosum; Lorraine Begonias; Rhododendrons for Forcing; Reminders.

The newspapers' help

Perhaps the most significant feature in connection with the recent successful floral art exhibition of the Chicago Florists' Club was the unusual amount of high-class newspaper publicity accorded to the event. To get the large metropolitan dailies, such as the Chicago Daily Tribune, to devote prominent reading space and pictures to an affair conducted by any trades people is something almost beyond the limits of possibility, as is well known to anyone who has ever tried it. Just how it was accomplished in Chicago we do not know, but probably Fred. Lautenschlager's generalized explanation comes close to the truth:—"It seems that it was the kind of a show that the newspapers like to speak of and the kind of a show the public prefers to visit." Mr. Lautenschlager was the publicity man and he should know, if anyone does. However, we have no doubt that Mr. Fred's well-known persuasive personality was no small factor in the achievement.

A successful show season

There are a few straggling fall exhibitions yet to be heard from but the great majority of them are now past and the industrious workers—officials and exhibitors—may now rest from their worry and toil and sum up their experiences with a view to planning discreetly for the next series. HORTICULTURE has done its level best in this trying period of high cost of paper and other material to give adequate space for suitable record of what has been going on in the exhibition world and it is hoped that our efforts have not failed of appreciation. It is very encouraging for us all to note that the reports from exhibitions everywhere are so uniformly favorable. There was a time, not many years ago, when the reverse was true with a regularity that was disheartening. We have not been backward in expressing our views and convictions as to the policies that would make for still greater success in the present attitude of the public and we have good reason to believe that HORTICULTURE's zeal in that respect has not been fruitless.

Thanksgiving Day

Before "ye editor" has another opportunity to exchange greetings with HORTICULTURE's readers another Thanksgiving Day will have passed into history. The observance of the joyous old New England holiday all over the land seems to increase as the years roll along in its value to the flower trade and for that boon at least the flower trade should be especially thankful. Any occasion or movement which affords opportunity to enlarge our business and thus realize in a more substantial manner on the *entire* product of the industry is, in our humble opinion, what the American florist stands most in need of today. Any such realization would be justifiable cause for a day of thanksgiving such as the florist has rarely experienced. How to proceed to raise the market value of flowers in the existing emergency, in keeping with the advancement in cost of other commodities, is a very serious problem and one that seems almost insurmountable. But if we cannot raise prices we *can* increase sales and thus turn to profit the enormous waste which the flower business has been standing for with marvelous patience and equanimity.

Fire prevention

We have all heard and read considerable regarding "Fire Protection Day," which has recently been widely observed all over the country. While it is important that the cooperation of every commercial interest be given to this vitally important movement yet it is true and should be recorded that the greenhouse industries—meaning not only those who operate greenhouses but those who make a business of building them—have been zealously working for the ideals for which "Fire Prevention Day" stands, insistently and persistently, for years and years. In no other line of building construction has the elimination of fire hazard received closer attention or been carried forward to a greater degree of success than in the structure and equipment of the modern type greenhouse. There was a time, which is still fresh in the memory of many of us, when a greenhouse establishment was justifiably looked upon as something of a menace to any residential neighborhood because of its liability to start a conflagration. But greenhouse buildings and heating outfit as constructed and installed today by the leading specialists in such work are no longer a source of danger either to themselves or adjacent structures and from being known as a vulnerable and risky proposition, greenhouse property, if up to modern ideals in structure and materials is well entitled to stand in the "preferred" class.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Razick

Questions by our readers in line with any of the topics presented on this page will be answered by Mr. Razick. Such communications should invariably be addressed to the Editor of HORTICULTURE.

Disbudding

This will have to be attended to regularly now, as the roses will be too valuable to have their quality impaired by allowing a lot of side buds to take the strength away from the bud proper. It often happens that some of the bottom breaks or the extra heavy growths do not bear a good bud. In this case it will be profitable to remove the top of the growth to about where the rose would be cut, and do this as soon as the bud shows what it will be like. If this is done soon enough the eyes on the growth will break at once and there will be three roses where there was only one poor one. There may be some deformed buds on the weaker growth and all these should be taken as soon as they show up. Do not cut these back too far but take them out with the one leaf only so that it will not be long before the growth will bear a bud again and it can then be cut down to where it should be. When doing this work be sure to have a bag or something to put the waste into as it is poor policy to drop everything on the benches where it will have to be picked up again. Green fly, thrips and other insects usually are at the top of the shoots and if there should be any on the buds taken and the buds dropped on the bench it would give the insects an excellent chance to get right on the plants again. Pick them up as they are taken off and burn them later.

Pinching Beauties

It will be well to go through the Beauty houses every so often and pinch all the real short growth such as would produce a No. 3 flower. Care should be taken, however, to see that the work is done on time and not let go until the buds are big. The proper time is when the buds are about the size of a wheat grain, or in other words as soon as they are large enough to be seen. The buds should be taken down to a good leaf. This

work is so simple and so profitable that it is well worth cutting heavy and are pretty well cut off. It will not be long before these pinched shoots will start growing again and will soon run up into a fancy or an extra, thus proving not only far more profitable but helpful to the plants as well, as they will have something to keep the roots busy, and that is what they need especially in dark weather.

Thanksgiving

It will be here next week, and in spite of all our troubles such as labor, coal, high prices for all raw materials, we have a great deal to be thankful for. Business is good with prospects of being better, and we should try to better it by growing better stock, handling it better, in fact do all we can to get our products to the homes of our patrons as fresh as possible, and this will mean more sales. Do not try to hold the cut roses for a week ahead of the holiday in order to benefit by the higher price that may be paid then. It is bad business and there is nothing to gain. If stock should be very scarce pickled roses may sell, but if there is a good supply all poor stuff will be dumped, as it should be, and it will not be only the grower who will lose but the whole trade will suffer more or less.

Lining Boxes

With the thermometer down to 20 mornings it will be necessary to see that the boxes are properly lined so that the roses will not be cold or frozen when they reach the market. Paper is high priced so it will be well to see your wholesaler and get a line on how many sheets are required at certain temperatures. He is the man who gets the stuff and he will know better than the grower. When lining the boxes see that the corners are well protected as it is here where most of the cold air gets in and freezes the roses.

TWELFTH ANNIVERSARY NUMBER — AND — CHRISTMAS SPECIAL

Will be Issued under Date of

DECEMBER 9, 1916

A Deserving and Business Promoting Issue as heretofore. **Patronized by the Best Trade.** Goes to press on Thursday, December 7. Send advertising copy a few days in advance and give us time to place it well. **No Advance in Space Rates.**

CLUBS AND SOCIETIES

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The regular monthly meeting of the Gardeners' and Florists' Club of Boston, was held at Horticultural Hall on Tuesday, Nov. 21. A large number of members were present and the lecture of the evening was given by John Davey of Kent, Ohio, well known as "the Father of Tree Surgery." The lecture was illustrated by lantern slides and entitled Tree, Insect, Bird. Many of the members expected a lecture on practical tree surgery, but the subject was scarcely touched upon, although many slides were shown of good and bad tree pruning carried out in various cities throughout the states, also the healthy healing effects of large wounds that had been filled in and braced by the Davey System, but the lecturer failed to describe how the process was carried out. Most of the slides were of birds, insects, cats, rats, etc. The lecturer emphasized the fact of providing plenty of moisture at the roots during the growing season to preserve trees in a good healthy condition.

Mr. Davey utterly condemned the English sparrow and said he would like to see every one in the U. S. A. exterminated. The discussion was slight and chiefly in opposition to his remarks about the sparrow.

It was decided to invite the American Carnation Society to hold their annual convention in Boston in January, 1918. The following officers were nominated for the ensuing year: President, James Methven; vice-president, A. K. Rogers; secretary, W. N. Craig; treasurer, Samuel J. Goddard; executive committee, H. H. Bartsch, W. J. Kennedy, Peter M. Miller, George Hamer, John F. Briry, Thos. Coles, W. H. Judd, W. C. Rust.

List of awards: Carnation No. 44, shown by Littlefield & Wyman, N. Abington, hon. mention; Carnation No. 48a, shown by Littlefield & Wyman, report of merit; Carnation Nancy, shown by S. J. Goddard, Framingham, report of merit; Carnations Doris and Laddie, shown by S. J. Goddard, report of merit for each. Rosalia, by the same exhibitor, report of superior merit. Chrysanthemum, sport of white seedling, by S. J. Goddard, report of merit.

SEWICKLEY HORTICULTURAL SOCIETY.

At the monthly meeting, held on Tuesday, November 14, Vice-President R. Boxel presided. The various committees of the chrysanthemum show were given a vote of thanks for their efficient services. For the coming gardeners' convention in Washington, J. Barnet has been appointed publicity committee for this district and a good delegation should be on hand. Nominations for officers for 1917 being in order, the following were proposed: President, John Barnet, R. Boxel, A. E. Bousey, J. Carman; vice-president, A. Davidson, Robert Taylor; secretary,

Meetings Next Week

Monday, Nov. 27.

Florists' and Gardeners' Club of Rhode Island, Swartz Hall, Providence, R. I.
Gardeners' and Florists' Club of Baltimore, Florist Exchange Hall, Baltimore, Md.

Tuesday, Nov. 28.

Newport Horticultural Society, Newport, R. I.
Tarrytown Horticultural Society, Tarrytown, N. Y.

Friday, Dec. 1.

North Shore Horticultural Society, Manchester, Mass.
North Shore Horticultural Society, Lake Forest, Ill.
Pasadena Horticultural Society, Pasadena, Calif.
Yonkers Horticultural Society, Yonkers, N. Y.
People's Park Cottage Gardeners Association, Paterson, N. J.

Saturday, Dec. 2.

Pacific Coast Horticultural Society, San Francisco, Calif.

Marcus Curran; treasurer, Wm. Thomson, Jr.; executive committee, Wm. Gillies, Wm. Thomson, A. E. Bousey, A. Davidson, R. Boxel, J. Carman, J. Barnet, Wm. Beele, J. Jones, W. Curran and J. Barnett were appointed to attend the next meeting of the Pittsburgh Florists' and Gardeners' Club and the Western Pennsylvania Horticultural Society and get things started on the proposed Fall Show for 1917. It was left to the executive committee to arrange for a Ladies' Night in January. A most interesting paper from the National Association of Gardeners on "Horticulture as a Profession from the Standpoint of a Gardener" was ably read by John Carman, to whom a vote of thanks was accorded. Next four meetings will be at 7.30 instead of 8 P. M. Twenty-one applications for membership were received. M. C.

HOLYOKE AND NORTHAMPTON FLORIST'S AND GARDNER'S CLUB.

The regular meeting was held jointly with the M. A. C. Florist's and Gardener's Club at Amherst, Nov. 13, with the M. A. C. flower show as an extra attraction members turned out in good number and as usual the occasion was one of profit and pleasure. It was felt that a closer spirit of cooperation between the two clubs would tend to mutual advantage, and to this end an open invitation was extended to the members of each club to attend the meetings of the other. A pleasing feature was the presentation by President Butler, on behalf of the club, of a cut glass bowl to Prof. Nehrling in honor of his recent marriage.

G. H. Sinclair, D. J. Gallivan and R. S. Cary, judges of the students' work at the show, were called upon to explain the why and the wherefore of their awards. They acquitted themselves nobly. After a social half hour members dispersed with the feeling that it was an evening well spent.

H. E. D.

NATIONAL ASSOCIATION OF GARDENERS

The plans have all been completed for the annual convention of the National Association of Gardeners to be held in Washington, D. C., Dec. 5 and 6. The New Ebbitt House has been selected as the headquarters of the association during the convention. The lecture hall of the new Smithsonian Institution has been placed at the disposal of the association for its business meetings.

Members are requested to register with the secretary at the association's headquarters by nine o'clock on Tuesday morning, Dec. 5, when they will be furnished with complete details of the two days' program, which will be one full of interest and sufficient activity to keep the visitors occupied during their stay at Washington.

While the purpose of holding the convention will not be overlooked, it has been decided to make the meetings as brief as possible without impairing the business that is to come before them, in order that the visiting members may have all opportunity possible to enjoy the many interesting points in and around the Capitol city.

Congress will be in session and an opportunity will be provided the gardeners to observe how the laws of our country are enacted. On their visit to the Department of Agriculture's buildings they may learn how the government grows its plants while their visit to the mint will enable them to see how money is made.

An automobile trip through the park system of Washington and a journey to the country estate of George Washington, at Mt. Vernon, are a part of the entertainment.

CHRYSANTHEMUM SOCIETY OF AMERICA.

The following reports have been received on new chrysanthemums, from the committees appointed by the society.

Exhibited at Boston, Oct. 28, by Elmer D. Smith & Co., Adrian, Mich., name of variety, Smith's Imperial; color white, Jap. Inc.; points com. 88. At New York, Oct. 28, name of variety, October Herald; color bronze; Jap.; points com. 87, name of variety, Smith's Imperial; color, white; Jap. Inc.; points com. 88; name of variety, Miss Anola Wright; color, bright pink; Jap. Inc.; points ex. 86. At Cincinnati, Nov. 11; name of variety, Helen Lee; color, light pink; Inc.; points com. 85. At Chicago, Nov. 11; name of variety, Helen Lee; color, light pink; Inc.; points com. 90.

At Chicago, Oct. 28, by H. W. Wehrmann, Maywood, Ill., name of variety, Ella; color, bronze yellow; anemone; points, anemone 89. Nov. 4, by Peter Reinberg, Chicago, Ill.; name of variety, J. Hamilton Lewis; color, straw color with lavender edge; pompon; points, pompon 92.

At New York, Nov. 6, by the E. G. Hill Co., Richmond, Ind., name of va-

riety, Richmond; color, yellow; Jap. Inc.; points com. 86. At Chicago, Nov. 12; name of variety, No. 92; color, yellow; Inc.; points com. 90. Name of variety, No. 69; color, yellow; Inc.; points com. 83.

At Philadelphia, Nov. 8, by Chas. H. Totty, Madison, N. J. name of variety, Louisa Pickett; color, white; Jap. Inc.; points com. 88, ex. 88. Name of variety, W. H. Waite; color, bronze; Jap. Inc.; points com. 90, ex. 89. Name of variety, Golden Champion; color, deep yellow, slightly tinged with bronze; Jap. Inc.; points com. 87, ex. 89. By G. A. Lotze, Glen Burnie, Md.; name of variety, No. 3; color, lemon yellow; Jap. Inc., points com. 89. By Manus Curran, gardener to Mrs. E. M. Horne, Sewickley, Pa., name of variety, No. 20; color, light bronze; single, points single, 88.

At Chicago, Nov. 12, by James Livingston, Milwaukee, Wis.; name of variety, No. 9; color, yellow, anemone, points anemone 89. By Mt. Greenwood Cemetery Assn., Morgan Park, Chicago; name of variety, Hilda Canning, color, bronze; pompon; points, pompon, 92.

CHAS. W. JOHNSON, Secy.

MASSACHUSETTS HORTICULTURAL SOCIETY.

At the annual election, November 18, in Horticultural Hall, Boston, the Massachusetts Horticultural Society chose the following named to hold office during the coming year:

President, Richard M. Saltonstall; vice-president, Nathaniel T. Kidder; trustees, three years, Stephen M. Weld, Ernest B. Dane, Edwin S. Webster, Andrew W. Preston; nominating committee, Marcellus A. Patten, William Sim, Nathaniel T. Kidder, John K. M. L. Farquhar, William Downs.

Mr. Saltonstall presided over the meeting during which he announced the appropriation by the trustees of the sum of \$8,500 to be distributed in prizes to competitors in the Horticultural Society's exhibitions, and the sum of \$350 for children's prizes exclusively. There was no reading of annual reports. That is left for the meeting of the society in January.

CHICAGO FLORISTS' CLUB

On account of the Illinois State Florists' Association the club meeting was held Nov. 16, one week later than usual. Nomination of officers which was the principal business resulted as follows: For president, Wm. H. Amling and Fred Lautenschlager; vice-president, Paul Klingensporn and Emil Reichling; treasurer, Michael Barker and O. Amling; secretary, Guy French and Allie Zech; trustees, A. Henderson and A. Jurgens. Mr. Lautenschlager has since written a personal letter to his friends in the trade, most heartily endorsing the nomination of Wm. H. Amling as president and requesting that he be made the unanimous choice of the club.

The American Dahlia Society executive committee held a meeting on Nov. 8, and found everything working very favorably for a successful year.

LANCASTER COUNTY FLORISTS' ASSOCIATION.

Thursday, November 16, a raw, cold day, the first touch of winter to visit this section, did not deter thirty good men and true from meeting at the greenhouses of Elmer Weaver and taking automobiles for an afternoon visiting trip.

At Elmer Weaver's we found a large house devoted to mignonette, calendula and sweet peas with a few plants of a new tomato called Napoleon, which had without any artificial fertilization or special attention in any form enough fruit on one plant to make half a bushel of good, medium-sized tomatoes when ripe. Of the newer carnations he was trying out Nancy and Alice with the odds on Nancy, but neither quite in the race with Supreme. Belle Washburn, Aviator and Nebraska were the scarlets with Nebraska in the lead, Aviator a good second, and Washburn plugging along with a possibility of winning out before the end of the season. Alice Coombs has not shown any commercial supremacy as yet, but from the looks of the stock it is not so much the fault of the variety as the condition or health of the cuttings disseminated last spring. Akehurst, of which there are several beds at this establishment, came near being thrown out as worthless the year after its introduction for the same reason but today quite a number of growers have it and consider it as one of their leading varieties. Theo shows some possibilities as a medium-sized commercial pink and a new white of Mr. Weaver's own is well worth watching.

Chas. M. Weaver's is the sweet pea establishment of this section and he has them in three stages, a four hundred-foot house to each stage. One house is in crop now, another just coming in and a third with the glass just being put into the sides. The thermometer had been down to 20 in the morning and was down to 30 when we were there. A house of mignonette was a revelation to some of the growers, every head being the same height and the whole house as uniform as a field of wheat.

At H. B. Weaver's we found carnation Alice doing exceptionally well and his Lord & Burnham iron-frame house doing business right along with prospects of being on the job for his children.

Jacob Weaver, of Witmer, was the next stop. It might look as if the whole Weaver family were florists, but, like the Herrs, they are as numerous as the leaves on the trees. At this place we found two new carnations that have originated with Mr. Weaver, one a yellow that I mentioned when we were here two years ago. It has a slight tinge of pink but not noticeable unless looked for, and in size, substance, stem and habit it certainly is good in its own home town. What it might do if disseminated remains to be seen. He has about a hundred plants of a dark cerise, or red, of immense size and wonderful keeping qualities, and unless it should develop some fault not yet in evidence it would prove a good one to grow. Cutting across the country we came to the establishment of Elias Lefevre,

where is some of the best carnation soil in the country and the carnations grow it. If Fred Horner, Jr. could come to this place and see Pink Perfection and White Wonder growing he would have to buy a new hat before going back to Lafayette, for I do not think they ever had them as good in that city.

John Shreiner and A. Denlinger, two of our market growers with places close together, were visited and at Shreiner's we found a general line of stock for market, with a young chicken having a glorious time among his chrysanthemums. At Denlinger's a good part of the place is devoted to carnations for a winter crop to ship later on. The houses are filled to overflowing with vegetable and flower plants for the market. One of the party made the assertion that these two men made more money per square foot with their intensive culture than any of the large establishments of the country do.

Enos Lefevre had a new chrysanthemum that every grower in the party wanted to buy stock of. It is called "Brock" and is a fine large incurved pink of exceptional color. J. Wade Galey was last on the list. While every place we touched was full of good stock, and especially so in carnations, this place of Galey's was like adding the whipped cream to an already rich dessert. It is a model of neatness and efficiency and his new King construction house, by all odds the finest house in the country, part of the credit belonging to the King people and part to Mr. Galey, as he has it completed with heavy cement walks with lattice trellis for the support of his carnation wires and all painted white so that everything from the roof to the ground appeals to the eye and imagination.

Coming back to the city, the regular meeting of the club was called at 7.30 P. M. sharp. Rudolph Nagel had on exhibition some fine blooms of chrysanthemums Golden Chadwick, Edwin Seidewitz and Improved Chadwick.

Harry K. Rohrer, chairman of the flower show, reported a success. A committee consisting of David Rose, Lemon Dandis and Thomas Fries was appointed to arrange for the annual banquet in December. Rudolph Nagel then opened a discussion on chrysanthemums which was participated in by nearly all present, with the result that the following were all classed as good ones to grow:

Oconto, Chas. Razer, Autocrat, Bonaffon, Golden Queen, Yellow Razer, McNeiss, Nonin, Marigold, Lena Bay, White Chieftain, Patty. In pompons: Pitcher, Harvest Home, Seven Oaks, Mense varieties, Buckingham, Baby sorts.

In a general discussion on co-operation in the retail trade many good points and suggestions were brought out and it is to be hoped that some uniformity will develop from it.

A spring show, purely as an advertising proposition, was taken up, but not much enthusiasm was displayed as the size of the town allows customers to visit the greenhouses without any trouble, and the advantages to be secured were considered not enough to pay the cost.

T. J. Nolan was a visitor.

ALBERT M. HERR

THE EXHIBITIONS

CLEVELAND FLOWER SHOW.

List of additional awards not included in report of judges made Nov. 11:

Certificate of Merit: A. N. Pierson, Inc., Cromwell, Conn.; Group of novelty chrysanthemums not for competition; Chas. H. Totty, Madison, N. J.; Group of pompon and single chrysanthemums, not for competition; John A. Then, Chicago, Ill.; New carnation Thanauthos; Elmer D. Smith, Adrian, Mich.; New pink pompon chrysanthemum Little Gem; H. P. Ellis, Cleveland; Asparagus Sprengeri.

Honorable Mention: A. N. Pierson, Inc., Cromwell, Conn.; New chrysanthemum, Barbara Davis; Nagitree Gardens, Wickliffe, O.; Group of palms and stove plants, also pompon and single chrysanthemums; Anna Dean Farms, Barberton, O.; Sunburst roses, not for competition.

The third annual Cleveland Flower Show will be held in the Coliseum, Nov. 6th to 11th, 1917. This will be a big national show with the strong cooperation of all the national horticultural and florists' organizations. It will be planned on a big scale, even surpassing the Cleveland Flower Show held in Nov., 1915, which put Cleveland on the map in horticultural circles and is still referred to as one of the best flower shows ever held.

To growers—begin to plan your exhibits now. An advance premium list with big prizes will be ready Feb. 1st. Write for a copy.

To trade exhibitors space for commercial displays will be limited. Applications for space received now and reservations made in January. Address M. A. Vinson, Mgr. Cleveland Flower Show, 402 Leader-News Bldg., Cleveland.

UNIVERSITY OF ILLINOIS.

The Fifth Annual Chrysanthemum Show of the Floricultural Division of the University of Illinois was visited by over 6,200 people. The show began Sunday, Nov. 12, and extended through Saturday, Nov. 18. On Sunday alone, between the hours of 1.00 and 5.00 P. M., over 3,500 people viewed the display of 364 varieties of chrysanthemums. Of these 364 varieties, 225 are seedlings of pompons, singles, and anemones and are the result of student class work.

The pot plants of the smaller varieties filled a house 35 feet wide by 105 feet long. The larger flowering varieties were in the bench and were viewed from a raised walk along the entire length of the house. The entire range of greenhouses was open to the public.

The ladies of the State Federation of Women's Clubs which was in session here during the week, were delighted with the show. Governor Dunne and family visited the greenhouses after the Home-Coming football game on Saturday.

EXHIBITION AT WORCESTER, MASS.

One of the most effective of the fall exhibitions held by the Worcester County Horticultural Society was staged on Thursday, Nov. 9, in Horticultural Hall. The show was in charge of A. H. Lange of H. F. A. Lange Co., florists, whose displays were among the most attractive found in the hall.

FRED LAUTENSCHLAGER,

Publicity Manager of the Recent Floral Art Show at Chicago.

Mr. Lange selected the upper centre of the hall for his principal exhibit, which comprised potted plants and cut flowers arranged in a round group about a silver gazing ball. Harry Randall exhibited roses, White Killarney, Ophelia, Mrs. George Sawyer and Francis Scott Key banked against a background of tree and Farleyense ferns. A. N. Pierson, E. W. Breed, W. R. Nicholson, Worcester Conservatories, F. B. Madaus were among the other firms represented. There were four entries in the table decoration class and the prizes were awarded in the following order: 1st, H. F. A. Lange; 2d, Lucy M. Coulson; 3d, Mrs. P. G. Forbes; 4th, A. J. Jenkins.

PITTSBURGH FLOWER SHOWS

Last Sunday practically ended the long and splendid display of chrysanthemums at the Phipps conservatories in Schenley Park and West Park, and the H. J. Heinz conservatory, which were supplemented by the very successful initiative effort by the Sewickley Horticultural Society. Approximately 20,000 people viewed the Schenley display last Sunday, with an additional 10,000 the week before, these figures practically holding good for the other places, as for a number of years it has been noticeable that these flower lovers, old and young, "when once started, make the rounds." During the week there were troops of school children—often 200—in charge of teachers, who preached the gospel of work, as well as pleasure.

While Superintendent George W. Burke and foremen John Jones and James Moore are modest to a fault, annual visitors for years tell us that they have never seen the greenhouses as attractive throughout. Mr. Jones' display numbered about 3,000 chrysanthemums grouped and massed by a master's hand and artist's eye for color effect and graceful proportions. Three houses were called into requisition, one embodying a huge Dutch bouquet, which gave especial delight to the little folks. There was also a magnificent display of lilies, crotons and aquatic plants.

The West Park exhibition was supplemented by the first Aquarium Show of the year-old Pittsburgh Aquarium Society in one of the tropical palm houses. In Mr. Moore's houses was a charming distinctive touch given by large hanging baskets of yellow-starred *Indicum chrysanthemum* and standards of *Nerissa*.

The show house of the Heinz conservatory was utilized for the chrysanthemums, which the superintendent, Anthony A. Leach, and his first assistant, Mr. Bolton, arranged to surpass

CHRYSANTHEMUM SHOW AT H. J. HEINZ CONSERVATORY, PITTSBURGH, PA.
A. A. Leach in Charge.

all previous efforts in a sunken garden effect. One of the smaller connecting houses was devoted to a beautiful display of orchids, while still another was transformed into a Japanese garden, which will probably remain as a permanent feature. Many of the accessories for the latter were purchased by the owner during a recent trip to the Orient.

CO-OPERATIVE FLOWER SHOW AT AMES, IOWA.

A sincere disposition of the florists of Iowa to co-operate with the State College was manifested by the great number of entries made and the first state flower show was staged at the college in Ames, Friday and Saturday, Nov. 10 and 11.

The number of entries and the character of the material sent in was exceedingly good, considering that no plans were made for staging this co-operative show until about three weeks ago. In this enterprise the college and the florists worked together in an effort to stimulate a greater public interest and the success of this first exhibition by the florists has made it almost certain that a big fall show will be held next year in Des Moines.

Friday, which was Florists' Day brought many florists and their wives to Ames as well as some out-of-state trade visitors. About forty-five florists availed themselves of the opportunity to gather at the college on Friday. In connection with the flower show the florists held a meeting in the afternoon which proved to be of great interest. Dr. I. E. Melhus of the college gave a lecture on Plant Diseases of Interest to Florists. He was followed by Roy F. Wilcox of Council Bluffs, Iowa, who discussed the Cost of Production in Comparison with Present Selling Prices. The remainder of the meeting was given over to a general discussion of Terms of Credit, Flower Show, and Plans of Increasing and Educating the Trade.

In the evening the florists attended a banquet given by the Horticultural Club of the college. The support which the florists gave this first attempt at staging a flower show of state-wide interest received many commendations, and the amount of flowers sent in exceeded expectations. In addition to the material exhibited by florists in the nineteen competitive classes, several sent in other material of interest. The various novelties from the central west attracted much comment. Some of the newer carnations were *Thenanthos* exhibited by the Randall Co., Chicago; *Akehurst*, by *Schroeder Floral Co.*, Milwaukee, Wis.; *Nebraska*, by *C. H. Frey Co.*, Lincoln, Nebr.; *Bonfire* and *Rosette* by *Wieter Bros.*, Chicago. Among the roses were noted *Baby Doll*, Mrs. W. R. Hearst, and *Lady Alice Stanley*, from J. A. Budlong, Chicago and *Minnetonka* from the *Alpha Floral Co.*, Des Moines. *Chrysanthemums* in variety were exhibited by *E. D. Smith & Co.*, Adrian, Mich. *J. S. Wilson* of Des Moines had a fine collection of seedlings of single and anemone *chrysanthemums*.

J. F. Wilcox Sons of Council Bluffs, staged an exhibit of cut flowers and pot plants covering 125 square feet. This fine display included both large and small *chrysanthemums*, roses, carnations, cyclamens and begonias.

Wesley B. Green of Des Moines, J.

open for inspection and one large house which was filled with numerous large specimens and bush plants was the center of interest for all visitors.

Competitions for students in home floral decorations in which there were classes in table decorations, basket arrangements, vase arrangements and arrangements of autumn material proved to be of much interest to the women observers in particular.

An unique feature staged by the department—a large gilt picture frame in which was arranged a vase of large chrysanthemum formed an attractive picture entitled "The Queen of Autumn"—brought forth many approving comments.

PORTLAND (ME.) EXHIBITION.

Apple was king in Portland (Me.) City Hall last week, when the annual show of the Maine State Pomological Society was on. Together with the meeting of the Pomological Society was the Flower Show of the Maine State Florists' Society. On the platform was a most attractive assemblage by Strouts, of Biddeford, while arranged on tables in the hall center were beautiful displays by Ernest Saunders of Lewiston, M. A. Clark of Ellsworth; Saco Flower Co., J. W. Minott & Co., Portland, and A. Wallace, Portland.

C. S. Strout of Biddeford, Maine, carried off first honors for general display, consisting of ferns, chrysanthemums, geraniums, roses and carnations, including a vase of seedlings of the latter. E. Saunders was awarded second for general display. Noticeable among his collection were lilies, Jerusalem cherries, maidenhair ferns, chrysanthemums, roses and carnations.

J. W. Minott & Co. displayed cat-

tleys and cypripediums, also chrysanthemums, carnations and begonias.

The officers of the Society are: President—J. H. Stafford, Bar Harbor; vice-president—C. S. Strout, Biddeford; treasurer—E. Saunders, Lewiston; secretary—R. T. Muller, Orono.

RHODE ISLAND HORTICULTURAL SOCIETY.

The most successful November show in the history of the Rhode Island Horticultural Society was held last week in the ball room of the Narragansett Hotel. The attendance was unusually large. The local trade was well represented, judging from the list of prize winners, which included Burke & Burns, Warwick Greenhouses, Maplehurst Greenhouses, Fred Hoffman, Lawrence Hay, John Marshall, Quidnick Greenhouses, Johnston Bros., John A. Macrae, Hampton Meadows Greenhouses, T. J. Johnston & Co., Macnair, and E. J. Bevins.

HORTICULTURAL SOCIETY OF WESTERN PENNSYLVANIA.

Apropos of inaugurating plans for the June Show of 1917. Mr. Fraser and Anthony Leach were appointed a committee to confer with the Florists' Club of Pittsburgh at the recent meeting of this society.

The exhibits included a vase of Francis Scott Key roses, the contribution of Mr. Fraser. Mr. Leach and William Thompson, Jr., who has charge of the Sewickley Heights estate of Mrs. Elizabeth M. Horne of Lakewood, N. J., showed chrysanthemums. Dahlias, including forty splendid varieties, were the contribution of Mr. Murphy, supt. on the Sewickley valley farm of H. Lee Mason. Mr. Murphy received a cultural certificate

for the blooms and, incidentally, had a most interested audience during his talk on the culture thereof, in which he stated that his best results were attained from cuttings planted out late.

BOXWOODS IN WINTER STORAGE.

Gentlemen: I would appreciate your expert advice on the following method of handling Boxwoods in winter storage. Our stock of Boxwoods have grown in our nursery since spring. I propose to dig them with earth ball, burlap, soak in water and pack same in moist shingle tow, after which they will be packed lightly in straw in a slightly reclining position.

Our storage is brick, lined with paper and sheathing, plenty of light and air but no heating device. Do you think by this method I can successfully bring this stock through the winter or must I have more light, air and heat for success?

Your opinion upon this matter will be much appreciated.

Yours very truly,

E. B. S.

Regarding wintering over boxwood that has been planted and is established in the ground since spring, I should advise to have it stand as it is and cover with some leaves between and alongside of the plants. Get short good branches of evergreen—hemlock preferable—and insert them into the ground on both sides of the rows, tie the tops together so that the leaves could not blow away and so that the snow would slide off when falling down.

This is the simplest and most natural way of preserving boxwood. It is not the actual cold that does harm but the freezing and thawing of the boxwood, not through the winter but in the early spring. By this treatment there is no trouble to carry boxwood through the winter, providing it is well drained so that no water stands around the roots through the winter.

PROPOSED TOUR OF THE NATIONAL PARKS AND FORESTS.

The Massachusetts Forestry Association announces that it is arranging for next summer a Tour of the National Forests and National Parks. Non-members who are interested may secure the same privileges as members by the payment of a guest fee.

The purpose of this tour is entirely educational. The people of Massachusetts are joint owners of the national forest and national parks and they should know more about them and how they are being managed. Matters of legislation concerning these vast domains are constantly coming to our attention, and few people in the east know enough about them to act intelligently. Our views differ from our western cousins and every session of Congress registers volumes of debates on how these enormous areas should be managed. All the people should have an equal say in these matters and their decisions should be based on knowledge and facts.

Few people realize that one-tenth of the area of the United States is included in our national forests, or that the aggregate area of our fifteen national parks is nearly as large as Massachusetts. Only those who have seen the wonders of the national parks can appreciate the superiority of our own natural scenery over that of any other country.

While the prime purpose of this tour is to secure first-hand information, it will also afford an excellent opportunity for those who desire a vacation ranging from three weeks to nearly two months in extent in the open air and amid the most inspiring and instructive surroundings.

The tour will be under the auspices of the Massachusetts Forestry Association which has engaged the Bureau of University Travel to arrange the details and conduct the party.

The plan is meeting with general approval and an unexpected interest is being shown in the itinerary. Those

For the purpose of spreading the general knowledge of the national parks and national forests, two illustrated lectures will be given December 14, 1916, at 2 o'clock, at the Twentieth Century Club, 3 Joy street, Boston. The public is invited.

MASS. AGRICULTURAL COLLEGE NOTES

All classes in floriculture are working at bulb planting, both indoors and out this week. Junior classes are also trenching for sweet peas this week.

Thursday evening the Florists' & Gardeners' Club met to discuss the publication of an annual and the appointment of officers for the same.

The annual trip to A. N. Pierson's, Cromwell, Conn., scheduled for last Saturday, proved most successful. Tom Beers, M. A. C. '12, acted as guide and pointed out many most interesting things about the establishment. The great size of this establishment impressed the students very much.

The impression seems to be widely prevalent in trade circles that the Cottage Gardens Company's new carnation "Crystal White" is to be disseminated this season. The Company states that they are at a loss to know where this impression originated as it has never been their intention to send out Crystal White until next season and they never made any statement that could be construed otherwise. The only carnation they are sending out this year is Cottage Maid and they wish to assure the trade that Crystal White will not be on the market until the season of 1917-18.

PUBLICATIONS RECEIVED

Bailey's New Standard Cyclopaedia of Horticulture. Volume V, P. to R, inclusive, of this monumental work has been received from the publishers, The MacMillan Company, New York. A perusal of the volume only adds to our appreciation of the unprecedented service Dr. Bailey has rendered in placing such a comprehensive and authoritative treasury of horticultural thought, learning and achievement before the people. Vol. V. comprises pages 2423 to 3041. There are twenty beautiful page plates, several of which are in colors and the cuts used to illustrate the text run from No. 2694 to 3515. This shows an increase of 1449 pages and 1248 illustrations as compared with the contents of the corresponding volume in the old edition of the Cyclopaedia, which gives some idea of the immense work which has been put into this new edition. A new chapter on Planting alone fills 50 pages. Prunus occupies 22 pages as against 13 in the older edition, Pyrus 13 against 7, Rhododendron 18 against 9. The chapters on the Rose occupy 40 pages, to which ten collaborators have contributed.

No florist or gardener should think of getting along without owning a copy of the Cyclopaedia of Horticulture. The sixth and last volume will soon be available. The price for the full set is \$36.00. HORTICULTURE can supply it either by installments or complete at the publisher's price, \$6.00 per volume.

Tree Wounds and Diseases. Their Prevention and Treatment, by A. D. Webster. Thirty-two full page plates and other illustrations, large 8vo. \$2.50 net. J. B. Lippincott Company, Publishers, Philadelphia. The infirmities of trees and how to overcome them is a subject which has caused much anxiety and demanded incessant attention and study from time immemorial but so far as we are aware the volume now before us is the first work devoted exclusively to this important subject. That such a book is needed, all our readers know and at the present time when so many inexperienced operators are abroad in the land its appearance is especially to be welcomed. The author, A. D. Webster, Regents' Park, London, knows his subject in a scientific and thoroughly practical way, and this book is the summing up of his experiences in many years of work and observation. There can be no question that any one entrusted with or interested in the care of trees, ornamental or fruit, will find much of value to him in this lucid and thorough presentation of the dire results sure to follow from neglect of injured bark, poor pruning, fungus growth, insect ravages, bad soil and atmosphere effects, diseased branches, cavities, etc., and the means to be adopted for prevention and cure. The author has undertaken to bring home to those re-

sponsible for trees that with a small outlay of labor and expense, intelligently applied, the lifetime of old, historic or accidentally damaged specimens may be greatly extended. The illustrations are unusually good and the large type and clearness of the printed pages will make reading a pleasure especially to those whose eyesight is not of the best. It is a good book and well worth the price. Copies may be obtained from the office of HORTICULTURE at publishers' price.

The Page Company of Boston send out about this time each year a number of splendid books of wholesome, high-class fiction by clever writers, at popular prices, which find an enormous sale as holiday gifts. This company is doing a real service to the public in the publication of so many of these excellent stories and we never hesitate to recommend them to those of our readers who are looking for books to please the young and young-old people at Christmas time. Among this year's quota are the following:

The Pioneer Boys of the Columbia, as its title indicates, is a book for boys. It is a tale of life in the wilderness of the great Northwest by Harrison Adams, uniform with the five previous volumes of The Young Pioneer Series by this author, this book completing the set. The story is full of adventure and spirited action and it is appropriately illustrated with six full-page pictures by Walter S. Rogers. The narrative appeals irresistibly to every boy, but it is something more than mere fiction, being carefully founded upon fact as to conditions and experiences in the explorations westward from St. Louis following the purchase from France of the vast territory known as Louisiana. As the Boston Globe expresses it, "Such books are an admirable means of stimulating among the young Americans of today interest in the story of their pioneer ancestors and the early days of the Republic." Price \$1.25 net, \$1.40 postpaid.

Man Proposes, or the Romance of John Alden Shaw. By Eliot H. Robinson. Illustrations with frontispiece in color by Wm. Van Dresser. Here is a skilfully laid romance of more than passing interest, weird and almost tragic in some of its quickly changing scenes. Its action is centered in Boston and Newport principally and the realistic word pictures of the inside life, manners and gaieties of the summer society of the great watering place will be found full of absorbing interest. Price \$1.25 net.

The Violin Lady. A sequel to The Fiddling Girl and The Proving of Virginia. By Daisy Rhodes Campbell. This pretty little romantic story contains the adventures of the heroine of the two preceding publications and tells of her triumphs and hardships abroad, of her friends and her love affairs, and finally her wedding bells and return to

America. This volume has pronounced even far ahead of the earlier books in interest and charm. It is a bright, snappy story all through written in a delightful vein and the girls will like it. There are seven full-page plates and frontispiece in colors, by John Goss. Price \$1.25 net.

The Road to Le Reve. By Brewer Corcoran. Illustrations by H. Weston Taylor, with colored frontispiece. The scene of this narrative is laid in Maine. It is a story of society and the wilderness, and shows a thorough familiarity with both on the part of the author. The fishing club of the multimillionaires, whose interests spread out like the web of a spider, furnishes the setting for a romance combining an insight into the methods of modern American enterprise and finance with a fascinating love story full of youth, open air and adventure. Price \$1.25 net.

Anne's Wedding. By Iola May Mullins. Third in the series of The Blossom Shop Stories. The previous volumes have been warmly commended and this one is considered the best of the series. It is written in a style which is original and romantically ingenuous, and is very sunshiny and charming in its portrayal of life and customs in the South. These stories with their picturesque southern setting have charmed both young and old. The effect of its perusal is to make one feel that "the world is a pleasant place to live in." Price \$1.25 net; \$1.40 postpaid.

My Garden. By Louise Beebe Wilder. Doubleday Page & Co., publishers. This is an excellent book, written for the amateur by an amateur—an amateur who is far from being an amateur in horticultural knowledge, and deeply imbued with the gardening spirit and who, it is plain to see, has by practice and first-hand experience acquired a well-grounded perception of her subject far in advance of that possessed by many self-sufficient professionals. There are eighteen chapters. Their subjects, a list of which will give some idea of the scope of the book, are as follows: In the Making; In the Nursery; The Day Before Spring and the Next; May in the Garden; June Magic; July Problems; Waning Summer; Autumn Beauty; Border Roses and Climbers; Border Irises; The Lure of the Lily; Who's Who Among the Annuals; Shrubs; Flowering Trees in the Borders; Green Draperies; Trouble; Plants for Special Situations; The Herb Garden. Every florist and local nurseryman is called upon to give garden advice and answer innumerable questions asked by his customers. Why not answer them all by having this convenient book on sale and recommending it to all inquirers on gardening topics? It will not only serve this purpose but its distribution in any residential neighborhood

Fall Spraying "SCALECIDE" Does the Work Controls Leaf Curl Cleans up the Trees

Don't put off the dormant spray until the spring rush. The weather may be bad or the ground too soft. Spray this fall and make sure of controlling peach leaf curl, San Jose scale, pear psylla, apple canker, collar rot, etc. You can save trees now that would die before spring. Use "Scalecide." Better and cheaper than lime sulphur—cuts the labor

cost. Never injures trees, hands, face or pump. Cost of spray materials will advance before spring. Order now and save money. Write today for free booklet, "The Whys and Wherefores of Fall Spraying." B. G. PRATT CO., Manufacturing Chemists. Department 12. 50 Church Street, New York City.

will create new business in planting material and garden requisites. It sells for \$1.50.

Productive Poultry Husbandry. Second revised edition. By Harry E. Lewis, Poultry Husbandman of the New Jersey Agricultural Experiment Station. 329 illustrations. 536 pages. A complete and practical treatise on the breeding, feed, care and management of poultry, together with chapters on fattening, killing and preparing for market. There is no problem in any phase of practical poultry raising that is not thoroughly and clearly treated in this book. Because it deals entirely from the practical and utility view point it will appeal especially to the man, woman or youngster handling chickens. Every person with five or five thousand chickens will be glad to have the book. Published by J. B. Lip-

incott, Philadelphia. Handsome cloth binding. \$2.00 net.

Productive Bee Keeping, by Frank C. Pellett, Iowa Inspector of Apiaries—Here is a new book upon the bee industry that strikes the proper note in its comprehensive practicability and sanity. Mr. Pellett, the author, in his long experience as a successful honey producer, instructor to the profession and an official inspector of hives in a rich bee state has had a great opportunity to sift the good from the bad; he took the opportunity, and the result is a book which contains the best methods that have successfully met the greatest variety of tests in the greatest variety of conditions.

The work is an honest presentation of the material needed by the extensive producer who wishes to have it at hand for ready reference, the small producer who wants to study that he may make progress on the surest lines, by the beginner or student who wants to set up for himself and to do so upon the scientific basis that will bring the best returns. It contains the last word upon every subject connected with the industry and it is written in a manner easily understood and capable of being immediately applied in the work of the expert or the beginner.

This is the latest volume in the Lipincott Farm Manual Series, and that in itself is a sufficient guarantee of high excellence. The majority of the illustrations are from the author's original photographs or drawings,—they are of the highest type and give a pictorial presentation of way and methods. The handsome cloth binding is durable. 134 illustrations, 340 pages, 8vo. \$1.50 net.

The Annual Report of the Parks Department of the City of Calgary, Alberta, for the year 1915 has been received in typewritten form. From it we learn that this far-away city is

making rapid progress in the development of public reservations. During the year about twelve miles of new boulevard has been constructed and there is now a total of over fifty-two miles. The city nurseries have been economically managed and the report shows a profit of \$4,151.81 on their operation for the year. William R. Reader holds the office of parks superintendent.

Fifty-sixth Annual Report of the Board of Park Commissioners of the city of Hartford, Conn., for the year ending March 31, 1916. A model report in thoroughness and giving good evidence that the people of Hartford are well served in their recreation department. Illustrations interesting and of fine quality. There is a tabulated insert which will prove valuable for reference and comparison by any one interested in park maintenance.

IMP. SOAP SPRAY

Is a scientifically prepared compound that is highly efficient for ALL insect pests. Why bother with several sprays when this will answer every purpose throughout the year?

One Week's Imports.

Imports at the port of New York of horticultural material, for the week ending November 10, were recorded as follows:

Bulbs—France, \$398; Netherlands, \$18,806; England, \$783; Canada, \$340; Hongkong, \$88; Japan, \$12,873.

Plants—Belgium, \$74,491; France, \$96; Netherlands, \$20,826; England, \$1,828; Bermuda, \$99; Guatemala, \$133; Trinidad, \$430; Colombia, \$837. Red Clover Seed—France, \$3,185.

Grass Seed—Denmark, \$13,000; England, \$15,051.

Other Seeds—Denmark, \$1,596; France, \$10,651; England, \$2,275; Japan, \$1,056; Morocco, \$595; Spain, \$709.

Nitrate of Soda—Chile, \$320,400. Other Fertilizers—England, \$2,149; Scotland, \$163; Japan, \$4,593.

Douglas P. Laird, a gardener of the Edinburgh, Scotland, seed trade, who has held an important position with Henry A. Dreer, Philadelphia, for some time, goes to Thorburn's, New York, commencing November 17, in charge of the flower seed department. Mr. Laird is but 24; but he has had the right training and is bound to make good. We wish him well, and commend him to the kindly and courteous coterie that make the seed trade of New York. They will be nice to him, as he deserves—which goes without saying.

NEWS ITEMS FROM EVERYWHERE

CHICAGO

The American Bulb Co. are busy as bees in their limited quarters, but stock moves so rapidly the small space does not matter. Just now winter berries are a special feature and everything in the way of baskets are filling the counters.

Miss L. A. Tonner has returned from Baconton, Ga., where she went to oversee the harvesting of the crop of pecans from the groves belonging to herself and sisters. Miss Tonner sells pecan orchards in addition to her wholesale cut flower and supply business.

Word has been received that the Christmas schooner, the Rouse Simmons, in charge of Mrs. Schunemann, is on its way with the usual load of Christmas greens. Mr. Schunemann lost his life on this boat three years ago and his widow and daughter took up the business.

A. Henderson reports the bulb season practically closed and stock has cleaned up well. He says all importations of lily of the valley pips must come from Holland this year, and as the Holland bulbs have never been regarded equal to the German it is for the growers this year to observe extra care in order to make up for it.

At Poehlmann Bros. everything is in readiness for a banner year in the supply department and orders are being placed for holiday stock. It seems as if the popularity of baskets is greater than ever and there are variations to suit all tastes. In the cut flower department chrysanthemums are still holding their own and will for some time. Orchids are scarce now, but they are expected to be in good supply for the holidays.

Chicago visitors to the Chrysanthemum Show at Urbana, say the University of Illinois showed three hundred varieties of chrysanthemums, making a fine display. The floricultural department of the big school is attracting many students, a fact which augurs well for the florists of the near future. After completing the course, these students usually go out and take any position available with large growers, where they add experience to their scientific training, before going into business for themselves.

That the German two-year-old lily of the valley bulbs will produce just as large and strong stems with equally large bells as the one-year pips, is the statement of Phil Schupp, manager of the J. A. Budlong Co.'s wholesale store, and he backs up the assertion by showing the stock received from their greenhouses each day. He says, however, that the loss is much greater in the pips and the advanced price this year makes the profit no more than in other years when lily of the valley sold for three and four cents. The Budlong Co. has enough of the German pips to last till June next.

The following is a copy of a letter which has been sent out by Fred Lautenschlager:

"At the meeting of the Chicago Florists' Club at the Hotel Mortimer, November 16th, my name was placed in nomination for president, an honor I deeply appreciate.

"As the name of one of my dear friends was also placed in nomination for this office, I have decided to request that my name be withdrawn in this connection, in order to make unanimous the nomination and the election of my esteemed friend, Mr. Wm. H. Amling, of Maywood, Ill., for president of the Chicago Florists' Club.

"Mr. Wm. H. Amling is a gentleman of noble character, one who is truly regardful for the interests of others, and one who has at heart the best interests of this Club. He is a gentleman who is capable of fulfilling the office as president with credit and honor."

PHILADELPHIA

Paul Huebner has just returned from a visit to Rutherford, N. J., and speaks very highly of the foliage and ornamental plants seen on his visit, especially of those at the establishment of the Julius Roehrs Co.

Samuel S. Pennock, John H. Dodds and Robert Craig went from Philadelphia to Baltimore to help in the judging department of the "Maryland Week,"

One Day Earlier

On account of the Thanksgiving Holiday falling upon our regular Press Day, HORTICULTURE will go to press on Wednesday afternoon, November 29, one day earlier than usual.

Advertisers and Correspondents will please take due notice. Communications of immediate importance may be telegraphed "Press Rate, Collect," up to Wednesday noon.

which included a flower show. The daily press of Baltimore showed them in the limelight photographically the next day. One of these pictures is worth reproducing for reasons which will appear later, so we have a copy under way for HORTICULTURE.

A meeting of the American Rose Society attended by about twenty of the active executive members, mostly local but four or five from a distance, was held in the P. H. S. library on the 22nd inst. The special business was to arrange for the national rose show to be held in Philadelphia next spring. President Samuel S. Pennock occupied the chair and Secretary Hammond was also on hand. A full official report of the proceedings will follow, in due course.

President Samuel S. Pennock, of the American Rose Society, was much pleased on the 18th inst when he received another \$100 subscription to the guarantee fund for the great National Rose Show, which is to be held in Philadelphia next spring. This makes now the full amount of five thousand dollars which is considered ample backing for an enterprise of community importance, but they are not going to stop at that and more guarantees will be welcome. Come on in with your hundred. The next executive meeting will be held at Horticultural Hall on the 22nd inst, and more foundation work, broad and deep, will be instituted.

WASHINGTON

Among the judges of the Baltimore flower show was David J. Grillbortzer, ex-president of the Florists' Club of Washington.

The District Commissioners have appointed Clifford Lanham, assistant superintendent of trees and parkings, as superintendent to succeed his father, the late Trueman Lanham. Mr. Lanham is a very capable man and has a thorough knowledge of forestry and horticulture.

The delivery automobile operated by John McCabe was badly damaged last week when a big touring car crashed into it from in back. Young McCabe, who works for his father, M. J. McCabe, escaped unhurt but several of the passengers in the pleasure car received serious injuries. The driver of the latter was arrested.

The office of the assessor of the District of Columbia is distributing schedules to be filled out by the florists and returned to enable the District government to arrive at the proper tax to be assessed each for the rental of vaults under the sidewalks and streets. The Commissioners are directed to assess and collect rent for all space occupied under the sidewalks.

The Washington florists are co-operating in the movement for the conservation of wrapping paper suggested by the Washington Evening Star. There is absolutely no need for the wrapping of flower boxes, yet some of the stores do this before making even a wagon delivery. Attention is also being paid by the florists to the use of tissue and waxed paper, both exceedingly hard to get and the price excessively high.

At the annual session of the National Grange, P. of H., in Washington on November 14, Richard Vincent, Jr., Maryland's distinguished citizen, of Whitmarsh, Md., was appointed on the committee to receive President Wilson and family and escort them to the hall. This unique honor was gracefully carried out by Mr. Vincent, he escorting the President, and President D. Patterson of the Maryland Agricultural College escorting Mrs. Wilson, while the audience stood and the band played "Hail to the Chief."

The bureau of plant industry of the Department of Agriculture is planning for an amaryllis show to be held during the latter part of February or first of March. This will prove an unprecedented treat for the flower lovers of Washington, and the hundreds of thousands of people who will come here to view the inaugural parade. It is expected that there will be 1,500 blooming plants in the display. It is said that the show will be distinctive also in that these are all seedling plants and are crosses from some of the best blooms in the exhibition of four years ago.

The event of the week in Washington was the chrysanthemum show at the store of Gude Bros. Company. This is conceded to be the finest ever held by the firm and certainly the at-

tendance has exceeded that of any other year because of the fact that there were nine agricultural societies in session here during that time. Chrysanthemum William Turner attracted by far the most attention. Throughout the establishment the walls and ceiling were masked with ferns and vines. Asparagus and southern smilax were used to outline the large mirrors. Half baskets attached to the mirrors held snapdragon in three colors and pompons. The main display included Amorita, Major Bonnaffon, Nagoya and Golden Wedding, and the vases and baskets of these were banked with ferns and Glory of Cincinnati begonias. In the center of the store at the front was a tall basket containing a fountain with running water illuminated by an electric light in the center. In the window was another fountain and electric light, back of which was an aquarium filled with aquatic plants and goldfish. In the workshop was a very attractive display of American Beauty and other roses, chrysanthemums, snapdragons and begonias, and a similar display was made in the conservatory. Throughout the store were myriads of colored electric lights and in the balcony a Victrola machine furnished music and added to the singing of half a dozen or more canaries. In the balcony there was also a frame displaying a basket of American Beauty roses.

NEWS NOTES.

Evansville, Ind.—C. E. Gyseman and C. P. Beard have started in the nursery business.

Pittsburgh—Miss Eliza McKinley, head saleswoman for Randolph & McClements, has returned after a several months' leave of absence.

In the annual report of President Aley, of the University of Maine, to the Governor and Council, the need of a new horticultural building and greenhouse is urged.

Obituary

W. H. Donohue.

W. H. Donohue, aged 28 years, well-known among the florist trade of New York and Boston, who for a while several years back conducted a retail store at 2 West 28th street, died suddenly on November 15. His father, Fred. Donohue, formerly in the retail florist business in New York, and his late uncle, gardener on the Jessup estate, Lenox, Mass., are well-known. He leaves a widow.

John H. Muller.

John H. Muller, 74 years old, of 417 Pulaski St., Brooklyn, N. Y., a retired florist, died Nov. 13th, from a complication of diseases. Mr. Muller was born in Germany and came to this country when 18 years old. For many years he did a large wholesale and retail business and grew his own flowers. His retail store at Pulaski St. and Stuyvesant Ave. is now carried on by his son. He is survived by his widow, five daughters and one son.

T. C. Joy.

Thomas C. Joy, of the Joy Floral Company of Nashville, Tenn., died suddenly from an attack of heart disease on the morning of Nov. 10. Mr. Joy was 54 years of age, having been born in Goderich, Ontario, in 1862. He has been in the florists business in Nashville since 1878, and was a gentleman of very fine character. He was president of the Tenn. State Florists Society at the time of death. He leaves a widow, three sons and five daughters.

George G. Copp.

George Gordon Copp, botanist, and formerly a newspaper writer, died Monday, Nov. 20, at his home in New York. He was sixty-three years old.

As a young man Mr. Copp was a reporter. In 1898, having been a close student of floriculture, he became associated with the New York Botanical Gardens and in 1906 he was sent to Colorado to make a botanical investigation and survey of that region. He remained there and in other parts of the West, pursuing his work, until recently. Mr. Copp contributed numerous articles on the floriculture of the West to leading magazines. He was a founder of the Bronx Society of Arts and Sciences and a member of the Civic League of Staten Island.

BOSTON.

E. D. Kaulbach, of E. D. Kaulbach & Son, Malden's enterprising florists, states that they have just received a shipment of over 5000 Azalea indica from Belgium, and that they are all in excellent condition.

The pretty flower show at Penn's attracted a large crowd of visitors. The window display of floral baskets was especially brilliant. It was an excellent publicity stunt. Prizes were awarded to Wm. R. Nicholson, Waban Rose Conservatories, Thos. A. Cox, J. Frank Edgar and Thomas Roland.

The Boston Browning Society proposes that Boston have a Browning garden which will contain all the plants mentioned in the poetry of Robert Browning, similar to the Shakespeare garden in Central Park, New York city, which includes all the botanical references in the works of the great dramatist. It has been suggested that the new Fenway garden be utilized as the Browning garden.

Gordon Fisher, of Woburn, Mass., and Miss Gladys McKone were married at Dover, N. H., on November 15. Mr. and Mrs. Fisher will reside in Woburn, where Mr. Fisher is engaged in the greenhouse business.

BOUVARDIA

The double pink and white variety, stems 18 to 24 inches long. Something exceptionally fine. The best stock \$6.00 per 100.

WHOLESALE
GROWER of

CUT FLOWERS

In writing to Advertisers kindly mention Horticulture

Flower Market Reports

BOSTON The demand has not shown any increase or snap this week but prices have stiffened on some things, due entirely to local or isolated causes. Violets have made the customary phenomenal jump on account of football excitement. Carnations are in rather small supply but have not increased in market value. Roses have drawn the lines a bit tighter but there seems to be a sufficiency for all needs except in the case of American Beauty which seems to fall a little short of the immediate outlet. Chrysanthemums are in a bad plight. No grower in this section has made any profit on chrysanthemums this season, if we are any judge. There are too many of them even at the very low price at which they may be had. Thanksgiving Day trade is looked forward to as a little bracer in the way of demand and price, but our advice is to "hold up nothing."

CHICAGO A slight increase in the demand and a small decrease in supply, along with colder weather has worked quite a change in the market during the past week. The number of chrysanthemums is still great but not so hopelessly out of proportion to the wants of the buyers. Some of the larger varieties are now in bloom and probably the best prices will come with the closing days of the season. The big flowers are holding back the sales of lilies and there are quantities of them on the counters in the wholesale houses. Roses are equal to the demand always now and somewhat in excess in certain varieties. Mrs. Russell is showing quite a good many of low grade among the short lengths but the long ones are very fine and most growers are cutting heavily. Pussy willows are very welcome to those who are seeking novelties and many were shipped in from the south this week and mostly sold readily. Lily of the valley maintains its high price, but buyers have become accustomed to it and when it is really needed, six cents comes as readily now as three did a year ago. There are too many carnations for the growers to receive large returns, which is different from last fall. Green is in good supply and the ilex or winterberry is in every store.

The glut in the market and the spring-like weather continue, the latter, however, interrupted by a few days of cold weather last week. Roses are in a good supply. The chrysanthemum market is still much glutted. Carnations are very plentiful and there are some excellent blooms for the time of the year. Neither lilies nor callas find a very active market. Receipts of lily of the valley, sweet peas and orchids are sufficient.

NEW YORK It seems almost superfluous and unnecessary to use up good paper and ink, in these days of kiting cost, with remarks about the cut flower situation in this market as it now stands. It is and has been for several weeks in a "rag-tag and bob-tail" condition which words fail to adequately describe and a description of which can serve no useful purpose.

BEAUTIES

With cooler weather the quality has improved wonderfully. Crisp, solid, well colored flowers they are.

Football games and Thanksgiving Day call are looked to for some help on limited lines and on all sides the end of the chrysanthemum tide is confidently expected to change the aspect of the market but thus far nothing has happened to occasion either hopeful glee or gleeful hope. Violets have taken an abnormal jump skyward, but this is not to be regarded as having any permanent effect. With the exception of these and good cattleyas and to a lesser extent American Beauty roses, market values are very low as quoted and much lower as finally realized.

PHILADELPHIA

There was a slight improvement in the market here last week especially toward the wind-up. But it was only slight and the situation is nothing to brag of as yet. Lacks the snap and vim that is usually looked for at this time of year. The flush of the chrysanthemum influx is reached, however, and the mightiest of the cuts are now out of the way so that all round con-

ditions for the staples in other lines should improve. There are still plenty of Bonnafon, Razer, Turner and other mid-season favorites around, also a few of a good pink called Brock. Very few bronze. There seems to be an opening for a good bronze to fill in along about this date. The supply of roses has eased up considerably all along the line except on American Beauties. The latter are more plentiful with demand rather light. Russell is probably the best selling of all at present. The carnation supply also shortened up a little; fine quality; demand nothing wonderful. Orchids are getting scarcer. Cattleyas touched the market on the twentieth and are likely to go higher. Violets have greatly improved in quality and are in good demand. Lilies, both longiflorum and rubrum, go slow. Lily of the valley is rather scarce and in good demand. Asparagus and other greens are now going a little better as the autumn foliage is out of the way at last.

Flower Market Reports

(Continued from page 711)

Stock has shortened PITTSBURGH up quite a little with considerably fewer blooms than a week ago. However, supplies have been ample to meet the demands of a busy season and prices have been satisfactory all around. Chrysanthemums have been not only plentiful but of particularly fine quality. Likewise, the supply of roses and carnations has been all that could be desired. On the other hand, lilies are not plentiful and lily of the valley continues very scarce.

The market is not quite ST. LOUIS so over crowded this week. Chrysanthemums have stiffened somewhat in price. Some extra fancy blooms are arriving and will be in good shape for Thanksgiving. Bonnafton in yellow and Turner in white have the best call. A few dark red are in but do not have

(Continued on page 712)

Flower Market Reports

(Continued from page 713)

much demand except as a novelty. Car-
nations are daily improving and some
fine stock is seen in the wholesale
houses. Roses are coming in fine with
a slight advance in value. Violets and
sweet peas are improving. Christmas
novelties will come to the front after
Thanksgiving. Special low-price sales
of chrysanthemums and carnations
were held at two or three department
stores on Saturday, Nov. 18.

The first killing

WASHINGTON frost of the year
hit Washington

last week, eliminating large quantities
of outside bunch chrysanthemums
which have been greatly hurting the
sale of indoor stock. The big blooms
sold up quickly and retailers found it
difficult on Saturday to have their
orders filled. Lily of the valley is
quite poor and represents a loss to the
grower. It is now hard to get good
orchids. Roses of all varieties and
colors and carnations as well were in
good demand and as the supply had
been largely curtailed by a change in
the weather the wholesale houses
quickly cleaned them up. Narcissus
has made its appearance but moves
slowly. Sweet peas are not very
plentiful and sell well. Lilies are hang-
ing fire.

MASTICA

For Greenhouse
Glazing

USE IT NOW

F. O. PIERCE CO.

12W. BROADWAY

NEW YORK

Mastica is elastic and tenacious, admits of expansion and contraction. Putty becomes hard and brittle. Broken glass more easily removed without breaking of other glass as occurs with hard putty. Lasts longer than putty. Easy to apply.

Will last a life-time.

\$1.25 EACH

Adjustable—can and frame separate—easily cleaned. Frame all one piece, of malleable iron. More practical and more easily operated than any other.

Seal-tight liquid putty at \$1.25 per gallon.

Evans 20th Century Arm

Most up-to-date arm on the market. Proof that it is better than any other is that others tried to imitate it. Write for our 1916 catalog just out

JOHN A. EVANS CO.
Richmond, Ind.

When next you are in Milwaukee, take a taxi drive up the beautiful Lake Boulevard; and when you come to this layout (you can't miss it) pull the bell of the gardener's cottage, and we are sure Mr. W. McKinnoe (the gardener) will gladly show you the grounds and glass gardens.

Making The Best of a City Block

An Accomplishment That May Hold a Hint for You

HERE, indeed is a compact, attractive, practical layout. All three of those things it most certainly is.

In brief, two sides of the garden and lawn are bounded by a fine English design brick wall. The other two sides by the gardener's cottage; a glass show house; the residence; the garage; a greenhouse; and the so-called "garden house," which is really a work room with a sleeping room above.

You can well imagine the street side effect of the greenhouse, like a big show case filled with flowers.

Making the greenhouse serve as a boundary to a property, is nothing new, but it is a thing well worth keeping in mind.

You have guessed right, both the show and greenhouse of this Milwaukee subject, are our construction of Everlasting Lastingness.

1917

CHRYSANTHEMUM NOVELTIES

1917

Our Novelties for 1917 are the best we have ever had. The finest of the year in the large flowering type will be —

LOUISA POCKETT

Mr. Pockett, who raised both varieties says that Louisa Pockett will easily displace Wm. Turner as the best white in cultivation. From our knowledge of it I can endorse this statement.

In 1906 I distributed Beatrice May which remained our standard white for years. Five years later in 1911 I distributed Wm. Turner and now after a lapse of five years, in 1917 I will distribute this sensational white that surpasses all others—**LOUISA POCKETT**.

This is a seedling from Turner but a larger flower and heavier grower.

Other splendid Novelties for 1917 will be:

NAG-IR-ROC; W. H. WAITE; PRES. JOHN EVERITT; OCTOBER KING and BOL D'OR. January delivery, 2½ in. pots, \$16.00 Dozen; \$100.00 per 100.

We will also distribute Schaffer's
PHENOMENAL JAPANESE ANEMONES

And our new **SINGLES** for 1917, are as usual
THE FINEST IN THE WORLD

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

"If vain our toil, we ought to blame the culture, not the soil."—*1st pt.*

Holiday Suggestions

It will be time well spent to give each plant a perfect cleaning which will show to full advantage all the markings and shades which go to make foliage plants beautiful. A week or ten days before Christmas see that foliage and pots get a good cleaning as the least bit of dirt detracts from their beauty. The average florist can not grow all his own plants and now is the time to buy. Take a look through the advertising columns of HORTICULTURE for offers of anything you may want. Look over your stock of supplies now to see if anything is wanting such as heavy wrapping material, tissue, waxed and waterproof crepe paper, in white, red, and green, sheet moss, ribbons, chiffon, cut flower boxes, fern dishes, etc. Shop early.

Lilies for Christmas

To properly harden off the lilies it is best to treat them gradually until you have them in a temperature of about 50 degrees, night. See that they are kept clean of fly, as there is nothing more unsightly than lilies with green fly on them. When the flowers are well expanded they should be given a lower temperature, but remember they will not relish cold draughts which will cause them to wilt. Lilies intended for Christmas should be so far advanced that the buds begin to turn white twelve to fourteen days beforehand. They can stand from 60 degrees to 70 at night with a raise of from 15 to 20 degrees during sunny days. As the flowers open see that the pollen is promptly removed.

Lilium speciosum

These can be grown in pots, using four bulbs to a 7-inch pot, five bulbs to an 8-inch pot, and six to a 9-inch pot. The soil should be a good fibry loam enriched with very well rotted manure, using about a fourth to the bulk of soil. Crock the pots well and pot moderately firm. Before potting see that the soil is uniformly moist as these lilies want very little water until they have filled the pots with roots. It is a good plan to grow quite a few of these lilies, as they can be bloomed at a season when other flowers are scarce. Place under a bench where there is no drip, and where the temperature can be evenly maintained at about 40 degrees, with all the ventilation possible. The worst enemies of the lily when grown indoors are the aphids. Fumigate frequently—at least once a week. When they have started a couple of inches of growth they should be brought up to the light.

Lorraine Begonias

Any pairs or singles that are to be filled can be done now before the hurly-burly of the Christmas trade is with us. The atmosphere should now be kept rather dry for Lorraine begonias. These begonias are very sensitive to any sudden changes of temperature. Never let them dry out, for if this happens their beauty will be of brief duration. Most sensitive to sudden changes of temperature are begonias of all kinds, those of the Gloire de Lorraine type in particular. They should be as near 60 degrees as possible. Give them air when possible but cold currents should not blow over the plants. Avoid dryness at the roots or any excess in the way of watering. Where large specimen plants are grown—say in 6 to 8-inch pots—they should have plenty of room. Raise them up close to the glass on inverted pots and far enough apart to have every one fully exposed to light.

Rhododendrons for Forcing

Now is a good time to get a batch of the newly imported plants and pot them up. These plants when forced come in very serviceable for spring trade. It is always better to dip the balls of roots in a tub of water so they will have a chance to get well wet through for there is nothing worse than to pot them with a dry ball. They grow and flower well in a compost of two parts fibrous loam to one of leaf mold with some sand intermixed. Give good drainage and pack the compost firmly around the old ball. See that they are always kept moist at the roots. These plants want to be kept cool until January so give them a cool pit or house that is just clear of frost, but where you have not these conveniences a deep frame will answer very well. After the new year they can be given a temperature of 50 degrees at night. They like a good light house to grow in during the winter, but when they are in flower some shade will be found the best to hold them in good shape.

Reminders

English ivies can be stored under the edges of the benches in any cool house.

Anthericums can be freely propagated now from the young plantlets that appear on the flower spikes.

Keep pelargoniums well on the dry side until after the turn of the year, when any that need it may be repotted.

Cow manure that has been dried and made fine is the best of all manures for top dressing all bench crops, so always have a good pile of it inside ready for use.

Eupatorium

Nearing the last stages of the growing season the number of hardy perennials suitable for massive color display in the garden is limited. Of course we chiefly rely on chrysanthemums for late displays. Anemone japonica continues to produce flowers more or less freely up to frost. Likewise are *Aster grandiflorus*, *Caryopteris mastacanthus* and the arctic daisy, *Chrysanthemum arcticum*, still available. But for a real solid floral effect there are none of the afore-mentioned that eclipse the eupatoriums, particularly the well known variety *Eupatorium coelestinum*. In general appearance closely resembling the annual ageratums, its habit of growth is erect and slender, reaching a height of from 1½ to 2 feet. The flowers in a cut state possess good lasting qualities and may be used for filling vases. The main reason, however, for granting *Eupatorium coelestinum* permanent space on our borders is the great abundance of blossoms at a time when we need them for garden effect. As a flower producer the white species, *Eupatorium ageratoides*, is equally valuable. Slightly taller, its dense cymes will be found a desirable material in the makeup of various design work of the more inexpensive class.

Eupatorium purpureum maculatum with its deep purple flowers is well adapted for the wild flower garden

EUPATORIUM COELESTINUM.

or for naturalizing in moist situations of the park. Being natives of our country all the eupatoriums mentioned in this note require a minimum of care in the garden. A rather light soil, sufficient irrigation and a sunny exposure are essentials for the development depicted by our illustration. The common method of propagation is by division. Plantations, as a rule, endure the middle Atlantic winters without protection.

Glenside, Pa.

Richard Rothe

Violet Leaf-Spots

The question of violet diseases is one which is of importance to florists at this time of the year. Most of us have got the violets into the houses and many are picking flowers. But it is just now that the success or failure of our violet crop is liable to have its inception.

Violets, above all plants, are the fussiest in regard to themselves. They *must* be kept clean. That is, to my mind, the secret of continued success with violets. Leaves and other trash from the plants left lying around on the soil are veritable hot-beds of disease infection. Those leaves would never have left the plants if there had not been something the matter with them. Mr. Florist, would you put your child to bed with a scarlet fever patient? That's just what you do when you leave dead foliage and trash around your violet plants. Practice the cleanest culture, and see the difference.

This article does not make any attempt to treat exhaustively of violet diseases. Three of the most important leaf-spots only will be taken up. These three are *Alternaria* Spot, *Phyllosticta* Spot, and *Cercospora* Spot. *Alternaria* Spot can readily be distinguished from the others. Characteristically the spot is formed in concentric rings, i. e. the spot seems to be made up of several rings one inside the other. This is considered to be the worst of the leaf-spots of the violet. Many growers have from time to time been forced out of the business by this disease and at best you must expect a continual hard fight with it. This spot is caused by a member of the Fungi Imperfecti—*Alternaria violae*. At first the disease appears as small, greenish-white, round spots. Later, as the spot enlarges, the centers dry up and may fall out. At any rate, the center becomes a pale brownish color and is surrounded by a distinct amber-colored margin. Beyond this is an area of tissue of lighter green

color merging into the green of the leaf. Any portion of the plant, except the roots, may be attacked, but it is most commonly found on the leaves.

The *Phyllosticta* Spot may be identified by the cluster of very minute black or brownish specks in the center of the spot. The spot is whitish averaging one-eighth inch in diameter and the spots often run together and may involve the whole leaf. The causal organism is also a member of the Fungi Imperfecti known as *Phyllosticta violae*.

The *Cercospora* Spot usually produces a clear whitish or grayish spot with a darker center. The fungus causing this spot is a member of the Fungi Imperfecti, too, and is known as *Cercospora violae*.

Often it is almost impossible to tell the spots apart especially when two or even the three causal organisms are found in the same spot, as often happens. However, the characteristics given will serve to identify the disease to some extent and only a microscopical examination can make sure of the identity of each.

Whatever spot the plants may be affected with there is the same treatment. It is useless to try spraying. "An ounce of prevention is worth a pound of cure." Practice clean culture ALWAYS. Water early in the day and only on sunny days. Select strong, healthy vigorous plants when planting. Propagate from clean stock. Renew the soil every season. Finally, keep insects down. They are often a bigger factor in the spread of disease than one would imagine. Remember, if you don't let disease gain an entrance, you cannot have an infection. This means that you must pick and destroy all yellow and diseased leaves, plants or plant parts as soon as they appear.

Amherst, Mass

B. E. Wildon,

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Watch For Crown Gall

This disease has never bothered us in the rose houses until recently when it was brought in on some plants that were purchased, and judging from reports it is appearing every here and there all over the country. It resembles black knot on plums and peaches and wild cherry and as far as we know it is the same thing. The only cure is to cut it off the plants and burn it as soon as it is seen. Often it will grow at the base of the plant on the roots, in which case it can be located by looking for it on all plants that do not thrive well compared with their neighbors. If other plants are on hand big enough to replant the best way would be to pull out the plant with as much soil as possible and burn it, setting the new plant in its place. Where no plants are on hand and it is discovered on time, the growth can be cut off with a sharp knife and burned. If it is cut off close to the plant, and the wood where the growth was found scraped clean with a sharp knife, it is not likely to appear again on the same plant. We have not known this disease to be plentiful enough to cause any noticeable loss, but as it may appear here and there it is best to get right after it and keep it out. It is caused by bacteria which no doubt comes from the soil. It would be well to bear this fact in mind when getting soil for the sod heaps this fall and not take any soil from under or near wild cherry trees, or fruit trees affected with this disease. Also if there are any trees on the place so affected it will be best to remove the diseased limbs and burn them at once, and should the whole tree be badly affected dig it out with the roots and burn it all in the boilers if possible, so there will be no chance of any unburned portion of the diseased wood getting into the soil.

Mulching Beauties

It will be necessary to mulch once more in the earlier planted houses of Beauties and this work will have to be done with the utmost care for it will be very easy to do more harm than good. To begin with, the manure should be well decayed and thoroughly mixed by being turned over frequently. It should not be hot and should be cow manure only. When applying the mulch it will be best to apply only enough to protect the roots, and nowhere near as heavy as the first mulching done in the late summer or early fall. Often all that is necessary is to apply a little manure along the front edge of the benches, where the mulch that was given before has been dissolved by frequent waterings. Make sure that the plants are not too dry when the mulch is applied, and water them as soon as it is on. This will take the heat out of the manure should there be any in it, and it will also wash down a great deal of ammonia which would otherwise escape into the air and perhaps burn some of the leaves. Unless the night following is very cold leave a crack of air on the house to make sure that no harm will come to the plants from the odor of the manure. As the darkest days of the winter are coming be careful not to mulch too heavily, giving merely

enough to protect the roots, and depend on liquid manure, sheep manure, bone meal, etc., to give the plants the food they need.

Cleaning Up

Plants will not only look much better if they are kept clean but they will do much better as well, if all the dead leaves are kept picked off, and the surface of the benches stirred enough to keep the top of the soil open and sweet. No scratching should be done as the roots by this time are near the surface, but the coarse lumps can be rubbed over as the leaves are picked. This should not disturb the roots in any way, and will prove a great benefit to the plants which need air as well as food and water. There are bound to be some dead leaves, especially in commercial houses where the roses are planted close together and made to carry plenty of growth. Some of the bottom leaves are bound to die this way as they get shaded so badly that they are of no use at all to the plant. On private places where quality of flowers and foliage as well as general appearance of the plants must always be the first consideration, they can be planted further apart, and then they will not lose so many leaves. If the plants lose foliage through natural causes such as mentioned, growers will have no occasion to worry. Tying too tight, or rather bunching the plants too much when tying to stakes, will kill a good many leaves unnecessarily, but this can be avoided.

Sulphur on the Pipes

As there is much more heat in the pipes now that the weather has been cold and the ventilators are open less and less every day, the amount of sulphur used on the pipes will have to be much less than was used earlier when air was always on and heat used only a few hours each night. Care should be taken not to apply sulphur to pipes carrying more than eight pounds of steam. If they have more than that, a little lime will have to be added to the sulphur to keep this from evaporating too rapidly, thus making the fumes too strong and bleaching the flowers if not burning some of the leaves. In the old style rose house, twenty feet wide, one pipe around the house painted every ten feet or so will be all the sulphur needed as a fumigation to prevent mildew or to check a slight attack. If mildew has spread badly a little more will be needed, but this is an exception as it should never be allowed to spread at all. As soon as a speck or two appears here and there, see that the cause is found and removed and the disease kept from spreading by killing it at once. A little sulphur on the pipes at night, followed by a syringing the next day, will do the work very nicely. Or the plants can be sprayed regularly with Fungine. Dusting with sulphur should not be resorted to at this time of the year as the sun is not strong enough to affect it any, and it will likely do harm by bleaching the buds wherever it touches them. Never under any circumstances burn sulphur in the green-houses as the fumes will surely kill everything with which they come in contact.

of each new variety and a very extensive and valuable trial of novelties is confidently expected from this ingathering. We hope that our American hybridizers will be well represented in this enterprise, so praiseworthy on the part of the French horticulturists at a time of awful struggle and privation. From what we hear about the new "creations" now receiving their finishing touches by certain American rosarians the candidates entered from this part of the world are not likely to suffer by comparison with those raised anywhere on the other side of the Atlantic. It is quite safe to say that there are some genuine surprises in store.

Disproportionate but just closed, it is already full premiums time for the planning of details and the compilation of prize schedules

for the next season, and the earlier it is undertaken the better. The custom of soliciting special prizes from the numerous florist, nursery and seed houses, as well as from private patrons of horticulture and from local business houses, appears to be rapidly growing—in fact, some of the prize schedules of the season just ended have consisted very largely of these special donations. One serious fault with such is the great disproportion in the amounts offered and their widely variant appropriateness relatively to the respective classes in which they are offered. We expect eventually to see the trade establishments, who are being drawn into this prize levy more and more each year, generally adopt the plan of series of medals, the honor of winning which, rather than their cash value, will be the incentive to competition, but in the case of other classes of donors, the amount of whose gifts is largely dependent upon generosity rather than upon their adequacy for the purpose specified, the schedule committees should urge and should be given all possible latitude in the division and application of the amounts subscribed, so that the absurd disparity so noticeable in many instances may be avoided in the future.

Mutations of the chrysanthemum The best thing that has happened to the chrysanthemum in recent years is the single chrysanthemum. Just at the

time when the regulation big double varieties were beginning to get "the cold shoulder" from the jaded public the singles and anemones and pompons stepped out from their humble position in the back ground and saved the day by their appeal to the people of dainty artistic temperament and thus an extension and renewal of popularity came to the queen of autumn in whatever character she appeared. In fact, the massive Japanese doubles are not outclassed by this turn in chrysanthemum affairs but rather is their stability restored. This revival of interest has proved a stimulus on new lines to the chrysanthemum raisers who are now encouraged to strive for new colors and habits and forms that will appeal to the artistic eye and lend themselves to graceful decorative effect either alone or in association with the big blooms. The experience of the exhibitions this year shows that the popular heart has been touched. The public voice has spoken in undoubted approval and the people stand ready to be shown how the chrysanthemum can and should be made use of to beautify and adorn the somber surroundings of autumn. Bear this fact in mind when making up the prize lists for next fall and you'll have no reason to complain of the public interest if you act accordingly.

A great trial of new roses We are informed that it is proposed by the Government of the City of Paris to establish in the Department of the Seine a "rose concourse" to continue for three years 1917-1919. They request that rose raisers everywhere send for test purposes five plants

INVESTIGATION OF ROSE DISEASES

By Dr. L. M. Massey, Specialist on Rose Disease Investigations, Department of Plant Pathology at Cornell University.

A special and extensive investigation of the diseases of roses has been undertaken by the department of Plant Pathology, Cornell University. This work, which was begun August 1, 1916, is being conducted in co-operation with the American Rose Society, whose members have contributed towards the financial support of the undertaking.

During the past three months much time has been spent in visiting rose plantings in northeastern United States, making a survey of diseases. The gardens and greenhouses of some thirty-five rose growers have been visited. The number and extent of the diseases present have been noted and specimens taken for further study. Growers have also materially aided the work by sending in specimens. These specimens have been examined and the growers advised as to the cause and control of the disease so far as our present knowledge and experience allows.

Unfortunately, nothing is known concerning the control of many diseases of the rose, and but little concerning even some of the most common diseases; and what little is known is mostly of an academic rather than of a practical nature and not accessible to the average grower. Every grower who has endeavored to obtain much information upon any rose disease has been brought face to face with this unfortunate situation. It is for the correction of this condition that members of the American Rose Society have enlisted the services of a plant pathologist to investigate rose diseases and place the information before the growers.

The preliminary survey has shown that the two most common diseases of the rose are the powdery mildew and the black spot, both on indoor and outdoor plants. These diseases have received the most attention of growers and plant pathologists in the past. It has been proved beyond doubt that they are caused by fungi, the life-histories of the casual organisms have been partially worked out, and various suggestions for control offered. Considerable work remains to be done to determine the conditions which favor the development of these diseases and the best methods of treatment. It is the plan of the writer to publish a short article in the trade papers in the near future upon each of these diseases in which the known facts concerning them will be placed before the growers.

STRAWBERRIES UNDER GLASS.

Strawberries at \$2 to \$2.50 a pint box in February and March should be a paying crop if well managed. Plants in fruit make, also, an acceptable feature in a dinner table decoration from the double standpoint of beauty and utility. The accompanying cut shows a system of strawberry forcing as successfully carried on by a grower in Waltham, Mass. As will be seen the boxes in which the plants are set are arranged on shelves, one above the other, on the rear wall of a lean-to greenhouse. The boxes are open on top but the plants issue from apertures

in the front of the boxes and hang towards the light so that the fruit is well exposed to the sun and is also kept from injury by contact with the soil. A wooden track runs the length of the house and the man watering or otherwise working on the plants stands on a car which a helper pushes along. Temperature is not allowed to drop below 65 degrees at night and hand fertilizing has to be carefully done to every pistil. Bees are not enough for this and without hand work every sunny day, misshapen fruit is sure to occur.

However, the survey has revealed the fact that other diseases besides mildew and black spot cause rose growers considerable losses. In fact, many greenhouse men claim that these two diseases cause them little worry.

Ophelia and American Beauty plants affected with a serious root or crown-rot have been received from growers and observed by the writer, in visits to rose houses. The plant decays just below the surface of the soil, usually where the plant "breaks," the developing branches being encircled by the rot. Soon the parts of the plant above ground become yellow and of a sickly appearance as if starved for moisture or food, and die a more or less lingering death. Some growers have kindly furnished samples of plants so affected, and several organisms which may possibly be causing the disease have been isolated from diseased tissue. Inoculations will be made to determine which organism is the cause. The life-history of the pathogene will be studied and an attempt made to work out some method of control. This is necessarily a slow process, but will, we trust, result in the discovery of an effective means of controlling the trouble.

Other diseases which have been noted are: (1) crown gall, caused by a bacterial pathogene, affecting the roots and occasionally the stems of both indoor and outdoor roses; (2) *Phyllosticta* leafspot, affecting outdoor

roses, chiefly ramblers; (3) other leaf spots and cane diseases of unknown causes. Work upon the cause of the diseases in this last group is now under way. Extensive experiments on the control of leaf-spot diseases of indoor and outdoor roses are being planned and will be tested out as quickly as possible. Reports of progress will be made from time to time.

Some misunderstanding seems to exist among growers in regard to sending specimens for examination. Where desirable a postal card will bring to the grower one or more franked tags which will carry specimens by mail postage free; or the grower may pay the postage if he so desires. The specimens will be examined and the sender furnished with all available information regarding the cause and control of the disease. Not only members of the American Rose Society, but rose growers in general may take advantage of this opportunity to obtain information relating to rose troubles. By sending specimens the grower will not only help himself but will be materially aiding the project. Specimens will always be appreciated, regardless of whether or not they are of a new or old disease, or of economic importance. It is especially desired at this time to obtain rose plants affected with root diseases.

CLUBS AND SOCIETIES

AMERICAN ROSE SOCIETY.

The executive committee of the American Rose Society held a special session in Horticultural Hall, Philadelphia, Pa., on the afternoon of Nov. 22. There was an attendance of twenty-three persons representing the Philadelphia Florists' Club and the Pennsylvania Horticultural Society. A very full discussion took place relative to where the best place would be to fix upon for the Spring Exhibition of March 20, 21, 22 and 23, 1917. The discussion was finally brought to a head by a motion by Joseph Heacock, recommending the holding of the next annual meeting and exhibition of the American Rose Society in the First Regiment Armory, March 20, 21, 22 and 23, 1917, and was duly seconded. The motion was put by President Pennock and unanimously carried. It was voted that a committee be appointed to engage the Armory Hall, George Burton to be chairman, also that Adolph Farenwald be appointed exhibition manager. It was further decided that a local secretary be appointed, and Fred. Cowperthwaite was designated for that position. A committee on the exhibits of private gardeners and to solicit the same was appointed with William Kleinheinz, Ogontz, Pa., as chairman. Other committees were constituted as follows: On Commercial Exhibits, George Burton, Chestnut Hill, Phila., Pa.; Wallace R. Pierson, Cromwell, Conn.; George Asmus, Chicago, Ill.; E. Allan Pierce, Waltham, Mass.; T. B. Langhans, Pittsburgh, Pa.; Frank A. Friedley, Rocky River, Ohio; Robert Simpson, Clifton, N. J.; J. A. Peterson, Westwood, Cincinnati, Ohio; William F. Gude, Washington, D. C.; Leo Niesen, Phila., Pa. Advertising, W. F. Therkildson, 471 No. 5th street, Philadelphia, Pa. Tickets, E. J. Fancourt, Philadelphia, Pa. Decoration, John P. Habermehl. Treasurer for local expenses, Alfred Burton. Schedule for Cut Flowers, Harry O. May, Summit, N. J.; Robert Simpson, Clifton, N. J.; Adolph Farenwald, Roslyn, Pa. Official headquarters will be at the office of S. S. Pennock, 1612 Ludlow street, Phila. Pa. The matter of providing a refreshment stand was discussed and referred to the manager with power. The matter of complimentary tickets to the members of the Philadelphia Florists' Club and the Pennsylvania Horticultural Society who assist in the work of the exhibition was referred to Geo. Burton. The distribution of tick-

ets to the press is to be left with W. F. Therkildson.

The matter of the price of ticket was discussed at some length, and it was resolved that florists, merchants or seedsmen who wish to buy tickets for distribution shall pay at the rate of 25c. each in lots of one hundred, and that the regular ticket of admission shall be 50c. In regard to children's tickets at reduced rates, this is to be left in the hands of the manager and ticket committee.

A motion was unanimously carried that it was the sense of the American Rose Society and of this meeting, that a resolution of thanks be extended to the Pennsylvania Horticultural Society for the use of Horticultural Hall, and the courtesies extended to us, and that the secretary be directed to forward this sentiment in an official communication to the Society.

BENJAMIN HAMMOND, Sec.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Department of Plant Registration.

Public notice is given that W. Atlee Burpee & Co., Philadelphia, Pa., offer for registration the Dahlias described below. Any person objecting to the registration, or to the use of the proposed names, is requested to communicate with the secretary at once. Failing to receive objection to the registration the same will be made three weeks from this date.

Descriptions: — Paeony-Flowered Dahlia. Parentage: Seedling from Mrs. Hugh Dickson. An early and profuse bloomer. Flowers large. Color, salmon pink, heavily flushed yellow and amber. The central twisted florets are clear yellow with suffusion of salmon and amber. Height, 4½ to 5 feet. Name, Mrs. John Gribbel.

Decorative Dahlia Parentage: Flora crossed Baron G. de Grancy. Flowers of medium size, pure white, of good depth, and produced on very long stiff stems. Height 4½ feet. Name, Jean Kerr.

Paeony Flowered Dahlia. Parentage: Seedling from Mrs. Hugh Dickson. Flowers of large size. An early and continuous bloomer. Color, salmon-buff with pinkish-salmon suffusion. Reverse of petals reddish-salmon. Height 4½ to 5 feet. Name, John D. Rockefeller.

Nov. 25, 1916. JOHN YOUNG, Sec.

CHRYSANthemum SOCIETY OF AMERICA.

The following reports have been submitted by the committee appointed by the Society:

Exhibited at New York, Nov. 8, by Carl Schaeffer, supt. for Richard Mortimer, Tuxedo, N. Y.; all anemone varieties. Yellow Prince, yellow, points 90; Mortimer, light pink, yellow center, points 88; Old Rose, old rose, bronze tint, points 92; Titian Beauty, bronze, red shadings, points 90; June, light pink, points 85; Graf von Oriola, deep pink, yellow center, points 96; Wee Wah, bright bronze, points 90; H. J. Heinz, light yellow, deep yellow center, points 87; Wilfreda, amber bronze, points 88; Graf von Fleming, white, points 88; Pepita, white tinted pink, points 90; Clemencia, deep lavender, points 87; Innocencia, blush tinted pink, points 94;

Exhibited at New York, Nov. 18, by E. G. Hill Co., Richmond, Ind. Whittier, yellow, Jap. Inc., com. points 85; Browning, amber bronze, Jap. Refl., com. points 80; at Philadelphia, Nov. 18, Whittier, yellow, Jap. Inc., com. points 89; Browning, light bronze, Jap. Inc., com. points 85.

Exhibited at Chicago, Ill., Nov. 18, by Deerfield Nurseries, Deerfield, Ill.

THANKSGIVING

For the Planter of Outdoor Material is

NOT YET DUE

He must wait until Spring time to find out what he has to be thankful for. It makes all the difference in the world whether you planted the sturdy, well-ripened Maine-grown trees, shrubs and herbaceous stock, or "economized" on stuff raised in milder latitudes.

Consult us NOW about your requirements for next Spring. We can supply the goods which bring a PERENNIAL THANKSGIVING.

MOUNT DESERT NURSERIES, BAR HARBOR MAINE

Seedling, white greenish center, anemone, points 85; by Henry Wehrmann, Maywood, Ill., Annie, white, yellow center, Anemone, points 90.

Exhibited at Boston, Nov. 18, by F. Dorner & Sons Co., Lafayette, Ind. Sport from pink seedling, light pink Jap. Refl., com. points 88.

Chas. H. Totty, Madison, N. J., has changed the name of variety Golden Champion to Nag-ir-roc.

CHAS. W. JOHNSON, Secy.

TEXAS STATE FLOWER SHOW.

The exhibition at Dallas brought out a splendid support both from local growers and those at a distance. The awards on the three days showed up as follows:

Chrysanthemum blooms, local exhibitors—Drumm Seed & Floral Co., Fort Worth, six 1st, one 2nd; Lang Floral & Nursery Co., Dallas, two 1st, five 2nd; Texas Nursery Co., Sherman, two 1st, one 2nd; Bird Forrest, Waxahachie, one 2nd. Chrysanthemum plants—Texas Nursery Co., one 1st; Lang Floral & Nursery Co., one 2nd.

Chrysanthemum blooms, out-of-state exhibitors—Denver Wholesale Florists' Co., two 1st, one 2nd; Poehlmann Bros. Co., Chicago, one 1st, two 2nd; Mrs. R. F. Darbee, San Francisco, one 1st, one 2nd. Chrysanthemum plants—Stuppy Floral Co., St. Joseph, Mo.

Roses, local growers—Texas Nursery Co., one 1st; Lang Floral & Nursery Co., one 1st, one 2nd. Out-of-state growers—Poehlmann Bros. Co., four 1st, one 2nd; Gullett & Sons, Lincoln, Ill., one 1st, three 2nd.

Carnations, local growers—J. F. McAdam, Fort Worth, four 1st; Texas Nursery Co., Drumm Seed & Floral Co., Wichita Falls, each one 2nd. Out-of-state growers, Denver Wholesale Florists' Co., three 1st, one 2nd; Gullett & Sons, one 1st, two 2nd.

All of the prizes in the class for single specimen chrysanthemum blooms were won by Mrs. R. E. Darbee, there being no others in competition. The sweepstake prize of the out-of-state entries was also won by Mrs. R. E. Darbee.

General exhibit of plants and novelties, Lang Floral & Nursery Co., 1st; Stuppy Floral Co., 2nd.

Exhibit of blooming plants, Stuppy Floral Co., 1st; Poehlmann Bros., 2nd; Lang Floral & Nursery Co., 3rd.

Collection of ferns, Lang Floral &

Nursery Co., only entry in the fern section.

Table decorations, Lang Floral & Nursery Co., 1st; Dallas Floral & Nursery Co., 2nd; Texas Nursery Co., 3rd.

Brides' bouquet, McKinney Nursery Co., Dallas, 1st; Lang Floral & Nursery Co., 2nd; Texas Nursery Co., 3rd. Corsage bouquet, McKinney Nursery Co., 1st; Lang Floral & Nursery Co., 2nd; Dallas Floral Co., 3rd.

Basket of flowers, Lang Floral & Nursery Co., 1st; Texas Nursery Co., 2nd; Dallas Floral Co., 3rd.

Tarrytown, N. Y., Nov. 26.—John D. Rockefeller was aroused from his sleep early today by the explosion of a boiler in one of the large greenhouses on his estate here. Servants were dispatched to find out what had caused the loud report, and when Mr. Rockefeller learned what had happened he went back to bed.

Many valuable plants and flowers were destroyed by the explosion. A watchman in the building at the time barely escaped injury.

Obituary

William L. Kroeschell.

The trade was greatly shocked when news of the sudden death of Wm. L. Kroeschell, at the Illinois Athletic Club on Thursday eve., November 23, was announced in the local papers the following morning. Mr. Kroeschell was one of four brothers who in 1876 founded the firm of Kroeschell Bros. Co. for manufacturing boilers, in which business he was actively engaged to the day of his

WILLIAM L. KROESCHELL

death, having spent Thursday as usual in his office. Wm. L. Kroeschell was born sixty-one years ago in Nashville, Tenn., coming with his parents to Chicago when a child and receiving his education in the city schools. His first business venture was on the Board of Trade, later being member of the commission firm of Gerstenberg & Kroeschell and in 1900 he became active in the manufacture of boilers and was secretary and treasurer of the firm. In the branch of the firm which manufactures ice machines he was also secretary and director.

Mr. Kroeschell was a man who loved to meet with other men and, as a representation of one of the most important of the allied trades, he was well known to the florists, being a life member of the Society of American Florists, the American Carnation Society, the Chicago Florists' Club, the American Rose Society and the American Vegetable Growers' Association, at whose convention held this summer many in the trade saw him last, when he was toastmaster at the banquet. He was also a member of the Board of Trade and the Illinois Athletic Club, and had a beautiful home at Winnetka, a north-shore suburb.

Mr. Kroeschell leaves a wife, two daughters, Mrs. Robt. Butz and Mrs. E. C. von Ammon, an aged mother, a sister and two brothers. His father who was a designer and hydraulic

and mining engineer, and built the first tunnel for water intake in Chicago, has been dead for several years.

S. J. Reuter.

S. J. Reuter, senior member of the firm of S. J. Reuter & Son, Westerly

S. J. REUTER

R. I., passed away on the night of Thursday, November 23. Mr. Reuter had been in delicate health for some

time and his death was not unexpected, and his family had realized that he would never get out again.

S. J. Reuter was born in the city of Mainz, Germany, October 7, 1851, and came to America in 1872, landing in New York on Election Day of that year. He remained in New York until February and from there went to Norwich where he worked on two private places as gardener and all-around man, staying there a little less than eight years, when he went to Mystic, Conn., for a few months and then moved to Westerly where he established the present business in 1880. In the year 1907 the business which had hitherto been in his own name was incorporated, his son Louis J. going into the company. He was a member of the Society of American Florists and life member of the American Rose Society.

Mr. Reuter was an energetic, very hard worker. He was a man who would push through anything which he undertook, and by virtue of this he built up by degrees a splendid establishment. He was a business man of strict integrity and possessed in a large degree those manly qualities which win respect and personal esteem and leaves a record of achievement of which his family may well feel proud. The funeral on Sunday was under Masonic direction and was attended by a large concourse of friends among whom were Patrick Welch, E. Allan Peirce, W. H. Elliott

WRITE FOR CATALOGUE

GREENHOUSE FUMIGATION

In view of the frequent inquiries made concerning methods for fumigating greenhouses with cyanide, the following directions recently published by the New Jersey Agricultural Experiment Station at New Brunswick are here quoted:

"Inasmuch as greenhouses differ considerably in tightness and construction, and as past experimenters have in many cases failed to note moisture and temperature conditions, the subject of greenhouse fumigation is in a somewhat unsettled state, and such a condition will continue to prevail until some one makes a serious and long-continued study of the subject, taking into consideration all factors which have a bearing on the result.

"Concerning the amount of potassium cyanide to use against the white fly, A. W. Morrill, in Circular 57 of the Bureau of Entomology, U. S. Department of Agriculture, states that between 1/5 and 1/6 of an ounce per 1000 cubic feet of space for 3 hours' exposure has been used with success, also that 1/3 of an ounce per 1000 cubic feet of space used for more than 30 minutes destroyed only the adults and slightly injured the plants (tomato and cucumber), and that in one instance 1 ounce per 1000 cubic feet of space gave good results in an all-night exposure. He also states that probably 1/4 of an ounce of cyanide for each 1000 cubic feet for an exposure not exceeding 3 hours represents the amount which will prove most effective for treatment without injury to tomato or cucumber. R. D. Whitmarsh, in Circular 154 of the Ohio Agricultural Experiment Station, states that in general the amount of cyanide necessary for white fly work varies from 1/5 to 1/6 of an ounce per 1000 cubic feet for 3 hours to 1 ounce per 1000 cubic feet lasting overnight, depending on the construction of the greenhouse. He further states that it is well to have the temperature as low as 55 if possible for best results, and that the fumigation should be repeated in 2 weeks. Mr. J. J. Davis, in the 27th Report of the State Entomologist of Illinois, advises for white fly in moderately tight houses, 1 ounce of cyanide to 3500 cubic feet of space for an all-night exposure, the operation to be repeated 3 or 4 times at intervals of 10 days to 2 weeks. In his general fumigation directions he advises that if possible a temperature above 60 to 65 deg. F. should be avoided, since at a higher one the plants are more liable to be injured.

"A. B. Gahan, in Bulletin 119 of the Maryland Agricultural Experiment Station, states that in houses contain-

ing a number of different kinds of plants he would recommend the use of not more than 3/4 of an ounce of cyanide for each 1000 cubic feet of space. This charge, he says, will be sure to kill thrips, aphids and white fly if left in a closed house over night, the following plants being uninjured by such an exposure—violet, primula, chrysanthemum, begonia, nasturtium, alternanthera, lantana, verbenia, orchid, snapdragon, asparagus fern, sweet pea, coriopsis, mignonette, carnation, croton, cyclamen, Easter lily, geranium, rose, cucumber and lettuce. He further states that a long exposure to a moderate amount of gas is less likely to cause injury to most plants than a short exposure to a heavy charge.

"Our experience in New Jersey with white fly on tomatoes leads us to advise for a modern tight greenhouse 5/8 of an ounce to 1000 cubic feet of space for an exposure of 20 to 25 minutes, having the temperature from 60 to 70 deg. F., and the humidity 70 per cent.

"Prof. M. A. Blake, in the New Jersey Agricultural Experiment Station Report for 1913, tells of the successful results obtained against the rose aphid in a tight, well-glazed greenhouse, using 5/8 of an ounce of cyanide to 1000 cubic feet for an exposure of 16 minutes with the temperature above 65 deg. F., and where moisture conditions were normal for a rose house. From a series of tests conducted at the New Jersey Stations, he remarks that fumigations against the rose aphid are not likely to be successful where the temperature of the house is 60 deg. F. or below, inasmuch as metabolism in insects is largely determined by temperature, and when this is low the insects resist the effects of the cyanide. The tenderness of the plants should also be considered. The more tender and soft the growth the more likely injury will follow the use of cyanide.

"W. J. Schoene, in Technical Bulletin No. 30 of the New York State Agricultural Experiment Station, in a series of fumigation tests with brown-tail moth caterpillar, found that a greater number of caterpillars survived the fumigations made at a low temperature than at a higher temperature, also that fumigations made under humid conditions were more destructive to the larvae than tests conducted in dry air. He suggests that the difference in the results and the resistance of the larvae to fumigation were due largely to the conditions incidental to hibernation, such as the reduced moisture content and comparative inactivity of the larvae.

"Taking into consideration the work of Mr. Schoene and our own experience

in fumigation, we cannot at present help but be advocates of heavy charges of cyanide and short exposure. However, as has been stated before, the entire subject needs a thorough investigation from all angles.

Directions for Fumigating With Hydrocyanic Acid Gas.

"Fumigate only at night. Have the foliage of the plants dry. The materials used in the generation of the gas are 98 per cent. potassium cyanide, commercial sulphuric acid and water. For every ounce of cyanide use 2 fluid ounces of sulphuric acid and 4 fluid ounces of water.

"1st—Determine accurately the number of cubic feet of space in the greenhouse to be fumigated.

"2nd—Find out the total amounts of cyanide and sulphuric acid necessary, and divide these into parts or charges representing each 25 feet of length of the greenhouse.

"3rd—Weigh out the desired amounts of pulverized cyanide for each charge and wrap each in a single thickness of cheesecloth or place in a thin paper bag.

"4th—Measure out the necessary amounts of sulphuric acid and water and place in glazed earthenware dishes or glass receptacles (do not use metal). Pour the water in first and add the acid slowly, mixing with a glass rod or stick. The container should never be more than 1/4 full of acid and water, because the action which follows the introduction of the cyanide will result in much of the material being splashed out. Ordinary glass tumblers or bowls, 6 or 8 inches high, about 3 or 4 inches wide, are often suitable.

"5th—Make the house as tight as possible by closing all ventilators and stopping up all cracks.

"6th—Distribute the bowls containing the acid and water at the desired distance apart and place beside each the bag of cyanide.

"7th—Commence at the far end of the greenhouse and work toward the exit, dropping each bag of cyanide gently into the bowl. If a number of charges are necessary, two or more operators will need to work together.

250 at 1000 rates.

H. H. BARROWS & SON, Whitman, Mass.

After the last bag has been disposed of, leave the greenhouse immediately and close and lock the door.

"8th—After the fumigation has gone on the desired length of time, thoroughly air the house for at least 1/2 an hour before entering.

"9th—Take out the containers, keeping face averted so as not to breathe the odor which comes from them, and bury the contents in the ground.

"10th—Wash out the containers with clear water and use for no other purpose. As soon as the cyanide comes in contact with the acid and water, the gas starts to come off, and by using many containers or generators a quicker distribution of the gas is assured.

"Caution.—Potassium cyanide is a deadly poison when taken internally, and the gas generated by the addition of cyanide to sulphuric acid is also a deadly poison when inhaled. As a result, one should use extreme care in handling these materials. With proper precautions and care there is no danger. No matter how familiar one is with fumigation, it will not pay to become careless."

OBITUARY.

(Continued from pag. 732)

and Mrs. Elliott from Boston and John Young from New York.

Mr. Reuter is survived by his widow, one son and two daughters. In the past few years most of the business responsibility has been carried by his son Louis.

Bayard Thayer

Just as HORTICULTURE goes to press the sad news comes of the sudden death, this morning (Wednesday, November 29) of Bayard Thayer, patron of horticulture and owner of one of the finest garden estates in this country, at South Lancaster, Mass. Mr. Thayer's age was fifty-four years. Other than the foregoing, we have no details. The news of the passing away, in the prime of life, of one so useful and liberal in behalf of American horticulture, comes as a terrible shock.

Joseph H. Cushing

J. H. Cushing, who for many years conducted a florist business under the name of the Quidnick Greenhouses, died on November 25 at his home in Quidnick, R. I., aged 65 years. Being in failing health, Mr. Cushing sold out his business and retired last March. He leaves a widow, one daughter and a grandson.

IMP. SOAP SPRAY

Is a scientifically prepared compound that is highly efficient for ALL insect pests. Why bother with several sprays when this will answer every purpose throughout the year?

Some common Sucking Insects, magnified.

HAMMOND'S PAINT & SLUG SHOT WORKS, Beacon, N. Y.

TWO NEW ROSES OF HIGH DEGREE.

We saw two of C. H. Totty's new rose pets in the wholesale market recently and were greatly impressed with their beauty and other splendid qualities as forcing roses. "Cleveland" has foliage of unrivalled thickness and lustre and the color is the purest of pure, the pink merging into luminous orange at the base of the petals and it has been demonstrated that this variety holds its color persistently all through the hot weather. Nellie Parker is a companion novelty also raised by Dickson. Its color is a soft Daybreak, a tint rarely found in roses.

BAILEY'S NEW STANDARD Cyclopedia of Horticulture

Six large quarto volumes. More than 3,600 pages. 24 exquisite full-page color plates. 96 full-page sepia halftones and more than 4,000 text engravings. 500 collaborators. Approximately 4,000 genera, 15,000 species and 40,000 plant names.

The new Standard Cyclopedia of Horticulture has been freshly written in the light of the most recent research and experience. It is not merely an ordinary revision or corrected edition of the old Cyclopedia, but it is a new work from start to finish with enlarged boundaries geographically and practically; it supersedes and displaces all previous editions or reprints of every kind whatsoever. It is both an Encyclopaedia and a Manual, for with the aid of its Synopsis and Key, amateur and professional alike may quickly identify any plant, shrub or fruit contained within the set, and then receive expert instructions for its cultivation. Price \$6.00 per volume. Five volumes have now been issued and the others will follow in succession. Order from

One Week's Imports

Imports at the port of New York, for horticultural materials, for the week ending Nov. 18th, were recorded as follows:

Bulbs—France, \$1,780; Netherlands, \$776; England, \$569; Japan, \$16,999.

Plants—Belgium, \$94; France, \$35; Netherlands, \$229; England, \$751; Ireland, \$361; Bermuda, \$261; Panama, \$98; Brazil, \$135; Columbia, \$2,473; Japan, \$16.

Red clover seed—Chile, \$11,154.

Clover seed—Canada, \$9,801.

Other grass seed—Scotland, \$511; Ireland, \$5,385; Canada, \$2,356.

Other seeds — Denmark, \$640; France, \$31,477; Italy, \$811; England, \$239; Canada, \$45; Spain, \$563; Hong-kong, \$242.

Dried blood—Argentina, \$4,640.

Other fertilizers—Scotland, \$102; Argentina, \$14,826.

PUBLICATIONS RECEIVED.

The Twelfth Annual Report of the Canadian Seed Growers' Association, for the year ending March 31, 1916, has been received. Part I contains the minutes of the Annual Meeting and Part II is devoted to Addresses and Contributions.

"Peggy Raymond's School Days." By Harriet Lummus Smith. This is another gift book, published by the Page Company, Boston, a number of whose holiday offerings we reviewed last week. It is the third in the Friendly Terrace Series. The story has no lack of thrilling incidents and is a worthy sequel to its predecessors, "The Girls of Friendly Terrace" and "Peggy Raymond's Vacation." Price \$1.50.

Chatterbox, 1916.—Chatterbox is the acknowledged king of all juvenile books published in the English language. Chatterbox is not made up of "rehashed" of old material, but the stories are especially written and the illustrations made for each volume, regardless of cost. The Annual grows in popular favor yearly and maintains its enviable position as the best juvenile publication. Price \$1.25. The Page Company, Boston.

"Pollyanna Calendar." A handsome holiday gift, with a richly embellished page for each week in the year on each of which is inscribed an appropriate quotation from the popular "Glad Book." The Page Company, Boston.

OUT OF THE GINGER JAR.

If all the members of the American Rose Society were as good workers as Robert Pyle, of the Conard & Jones Co., there would be nothing else heard of in the horticultural world but the A. R. S. He took in seventeen new members after his recent lecture in Pittsburgh. We are not all Robert Pyles, able to pull in piles like this, but we can all do a little. If each of us should send in one, that would double the membership, and doubling the membership doubles the influence. The president, Samuel S. Pennock, is a great worker himself, but his other real greatness

is in his ability to enlist the enthusiasm of everybody else around him—including the Robert Pyles.

NEWS ITEMS FROM EVERYWHERE

CHICAGO

Andrew Benson is booked to leave in December for another trip to South America to collect orchids for Poehlmann Bros. Co. Before leaving he has promised to give some of his experiences before the Chicago Florists' Club.

For the season of the year, Kroeschell Bros. Co. are having a fine run of business. During the past week orders have come from extreme parts of the country, one from the south, one from Maine and one from the state of Washington.

After repeated rumors to the effect that the E. C. Amling Co. are negotiating for the Green Truax Bldg., opposite their present location, it is now stated by their friends that a lease has been signed and that they will occupy the new store Jan. 1st, 1917.

J. Huebner, 11 W. Randolph street, says business is very satisfactory at his store, where a specialty is made of decorating for social functions, of which the season so far has been very full. Mr. Huebner has a collection of photographs of his work of which he is justly proud.

At the Poehlmann Bros. Co. potted chrysanthemums are nearly gone, only a few remaining for Thanksgiving sales. A good supply of azaleas, cyclamen, and begonias will leave no gap in the potted plant department, however. Christmas and regular orders are showing that business is picking up all over the country.

At Frank Oechslein's the time of the potted chrysanthemum plants is over. About forty of the best standard varieties were grown with yellow in the lead, about evenly divided between large flowering pompon and single varieties, all grown to bush shape and in pots ranging from five to eight inches. Demand this year has been a little heavier for the large flowering, that is from two to four inches on bush plants.

The fall flower shows at the various parks are in full swing this week, and the park conservatories are open each evening till ten o'clock. These affairs are generally well patronized and this year one of the women's clubs led the way to a still larger appreciation of their value by holding a meeting there. It is not uncommon to find people who have lived in Chicago a lifetime and have never been inside the conservatories.

CINCINNATI.

A. K. Davis who was formerly in business in Bellevue is opening a new flower store in Newport, Ky.

Farrel & Co., are opening a flower store in the Galt House at Sixth and Main Sts. Mr. Farrel, formerly was with Julius Baer.

The R. G. Kootz Floral Co. are removing their store from its present location to the Gwynne Building at the busy corner of Sixth and Main streets.

BOSTON.

The New England Florist Supply Co. have recruited their staff for the Christmas business by the addition of William J. Flynn, a well-known member of the craft.

W. S. Spring, who for the last 16 years has been known as the Castle Square Florist, has recently opened a new store in the Auditorium Building in Malden. Mr. Spring has equipped his shop with neat up-to-date ideas and conveniences and is confident of success in his new undertaking.

R. & J. Farquhar & Co., have in course of construction some new plant houses at their Dedham nurseries in which an ingeniously designed, home-constructed concrete gutter is used between the houses. The houses are intended for hybrid roses. We noticed a new begonia at this place, of German origin, which although greatly resembling Glory of Cincinnati, is yet different and has some advantages over that popular sort, in the color of the foliage and the slightly deeper pink of the flowers. The latter is not so much due to the exact color of the petals as to the form of the flower which is somewhat cup shaped and thus showing more of the outside of the petal.

W. E. Fischer, who has been many years in the Boston Park Department, leaves here after thirty years' service to take the superintendency of the Cyrus McCormick estate at Lake Forest, Ill., succeeding E. O. Orpet, who has resigned and will go to the Pacific Coast.

On Monday night, November 27, Mr. Fischer was given a rousing farewell banquet and send-off at the Hotel Brewster by over one hundred friends in the Boston and Metropolitan Park departments and the florist and gardening profession. Wm. P. Glennon of Jamaica Plain was toastmaster and he was a brilliant success. Starting with P. Welch he succeeded in drawing out a line of high-class oratory such as is rarely equalled. The affair was under the management of Jas. B. Shea and those who know that prince of genial hospitality can faintly realize how it was carried out. As for Mr. Fischer he has something to remember as long as he lives even if he should rival Methuselah in that respect. He was presented, incidentally with a traveling bag, purse of gold, field glasses and a set of horticultural books, and on the Saturday before, he had been presented with a gold watch and chain by his associates at Franklin Park. Previous to the speech making a lively cabaret entertainment was given. The affair was one of the liveliest "pulled off" in Boston horticultural circles for many a year.

WASHINGTON, D. C.

An examination will be held by the Civil Service Commission on January 3, for scientific assistant in drug plant investigation at the Department of Agriculture, which position pays from \$1400 to \$1800 per annum.

Postmaster General Burleson has ordered the suspension of the rule which provides that domestic mail matter bearing on the address side adhesive seals or stickers, other than lawful postage, shall be treated as unmailable, during the period from December 1 to January 1. The suspension is granted in order to facilitate handling and delivery of mail during the Christmas holidays but postmasters are instructed to inform their patrons that such seals or stickers should not be placed on the address side of mail.

Announcement has been made by the White House of the following formal program of social events, starting with the Cabinet Dinner on December 12, the events coming this year three weeks earlier than usual; then follows the Judicial Reception on December 19; the Diplomatic Dinners on January 9 and 16, one of these being tendered to the representatives of the Allied nations, the other, to the representatives of Germany, Austria, and their allies; the Congressional Reception will be held on January 23, and the Supreme Court Dinner on January 30, and the reception to the Army and Navy on February 6, while the season will close February 13, with the Speaker's Dinner.

NEWPORT, R. I.

The Thomas Galvin Estate has gone out of business. The greenhouses were bought for removal by W. C. Vanicek.

Mr. Falkenholme, gardener at the Hutton place whose leg was amputated about three weeks ago is progressing satisfactorily toward recovery.

John Forbes, gardener at the August Belmont estate, Newport, is leaving to take charge of the new Schwab establishment in Pittsburgh, where it is said that half a million dollars will be spent on greenhouses alone.

PITTSBURGH

Randolph & McClements had the decorating for a debutante tea, which was the finest affair of its kind this season. Centering the tea table in the dining room was a large French basket filled with cattleyas and oncidiums with tea roses and adiantum, with yellow ribbons entwined. Maidenhair ferns banked the mantel shelf, and at each side were silver bowls filled with sunburst roses. Conventional decorations of specimen chrysanthemums and foliage were used throughout the other apartments.

NEW YORK.

Henry S. de Forest has been secured by the King Construction Company, of North Tonawanda, N. Y., to represent them in New York City and surrounding territory, with an office in this city, beginning Nov. 22. Mr. de Forest is widely known in the greenhouse construction and heating business, having been 2nd vice-president and manager of the Boston office of the original Hitchings Company, afterwards manager in Boston for the Burnham, Hitchins and Pierson people, then sales manager for Pierson U-Bar Co. in New York and in Montreal. Mr. de Forest has been living in Montreal for a number of years since discontinuing with the U-Bar

Co., and we are pleased to welcome him back to the scene of his former activities.

Lewiston, Me.—A new corporation, the Maine Bulb and Flower Growers, has been formed by George W. Horne of Lewiston, Willard A. Noyes of Auburn, and George A. Whitney of Auburn. The temporary officers are: president, Mr. Whitney; treasurer, Mr. Noyes; secretary, Mr. Horne. They propose to purchase a farm, build greenhouses, raise and keep sufficient cattle, hogs and horses, and keep the soil at all times in high condition. The gladiolus will be their principal specialty at first and they have a big asset in the recognized superiority of Maine grown bulbs.

THREE DISTINGUISHED PHILADELPHIANS.

Flower Market Reports

Stock in some respects **BOSTON** is barely sufficient for the heavy demands this week. Chrysanthemums have enjoyed a big call, and in addition to cleaning up on every flower, many dealers have received fancy prices. Yellow varieties reigned supreme, but are closely pressed by the red. This heavy run on red is due to the shortage of red roses. A steady rise in prices is to be noted in all rose sales of the week. Carnations are somewhat slow to move, but command fair prices. A record for lily of the valley for recent years is this week established when it has brought no less than \$10.00 per 100 on special call. It is abnormally scarce and the majority of the sales were made at \$8.00 per 100. Stevia is plentiful and is called for in goodly quantities. Violets have had an excellent week, both in point of sales and price.

There has been sufficient stock to fill all demands, though at times more good carnations could be used. Chrysanthemums were in fair supply and prices satisfactory. Some excellent Golden Wedding, Maud Dean, Mrs. Jones and Wellesley Pink were had, although a good portion of the receipts have been of the medium quality. Violets have had a good call, also lily of the valley and cattleyas. The heavy supply of roses has now shortened and prices rule better. There are plenty of lilies, narcissus and other stock. This week should show up a large volume of business.

There was a fair demand for flowers during the past week but all of the wholesale houses could have handled more outside orders and would also have welcomed more local trade. The cold wave brought a change for the better in market conditions but still it is considered a dull November, and even the week previous to Thanksgiving business was not up to normal. With the opening of the last week of the month, Thanksgiving orders came pouring in and it required all hands to care for them. The amount of stock on Monday was not in excess of the demand and in many cases more could have been used to advantage. Chrysanthemums are nearing the end. This week will see the big late blooms at their best and comparatively few are now expected to be left over. Pompons which have played such a large part in the market in competition with carnations, show signs also that their reign is nearly over. Roses are not in quite so large supply since the drop in temperature. Carnations, on the contrary, are coming in with the few clear days and the cool weather is making the quality excellent. Pussy willows, ilex or winter berries and all kinds of green play quite a large part in the total sales. There is an oversupply of lilies; lily of the valley is scarce enough to maintain its high price and sweet peas are scarce.

CYPRIPEDIUMS

Well grown, deep, rich green flowers, in quantity. Delivery now or Christmas.

\$2 per doz., \$15 per 100

BOUVARDIA

Splendid quality, (single), pink, light pink and white, \$4 per 100.

The supply for **CINCINNATI** Thanksgiving is larger than it ever has been for that day. So confident were the buyers of a large supply that few of them troubled to place orders except for special stock. The balance were willing to take their chances. Roses and carnations are good and in heavy supply. Chrysanthemum offerings are every bit as heavy as they have been since the glut started. Lilies are very plentiful and they have not been meeting with a very strong demand.

NEW YORK This week's story can be told better next week. At present writing, on the verge of the great national feasting holiday there is a very welcome activity in the wholesale flower district. There is no scarcity, however, except in a few specialties and those who wish to have flowers on their Thanksgiving Day

table can have all they want at reasonable prices. Violets have taken a much-needed jump from the gutter prices which have prevailed and there is a probability that this once prosperous little flower may get back to at least a semblance of respectability after its hard experience for which the men who grow it are far from blameless. Cattleyas are hitting the high spots, as they should, and those who are ambitious to be classy in their flower buying can now be accommodated. We wish it were always so. The flower trade should be at all times in position to hold the patronage of the patrician and of the plebeian. We need them all.

The improvement noted in **PHILADELPHIA** our last report continues with a slight upward tendency. Stocks cleaned up pretty well

BOXWOOD SPRAYS—QUALITY IS ECONOMY—Especially is this true in the buying of OUR BOXWOOD SPRAYS.

That's why so many florists and storemen insist on ordering our product. They always get the very best. Our Sprays come from OLD SOUTHERN PLANTATIONS, where on the old plantations the growing of great clear, well clothed glossy foliage, of which you can use every spray. We know it. Why not buy the best at First Cost to Consumer Prices—\$7.50 PER 100 LBS.

Also ask for booklet "CHRISTMAS SUPPLIES." It offers suggestions. **PITTSBURGH CUT FLOWER CO., 116-18 Seventh St., Pittsburgh, Pa.**

Flower Market Reports

(Continued from page 743)

and prices held firm with prospects of a decided advance for the Thanksgiving trade. American Beauty and some other roses shortened up considerably in supply but the quality was all that could be desired. In Russells especially the quality continues extra good and they remain among the best sellers. Carnations are very fine and the demand is better than it was. The leaders are Matchless, Mrs. C. W. Ward, Enchantress Supreme, Beacon and Victory. The quality of the chrysanthemums arriving is not quite equal to other years. The leaders at present are Golden Chadwick, Bonnafon and Enguehard. Cattleyas reached the twelve dollars a dozen mark on the twenty-seventh. The cypripedium crop is now available and what we have seen are unusually good, being large, richly colored and well finished flowers. Lily of the valley is still on the scarce side; violets going better than usual; sweet peas very good indeed and cutting quite some figure in the market. Bouvardia, calendula and paper white narcissi are also prominent crops in good form at present. Gardenias scarce.

WAYCROSS, GA.

**Plant Propagation, Greenhouse
 and Nursery Practice**

By M. G. KAINS

We have had many inquiries from
 time to time for a reliable and up-to-
 date book on plant propagation, but
 were always at a loss to find any pub-
 lication that we could recommend. The
 subject has been dealt with in fragmen-
 tary manner only in books that have
 come to our notice. So it is well that
 this new work has been issued, espe-
 cially as it is both comprehensive and
 practical, and it should meet with a
 ready sale among plantmen, nursery-
 men and gardeners. There are nineteen
 chapters covering in detail topics of
 germination and longevity of seeds,
 propagating by buds, layering, cuttings,
 grafting, etc., fruit tree stocks, clones,
 etc., and there are eight pages of con-
 densed cultural instructions in tabu-
 lated form, covering annuals and peren-
 nials from seed, woody plants, ever-
 greens, vines, bulbs and tubers, green-
 house and house plants, ferns, palms,
 water plants, orchids and cacti. The
 illustrations are numerous, comprising
 213 figures and halftone plates. There
 are 322 pages well bound and on heavy
 paper, teeming with helpful information.
 It is a book which no cultivator can
 afford to do without. It is worth many
 times its price. Copies can be supplied
 from the office of HORTICULTURE at
 publisher's price, \$1.50.

Kroeschell Bros. Co., 466 W. Erie St., Chicago**Flower Market Reports**

(Continued from page 745)

PITTSBURGH Thanksgiving will have cleaned up chrysanthemums of all kinds. Business conditions are very good, with satisfactory price list and the demand likewise. There is a plentiful supply of practically all home grown stock. Roses and carnations are fair and there are just about enough lilies to clean up nicely each day. Although too early in the season for correct prophecy, the signs point to the probability that violets will be in more favor than for several years past.

The market stiffened **ST. LOUIS** up the past week. Owing to the considerable letup in chrysanthemums, roses and carnations at time of writing are hardening up in demand and price. Violets always enjoy a good call for Thanksgiving. Sweet peas are not very plentiful, no fancy varieties being yet seen. Thanksgiving trade is good, fancy stock in all lines bringing good prices.

STANDARD FLOWER**POTS**If your greenhouses are within 500
miles of the Capitol, write us; we can
save you money.**W. H. ERNEST**

29th & M Sts., Washington, D. C.

The great variety of weather with which Washington has been "blessed" during the past week or ten days has had considerable effect on the business of the local florists. The temperature has risen and has dropped as much as thirty degrees in a few hours. Chrysanthemums last week passed their height and roses and carnations are slowly coming into their own. The prices on the former have stiffened slightly and there will be the usual increase on all flowers for the Thanksgiving Day trade. There has been plenty of everything. Lilies have gone to waste because of the heavy supply of chrysanthemums. Lily of the valley is not very good. Narcissus has not been selling to any extent, it being too early in the season. Violets, sweet peas and miniature roses are considerably in demand. Cattleyas are scarce and prices have advanced.

SIGGERS & SIGGERS

PATENT LAWYERS
Box 9, National Union Building
Washington, D. C.

From this side view of the plate, you can see what a leverage a hinge has when the whole weight of the sash comes on the bottom edge of the plate.

No matter whether we use the standard plate like the one above or our Z bar, the sash is hinged direct to the fascia.

No part of our steel side posts is below ground to rust out, out of sight. They are bolted to cast iron bases in concrete footings.

Note the fascia under the eave and that the sash is hinged to it—not the extreme edge of the plate.

Prying Into Some Pry Off Points

LET'S consider just one thing—the eave and the way we don't do. You notice from the side detail cut above, that the sash is hinged to the cypress fascia and not direct to the plate.

Doing it this way brings the prying pressure of the hinges in the centre of the plate, giving no leverage for any prying effect. When hinged direct to the plate, the hinges extend out to the very edge of the widest part of the plate, causing a decided leverage or pry.

This prying, be it ever so little, sooner or later loosens the glass.

We can take you to houses with extra deep and heavy side sash, that have been up for years, and the eave glazing is as snug and tight as ever.

We'll wager you thought we were a bit behind the times in still continuing to use the fascia as a hinging member.

What do you think now?

You know we go anywhere for business. Or to talk business.

A SLEEPLESS WATCHMAN

ALARM TEMPERATURE CONTROLS FOR GREENHOUSE USE

Guaranteed to Render Satisfactory Service. Your money will be returned if instrument does not prove satisfactory after a thirty days' trial

G. H. 4.

\$10 Each

Oxen Hill, Md.,
Nov. 18, 1916.
Standard Thermometer
Co.

Gentlemen: Please find enclosed money order for which please send at once your Standard Greenhouse Thermostat No. G. H. 3. The one I bought last year has proved to be one of the best saving labor and expense device, as before I bought it I was compelled to be up most every night for fear of something going wrong.

Yours truly,
John S. Sharper,
Box 236, Wash., D. C.

G. H. 3.

\$7 Each

Your Best Friend!

Plant Insurance at \$7

The Standard Thermostat is the best business partner and friend you can have. It protects your growing things from ruin by sudden changes in temperatures. It is infallible, inexpensive—more reliable than a night fireman.

The Standard Thermostat will ring a bell whenever your greenhouse temperature rises or falls to the danger point. Place the bell at your bedside or anywhere you please.

This is a word to the wise—a buy word to the wise grower. Sudden temperature ups and downs ruin thousands of plants every year. Protect yours! Install a Standard Thermostat now. It costs only \$10.00. Write today.

Was Your Watchman Awake Last Night?

You are taking chances every night with your valuable crops, unless you have proof that the temperature in your greenhouses is kept even.

A silent, sure check on your watchman is the DE LUXE member of the Standard Thermometer family.

Supply of charts, specially prepared recording ink furnished with each instrument.

No. 200

\$25

But not if you are equipped with the STANDARD THERMOSTAT. The Standard Thermostat protects you from just such dangers. It will ring a bell at your bedside when danger is near.

The Standard Thermostat is indispensable to the up-to-date grower. You know preparedness counts. Get the Standard today. It costs only \$7.00—lasts a lifetime. Write for descriptive matter now, while you are thinking about it.

Tell Tale—That's Just What It Is

The chart shows every variation in temperature, however slight day and night.

With the key in your pocket, you may sleep, for the night man knows this sleepless watchman is watching him!

IS IT WORTH \$25.00 TO YOU TO INSURE YOUR BUSINESS? MOST FLORISTS THINK SO!

CHRYSANTHEMUM NOVELTIES

1917

Our Novelties for 1917 are the best we have ever had. The finest of the year in the large flowering type will be —

LOUISA POCKETT

Mr. Pockett, who raised both varieties says that Louisa Pockett will easily displace Wm. Turner as the best white in cultivation. From our knowledge of it I can endorse this statement.

In 1906 I distributed Beatrice May which remained our standard white for years. Five years later in 1911 I distributed Wm. Turner and now after a lapse of five years, in 1917 I will distribute this sensational white that surpasses all others—**LOUISA POCKETT**.

This is a seedling from Turner but a larger flower and heavier grower.

Other splendid Novelties for 1917 will be:

NAG-IR-ROC; W. H. WAITE; PRES. JOHN EVERITT; OCTOBER KING and BOL D'OR. January delivery, 2½ in. pots, \$16.00 Dozen; \$100.00 per 100.

We will also distribute Schaffer's
PHENOMENAL JAPANESE ANEMONES

And our new SINGLES for 1917, are as usual
THE FINEST IN THE WORLD

1917

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

"If vain our toll, we ought to blame the culture, not the soil."—Pope.

Care of Christmas Plants

AZALEAS—There are few more popular Christmas plants than azaleas, the bright colored sorts, such as Hexe and Mme. Petrick especially. Remove plants nicely in flower into a cooler house, but do not let the change be so sudden as to cause wilting.

CAMELLIAS—Camellia plants carrying two or three flowers are quite salable at the holidays. If plants have hard, green buds, which have not yet started to swell, they cannot be flowered on time. By all means grow camellias fairly cool, not exceeding 50 degrees at night at this season.

POINSETTIAS—If the foliage is still dark green on the plants you are fortunate. Such stocks, even if the bracts are not large, will sell well. From now on pay special attention to watering and do not subject the plants to any cold draughts or low temperature.

LILIES—The crop of Christmas lilies must now have the buds starting to open. Then in a temperature of sixty to sixty-five degrees at night, they will be all right.

BERRIED PLANTS—Christmas is the time par excellence for disposing of berried plants. In fact, the sale for them at any other time is quite limited. *Ardisia crenulata* is deservedly popular. *Solanum*, Christmas peppers and *Otaheite* oranges are all popular fruiting plants for the holiday trade.

BEGONIAS—*Lorraine*, *Glory of Cincinnati* and *Mrs. Peterson* begonias are great Christmas plants. Do not keep them too warm from now on and they will then give your customers more lasting pleasure.

ERICAS—*Ericas* such as *melanthera* are quite easily flowered for Christmas and meet with a good sale. This is another plant which will not tolerate forcing and must always be grown cool but which is quite accommodating in that it will remain fresh a long time. Any temperature just above actual frost will suit it.

LILY OF THE VALLEY—Pots of lily of the valley five and six inches in diameter, with fifteen to twenty single pips in each, will make salable plants. As they are getting fully opened, give them slightly cooler quarters, but be careful on this point as a drop of 20 degrees will cause the plants to wilt.

DECORATIVE FOLIAGE PLANTS—Do not make the mistake of mixing these rich foliage plants in the same pans or hampers with poinsettias, as they hardly agree. The highly colored *crotons* and *dracaenas* make excellent plants for warm rooms, as does *Pandanus Veitchii*. All of these stand the drying heat with little injury. It is well also to remember that none of these plants should long be exposed to a temperature lower than 50 degrees, or they will soon show it in loss of foliage. They should, therefore, be extra well protected when sent out to customers during severe weather.

PRIMULAS AND CYCLAMENS—*Primulas* and *cyclamens* are plants which can be sold at a moderate price and are really satisfactory to the purchasers, as they bloom

so long under quite adverse conditions. The pink and red are the ones which sell now, and plants which have had a light, sunny bench and a temperature of 50 to 55 degrees at night since early September are now in good condition. Use care in watering to do it around the sides of the pots. If poured in the center of the plant the probabilities are that the buds and foliage will decay.

FERN DISHES—There is invariably considerable call for fern dishes at Christmas and it is well to have a good number made up in advance. Some prefer them with a small *Coccoloba Weddelliana* as a centerpiece.

SPECIMEN NEPHROLEPIS—The old Boston variety is still most in evidence and sells better than any other sort, but there is a wide assortment of other forms. Watering is of vital importance or there will be a great loss while plants are in the store. Few store florists know much about it and when large numbers of valuable plants are on hand, get a competent greenhouse man to water them.

HARDY SHRUBS—English hollies in tubs take the lead among the berried subjects. Others are *Skimmia japonica* and *Aucuba japonica*. These being able to withstand quite hard freezing, they are excellent to stand outside the store, and in addition some of the *cupressus*, *retinosporas*, *thuyas*, *abies* and other coniferæ can be used to good advantage. Neat tubs, painted green are better than pots for all these shrubs.

CARE IN HANDLING—Christmas is the holiday when we may naturally look for a low temperature. An ample stock of newspapers, tissue and oil paper and cotton-wool should be laid in. Regular wrapping paper should be used as an outside cover at least for small plants, for the sake of neatness. Such special flowers as gardenias and orchids should have their flowers wrapped in tissue or oil paper before heavier material encloses them. If severe cold, a sheet of cotton-wool should also be wrapped around each. Do not cover the plant heavily and leave the pot exposed. A bad chilling at the roots may easily prove disastrous. Wrap heavily; it is better to be on the safe side and overdo it, rather than have customers telephone complaints of chilled or frozen plants.

Christmas Greens

Practically everyone in the retail business handles Christmas greens, and with most of us it pays as well as anything we do around the holidays. A few words on this will not go amiss now. A deep cold-frame can't be beaten for storing greens. Spread some heavy paper or burlap over the bottom to keep the stock clean; the made-up wreaths can be piled up here, also the loose holly and most of the other stock if the weather isn't too severe. Sprinkle lightly, place heavy paper over the top of all, followed by the sashes and such protection on the outside as well be necessary to keep out frost. We shall want all such kinds as holly, fresh cut boxwood, laurel wreathing, *lycopodium*, moss, mistletoe, etc.

Make use of the best stock you can buy, and make up well. If it ever pays to offer high quality stock, around Christmas is the time.

Cinerarias

Give a cool and airy house, where the temperature can be kept from 40 to 45 degrees at night, with a rise of 10 degrees with sun heat. In fact, the fullest light and a low temperature and constant fumigation are the three essentials to make stout, healthy cinerarias. These plants will now be making very rapid growth. Particular care should be taken to ventilate well during warm and dull weather so that they will not grow soft. Do not let them get pot-bound before giving them a shift with a compost of two-thirds of chopped sods and one-third of well-decayed cow manure. The green aphid is likely to be troublesome from this out so fumigate once a week. Seeds sown in August for Easter plants will now be in two-inch pots and will soon want a four-inch in which they will pass the winter, and in February will be shifted into their flowering pots, five-inch or six-inch.

Fern Spores

To bring these up to good sized seedlings requires watchfulness. All seed pans should be well cleaned, so as not to leave any germs of moss or fungus which are sure to ruin the young ferns, when they begin to show. One point to be remembered is to have everything very

clean. Use plenty of crocks on the bottom of the pans to insure good drainage. Some moss can be spread over the crocks to hold the compost from choking up the drainage. These pans can be filled to within an inch of the top. A good compost will be equal parts of loam and leaf-mold and some sand. Over this put about half an inch of finely sifted compost, press firmly and sow the spores; press the spores in and place pans in a temperature of 65 degrees and cover with glass. To keep up a steady supply of small ferns for the filling of fern pans one should sow spores about every five or six weeks. Newly sown spores should be kept in a temperature of not less than 65 degrees at all times and they should have this heat for sometime after they appear.

Reminders

Give plants that are well pot-bound a top-dressing of dried blood. This is an excellent fertilizer for this purpose.

Place a few stock plants of bouvardia in a warm moist house so they will produce early cuttings. About 60 degrees will suit them.

Maintain a restful temperature in the houses where palms and ferns are kept, unless for any special purpose some are being forced.

Daffodils that were planted early should now be sufficiently established to stand moderate forcing. Fifty-five degrees will be all right.

Next Week: Callas; Easter Lilies; Mignonette; Orchids; Start Propagating; Reminders.

Carnations

With the high cost of all that enters into Carnation growing, it becomes necessary to get the best results from each house. Carnations are grown at a profit so small, that small leaks are dangerous, and as higher prices are not easily to be obtained, better cultural methods are a necessity. Other crops have a larger margin of profit, but a slight falling off of quantity or quality on the part of a carnation range means net loss while no great excess of gains, due to a combination of favoring circumstances, can be looked for. The carnation specialists know this but it is the man who grows a mixed crop—and the writer is one—who needs to know that his houses are actually giving best results. And it is none too soon to think out next season's plans. Can we trust the crop to the weather conditions out of doors from May to August? Dozens of New England growers are suffering from bad outside conditions this season, and the trouble will not end with this season's cut, as weakened plants produce weak cuttings and "yellows" are apt to beget "yellows."

Some strains of Carnations can be safely grown inside as the Winsors—and a more profitable breed of Carnations has never been produced for the grower who understands it and can use short stems in the autumn. White Winsor will easily produce thirty-five blooms to the square foot, and for keeping qualities and fragrance no sort grown today surpasses it.

Matchless does well as an inside grown sort. Beacon Delight needs the open air and a lot of it for best results. The Enchantress family can be grown either way

and give a good yield, but the blooms are apt to be soft at times and the grower needs to study his market carefully if he is to use this sort. It's the condition of the blooms when they reach the home that counts and reacts on the growers.

Your retail florist will call for flesh pink in autumn, high colors at the holidays, white at Mother's Day and deeper pink in the late spring. About 35 per cent. white, 35 per cent. flesh pink and 30 per cent. all others meets the call pretty well. Inside grown stock will give good returns early in the season before chrysanthemums are much in the market. Then comes a lull perhaps and the matter of saving cuttings comes in. And here is where a year's results may be made satisfactory or allowed to show a loss. The grower and retailer can study this question of long stems and lost cuttings, or future blooms, to their mutual advantage. It is possible to gain \$1 per hundred by an additional length of stem and in doing so lose three or four dollars worth of side shoots. Save the cuttings. If you can use them in the sand take the stem. Matchless, for instance is needed in large quantities at Mother's Day and that spring crop can be made or marred, early in the season. We are just learning to grow Matchless, and it is a wonder. Benora, too.

The soil pile for next season's carnation beds, and the field for planting out—it's none too early, it's too late for some of this work and if it has not been attended to best results will be difficult—but that is too long a story at this writing.

Charles S. Strunk.

Biddeford, Me.

Winter Flowering Begonias

By the introduction into Great Britain of *Begonia Socotrana*, from the Island of Socotra in 1880 by Professor Bailey Balfour of Edinburgh, Scotland, and also by the results obtained by John Heal for the firm of James Veitch & Sons, in crossing *B. Socotrana* with tuberous varieties, we now have a class of begonias that are well worth growing for winter decoration in the conservatory. The first variety raised by John Heal was *Autumn Rose* from a cross between *B. Socotrana* and the American variety *insignis* which flowered in 1882 but not being distributed was eventually lost. The next attempt by Mr. Heal proved more successful in the production of a variety named after himself, viz., *John Heal*, from a cross between *B. Socotrana* (female) and *B. Viscomtess Douerade*. According to what is written of the variety *John Heal*, only one seed germinated, and the whole stock of it is the produce of a single plant distributed in 1885. Next in succession came *B. Adonis* in 1887, followed by *B. Agatha* in 1903. *B. Agatha* was the produce of a cross between *B. Socotrana* and a garden variety, *B. Moonlight*. *B. Moonlight* was raised about 50 years ago by the late Colonel Tower Clarke of Daventry, Eng., who was also the raiser of the well-known *B. Weltonensis* from a cross between *B. Pearcei* and *B. Dregei* (one of the parents of *B. Gloire de Lorraine*). *Begonia de Lorraine* was introduced in 1891 by Lemoine of Nancy, France, and grew rapidly into favor on both sides of the Atlantic, it being the produce of a cross between *B. Socotrana* and *B. Dregei*. Other varieties of *Gloire de Lorraine* are *Turnford Hall*, a white sport introduced by T. Rochford & Sons, Eng., *Amabilis*, *Glory of Cincinnati*, *Rochfordii*, *Lonsdale Light Pink*, and *Mrs. J. H. Peterson*. The latter is a beautiful variety with dark bronze green foliage and reddish pink flowers. *B. Melior* is another beautiful variety from a cross between *B. Lonsdale Light Pink* and *B. Socotrana* which I believe was raised by J. H. Peterson of Cincinnati. The flowers of this latter variety are large and of a delicate rose color. Messrs. Clibran of Altrincham, England, have also lately introduced some beautiful varieties of the *John Heal* type—*Altrincham Pink*, *Splendour*, *Pink Perfection*, *Scarlet Beauty* and various others. *John Heal*'s recent introductions are

BEGONIA MRS. HEAL.

Success, *Mrs. Heal*, *Elatior*, *Julius*, *Sylva*, *Winter Cheer*, *Optima*, *Eperius*, *Syros*, *Her Majesty* and a few others. Like the *B. Gloire de Lorraine* family, the *John Heal* type can be readily propagated from the leaf, taken from the plant with a heel attached and inserted in 2-inch pots filled with sharp sand, and placed in a propagating frame with a temperature ranging from 65 to 70 degrees at night, care being taken not to let water condense on the leaves. Propagated also by taking off side growths and young shoots from the tubers in March after they have attained a height of 2 to 3 inches and inserted in 2-inch pots filled with sharp sand, they will root in from ten to fourteen days.

As soon as the cuttings are rooted, they should be taken out of the sand and potted up into 2½-inch pots, in a nice free open compost consisting of loam, leaf mold and a little sand to keep it open. Potting should be medium firm, and great care in watering is required if one wishes to succeed in growing the *John Heal* type of *Begonia*, also care in ventilation, shading from strong sunshine, and fumigating regularly to keep down the mite, and a regular temperature of 60 degrees at night, weather permitting, throughout the growing season. They are also subject to mildew in some locations, but this can be overcome by spraying with Fungine, applied with a very fine sprayer, and a careful operator of same. When they are well rooted in the 2½-inch pots, they will require a shift into 4-inch pots, using a compost as recommended before, but in a rougher state. For the

final potting a compost consisting of loam three parts, dry cow manure one part, leaf mold one-third part, sand and charcoal finely broken up will suit them.

When coming into flower, they will do better in a temperature of from 55 to 60 degrees at night, and will last longer in flower than if grown in a warmer temperature. After flowering the plants should be cut back to within 6 or 8 inches of the base of the stems, and placed in a house with a temperature of 50 degrees, only giving them sufficient water to keep them in a green condition until spring.

Southboro, Mass.

Iberis

Reiterating the merits of *Iberis umbellata*, the annual candytuft, on the pages of HORTICULTURE would be equal to an indirect attempt to throw doubt on the intelligence of its readers. Known for ages as standard material for edging, we simply look at the various colors of annual candytufts as indispensable, especially for inexpensive floral garden arrays. To direct the attention to the hardy perennial class of iberis, however, seems to me by no means untimely. The fact of their rapid gain in popularity among hardy flower garden owners is plainly evident. During April and May when covered with snow white or lavender-shaded flowers they attract attention at once. After having added conspicuously in the vernal floral effect the dark evergreen foliage remains and the border-edges or plantations of hardy candytufts appear clean and presentable during the remainder of the year. The scope of usefulness of perennial iberis is, however, not limited to edging purposes and border-plantings. They class among the best material adapted for dry walls and rockgardens: indeed here we could afford omitting them at all. The natural consequence is an ever increasing demand for hardy candytufts.

In regard to varieties I am inclined to put the well known *Iberis sempervirens* in the lead as the hardiest pure white one. Perfection, Snowflake and superba as improved *sempervirens* are distinguishable by more or less larger flowers. Little Gem, identical with Weisser Zwerg, a very handsome compact and dwarfy variety, is the ideal thing for rockery use. The subject of our illustration, *Iberis correaefolia* when true to name

opens pure white, turning to light purple during the last stages of blooming. Forming shapely bushes of from one to two feet in height, the branches woody, *Iberis gibraltarica* according to my observation is best adapted for the hardy border. Adorned with flowers of light lavender pink nearly throughout the whole summer, it is the first to suffer in winter and requires careful protection.

IBERIS CORREAEOFOLIA.

Hardy candytufts are best raised from seed sown in spring. Seedlings flower the second year. For perfect development, plantations should have an open sunny exposure. Under leaf-cover I have, as a rule, had very few plants winterkilled, but I take care not to have the green tops exposed to the sun during February and March.

Richard Rothe

Glenside, Pa.

Cypridedium insigne Sandrae

Cypridedium insigne has long been a favorite Christmas flower. It "makes up" effectively in combination with anything and everything in cut flower work or plant baskets and will practically outlive all the other flowers used with it. It is gratifying that the chaste and lovely pale yellow variety which is depicted on the cover page of this issue of HORTICULTURE has now become plentiful enough to be obtainable in quantity as a cut flower for commercial florists' use. It sells at wholesale for six dollars a dozen blooms when the ordinary *insigne* brings about a dollar and a half per dozen, and it is worth the difference to any florist catering to an exclusive trade.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

Christmas Roses

All roses that will be in for Christmas will be showing buds now, and care should be given so that they will not become deformed or the foliage mildewed. Keep them well disbudded and sprayed. It will also be advisable to go over the plants and tie them well so that all the buds will have nice straight stems. The plants can still be fed right up to the time that the buds begin to show color, after which if there is a heavy crop coming on the feed should be dropped for a while as the plants will not need it to finish the buds; in fact it might even prove harmful to the crop.

Soot

Soot is very nice to use at this time of the year, and applied properly will be a great benefit to the plants. It helps put the color into the buds, in addition to being a good fertilizer. The imported soot is best but places burning soft coal will have quite a little soot of their own if it is taken care of. When applying the soot to the benches use only enough to blacken the surface of the soil nicely and apply it as evenly as possible. If lime had been applied only a short time before do not apply the soot. Neither should it be used with bone as the lime itself and the lime in the bone would act on the soot and free too much of the ammonia which it contains. It is best to have the plants fairly wet when it is applied and it can be watered in as soon as it is on the benches. It can also be mixed into the manure water and applied with this and will be sure to be evenly distributed if it is well mixed in the tank.

Be Ready for Snow

The weather has been too good to last and we can look for a sudden change at any time. We hope it will not come but no one can tell and it is best to be ready in case of a blizzard with deep snow. Get some soil in for potting and get all the pots put away so that the severe freezing that may come will not break them to pieces. All broken glass should be repaired at once and if there are any old houses that may have to be braced it should be done at once as putting it off may prove costly. With the high price of coal it will pay to go over the houses good and see where leaks can be stopped up. Tar paper can be put on the backs of some of the three-quarter span houses. This can be made to look fairly neat if care is taken to nail all laths which are to hold it. It will last for a few years, depending on the quality of the paper used and on the condition of the wall under it. But it will save coal and that is the main item.

Care of Grafted Plants

Grafted plants have one fault and that is that the stock is bound to send up shoots which, if allowed to grow, will take all the nourishment from the graft and the result will be that the graft will die or do so poorly that the plant will not pay its keep. Go over the plants every now and then and get all these breaks before they have a chance to get very high. A good time to do this is while watering, as the grower will then have time to look at each plant thoroughly, and if there is any growth from the stock tear it off. This is better than cutting, for if it were cut it would surely grow again. If pulled away, it will be taken off right where it started and the chances are that it will not start again. Care should be taken not to disturb the plant while doing this. If it is done while watering, the water applied right afterward will settle the soil back to the roots and there will be no harm done.

Work in the Propagator

This house should be cleaned out now if the work has not been done as yet for it will soon be needed. In fact on many of the large places early cuttings are already in the sand, these to be used for summer roses. If sand is not to be had on the place have some hauled up so that it will be on hand when needed. It can be piled up somewhere where it will be handy to get at, and if a little lime is scattered over the ground first it will not get any foreign matter into it from the soil underneath. It can also be kept clean by not taking it off the ground too thoroughly when it is being picked up to be put into the benches. When cleaning in the propagating house, be sure to get under the benches and into all nooks and corners for often one neglected corner will cause enough trouble to spoil all the other cleaning work. The pipes under the benches should be looked over so that there will not be any leaks to repair when the sand is all in and the fire started. Where time will permit it would be nice to scrub the house down with whale oil soap and Aphine, taking care to pour a little of the mixture into all crevices where insects are making their home. This will kill or drive them out and if they do not find congenial quarters elsewhere they will die or move out. Scatter a little lime under the benches to help sweeten the soil there. Also will help keep insects out for these do not like to stay where it is clean. They must have dirt and decaying matter in one form or another. Make a good job of the cleaning this year. It will pay.

The war blight From the office of *The Orchid World*, Hayward's Heath, Sussex, England, one of our most prized exchanges, comes the announcement that "the editor having been called up for military service, the publishers beg to notify all subscribers that *The Orchid World* will be discontinued for the duration of the war." *The Orchid*

World is a monthly, devoted exclusively to orchidology, edited by Gurney Wilson, F. L. S., up-to-date and authoritative in contents and handsomely illustrated and orchid fanciers and enthusiasts on this side of the Atlantic will, we know, join with *HORTICULTURE* in sincere regret for the enforced discontinuance of this useful journal, and in heart-felt hope that the awful conflict in Europe may soon come to an end and that the talented editor of *The Orchid World* may be providentially spared and enabled to return unharmed to the editorial chair which he has so ably filled in the past.

With this, its twelfth birthday anniversary, *HORTICULTURE* presents compliments and good wishes to the thousands of friends whose generous support has made its existence possible during these twelve eventful years. Journalistic life today is far from being a summer dream, even in this country of peace and so-called prosperity. As the situation stands today, it takes pretty good "stuff" to be worth even the paper on which it is printed. Nearly everything which enters into the cost of a publication has advanced in price, that of paper having more than doubled, and the end is not yet in sight. The most practical solution for the problem which thus confronts the publisher would seem to be fewer pages and more condensed and useful contents, and if the latter should be forthcoming the former will undoubtedly be forgiven! *HORTICULTURE* has always striven to represent all that is progressive, dignified and creditable in American horticulture. It has been our earnest desire to help in our humble way towards the advancement of horticulture as a profession, as a commercial industry and as a popular recreation, in every way possible. Our entire sympathy is with all agencies looking to the same uplifting end. Standing on the threshold of another year *HORTICULTURE* extends hearty good wishes to all its collaborators in the good work and pledges itself anew to the cause of *flowers every day in every home*.

In the printed program for the Chrysanthemum Show of the Lancaster County (Pa.) Florists' Association a praiseworthy attempt was made to prepare the public for higher rates on flowers. It was represented that an advance in selling prices is inevitable in the face of the enormous increase in the cost of labor, coal and the many smaller items indispensable in the conduct of a florist's business. It is certainly very desirable that the income from the sale of flowers in the aggregate should be materially increased in order to meet the enhanced cost of production but whether this can be best accomplished by advancing the selling price per dozen blooms or, on the other hand, by disposing of more flowers at the old prices is a question worthy of careful consideration, just so long as enormous quantities of flowers of various grades of quality are lost in the large markets at certain seasons. Indeed, under present conditions of production it is a very rare day which sees the flower market cleaned up and yet the use of flowers by the people is pitifully insignificant as compared with what it should be. What course should the flower grower pursue in order that his product shall find a greater welcome and a fuller recognition by the people—not for funerals, weddings or special holidays, but as essential adjuncts to a well-ordered daily existence? This is the florists' problem as *HORTICULTURE* sees it at the close of 1916.

The Late Bayard Thayer, Friend of the Woods and Gardens

To the Editor of HORTICULTURE:

The announcement of the sudden death of Bayard Thayer, which occurred in Lancaster, Massachusetts, on November 29th, appeared last week in HORTICULTURE, but some notice of his conspicuous service to arboriculture and horticulture may well find a place in your columns.

Fond of hunting and of the woods from boyhood, Bayard Thayer had a real love of trees and lost no opportunity to increase his knowledge of them. At the age of thirty-eight, when he established a home for himself on a nearly treeless hill in Lancaster, he began to plant trees on a large scale, wisely selecting for his principal plantations the white pine and the hemlock, the two conifers best suited for New England. Every year these plantations have been extended, and now contain several hundred thousand trees. His interest in trees, however, was not confined to those which are native to New England; and as an object lesson for future generations of lovers and students of trees he made a few years ago a pinetum which contains representatives of every coniferous plant which can grow in Massachusetts. Bayard Thayer's pinetum occupies a picturesque position, protected by natural woods; the soil is well suited for conifers, generous space has been allowed for the free and full development of the different trees, and no collection of conifers which has been made in the United States has now so great promise of beauty and interest. This pinetum and his great plantation of pines will long keep green the memory of Bayard Thayer as an intelligent lover and industrious planter of trees.

In the Thayer nurseries are growing seedlings of all the new Chinese and Japanese conifers raised at Lancaster from seeds distributed by the Arboretum, and in these nurseries have been raised many of the best of Wilson's deciduous-leaved Chinese trees and shrubs.

The native laurel grows naturally and in great beauty in Lancaster, and it was Bayard Thayer's intention to make the laurel the great decorative feature of his estate. For years he moved plants collected in other parts of Worcester county to his wood borders, and every spring has planted twenty-five or thirty thousand seedlings raised in his nurseries for this purpose. For the decoration of these woods he has had raised in his nurseries, also, all the handsomest species of American and Japanese azaleas, the flowering dogwood, and other handsome flowering native trees and shrubs; and the improvement by planting of no other American estate has been undertaken in a more systematic and intelligent manner.

Of the gardens created under the direction of Bayard Thayer—the Terrace garden with its unsurpassed Japanese yews, the crabapple and lilac gardens, and the Dutch garden with its brilliant display of tulips, it is unnecessary to speak here for they are known to all American lovers of gardens, and every year when the daffodils and tulips bloom are enjoyed by thousands of visitors from all the country round. It is doubtful if any American has, as a gardener, shown more good taste and imagination than Bayard Thayer, or in the short period of less than twenty years has accomplished more for the uplift of American horticulture. His death is a real loss, but other hands, it is hoped, will continue the work he so well began.

C. S. Sargent
Arnold Arboretum.

BENJ. HAMMOND FOR MAYOR OF BEACON.

It was announced Friday that Benjamin Hammond had been prevailed upon to enter the race for mayor and will be a candidate for the republican nomination for that office at the coming primaries, which will be held in February.

It is doubtful as to whether a better man could be found in this community to fill that important office than Mr. Hammond, and the city is indeed fortunate in gaining his consent to make the race. Mr. Hammond has always been deeply interested in the welfare of this community and has taken an active part in every movement to better local conditions. He has always been ready to give freely of his time and money and not infrequently has he neglected his private business in order to devote time to public affairs.

He is a thorough business man and for years and years has kept in close touch with municipal affairs and as a result he has the knowledge and experience that is so necessary in city government. If Beacon is to have an administration that is economical and efficient men of ability and sterling

character must be placed in office. As Mr. Hammond meets with all of these requirements his nomination and election should be the wish and desire of everyone who wants to see the city properly governed.—*From the Fishkill Standard, Dec. 2.*

"IT COULDN'T BE DONE."

Somebody said it couldn't be done.
But he, with a chuckle, replied
That maybe it couldn't, but he would be one
Who wouldn't say so, till he tried.
So he buckled right in, with a trace of a grin
On his face. If he worried, he hid it.
He started to sing as he tackled the thing
That couldn't be done, and he did it.
Somebody scoffed, "Oh, you'll never do that;
At least no one has ever done it."
But he took off his coat and he took off his hat,
And the first thing we knew he'd begun it:
With a lift of his chin, and a bit of a grin,
Without any doubting or quit it.
He started to sing as he tackled the thing
That couldn't be done, and he did it.

There are thousands to tell you it cannot be done;
There are thousands to prophesy failure;
There are thousands to point out to you,
One by one
The dangers that wait to assail you;
But just buckle in with a bit of a grin,
Then take off your coat and go to it;
Just start in to sing as you tackle the thing
That cannot be done, and you'll beat it.
—*Edgar A. Guest.*

AN APPRECIATION.

Mr. William J. Stewart,
Editor HORTICULTURE.

Dear Mr. Stewart,

I am in receipt of a marked copy of your issue of November 25th, containing an editorial on fire prevention. I am glad to see the specific nature of this editorial in which you bring the general subject close to your particular field. If trade and class publications in general were to follow your example, the net result would be the education of those who often unconsciously are dealing with fire hazard in dangerous form.

The National Board is very much in earnest in seeking to awaken such people to a sense of their dangers and responsibilities, and the co-operation of such influential journals as HORTICULTURE is an important factor to this end.

Thanking you for your co-operation, I am,

Yours very truly,

W. E. MALLAHER.

Gen. Mgr. Nat. Board of Fire Underwriters.

Conshohocken, Pa.—Florist Willis Baldwin has purchased the building in which his business is located on Fayette street.

NATIONAL ASSOCIATION OF GARDENERS

SIXTH ANNUAL CONVENTION WASHINGTON, D. C.

The sixth Annual Convention of the National Association of Gardeners was held at the New Ebbitt Hotel, Washington, D. C., on December 4 and 5, 1916, under the presidency of W. N. Craig, of Brookline, Mass. The weather was fine and everything moved smoothly, due in great measure to the cordial hospitality of the Washington florists, for which the association was most indebted to Wm. F. Gude, Washington representative of the Society of American Florists, who with his firm did much to make the stay of the gardeners enjoyable at the National Capital. The following were registered in attendance at the opening session: W. N. Craig, Brookline, Mass.; M. C. Ebel, Madison, N. J.; Joseph Manda, West Orange, N. J.; Robert Cameron, Cambridge, Mass.; George Tull, Oak Ridge, Va.; Frank Humphreys, Jericho, L. I.; Xavier E. E. Schmitt, Phila., Pa.; P. W. Popp, Mamaroneck, N. Y.; Antony Bauer, Deal Beach, N. J.; J. F. Piper, Madison, N. J.; W. A. Sperling, New York City; Percy S. Snow, Phila., Pa.; W. E. Maynard, New York, Great Neck Station; Alex. Michie, Cold Spring Harbor, N. Y.; John McIntosh, Syosset, L. I.; J. G. Melrose, Cold Spring Harbor, N. Y.; James Stuart, Mamaroneck, N. Y.; William Kleinheinz, Ogontz, Pa.; John Kuhn, Phila., Pa.; D. J. Coughlin, Glen Cove, L. I.; J. W. Everitt, Glen Cove, L. I.; A. E. Bonsey, Sewickley, Pa.; J. Barnet, Sewickley, Pa.; T. W. Head, Lake Forest, Ill.; E. B. Palmer, Bridgeport, Conn.; F. L. Mulford, Department of Agriculture, Washington, D. C.; John Scheepers, New York; George W. Hess, Supt. Botanic Garden, Washington, D. C.; W. F. Gude, Washington, D. C.; John S. Hay, Phila., Pa.; R. L. Jenkins, Anacostia, D. C.

William F. Gude delivered an address of cordial welcome. Mr. Gude spoke individually as representing his own firm, and also as representing the Washington Chamber of Commerce and the florists generally of the city. His remarks were enthusiastically received. He then introduced President Craig as the next speaker, who returned the thanks of the association to Mr. Gude, who he characterized as the "silver-tongued" orator of the Capitol City.

President Craig then delivered his address, which, in part was as follows:

President Craig's Address.

Fellow Members:—I am very glad that we have an opportunity to meet in the city of Washington, a city very dear to the hearts of every true American. Entirely apart from what we will find here of horticultural interest, there is so much that appeals to the eye, that I presume most of you would, like myself, prefer to make our business session as short as circumstances

will permit, in order that we may have more time to enjoy the architectural and other features of interest so abundantly spread before us. Having these things in mind I will not weary you with any tedious remarks.

Since our convention in Boston a year ago, which proved to be quite a successful one, in spite of the fact that we were meeting on ground largely untitled so far as our association was concerned, progress has been steady and satisfactory; and while the addition of new members has hardly reached my expectations, all things considered we have done very well and I anticipate a healthy growth during the coming year, for the better we become known, the more additions we shall make to our ranks.

It is very gratifying to know that our membership grows more truly national each year. At one time we were looked upon as a purely New York society, but that time has passed and members are now being added from all parts of our country; in fact of late the West, thanks to energetic work done by our vice-president, Mr. Theodore Wirth, and one of our directors, Mr. T. W. Head, has been adding more members than the East; and with our next convention in the West we are bound to add many more members in that section.

Our membership being truly national in character, we should spare no pains to preserve it as such. As our conventions are held only annually, there must naturally be long lapses between the visits to the various centers, and I think some plan might be evolved for the holding of occasional gatherings of members of the N. A. G. in the various centres of horticultural activity. A local secretary might be selected in each of the sections where we are the strongest who could call quarterly or semi-annual meetings of the local members and where matters pertaining to the welfare of the Association could be discussed, short reports of each being sent to the official organ. These local secretaries could perhaps collect dues as well as enroll new members, and in this way relieve our hard-worked secretary in some small measure. These meetings need not in any way conflict with the activities of the local clubs and horticultural societies.

We have during the present year been furnishing practical papers for discussion amongst the thirty-five or more local societies affiliated with us. If these have proven helpful we should continue them, and in that case we must ask your aid in helping to furnish the necessary quota of practical papers to carry the work along for another year.

The Service Bureau of the Association as it becomes better known is being more largely patronized. We cannot unfortunately secure positions for all applicants, but our good secretary has placed a good number and

would gladly have helped every one had it been in his power to do so. While there is no charge for this, we need a special fund to work more effectively, and I want to say that if those whom the Bureau has benefited would each make a small contribution, it would materially aid us. All are not unappreciative; one good member not long ago donated fifty dollars for services rendered. Is it too much to hope that others will contribute for similar reasons to this fund?

Our annual dues are small, and seem particularly so when our monthly organ, the "Gardeners' Chronicle of America" is included. Our Secretary, hard-worked as he is, and with physical disabilities to handicap him, has labored steadfastly to make our organ helpful and attractive, and has succeeded very well.

In conclusion, I am sorry that I have not been able to accomplish more for the interests of the National Association of Gardeners during my tenure of office; but I have done my best to work up an interest in it in New England, and I pledge my unstinted support to my successor, and will continue to give the Association all possible publicity. I ask the co-operation of every member in making 1917 our most successful year, and the National Association of Gardeners one worthy of our noble profession, and one which will command the respect of both gardeners and their employers.

The minutes of the last annual convention, held at Boston, Mass., were read by Mr. Popp, and duly approved.

W. F. Gude at the time announced that he had arranged to have each visitor given a pass to the Senate and House of Representative Galleries, to be signed by the Vice-President and the Speaker of the House. Also that he had made arrangements that the convention go by boat to Mt. Vernon on Wednesday, with the compliments of the Steamboat Company and the Mt. Vernon authorities. It was then ordered that the officers procure and have placed upon the tomb of George Washington, at Mt. Vernon, a suitable floral offering commemorative of the visit, also that a letter of condolence be sent to William Downs, who is prevented by illness from attendance. Sincere regret was expressed at his unavoidable absence.

The following resolution was unanimously adopted:

WHEREAS: The United States has recently concluded a treaty with Canada for the protection of migratory wild birds; and

WHEREAS: It will be necessary to enact further legislation by Congress to give effect to the terms of this treaty and to appropriate funds to carry out its provisions; and

WHEREAS: We, the members of the National Association of Gardeners, are strongly in favor of the protection of wild birds as provided for in said treaty; therefore

The Birthplace of the World's Most Famous Ramblers

BE IT RESOLVED: That, we strongly urge our Representatives and Senators in Congress to vigorously support any measures proposed to carry out the provisions of such treaty, and to support the necessary appropriations for the Department of Agriculture, so that the Department can enforce same.

George W. Hess of the U. S. Botanic Garden was unanimously elected as Washington Representative of the National Association of Gardeners. It was generally acknowledged that no better selection could have been made.

T. W. Head, of Lake Forest, Ill., made a strong plea for the holding of the next convention at Chicago, Ill., giving the east full credit for the work done in organizing the Association and building it up, but declared that now the west was ripe for missionary work and he knew of no better way to extend the work and usefulness of the Association at this time than to come west with the convention next year to Chicago. His own employer Mr. J. Ogden Armour had expressed to him the warmest interest in the matter of securing this meeting for 1917 in Chicago and had personally offered to interest himself in aid of the convention if held there. Mr. Head's remarks were applauded strongly, and on motion of Past President Everitt, Chicago was selected as the 1917 convention city. J. Barnett, of Sewickley, announced that while Pittsburgh had no objection to Chicago, he wished it understood that Pittsburgh was a candidate for the 1918 convention.

It was voted to print a list of members of the association for use of members and others. Secretary Ebel an-

nounced that the total membership was now 1,200, and that some 300 new members joined during the past year. Joseph Manda thought that the association was now of sufficient dignity and importance to justify the printing of its annual proceedings in special pamphlet form, and so moved; but on account of the present high cost of paper, etc., the motion did not carry, although the opinion was expressed that Mr. Manda's idea was an excellent one and should be followed out as soon as the state of the treasury would permit. William F. Gude was unanimously elected as an honorary member in recognition of his many courtesies.

F. L. Mulford, horticulturist of the Department of Agriculture being called upon then addressed the convention with respect to a little of the work of the department along lines in which gardeners are interested, calling attention to the work being done at Arlington Park in connection with the improvement of hardy chrysanthemums; also the rose test garden there in which the American Rose Society is co-operating, and the fine collection of peonies in co-operation with the American Peony Society, etc.

Immediately following the morning adjournment automobiles in waiting conveyed the visitors through Potomac Park, around the Lincoln Memorial across the river to Arlington Cemetery, and to the Arlington Farm of the Agricultural Department, where the various matters referred to in Mr. Mulford's remarks of the morning were pointed out. Fort Meyer was visited, the old Lee mansion of historic interest, back through Georgetown and out

to the Bureau of Standards, where a highly interesting demonstration of liquid air was witnessed, from there proceeding to Rock Creek Park and Soldiers' Home, returning to luncheon at the New Ebbitt as guests of the Gude Bros. Co., and after luncheon visiting the commercial establishments and greenhouses, including that of the Gude Bros. Co. The table decorations at the luncheon were chrysanthemums and Radiance roses, a variety that is at present exceedingly popular in Washington and which the Gude Bros. Co. can hardly supply up to the demand. The convention re-assembled in the evening and reports of officers and committees were heard. The treasurer's annual report, showed a surplus of \$2,000 in the treasury.

The following officers were elected to serve during the ensuing year: Thomas W. Head, president; Theodore Wirth, vice-president; M. C. Ebel, secretary; James Stuart, treasurer; William Turner; Peter Duff, William Duckham, William Kleinheinz and J. F. Huss, trustees.

ROSE TOURNAMENT AT PASADENA, CAL.

The Rose Tournament of Pasadena on New Year's Day this year will be one of the most gorgeous floral displays ever attempted in this country. The huge hot houses of the millionaires who make their winter homes there will be stripped for the occasion and this year, for the first time, the city has planted a municipal rose garden to supply flowers for the city and public school entries.

Canton China Hall-Seat or Plant
Pot Stand

Plant Pots and Pedestals

Obituary

Isaac Pollard.

This large hearted and enterprising man has been but little known outside of his own state of Nebraska. He died a few days ago at the ripe age of 86. His busy life was crowded with beneficent activities. He was one of the world's leading pomologists. His orchard was among the finest in all the land. The demand for his apples could seldom be supplied.

He came to Nebraska when the state was in its babyhood and saw it grow into influence, wealth and power. Yes, and he was among the foremost to make it grow. His farm was a very large one, and highly embellished with an immense variety of trees, shrubs and flowers. There you would see the choicest treasures of the Rockies. Besides he had ransacked the whole land for everything which could find ours to be a congenial climate.

He was a very public spirited man. Knowing by his own experience what could be done, he did his utmost to awaken farmers. At his own expense he sent out a great deal of literature to encourage others. He was large-hearted and benevolent.

He was a soldier of peace and not of war. The fame of a great general depends on the number of cities and villages he can lay in ruins, the works of art and the treasures of ages he can destroy, the number of men he can kill and the vast hosts of widows and orphans he can leave behind in his victorious march, the number of

fields he can soak in vicious blood.

The hero of peace builds up instead of destroying. He beautifies homes instead of burning them.

If a star were quenched on high
For ages would the light,
Still traveling downward from the sky,
Shine on our mortal sight.

So when a good man dies,
For years beyond our ken
The light he leaves behind him shines
Above the paths of men.

C. S. HARRISON.

John Baldinger.

It is with regret that we chronicle the death of John Baldinger, of Pittsburgh, which took place on Friday of last week at the home of a sister in Avalon, Pa., where the funeral services were held on Monday. Mr. Baldinger, who was about forty years of age, had been in precarious health for the past year owing to tubercular trouble. Prior to this period, he had been a valued employee in turn of the old Elliott & Ulam Co., the B. A. Elliott Co. and the A. W. Smith Co., and was considered by all with whom he was associated as one of the best men in the trade, as well as one of the most popular in all circles with which he was brought in contact. Mr. Baldinger, who was unmarried, is survived by his aged mother, two sisters and several brothers.

C. Thompson Adams.

Charles Thompson Adams, formerly of West Medway, Mass., died on Sunday, November 26, at his home in West Roxbury, Mass., after a long illness. Burial was at West Medway. He is survived by his wife.

Mr. Adams was 76 years old. For many years he was in business as a carnation grower, having been one of the pioneers in that specialty and very successful with the old-time varieties. In manner he was quiet and unpretentious, a gentleman in every trait that makes a gentleman of the old school, upright in every dealing with his fellowman and kindly to all.

F. N. Strail.

Fred Newell Strail was suddenly stricken with heart failure at his home 4147 Gladys Ave., Chicago, at 6.30 A. M. on Thanksgiving Day. He had been connected with the trade in various ways for many years, having been with some of the most prominent down-town florists and also in business twice for himself, and was known to everyone in the trade. He leaves a widow, Sarah A. Strail, who is at present in the employ of A. Lange, a mother and brother. The funeral was held at Central Masonic Temple, in charge of Kilwinning lodge. Interment was at Rosehill.

Mrs. Andrew McAdams.

Word has been received of the death of Mrs. Andrew McAdams, at Jacksonville, Fla., where Mr. and Mrs. McAdams have made their home since selling out their business in Chicago a few years ago. Mrs. McAdams had been in poor health for some time and recently underwent an operation for cancer. Both Mr. and Mrs. McAdams are well known around Chicago and their daughter Miss May is a graduate from the landscape gardening department of the University of Illinois.

CLUBS AND SOCIETIES

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

At the last meeting of the club, held on November 21, 1916, the following nominations of officers were made for the coming year: President, James Methven; vice-president, Andrew K. Rogers; secretary, William N. Craig; treasurer, Samuel J. Goddard; executive committee, Peter M. Miller, Herman H. Bartsch, Duncan Finlayson, Thomas Coles, John F. Briry, William C. Rust, William J. Kennedy, William H. Judd and George W. Hamer.

The annual election of officers will take place on December 19. Voting will be as usual by Australian ballot.

The Club will hold a field day at Framingham on Saturday, Dec. 16, and visit the establishments of S. J. Goddard, Wm. R. Nicholson, J. T. Butterworth and J. A. Nelson.

At the regular meeting on Tuesday evening, Dec. 19, J. N. Keeler, of Hitchings & Co., will give an illustrated lecture on "Greenhouses. Their Location, Design and Construction."

W. N. CRAIG, Secy.

AMERICAN GLADIOLUS SOCIETY.

The members of the American Gladiolus Society by a large majority have chosen New York City as the place for holding the annual show for 1917. The exhibition will be held in the Museum Building, New York, Botanical Garden, Bronx Park. The date will be at the time of the Convention of the S. A. F. & O. H. Secretary Youell hopes to issue the preliminary schedule next month. The list of prizes will be the largest ever offered by the society.

At the November meeting of the N. J. Floricultural Society, Max Schneider received 90 points for standard chrysanthemum exhibit, 65 for carnations, 80 for violets and 75 for cut flowers and E. Panuska received a certificate of merit for seedling chrysanthemum White Wonder and was highly commended for Bronze Bird and Yellow Bird.

CHRYSANTHEMUMS IN OKLAHOMA.

AN OKLAHOMA CHRYSANTHEMUM HOUSE.

The accompanying pictures are good evidence of the way fine horticulture is progressing in the great western country which not long ago was "wild and woolly" and the last place one would look to for examples of skillful culture under glass such as is here-with shown. The varieties which appear in the pictures are principally William Turner and Yellow Turner, and the photographs were taken on November 11, this year. The scene is the greenhouse of Charles Page, Sand Springs, Oklahoma, and the gardener in charge is James Rust.

Sherborn, Mass.—M. O. Trameli, in charge of the greenhouses at the Reformatory, was badly injured when a sprayer he was using exploded. He was painfully wounded in the face, necessitating several stitches by the surgeon.

NEW CORPORATION.

Syracuse, N. Y.—Russell Bros., growers; capital stock, \$50,000. Incorporators, W. H. & J. H. Russell, W. F. Morris, L. R. Failing, Stephen King and Wm. Ellis.

BUSINESS TROUBLES.

Olivia F. Zinn, florist, 23 Central avenue, Medford, Mass., has filed a petition in bankruptcy. Liabilities, \$5307; assets, \$150.

Whitehall Gardens, situated in front of the National Liberal Club on the Thames Embankment, London, has been commandeered by the government and is being transformed by an army of workmen into large annexes to government offices close by. The statues of Outram, Bartle Frere and William Tyndale, the first translator of the New Testament, which adorn the gardens, will be covered to protect them until the place is restored after the war.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Kirby B. White, Detroit Mich.; First Vice-President, F. W. Bolgiano, Washington, D. C.; Second Vice-President, L. L. Olds, Madison, Wis.; Secretary-Treasurer, C. E. Kendel, Cleveland, O.

One Week's Imports.

Imports at the port of New York, of horticultural material, for the week ending Nov. 24th, were recorded as follows:

Bulbs—Belgium, \$95; France, \$160; Netherlands, \$29,981; England, \$134; Mexico, \$98; Hongkong, \$154; Japan, \$7,830.

Plants—Belgium, \$21,801; Netherlands, \$49,283; England, \$2,259; Ireland, \$508; Bermuda, \$95; Canada, \$5; Mexico, \$5; Japan, \$48.

Red clover seed—Chile, \$3,478.

Other seeds—France, \$338; Netherlands, \$61; England, \$8,639; Argentine, \$3,531; Hongkong, \$137; Japan, \$545.

Nitrate of soda—Chile, \$106,491.

Dried blood—Argentine, \$4,673.

Other fertilizers—England, \$4,321; Argentine, \$3,160.

MASSACHUSETTS AGRICULTURAL COLLEGE.

All students are being placed in stores for the Christmas holidays.

Seniors worked at tying roses this week. At present they are at work also on a problem on the equipment, maintenance, and details of a rose establishment.

The Junior classes trenched for sweet peas this week. Next Monday a trip to the Sinclair Range at Smith's Ferry is planned to study the crops, heating system and construction of the houses.

The M. A. C. Botanical Club met at Clark Hall, Thursday evening, for the election of officers. Prof. P. J. Anderson gave a talk on "Some Interesting Fleshy Fungi Collected about Amherst in 1916." G. W. Martin gave a paper on "Some Fall Algae found about Amherst in 1916."

AZALEA SHIPMENTS SATISFACTORY.

August Rolker & Sons, New York, inform us that they have received their full complement of Azalea orders from Belgium, excepting 19 cases to follow on the S. S. Ryndam. All information received tends to show that the release by the German authorities was due to the individual efforts of the Belgian growers, assisted by "The Chambre Syndicale des Horticulteurs Belges," who had to certify to each separate invoice, which again had to be approved by the British Consul in Rotterdam, involving quite an extra charge for "Consular Fees." No end to extra expenses right and left; but no doubt all American florists are glad to receive their orders, even if somewhat belated. So far as we can ascertain, the average deliveries, notwithstanding the long confinement, have turned out pretty fair, with few exceptions. Let us hope for better conditions next season, so as to enable real prompt deliveries, in the old accustomed style.

So. Milford, N. H.—Rodney Woodman has purchased the greenhouses built by the late Howard Carlton and is to add them to his florist equipment at East Milford.

Visitors' Register

Boston: C. S. Strout, Biddeford, Me.; George C. Watson, Phila., Pa.; Thos. J. Gibson, Newport, R. I.

A NEW INDUSTRY IN BOSTON.

The Boston Floral Supply Co., a new establishment, has taken three stories of the building at 347 Cambridge St., where the manufacture of all florists' requisites is being carried on on a large scale. Some of the machinery used is interesting in its complexity and surprising in its efficiency. This company has opened a new field in New England's floral history.

NEWS ITEMS FROM EVERYWHERE

CHICAGO.

"Jimmy" Anderson, a well-known buyer in the Chicago market for many years, passed away last Saturday evening.

The books of the Chicago Flower Growers' Association show an increase of 35 per cent. in its November sales over those of last year.

An accident which resulted in the death of Carl A. Jenson took place December 3, when he was struck by a train at Hubbard Woods. Mr. Jenson was a landscape gardener.

Zech & Mann have been particularly fortunate in their growers, who have kept them supplied with as choice stock as could be found anywhere during the chrysanthemum season.

Among the down-town florists who rejoice in a good November business is the Washington Flower Market, which Charlie Rogers says ran \$300 ahead of the same month last year.

The Foley Greenhouse Manuf. Co. closes its fiscal year Dec. 1st and James Foley, secretary, is working hard at the books. P. J. Foley, president of the company, is on a trip through the south.

Mr. and Mrs. Chas. T. Neiglich, 854 N. State street, have the sympathy of the trade in the loss of their daughter, Vera Alice, aged 14, on Sunday last. The funeral took place from the Grace M. E. church, Dec. 5th. Interment was in Rosehill.

As the result of getting California flowers into the Chicago market, something which was done very extensively with chrysanthemums this fall, a new wholesale house has opened on the fourth floor in the Atlas Block, known as the Southern California Flower Market.

A look in the ice boxes at the Chicago Flower Growers' Association would convince anyone that the Wellworth Farms are producing Milady roses that have no superior in the market. Ophelia and Mrs. Russell, so much in demand, are both grown very nearly to perfection by Fred Stielow for this firm.

A splendid sample of Oklahoma mistletoe was seen on the market. It was all in one piece, symmetrical in form and weighed six pounds. It was covered with berries which were remarkably fresh considering the piece had been cut for three weeks. If this is anything like what we are to have for the holidays American mistletoe will sell at sight.

Poehlmann Bros. Co. has just added another seven-ton motor truck to carry coal from the cars to Plant "B." Their contract calls for 47,000 tons of coal and because of a shortage of cars delivery was held up and Mr. Poehlmann was obliged to buy at a direct loss to the firm of \$8000 last week. Mr. Poehlmann received a wireless message today that a shipment of lily of the valley pins had been seized en route by an English vessel. It is

likely they will not reach this country, but if so the transfer will probably ruin them.

Three extensions to the greenhouses of the University of Chicago have just been completed by the J. C. Moninger Co. The company anticipates a busy season next year in greenhouse building, for the florists have had a good year and naturally many will increase their area of glass. Then too, the probability of further advance in price of materials will make early placing of orders seem the wise thing to do. Frank and Ed. Washburn of Bloomington, Ill. have just placed an order with the J. C. Moninger Co. for two new houses 34 x 150 ft.

Christmas Stock at Poehlmann's.

A visit to the Poehlmann Bros. plant at Morton Grove, Ill., found the outlook for Christmas stock most encouraging. Azaleas were coming into bloom, cyclamen were a most attractive sight in 5, 6 and 7-inch pots, while a large stock of begonias and poinsettias, always so much in demand for the holidays, were making a splendid showing. The carnation houses give evidence that a big crop will be on for Christmas, the stock consisting of 200,000 plants of Beacon and Champion for red; Enchantress, Ward, Akehurst and Alice for pink; White Perfection, White Enchantress, White Wonder and Matchless for white. In roses the stock includes all the usual varieties and American Beauty and Mrs. Russell will be especially fine. This firm has just received 266,000

lily of the valley pins which were put into storage and 800,000 more are expected.

BOSTON.

Ralph Silva, a prominent local florist, has accepted a position with G. A. Comerford, of Bethlehem, Pa.

John J. Cassidy, the Beacon street florist, is one of the twelve candidates for the three three-year terms in the City Council.

The wedding of Julia Conley, of South Boston, and William Cheney, who for some time was employed by Martin Touhy, the florist, took place Wednesday, November 29.

The question of the nomenclature of plants, botanical and popular and the effects of changes in same was a prolific subject for discussion at the December meeting of the Horticultural Club of Boston. On the table were handsome vases of roses, Francis Scott Key from E. Allan Peirce and Cleveland from L. J. Reuter.

The first state experimental station for market gardeners will open in Lexington next spring, and much interest is being manifested in it by market gardeners of Greater Boston, for they feel that the state can render them much help in fighting various diseases of plant life and in using modern methods of raising crops. The station will be located off Reed street in North Lexington on a part of what is known as the Vail Farm. There are 12 acres in the tract. The station will be conducted under the direction of the Massachusetts Agricultural College

trustees and the Boston Market Gardeners' Association. Prof. H. F. Thompson of Arlington, who is connected with the Agricultural College, will be district agent. It is planned to erect four or five greenhouses when money is appropriated by the state. This station has been procured through the efforts of the Boston Market Gardener's Association after about three years' work.

The George R. White Medal of Honor for 1916 has been awarded to William Robinson, the well-known horticultural writer and owner of "The Garden," London, England.

Mr. Robinson is widely known for his advocacy of natural gardening as opposed to the formal or "carpet bedding" system so much in vogue a few years since. His book "The Flower Garden" is a recognized classic on that subject and has gone through many editions. He was the founder of "Farm & Home," "Flora & Sylva" and "Garden Illustrated," the latter a popular amateur publication which still runs well. He has been physically incapacitated for active business for a number of years, but is still a power for good in all that appertains to horticulture. He has a fine estate at Gravetye, England.

WASHINGTON, D. C.

Gude Bros. Co. have a very attractive window display this week featuring the Florists' Telegraph Delivery Service.

Mrs. Nettie Supper, formerly employed at the store of Gude Bros. Co., but recently connected with the establishment of George C. Shaffer, has returned to the first-named.

The Government of the Netherlands has placed an embargo on the exportation from that country of vegetable seeds, according to a cablegram from the American vice-consul at Rotterdam to the State Department.

Charles Dearing and A. M. Grimes, scientific assistants in the bureau of

plant industry, will spend the remainder of the year at Norfolk, Va., and Willard, N. C., working on matters pertaining to muscadine grape culture.

For the fiscal year ending June 30, 1918, it is estimated that \$11,690 will be required to cultivate and care for the gardens, greenhouses and grounds of the Department. To establish and maintain an experiment farm and agricultural station on the Arlington estate \$21,900 is requested.

An appropriation of \$26,100 is required for investigations in economic and systematic botany, and the improvement and utilization of wild

plants and grazing lands. The Department will require \$250,000 for investigation of citrus canker; and for other investigations in plant industries an appropriation of \$25,500. \$243,720 is requested to cover the cost and distribution of seeds. The Department will need \$87,430 to carry into effect the insecticide act. For the investigation of diseases of forest and ornamental trees and shrubs, \$85,915. The Department expects to spend \$34,700 in studying and testing commercial seeds, including samples of seeds and grasses, clover, alfalfa and long grass seeds secured in the open market. An appropriation of \$75,000, \$20,500 of which is for salaries, is requested for the federal horticultural board.

ASSOCIATED RETAIL FLORISTS OF NEW YORK.

At the regular November meeting of the Associated Retail Florists, Inc., the candidacy of George E. M. Stumpp for president of the New York Florists' Club was brought up. A resolution endorsing him and urging his election was unanimously passed.

Mr. Stumpp is one of the charter members of the retailers' Association and besides being its treasurer and director, he is held in high esteem by all of the members. It is understood that the retailers of New York City feel that the time has come when one of their number should be honored and preside over the Florists' Club, and to that end they intend to make a strenuous campaign for Mr. Stumpp's election. Among other important business was the re-election of the entire Board of Officers.

Rapid strides have been made in increasing the membership. At each meeting, groups of new members are elected. At the last meeting the following thirteen retailers were elected to membership. Herman Warendorff, William C. Mansfield, Henry Hart, E. J. Hession, John Curry, Wm. Kather, Charles A. Small, Harry Ramm, W. A. Blaedel Sons, Harry Gressner, Herman Kuhn, Robert G. Wilson and Paul F. Meissner.

At the end of the business session a large roasted turkey, a masterpiece by that floral and culinary expert, J. B. Nugent, Jr., was demolished. Included in the destruction were all the proper accompaniments.

The next regular meeting of the Association will be held December 19th, 1916. A joint meeting with the Greek-American Florists' Association will be held during the coming week. In the meantime and until the annual election of the New York Florists' Club, the retailers' slogan will be, "Vote for Stumpp."

NEW YORK.

George Stumpp, Sr., of New York, has returned from Germany, where he has been domiciled since before the outbreak of the war. It is needless to say that he received a joyous welcome from a myriad of friends.

The King Construction Co. have opened a New York office at 1476 Broadway, corner 42nd street, Long-acre Building, and H. S. de Forest is representing them.

CINCINNATI.

L. H. Kyrk is on a trip to Portland, Ind., and Kalamazoo, Mich.

The marriage of Erwin Gear and Miss Hilda Meinhardt took place last week.

The R. G. Kootz Floral Co., are now completely installed in their new store in the Gwynne. The store is pretty and attractive and the move to this location should prove a good one.

ST. LOUIS.

The florists gave a dance to their friends on December 6.

Ira Erickson and Miss McClure, formerly with Grimm & Gorly, will open a flower shop at Sarah and Chouteau.

All the wholesale houses are displaying Christmas goods such as ruscus, Japanese frieze, etc., and advance flower orders are numerous.

SOME BOSTON PLANT ESTABLISHMENTS.

Davenport.

A. M. Davenport's new boiler house, now nearing completion, is a model in its way. It is of concrete, 60 ft. x 60 ft., and the pipes have a 30 foot drop from the greenhouses. Two 150 horsepower boilers are in place and there is room for three more of equal size. At the rate this Watertown place is developing it will soon take rank with the largest plant growing establishments in the country. A prodigious amount of material is turned out. Under the benches there is almost as much stock as there is on them and the shelves suspended above the benches carry a lot more so that some of the houses are veritable "three-deckers." Cold storage houses added the past season are packed to the limit with aucubas, roses, euonymus and bulbs for winter and spring trade. The full quota of azaleas—15,000 plants—was received from Belgium; very late but in better condition than might be expected, considering the long delays in transportation. Young ferns are a specialty and there are hundreds of thousands of them in sight for present and future needs. There are innumerable young kentias and 10,000 Cocos Weddelliana seeds have been recently planted.

The houses are gay now with poinsettias, cyclamen and begonias blooming for Christmas trade and the begonias are already pretty well sold out. One of the most attractive is a deep pink sport from Glory of Cincinnati, which originated here. There is an-

other sport—a white Florence Davenport—which we think has a big future being a much larger and heavier flower than Turnford Hall. Mr. Davenport classes Melior as the best seller of all the Lorraine kinds. Glory of Nahant is too light colored for wide popularity.

Edgar.

It has long been the fashion among the florist trade of Boston as well as elsewhere to visit the Edgar Company's plant houses at Waverley at least twice a year—at Christmas and Easter time. Each fall visit finds some radical improvement in the way of new greenhouses or other buildings of substantial character. This time it is a new plant house with "1916" cut in

the concrete wall. At least one house a year is Mr. Bartsch's "stunt." Azaleas, poinsettias, winter-flowering begonias-Lorraines, etc., poinsettias, Euphorbia jacquiniæflora, cyclamens, primroses and some beautiful browallias are among the Christmas offerings and the cold storage house and frames are packed to the limit with winter and Easter plant stock.

Farquhar.

The already vast range of R. & J. Farquhar & Co., at Dedham, grows in size almost continuously and plans for future additions are constantly on foot. The ranges of low plant houses as constructed here are ideal in con-

venience and economy. Besides the usual line of seasonable plant material a beginning has been made on a department of fancy hot-house stock such as crotons, dracaenas, pandanuses and the like and there are many tidbits of pretty little unusual things in flower for Christmas, adapted for use in combination baskets, which must be seen to be fully appreciated.

Roland.

Thomas Roland's holiday plants are, as always, the perfection of finish, bearing the unmistakable evidences of the master's handiwork. Mr. Roland says that he is about sold out already on some of the Christmas specialties. Such men scarcely need solicit business; it just comes to them.

PITTSBURGH.

Randolph & McClements are displaying the first line of new Japanese wares seen in this city, their exhibition window showing a most artistic arrangement of boxes and baskets. Their Thanksgiving display of fruit baskets filled with luscious fruits and autumn foliage with appropriate accessories attracted unusual attention.

John Yeaton, who has been ill for some time with pleurisy, expects to locate in California as soon as he is able to travel. Mr. Yeaton came to Pittsburgh some months ago from Philadelphia to take charge of the bookkeeping department of G. P. Weaklin & Co.

William J. Ferguson, who opened a flower shop on Penn avenue, East Liberty, has abandoned it and located in Cleveland, O.

Thomas Edward Tyler is supervising the planting of a deep herbaceous border around the entire grounds of his employer, Charles Dickey Armstrong. In the orchid house he has an exceptionally fine exhibition, arranged in honor of the Garden Club of Allegheny County, which was en-

tertained during the past week by Mr. and Mrs. Armstrong. The former, who is one of the ablest botanists in Western Pennsylvania and one of the original sponsors of the Horticultural Society of Western Pennsylvania, delivered an interesting lecture on orchids.

Flower Market Reports

BOSTON A very strong market followed upon the Thanksgiving Day clean-up and stiff prices were the rule until Tuesday when values began to sag, consequent upon the salubrious weather and increased receipts on all lines. Roses are of excellent quality and there is a good market at top quotations for all that are presented. Carnations hold up to the high limit of value also, and chrysanthemums, such as they are in the closing days of their career find ready sale at excellent figures. They are mostly Bonnafon. Lily of the valley seem to be securely fixed now in the \$8.00 a hundred notch. Violets have been gratifyingly active, and the trade is anticipating a still greater volume of business from this source. Stevia is rather plentiful and not very brisk. Repeated calls for poinsettias have been noticed this week but were only filled in a minority of cases. Asparagus is about the only plentiful thing around and both varieties have been sold heavily all the week.

CHICAGO The past week has been a very satisfactory one in the market. The Thanksgiving trade was unusually good and helped to make a better

average for the month's sales than had seemed possible. The sales of chrysanthemums were very gratifying and the proportion of the big ones left over was small. The pompons, especially those of the newer types, were much in demand and the stock of these is still excellent at this writing. It is a question how many will be left for the holidays should the warm weather continue, which at present closely resembles, or perhaps is, Indian summer. Carnations continue to sell for a lower figure than last year. Roses are sufficient for the demand and the stock runs well as to quality. Some fancy sweet peas are appearing and are very welcome. Extra fine smilax in eight feet strings is seen in some places. Lily of the valley is

scarce and that condition is now accepted as inevitable. Lilies are in excess of the demand, but are moving better than earlier in the season.

CINCINNATI Since Thanksgiving, business has been good. The supply in the market is large but not as large as it was, while the demand is much stronger than that preceding Thanksgiving. Thanksgiving business was good in spite of the fact that prices were much lower than in other years. Roses, carnations and lilies are plentiful. Chrysanthemums are still in a fair supply. Violets, sweet peas, lily of the valley, stevia and orchids all find a good market. Callas have a fair call.

HOLLY WREATHS AND CHRISTMAS GREENS

Every year the demand for our Holly Wreaths increases, because they are different from the cheap corner grocery kind, being made of the best Holly attainable with plenty of berries and generous foliage and the artistic make-up of men who know how.

Made on frames 9, 10, 12, 14, 16 and 18 inches; \$15.00, \$17.50, \$25.00, \$35.00, \$50.00 and \$60.00 per 100.

CASE HOLLY

We offer only one kind—selected Delaware—the best obtainable. We know you can get cheaper from Jersey and other points, but the quality is not there.

Per case, \$5.00. Special prices in quantity.

BOXWOOD SPRAYS

A. P./M. introduction which gets more and more popular as the years roll by for wreath making and all kinds of decorative work. Selected stock, dark, glossy foliage, all usable without any surplus wood. Exceptional value.

Per 50 lb. \$7.50

MAHONIA. Bronze, extra large bunches; 25 to 30 sprays each \$10.00 per doz. bunches
RETINOSPORA SPRAYS. Another P. M. introduction; very artistic. 4 lbs. will make a good size wreath.

25 lb. crates, \$7.50

LYCOPodium. We offer for prompt orders at \$10.00 per 100 lbs. As the woods are now full of snow the prices are advancing. Do not delay ordering.

LYCOPodium ROPING. Extra heavy; well made; 25 yard pieces \$10.00 per 100 yards

LAUREL ROPING. Extra heavy; well made; 25 yard pieces \$6.00 per 100 yards

WILD SMILAX. Per case, \$5.00

LONG NEEDLE PINES. Per doz., \$2.00; per 100, \$15.00

GALAX. Bronze and green; per 10-M case, \$7.50

NATURAL MAGNOLIA. Branches and crowns, per 50 lb. case, \$10.00

CHESTNUT OAK FOLIAGE. per 100 sprays, \$2.50
WILD NUTMEG. per 100 sprays, \$3.00
WOODWARDIA FERNS. 30 to 36 in. fronds, per 100, \$15.00
HARDY DAGGER FERNS. per 1000, \$1.50
FANCY FERNS. per 1000, \$2.00

Flower Market Reports

(Continued from page 755)

NEW YORK The market has been in really good shape of late. Fluctuations, of course, due to weather conditions and other causes beyond local control, but the general situation is and has been much more satisfactory than has been the case for the week following Thanksgiving Day in recent years. Chrysanthemums are quite gone. Roses and carnations are doing well, the very low quotations being generally eliminated even if phenomenally high figures are unobtainable. Cattleyas continue to hold firm at top quotations. Violets are holding nicely to the ground recaptured last week and sweet peas are also well entrenched at remunerative prices. Lilies are back from the low ground to normal values. It looks like a very bright Christmas prospect, if wise policies on the part of growers on the one side and dealers on the other are followed.

PHILADELPHIA The Thanksgiving week trade here turned out fully up to all expectations. Good prices were realized all along the line and everything that was worth clean-

Flower Market Reports

(Continued from page 757)

ing up cleaned up clean. A very gratifying showing indeed and one that gives a more cheerful tone to the market in all directions—the first tuneful, bell-like-tone we have heard for many a day. Another joyful note sounds today—Monday of present week—when from all sides cometh the story of brisk business and good prices. Long may she wave. What? Certainly I mean the bell. Flags are all right but bells do also wave.

Thanksgiving was a pronounced success. The abundant sunshine of the past several days has forced the roses and carnations to an unusual degree, although they continue to bring fair prices. The high cost of coal, especially, has almost swamped the smaller dealers, who, unfortunately were caught napping when others were laying in their winter supply in anticipation of the predicted scarcity and increase in prices. Chrysanthemums have practically had their day, although some very attractive specimens are still seen. Lilies are fair but there are no lilies of the valley of home production, all being brought in from other sections. Apropos of this, the inadequate express service is causing great inconvenience and, of course, dissatisfaction in regard to tardy consignments. Thanksgiving, or, rather, what were intended to be Thanksgiving violets, arrived entirely too late for their intended purpose. Paper white narcissus, Roman hyacinths, mignonette and calendulas are now coming in satisfactorily.

With ideal weather on ST. LOUIS the 29th and 30th, Thanksgiving Day for 1916 made everyone happy. The grower, the wholesaler and the retailer were all kept busy. The chrysanthemum ruled, with yellow the favorite color. Carnations were fine but heavy in supply. Roses were somewhat scarce and prices were stiff. Violets had a satisfactory sale. Chrysanthemums in good stock were in good demand at regular rates and a few fancy blooms brought prices accordingly.

The Thanksgiving WASHINGTON Day business was highly satisfactory to all and as a result of the heavy sales there followed a great scarcity of stock and high prices prevailed into the present week. Sweet peas were in heavy demand and these with violets sold very well. Lily of the valley brought \$8 per hundred and cleaned up well, orders coming in from many northern points. There were enough gardenias and orchids to fill the demand. For the first time in many months, retailers found it hard at times to get their orders filled and, in fact, there were many flowers unobtainable. Out of town orders had to be turned down in many instances because of lack of stock.

EASTERN CHEMICAL COMPANY
BOSTON, MASS.

DEPARTMENT OF AGRICULTURE TO BUILD POTASH FACTORY

A plant on a commercial scale will be built by the Department of Agriculture for the conduct of experimental work in the production of potash from kelp, an appropriation of \$175,000 for the purpose having been made at the last session of Congress. Two locations are under consideration, one near Santa Barbara, the other near Long Beach, California. It is expected that a definite location for the Department's factory will be selected shortly and that the work of constructing the plant will begin soon afterward.

The plans call for a plant capable of handling approximately 200 tons of wet kelp per day. Electric power probably will be used for all mechanical operations, while heat for drying and distillation will be furnished by crude petroleum. The equipment will consist of drying kilns, distilling chambers, vats, handling machinery, and the necessary buildings to house this apparatus.

From the 200 tons of kelp used daily about five tons of muriate of potash will be manufactured. The product will be sold and the proceeds turned into the U. S. Treasury. The primary purpose of the plant will be to determine the most economical processes for producing potash from kelp and to work out methods for the recovery and utilization of by-products. Numerous methods will be employed experimentally in operating the factory with this end in view. For the most part, however, the department will depend on distillation processes.

The department has decided to locate its experimental factory in southern California because of the combination in this region of an adequate supply of kelp and admirable operating conditions. The kelp grows in vast groves in water about 60 feet deep along extensive sections of the Pacific coast. For use in the manufacture of potash it is gathered by ocean-going harvesters which cut the plants beneath the water. In some places the beds extend to the three-mile limit, but in the neighborhoods now being considered by the department as locations for its factory the groves are much narrower. The plants grow rapidly, and it is believed that little difficulty will be experienced in obtaining an adequate supply of raw material.

CAMBRIDGE, MASS.
NEW YORK, N. Y.**THE FLOWER POT SHORTAGE.**

I noticed a statement in the New York news letter of one of the florist trade papers that the shortage of flower pots is causing men to be laid off. There is a shortage, but let's be fair and place the blame where it belongs. I know there are potteries enough throughout the country each well equipped with sufficient kilns and machinery to make pots plenty, if men could be obtained to run them. There has been, and is, many dollars' worth of idle machinery because of "labor" and on labor alone I place the principal reason for the shortage. The advance in wages has been met each time and no doubt will soon have to be met again. The total number of pots used is no greater than in former years, neither is the demand larger, but long delayed shipments make it appear so, and one good reason for delay is the freight embargoes placed upon the eastern cities by the railroad companies.

The grower must understand that during all last spring and summer the potter was fighting for him, while running with a depleted labor force, trying to get the additional labor necessary to make up the stock of pots needed for this fall trade, and that he is still trying hard to fill his fall orders and making stock for the coming winter and spring trade, hoping to have enough for all hands when needed. As far as the Whilldin Pottery Company is concerned we are now working to full capacity and gradually catching up with our fall orders. Our trouble at present is "Freight Embargo."

J. G. WHILLDIN, Pres.

FIGHTING MOTHS IN NEW ENGLAND.

Twelve million nine hundred and forty-seven thousand seven hundred and thirteen parasites which prey on the gipsy moth were released in Massachusetts and New Hampshire last year by the Bureau of Entomology of the U. S. Department of Agriculture. Of these, 661,713 were Japanese parasites known as *Schedius kwanai*. These were liberated in 28 towns in Massachusetts and 11 in New Hampshire. Another enemy of the gipsy moth, known as *Anastatus bifasciatus*, was colonized in 14 towns in Maine, 31 towns in New Hampshire and 71 towns in Massachusetts. In all 12,286 colonies of this species containing 12,286,000 individuals, were liberated to aid in the work of controlling the gipsy moth pests. These two parasites place their eggs in the egg of the gipsy moth, the eggs of the parasites hatch into larvae, or grubs, and these feed upon the developing caterpillar within

HENRY A. DREER, Seeds, Plants, Bulbs, and Supplies, 714 Chestnut Street, Philadelphia, Pa.

the eggshell and kill it before the egg has a chance to hatch. According to the annual report of the chief of that bureau just published by the U. S. Department of Agriculture, the parasites previously released seem to be gaining a foothold and many of them are now found in larger numbers and over a wider territory than ever before. The Calosoma beetle, another insect enemy of the moth, the report states, is continuing its good work, although apparently the beetles are not so numerous in certain localities as they were last year.

In New England, in cooperation with State official and other State agencies, considerable progress is being made in fighting the gipsy moth. This year in two towns in New Hampshire, two in Vermont, four in Massachusetts and three in Connecticut, the insect has apparently been exterminated. Extensive scouting to determine its spread showed that the moth has been found in 15 towns where it was not known to exist before. This gives a net increase of only four infested towns, which, the entomologists say, is a much smaller number than has been reported in previous years. All of the infestations discovered in these towns have been carefully treated and a large amount of creosoting of egg masses and banding and spraying of trees has been done in towns immediately inside the border. During the year approximately 35 tons of arsenate of lead were used and over 12,000 miles of roadway and 24,000 acres of woodland have been examined.

The standard curved eave having wall vents.

The angle vent method with the sash hinged direct to a steel angle.

The modified curved eave with moulded gutter at the eave and sash hinged to it.

Side Ventilation For Private Houses Three Ways Of Solving It

THERE is an undoubted graceful freedom to the curved house that many like, in spite of the fact that some architects claim that the laws of design demand that there be a cornice effect at the eave, such as a moulded gutter gives.

The question of design, however, is mainly a matter of opinion; but ventilation is not. It's an undodgeable necessity.

Some feel that the standard curved eave with wall vents answers the purpose for them.

Some don't.

For those who don't, we have two solutions. As far

as efficiency is concerned, one is as good as the other. As for looks—you can best decide that for yourself.

One way is to put a steel angle at the base of the eave, and hinge the continuous sash direct to it. This practically preserves the sweep of the eave, which many like.

The other way is to put an ornamental mould-faced gutter at the eave base and hinge the sash to that. In this house we give the curve a wider sweep which gives you a higher side.

We will build your house any of these three ways. But whatever way we do build it, it will be the house of Everlasting Lastingness.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

"If vain our toll, we ought to blame the culture, not the soil."—Pope.

Callas

Don't fail to fumigate about once a week or greenfly and thrips will get ahead of you. Ventilation should be given on all favorable days to avoid a stagnant humidity. In order to bloom well they require a night temperature of from 55 to 60 degrees. When in continuous flower callas eagerly take up large quantities of food from the soil and should have liquid manure regularly once a week and, when spring is nearing, twice a week. Now, under fire heat, water should be used abundantly on the paths and around the house. On all good days give them a syringing after the flowers have been cut. These plants will assure fair returns if grown under anything like fair treatment during the winter and spring. When planted out in beds, in two or three weeks they will stand a mulch of manure.

Easter Lilies

Harrisii or Formosa lilies, if they are just coming through the ground now will be all right, as Easter comes this year on April 8th. Now that the holiday trade leaves some vacant bench space it will be well to bring in some of the lilies intended for the Easter trade. There isn't any reason for using a strong heat at present, at least, for any lilies intended for Easter; 55 degrees will do nicely. Higher temperature will only tend to produce a soft growth. In about three weeks it will be all right to give them 60 degrees. All Easter lilies should have their pots well filled with roots before they are given too much heat. Give a good syringing on all bright mornings. Fumigate for green fly every ten days. In the case of multiflorums and giganteums, if the growths are three to four inches high you are all right. These lilies can be given a house that stands about 60 degrees at night and in about three weeks they can have 65 degrees.

Mignonette

Disbudding once a week improves the flower and stem. Keep them clean by light fumigation. They do not like heat. A temperature from 42 to 45 degrees at night and from 10 to 15 degrees higher with sun will be all right. See that they have proper supports to keep the shoots straight. If there is one thing that is very important in the culture of mignonette it is a fresh and bracing atmosphere. Take advantage of every good day and give ventilation to this crop, but always avoiding chilling drafts. Mignonette likes to be moist at the roots, so look to the watering. Do not keep the house too damp during dull weather as it tends to make a very soft growth. A mulch of half manure and soil about every four weeks will be advisable, but do not put it on any deeper than half an inch. Now is a good time to make a sowing for spring flowering. You can use three-inch pots, planting about four seeds in each pot. Keep shaded until they start to come up, when they should be given a place well up to the glass in a light house.

Orchids

Do not keep the houses too damp during dull and

murky weather, but during bright weather you can damp down two or three times a day. Use any spare time now in changing and sponging the orchids. East Indian family will stand more coddling and thrive, but that does not mean that they do not want ventilation, too. This should be given on all bright days. All such orchids as cattleyas, coelogynes, miltonias, laelias, odontoglossums, etc., love fresh air, so make it a point to give some ventilation every day, even if it is only for an hour. We are now coming into our shorter days, when careful watering counts. To do this work right the grower will have to go over his plants every day and make it a rule to water only as they may individually need it. They will not need any shade now until the middle of February. Look over the crates, baskets and pans and see that there are enough, as the potting season for most orchids will soon be here.

Start Propagating

Be sure that there is enough of bottom heat. This can be increased by boarding in the sides all around which will throw the heat right up to the bottom of the benches. Give the entire surface of sides and bottoms a good whitewashing of hot lime. See that everything is made thoroughly clean by washing down with a strong force of water all benches, walls, etc., It is always better to place about an inch of coarse material on the bottom, which will assure good drainage. You can place some moss on this, and then about three or four inches of clean sharp sand. Spread all over even, press down firm and give a thorough watering. All bedding plants can be put in from now on.

Shamrocks

Mr. John J. M. Farrell,

Dear Sir:

Will you kindly tell me how long it will take shamrock to grow to size for potting in two-inch pots? I have a small house, one side devoted to lettuce, so that the temperature will not be very high. Possibly shamrock will not do well. I will be grateful for any information.

T. M. P.

In answer to the foregoing, it will take from three and one-half to four months to grow good shamrocks from the sowing of the seed until they are salable stock in two-inch pots. They will grow very good in a 50 degrees night temperature, with 10 to 15 degrees higher by day. In order to have them of good size for St. Patrick's Day the seed should be sown any time during November. We sowed ours at the end of November.

Reminders

Give a mulch of well decayed manure to beds of peonies now. It will act as a protection in winter as well as enrich the soil.

Let young cyclamen have all the light possible now. The best place is on a shelf near the glass.

Keep the flower buds constantly picked off ageratum, alternantheras and other bedding plants.

Prepare the ground for next season's sweet peas. Use plenty of good manure and dig deep.

Next Week:—Care of Manure; Gardenias; Giganteum Lilies for Easter; Hydrangeas; Schizanthus; Reminders.

Who is to blame? The uncertainties and perils of sea transportation between European ports and this country are known to all our readers and it could surprise nobody that the azaleas and plants destined for the American trade had a very close call and suffered many grievous delays en route this season. But where can one find words sufficiently strong to condemn the demoralization existing right at home—as for instance the taking of five weeks to get these Belgian shipments to Boston after they had been safely landed in New York? One importer says that the spectacle he saw on the docks at New York was simply sickening. Who is to blame?

Words, words, words

Outside of the Barnum type of showmen, probably the first prize in a test for volubility in the use of grandiloquent adjectives and extravagant descriptive phrases in the conduct of their business would be easily won by the seed and plant catalogue men and novelty introducers. So universal, indeed, has this habit of dealing in the marvelous become that our inflated descriptions are no longer taken seriously. They impress nobody and why continue the absurd practice? We believe the time has now arrived when the dealer with sufficient backbone to eliminate all this superfluous boasting and stick to moderate language in his trade literature will meet with the greater confidence on the part of the buying public.

Is the florist "on his job"

Commenting in approval of our editorial note of last week in reference to certain conditions which appertain in the cut flower industry at the present time a reader of HORTICULTURE writes, "Is the florist on his job?" Our correspondent proceeds to intimate that in his opinion the average retailer, whether a "store florist" or doing business at his greenhouses has yet a long way to go before he shall have attained to that degree of efficiency in the conduct of his business, as a business, which men in other and often less important commercial lines have long since reached. Our friend is perhaps not far astray in his conclusions, especially as to the primitive and inadequate publicity methods in vogue and the faulty financial habits of many of the craft but, however that may be, HORTICULTURE feels pleased whenever its editorial remarks on matters affecting the reputé and welfare of the trade are taken in the spirit in which they are offered and thus accomplish their intended purpose—to set people athinking. That is, after all, a paramount function of the press.

All lining up

The very noticeable tendency in the retail florist trade toward a greater interest in the associated bodies, local and national, is one of the most hopeful signs of the present era in the growth of the florist business. During the thirty years in which the "get-together" spirit has been working so effectively among all other classes in the horticultural world, the retail store florists, with the exception of a comparative few have, until quite recently, maintained a conspicuously indifferent and at times almost repellant attitude. Efforts to interest them in organization aims and induce their participation in club and society activities were signal failures, usually. It is a good thing for the associations that the retail dealers are, at last, disposed to line up and take a part in the excellent work which these institutions are doing and the augmented active membership and larger official responsibility which is thus acquired is certainly a valuable acquisition. On the other hand, the effect of the movement on the retail store element as a whole, especially in the large cities where they are numerous, cannot fail to be salutary and uplifting. We feel that the revival has come to stay and, as thorough believers in the efficiency and progressive influence of class organization, we are more than pleased over the outlook as it now looms up.

Obituary

Jerome Jones.

Jerome Jones, Boston merchant and philanthropist, passed away suddenly at his home in Brookline, Mass., on Wednesday noon, December 13, aged 79 years. Heart failure following an illness with bronchitis was the cause. Mr. Jones was the senior member of the Jones, McDuffee & Stratton Co., dealers in crockery, china and glassware.

To the florist trade Jerome Jones is best known in connection with the chrysanthemum named for his late wife by her father, Henry A. Gane, who raised it as well as several other varieties of note. After the death of

JEROME JONES.

Mr. Gane, Mr. Jones established the Henry A. Gane Memorial Fund in care of the Massachusetts Horticultural Society, the income to be awarded annually for exhibits of the chrysanthemum varieties originating with Mr. Gane.

Edward Manning Bigelow.

"The parks of the city will remain his best monument, because they are a blessing for future generations," said the Rev. Dr. Frank W. Sneed, during the funeral service of Edward Manning Bigelow, "the father of the Pittsburgh parks," last Saturday. "Mr. Bigelow," he continued, "loved Pittsburgh and expressed that love in a practical and invaluable service. He had a vision of the city, which he had the courage to pursue, and in a measure, realize, although often bitterly opposed."

The death of Mr. Bigelow took place the previous Wednesday morning at the Allegheny General Hospital following an operation for cancer of the intestines. For some time he had been a sufferer and ascribed his condition

to the hard work of the State Highway Department.

Mr. Bigelow was born on November 6, 1850, in Pittsburgh, where his entire life was spent and where most of the important municipal improvements stand as his monument. He was president or trustee of many institutions and benefactions. Mr. Bigelow was instrumental in obtaining the gift of Schenley Park from Mrs. Mary Schenley, of London, England, to the city, and it was directly through his efforts that Henry Phipps presented the Phipps Conservatory of Schenley Park. Both Schenley and Highland Parks were laid out during his regime. He leaves his widow and three sisters. The funeral was held at his home on North Highland avenue and the remains were placed in the family vault in the Homewood Cemetery.

Frank S. Howard.

Frank S. Howard, for the last fifteen years private gardener for the Pullman estate, Chicago, passed away suddenly of heart failure, on Friday morning, Dec. 8th, at his home, 1826 Calumet avenue. Mr. Howard was born in Austria, in 1849, and came to this country when twenty years of age. After staying six months in New York he came to Chicago where he spent the remainder of his life, working for J. Y. Scannon several years, then in Washington Park for another term of years, and last at the place in which death found him busy at the work he loved. He leaves a widow, four sons and one daughter. Interment was at Oakwoods, on Sunday, Dec. 10, under Masonic auspices.

Herbert W. Johnson.

Former State Senator Herbert W. Johnson, 66 years old, died at his home in Haddonfield, N. J., on Sunday, December 10, after a long illness from Bright's disease. Mr. Johnson was former head of the firm of Johnson & Stokes, seedsmen, of Philadelphia, which was established about the year 1886 and continued for about 20 years when the partnership was dissolved and Mr. Johnson established the Johnson Seed Co., which continued in business for a number of years. Mr. Johnson filled several offices of public trust from time to time. He is survived by a widow and four children.

Albert L. Muller.

Albert L. Muller, for several years assistant to Landscape Architect John Nolan, of Cambridge, Mass., was struck by a Chicago & Northwestern train at a grade crossing in Kenosha, Wis., and passed away December 8. Mr. Muller was a native of Jamaica Plain, Mass., and was 26 years of age. Last spring he went to Kenosha as the manager of the Kenosha Homes Co. and had charge of the field work there. Mr. Muller was a graduate of the Massachusetts Agricultural College and

for a time was Professor Waugh's assistant in the department of landscape gardening and horticulture.

William C. Barry.

We are grieved to learn of the death of W. C. Barry of the nursery firm of Ellwanger & Barry, Rochester, N. Y. Mr. Barry passed away on Tuesday, December 12, after a brief illness with pneumonia. In nursery and pomological circles Mr. Barry was a shining light. He succeeded his father, the late Patrick Barry as president of the Western New York Horticultural Society in the year 1890 after having served as vice-president for seven years and has been continuously its presiding officer ever since. In the financial life of Rochester Mr. Barry was a large participant and his loss will be felt in the city's affairs. Personally he was a most agreeable and

WILLIAM C. BARRY.

companionable gentleman whom to know was to love. In years past he wrote several books and many magazine articles on horticulture and pomological topics.

The annual meeting and Vegetable Show of the Pennsylvania Vegetable Growers' Association will be held at Harrisburg, Pa., January 23, 24 and 25, 1917. The program will consist of four sessions led by growers and specialists. It is probable that there will be one session on each of the following subjects: Greenhouse Problems, Pests of Vegetable Crops and Latest Methods of Control, Economic Production and Marketing. An interesting and profitable time is assured. The State Horticultural Association meets at same time and place, as well as the State Board of Agriculture, Pennsylvania Breeders' Association and other state agricultural organizations. Association officers for 1916 are president, S. Herbert Starkey, Bustleton, Pa.; vice-president, W. H. Weinschenck, New Castle, Pa.; secretary, J. R. Bechtel, State College, Pa.; treasurer, H. W. Pierce, Wilkes Barre, Pa.

CLUBS AND SOCIETIES

NEW YORK FLORISTS' CLUB.

One of the biggest meetings in the Club's history took place last Monday evening when the election of officers to serve for the important year 1917 was in order. The club room was packed with members. Four new ones were admitted. Routine matters were quickly pushed through and the big business of the evening began with the appointment of Jos. Manda and Chas. Knight as tellers and W. F. Sheridan as judge. The election of president was the main issue and the withdrawal of three names out of the five on the ballot left the contest between Chas. Schenck and G. E. M. Stumpp. During the balloting and counting of votes a social hour was enjoyed in the ante-room. The result of the voting was declared as follows: President—Schenck 84, Stumpp 98; vice-president—J. H. Fiesser 85, P. W. Popp 83; secretary, John Young, and treasurer, W. C. Rickards, re-elected unanimously; trustees—R. J. Irwin, John Canning, A. Kottmiller. On motion of Mr. Schenck and Mr. Popp, respectively, the election of President Stumpp and Vice-President Fiesser were made unanimous. Then followed brief speeches by all the successful candidates. A vote was recorded authorizing Secretary Young to recognize the president-elect as the representative of the New York Florists' Club on the executive board of the Society of American Florists. Letters of sympathy were ordered sent to W. H. Long and P. L. Bogart, two members who are seriously ill.

The following exhibits were on the tables. Chrysanthemum Arawana from E. G. Hill, scored 88 points. Chrysanthemum Hamburg Late White from W. F. Kasting Co.; Cromwell Gardens—carnations Nancy and Nebraska; R. J. Irwin—seedling anemone chrysanthemum; Charles Tricker—winter flowering begonias Eclipse and Pink Perfection; A. Demeusy—sport from Enchantress carnation; Badgley & Bishop—roses Little Gem and No. 108.

WORCESTER COUNTY HORTICULTURAL SOCIETY.

The annual meeting of the Worcester County (Mass.) Horticultural Society was held December 6, and Arthur E. Hartshorn was elected president for a second term. Other officers chosen were vice-presidents Charles Greenwood, Leonard C. Midgley and Frederick H. Chamberlain; secretary, Herbert R. Kinney; librarian, Lucy M. Coulson; treasurer, Burt W. Greenwood. The Hadwen medals bought by an appropriation from the fund established by the late Obadiah B. Hadwen, and designed by Albert H. Lange, were awarded Miss Lucy M. Coulson on tuberous-rooted begonias; Irithorpe, the summer home of Dr. and Mrs. Homer Gage, and A. N. Nickerson, Pomfret, Ct. Two medals, one for

FLORISTS' CLUB OF WASHINGTON.

The December meeting of the Florists' Club of Washington, D. C., was devoted largely to a discussion of the grading of flowers and the grading of prices in the same connection. L. J. Reed, a representative of the Agricultural Department, a former grower of the middle West, gave a talk on the standardization of vegetable packing, and of how this to some extent could be applied to the florists' business.

An opposite view was taken by Adolph Gude, who pointed out that it would be impossible to observe such standards of grade because of the widely variant qualities of the products of the different growers.

The standardization of price according to Mr. Gude would also be a practical impossibility

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Kirby B. White, Detroit Mich.; First Vice-President, F. W. Bolgiano, Washington, D. C.; Second Vice-President, L. L. Olds, Madison, Wis.; Secretary-Treasurer, C. E. Kendel, Cleveland, O.

One Week's Imports.

Imports at the port of New York, of horticultural material, for the week ending Dec. 1st, were recorded as follows:

Bulbs—Netherlands, \$6,926; England, \$22; Scotland, \$76; Japan, \$3,982. Plants—Belgium, \$62,479; France, \$684; Netherlands, \$8,674; England, \$362; Scotland, \$89; Colombia, \$129. Clover seed—France, \$5,500. Grass seed—France, \$3,269; Spain, \$770; England, \$7,367; Scotland, \$4,203. Other seeds—Italy, \$67; Cypress Island, \$1,739; Netherlands, \$920; England, \$2,076; Hongkong, \$27. Nitrate of soda—Chile, \$151,066.

Notes.

During the fiscal year ended June 30, 1916, the Department of Agriculture purchased for the 1915-16 congressional seed distribution, 907,417 1/2 pounds of vegetable seeds at a cost of \$98,528.57; 44,859 pounds of vegetable seeds at a cost of \$19,528.85, and 15,606 pounds of lawn grass seeds at \$2,137.66. This information is contained in a statement showing the kind of seed purchased, the quantity and cost thereof, the date of purchase and the country of origin.

One of the provisions of the post office appropriation bill which the House committee on post offices and post roads will soon present to Congress provides that catalogues shall hereafter take third-class rates, instead of being allowed to go as parcel post packages. This will mean an increase of from 2 to 8 cents a pound on these books. This legislation, proposed by Representative Steenerson, is aimed at the large mail order houses, but it will affect all firms sending out bulky catalogues. In this same bill there is a provision looking to the establish-

ment of a 1-cent postage rate on first-class matter when intended for delivery in the same delivery district in which posted. This will cover all city drop letters and those intended for delivery within the limits of city or rural delivery districts.

CHICAGO.

Andrew J. Cronis has the sympathy of the trade in the loss of a son 14 months old. The little one had been ill for half of its short life.

Some familiar faces are noticed in new places this week. Fred Ottenbacher is seen at the Chicago Flower Growers' Association and Jack Byers now is found at Zech & Mann's.

Another firm to seek larger quarters is Joseph Ziska & Sons, who will occupy the second floor at 169 N. Wabash avenue. For many years this firm has been leaders in the manufacture of wire work for florists and has added other supplies as the business grew. As they became old enough Mr. Ziska took his other sons into business with him.

The supply of Christmas plants will be greatly reduced this year. Of azaleas many growers have none at all, and all have less than usual. Poinsettias will also be in smaller supply, mainly owing to the extremely hot summer which made it impossible to propagate the necessary stock. Cyclamen, on the contrary, will be a little ahead of the normal both in quantity and quality, some magnificent specimens being offered, but these are not enough to offset the shortage in

azaleas and poinsettias. For low-priced plants, primulas Chinese and obconica, will be much in evidence and a fair quantity of Christmas peppers and Jerusalem cherries, but hardly up to the usual quality. Acubas, ericas and ardisias are limited in supply. A few car loads of azaleas came in at the proper season but the great bulk

of the importations came about the middle of November in a damaged condition, owing to the cold weather at that time. Thirteen car loads arrived here during the past week, many of them worthless either from freezing or delay. White and the pink poinsettias are among the Christmas novelties.

WASHINGTON, D. C.

The Rose Society of Brookland, D. C., celebrated the fifth anniversary of its founding last Saturday evening by a reception and supper, preceded by a literary program. Prof. Mulford of the Dept. of Agriculture spoke on the rose garden at Arlington, Va.

More than three thousand persons attended the poinsettia show at the Botanic Garden on the day of its opening. This is the first poinsettia show ever held here. It was a record day for attendance at the Botanic Garden, and Supt. Hess received many compliments on the excellence of the blooms.

J. H. Small & Sons furnished the decorations at the New Willard Hotel for the annual banquet of the Gridiron Club, held last week. Large quantities of American Beauty and other roses, carnations and chrysanthemums were used, and the decorations were declared to have been among the finest seen in this city.

Shipments of Christmas greens on the river line steamers are beginning to get very heavy and the boats now arriving have decks piled high with crates and boxes of this material. There is not as much holly to be found along the Potomac this year as in the past few years, although it is said to be fairly plentiful. Mistletoe, however, is reported very scarce.

A bill has been introduced into the House to secure the establishment at or near Colquitt, Georgia, of an experiment station for the purpose of demonstrating the character of plants, fruit and ornamental trees, vegetables, etc., best adapted to the soil and climate of that section. The bill proposes an appropriation of \$25,000 for this purpose, under the direction of the Secretary of Agriculture.

The high cost of coal and the difficulties experienced in obtaining necessary supplies, two matters which have been instrumental in driving a large number of small florists out of business, and the high cost and scarcity of paper of various kinds, will be made the subjects of investigation by

the Attorney General if the resolution introduced by Representative Adolph J. Sabath is adopted. The magnitude of the proposed investigation can well be realized when it is shown that Mr. Sabath suggests an appropriation of \$250,000 for that purpose.

ST. LOUIS.

The florists' dance on Dec. 6th was a great success and a very enjoyable time was had.

The monthly meeting of the St. Louis Florists' Club was held on Thursday, December 14th.

Saturday, Dec. 9th, saw the opening of the Blossom Shop by Miss Nellie C. McClure and Ivar Ericson, formerly with Grimm & Gorley, at 4110 Manchester avenue.

PITTSBURGH

Henry Manke, who has been in the employe of the Zieger Company, for the past two years, is now with the recently organized "Liberty Florists."

William Cooper succeeds John Yeaman in the bookkeeping department of G. P. Weaklin & Company. Mr. Yeaman, who has been a sufferer from pleurisy for some time past, will leave a little later to locate in the far west.

Thomas Edward Tyler has been seriously ill for the past two weeks. Owing to this fact, David Fraser, of the H. C. Frick estate, arranged the beautiful display in the orchid houses of Charles Dickey Armstrong for the meeting of the Garden Club of Allegheny County last Friday.

BOSTON

Adolph Blume, a former New York and Chicago florist, is now with the H. M. Robinson Co.

The many friends of W. A. Riggs, the Auburndale florist, will regret to learn that he has been confined to his bed for over a week with sciatic rheumatism.

Philip L. Carbone sustained a severe loss when a fire broke out in the basement of his Boylston street store at about 2.30 last Tuesday morning. The firemen battled with the flames for nearly three hours. The fire worked its way from the basement to the top of the building, three stories above, and left in ruins \$40,000 worth of pottery, glass, floral ware and various accessories. These are all covered by insurance, but, under existing conditions, will be extremely hard to duplicate. Overheated steam pipes are believed to have been the cause.

Loring Underwood was the speaker at the monthly meeting and dinner of the Boston Society of Architects at the Parker House last night. He gave an illustrated lecture on "Old New England Gardens." Among the pictures thrown on the screen were the gardens of the Craitie House and the Botanical Gardens, Cambridge, the Sargent gardens and the Gen. Weld estate, Wrentham, the Adams' house garden, Quincy, the Nicholas estate, and the Old Manse in Concord. He pointed out the simplicity of the early gardens and the Mr. Underwood said that people of those days built gardens to live in and

not to look at, as is too often the case today. He advised the planting of plenty of shade trees and shrubs for comfort and enjoyment.

PITTSBURGH (PA.) FLORISTS' AND GARDENERS' CLUB

The 25th anniversary of the founding of our Club was celebrated by a banquet at the Fort Pitt Hotel, on Nov. 21st. All the former presidents, also the first secretary were present. Among the notable remarks were those of P. S. Randolph, a large plantsman, who deplored the fact that the plant business had not kept pace with the cut flower business in development. Very fine plants were produced back in the sixties, and there has not been much increase in quality or price, while in cut flowers there has been great increase in both. He was followed by W. A. Clarke a commission man, who thought that one trouble in regard to plants was that they were not adequately displayed and demonstrated; they were not brought to the attention of the public as they should be, and instanced the street fakirs on the corners who, he claimed were of great value to the wholesale houses and the growers in the disposal of surplus stocks of cut flowers, and at the same time increasing the knowledge and love of flowers among the mass of the people, and creating a habit of buying among them. It was near midnight when the gathering drew to a close.

many of us wishing that the 25th anniversary could come every year.

The regular monthly meeting of the Club was held December 5th.

A rising vote of thanks was given E. C. Reineman, Chairman of the Banquet Committee, for the efficient manner in which he had handled that celebration. A committee was appointed consisting of E. C. Reineman, Augustus Frishkorn, Neil McCallum and T. P. Langhans to look up the matter of a suitable hall and report at the next meeting when a vote will be taken on the advisability of holding a fall flower show.

An attractive display of poinsettias and solanums was made by the Bureau of Parks, Jno. W. Jones, foreman, for which a certificate of merit was awarded, and to Pasquale Falbozzi a vote of thanks for narcissus.

Henry Meuschke read a paper on the "Street Fakir," claiming that the present method of selling surplus stocks of cut flowers to the street fakirs at a lower price than to the retailers was not fair to the retailers, and as a solution suggested the shortening of the stems of first-class stock, thereby reducing it to the second grade, and then selling to the retailers and the street fakirs at the same price. There was some discussion of the paper and it was finally suggested that it be read at the next meeting before a larger audience, and when a fuller discussion can be held. The next meeting promises to be a very full one, as in addition to the above paper, there will be action on the fall flower show and nomination of officers.

H. P. JOSLIN, Sec'y.

CHICAGO FLORISTS' CLUB.

The Chicago Florists' Club held its regular December meeting at the Morrison Hotel on the seventh. It was the annual election of officers, and many members were out to work for their particular favorites, with the following results: President, Wm. H. Amling, Maywood, Ill.; vice-president, Paul Klingsporn, Chicago; secretary, Allie Zech, Chicago; treasurer, Otto Amling, Maywood, Ill. The president-elect is one of the most successful growers of cut flowers for the Chicago market and his stock is sold by the commission house of Zech & Mann. The vice-president came from Philadelphia three years ago to take the management of the Chicago Flower Growers' Association and has made good in his work and also made many friends here. The secretary is one of the youngest men in the trade to be at the head of a large wholesale business such as Zech & Mann has built up. The treasurer is a well-known grower and a nephew of the new president. Wm. F. Keimel was elected trustee to succeed Geo. Asmus, whose term has expired.

A. F. J. Baur, of Indianapolis, was present and exhibited carnations Merry Christmas and Pollyanna. J. C. Matheson, of Sheboygan, Wis., sent three plants of a pink begonia of the Enchantress Supreme shade. French & Salm had some magnificent Mrs. Russell roses from their place at

Union Grove. C. C. Watson, representing Niessen & Co., of Phila., expressed the belief that could the growers of his city see these roses they would be encouraged to try again to grow the Mrs. Russell rose. They made the high score of 92 points.

CONNECTICUT HORTICULTURAL SOCIETY.

The annual meeting of the Connecticut Horticultural Society was held in Hartford on Friday evening, Dec. 8th. After the general routine business had

been taken care of and the auditing committee had reported the books of the treasurer and the secretary O. K., the officers who served during 1916 were unanimously chosen to succeed themselves for 1917.

President Hollister introduced the matter of flower shows to be held next year, and plans are contemplated of giving Hartford a June Flower Show, a Dahlia Show and a Chrysanthemum Show. Inasmuch as the next meeting would be held the Friday before Christmas it was voted to omit that meeting.

ALFRED DIXON, Secy.

NEW YORK

WESTCHESTER AND FAIRFIELD HORTICULTURAL SOCIETY.

The annual meeting of the Westchester and Fairfield Horticultural Society was held in Greenwich, Ct., Friday evening, Dec. 8. Special features were the fine display on the exhibition tables, the election of officers, the secretary's report and the financial statement of the treasurer, which showed a very healthy balance. The newly elected officers are as follows: President, Wm. Whitton; vice-president, John Andrew; treasurer, Robt. Williamson; secretary, J. B. McArdle; cor. secretary, Alex. Clarkson, all of Greenwich. Executive committee: Wm. Graham, Robt. Grunnert, also of Greenwich, and James Linane, of Rye, N. Y. A very wise selection of competent men has been made and we anticipate a very successful year for 1917.

The judges made the following awards: Cultural certificate to Robt. Grunnert, for display of carnations; seedling chrysanthemums from Jas. Foster were very highly commended; Jas. Stuart received honorable mention for vase of *Erlangea tomentosa*. The thanks of the society was tendered to the following exhibits: *Crinum amabile* from P. W. Popp; chrysanthemum Mrs. E. D. Godfrey from Jas. Foster; potatoes from Owen A. Hunwick; lettuce May King, from Paul Dwenger, and oranges from Jas. Foster. Robt. Johnson received high commendation for antirrhinum. During recess Messrs. Jas. Stuart and P. W. Popp entertained the members with a description of their recent visit

to Washington in connection with the annual meeting of the National Association of Gardeners. The retiring Secretary extends to all a merry Christmas and a happy and prosperous New Year. Next meeting Jan. 12th.

P. W. POPP, cor. secy.

CHRYSANTHEMUM SOCIETY OF AMERICA.

The following report of new chrysanthemums has been submitted by the committee.

Exhibited at Cincinnati, Ohio, Dec. 2, by Elmer D. Smith & Co., Adrian, Mich.; name of variety, The Crest; white, anemone; points, 85; December Queen; yellow, shaded bronze; Inc. Jap., com. points, 89.

Registrations.

Anemone Chrysanthemums by Mrs. Francis G. Lloyd, Bernardsville, N. J.

Mrs. Francis G. Lloyd—Pure white anemone on the order of Garza, larger flower, wider petals and considerably taller in growth.

Mrs. Owen Winston—Clear yellow with bright orange center, outer petals perfectly straight, plant a strong grower, tall and healthy habit.

Mrs. Chas. S. Whitman—Lavender pink with a center of light cream

yellow. An exceptionally fine variety.
CHAS. W. JOHNSON, Secy.

HORTICULTURAL SOCIETY OF WESTERN PENNSYLVANIA

President David Fraser presided at the recent session of the Horticultural Society of Western Pennsylvania, which was devoted largely to the subject of Chrysanthemums. Secretary Tyler had a fine showing of pompons, while Wm. Thompson, Jr., and Anthony A. Leach each exhibited late flowering varieties. Mr. Leach also contributed an interesting and instructive address on the culture of these varieties, which was the subject later of considerable discussion, pro and con. The three exhibitors each received a cultural certificate. M. Curran and Mr. Burnett were present as representatives of the Sewickley Society for the purpose of joint consideration of a Chrysanthemum Show next year. If so agreed the suburban organization will not plan for one; and, if not, the members will go ahead in anticipation of, if possible, surpassing their splendid initiative exhibition of the present season. The first anniversary of the Horticultural Society of Western Pennsylvania will be observed at the coming meeting, and there will be the election of officers for the year to come.

Flower Market Reports

BOSTON Stock is very scarce in this market. Whether this is entirely legitimate or is caused by growers hoarding up a part of their product for Christmas is a matter of conjecture, but from the amount and persistency of the demand from all sides it is easy to assume that the light supply is largely due to a real shortage of crop. All stock is of excellent quality. Roses lead in price and favor. American Beauties were particularly active the earlier part of this week but quieted down perceptibly when the prices became prohibitive. All varieties of white and red sold well. Carnations mounted to six and eight dollars per 100, rather high for two weeks before Christmas, but they were all superfine quality. Snapdragon shares the general activity and scarcity. The chrysanthemum still hangs on and was rather in evidence all week. Sweet peas, especially Spencers, enjoyed an excellent sale. A few callas are seen, but not nearly enough to satisfy orders. The same holds true in the case of lilies. Violets are fair in quality and rather few in number. Lily of the valley had come down from its perch of the last month and is being bought up at \$6.00 per 100. Double the quantity of everything could be easily used and unless the supply increases substantially in the next week record prices may be expected.

BUFFALO Weather conditions are favorable for excellent trade at present and the market sees little or no surplus. Business has been satisfactory for some time. Chrysanthemums have practically ended and the demand has fallen toward lilies, carnations and other stock. Carnations are scarce and prices rule high; roses are in equal demand. Holly and all decorative greens have begun to move and

the days are becoming busier in this line. Holly is good and active though a little early. Indications point toward a record breaking trade for the holidays.

The quiet that precedes a big holiday is due this week and its existence is felt in all the wholesale houses. Only those who are really in need of flowers are seen in the market. Stock is not being rushed in, for Christmas is too near and the cool weather makes it possible to hold back for the big days ahead. In carnations this change is quite noticeable, supply being much shorter and prices stiffer. There are plenty of chrysanthemums for the limited demand this week. Holly is

coming in from the East and the grade seems to be good, the color being good and the berries fairly plentiful.

Market conditions **CINCINNATI** are fair. There is a steady but not particularly active demand while the supply is large enough to satisfy all present needs. Shipping business, particularly in greens and supplies, is excellent. Orders for Christmas stock are coming in rapidly. Roses are very plentiful. The short grades are meeting with the best sale. Some excellent carnations may be had. Violets have been enjoying a good market. Lily of the valley, orchids and sweet peas sell pretty well. Stevia is in a heavy

Flower Market Reports

(Continued from page 821)

supply and is good property. Narcissus and calla receipts are equal to all present needs.

There are still some good chrysanthemums in this market but they are rapidly disappearing, and sales are made readily, not only on chrysanthemums but many other things for the supply is not too large on any line except it be stevia and paper white narcissi and also on some varieties of roses, notably the dark red Hoosier Beauty which appears to be no match for the irresistible Hadley. Violets are greatly improved but the regular stores appear to be not able to dispose of them all as the fakers generally have a supply for street distribution. Mignonette of nice quality has made its appearance and there are also daisies yellow and white, snapdragons and a few Roman hyacinths now in sight. Lilies are fairly plentiful. Lily of the valley scarce and much of it inferior. Cattleyas are easing up a little in price, Percivaliana bringing low figures but Trianae holding up well in value.

The market continues in good healthy condition. The demand has been good and supplies not above normal—in fact, in some lines rather under, as many growers are holding back their plants for the holiday rush. There is an excellent clean up daily along the line. Roses have sold well at good prices although not so fancy as we hear of from some of our growers who ship to New York. Carnations also go better than usual and have reached the highest price of the season. Chrysanthemums are nearly over—Nonin being the most conspicuous at present. Sweet peas are gradually improving, both as to flower and stem, and are now of really excellent quality. Cattleyas are a little more plentiful, and cypripediums are also available in quantity—the latter unusually fine flowers as to size, color and finish. That beautiful spring flower, the pussy willow, is on deck already. It seems to be getting the Easter lily habit—a sort of all the year round proposition. Another early bird is the cut poinsettia. These too will move better a little later.

Business hereabouts surpasses any previous pre-Christmas season. Advance orders have been booked far ahead and stock just at time of writing is a little scarcer than for some time past. Everything is of fine quality, all homegrown goods being exceptionally satisfactory. However, as far as shipments are concerned, the signs are for a most trying season for both sellers and purchasers. Delays in arrivals

WANTS, FOR SALE, ETC.**HELP WANTED****WANTED**

Gardener or store clerk well informed in Plants, to take charge for the Holidays or longer, of the plant department of a New York City retail store. Write quick to **Florist**, care W. F. SHERIDAN, 133 W. 28th St., New York.

SITUATIONS WANTED

SITUATION WANTED by single man, 17 years' experience on private estates. No trifles answered. "G. D." care HORTICULTURE, Boston.

Flower Market Reports

(Continued from page 823)

are causing complaints all the time. Christmas greens, which should have been in some time since are still unheard of and the tardy arrival of violets, as reported last week, is even worse now. Goods of all kinds are held up owing to lack of railroad facilities, and those which succeed in reaching the city are again delayed in the delivery to the ultimate destination. And so it goes, "One woe doth tread upon another's heels, so fast they follow." The trouble is not restricted to this country, as the importations are having a like fate. Losses on azalea shipments from abroad are especially large, one firm (the Blind Floral Company) having lost sixty-two per cent. in a recent consignment.

In addition to the varieties listed in the tabulated price lists the following flowers are now on the market. Stevia, \$30 to \$50 per 100 bunches; calendulas, \$3 to \$5 per 100; sweet peas, \$1 to \$2; Roman hyacinths, \$2 to \$4.

Freezing weather is

ST. LOUIS now here and stock is coming in in fairly

large supply, carnations being especially plentiful. Roses hold up well in price and are not in oversupply. The quality is good. Violets are improving. Narcissus is plentiful. Chrysanthemums are about over; a few stragglers only are left.

The trade is well

WASHINGTON pleased with the business the past

week. Flowers were more plentiful while prices showed a slight stiffening. Chrysanthemums are still very good and sell readily at fair prices. Lily of the valley remains at \$7 and \$8 per 100. Violets are not moving, even at \$1 per 100. The weather has not been cool enough to make their sale good. Sweet peas are bought as soon as offered. Carnations are not plentiful and are bringing better prices. There are plenty of greens. Narcissus is more plentiful and selling better. There are more gardenias than there have been and the sale of these with orchids is dragging. Lilies are not moving.

DURING RECESS.

Boston Florists' Bowling League.

PUBLICATIONS RECEIVED.

Trees and Shrubs Hardy in the British Isles—By W. J. Bean, Assistant Curator, Royal Botanic Gardens, Kew, England. Revised Edition. In two volumes, with 1385 pages of text, copious index, many full page plates and very freely illustrated with figures prepared from photographs. A select bibliography is given. The first chapter is historical in character and Chapters II to XXVII are practical and cover all phases from propagation, transplanting, pruning etc., to lists of plants for special and peculiar situations. That on pruning is especially thorough and practical. The rest of the work is devoted to a discussion of the species and genera alphabetically arranged. The descriptions are terse and clear, and the habitat and date of introduction is usually given. The Royal Gardens, Kew, is taken as a standard for hardiness. The arrangement of the contents is simple and remarkably easy; the type is excellent and the illustrations leave nothing to be desired.

The author is recognized as one of the highest authorities on hardy woody plants in Europe and his thirty-three years' association with the vast collections at Kew have given him invaluable opportunities. He is also familiar with the contents of all the famous gardens in Great Britain and Ireland; further, he has travelled extensively on the continent of Europe and in 1910 he visited this country. All in all, Mr. Bean is particularly well fitted to write authoritatively on the subject to which he has devoted a lifetime and he has handled it in a masterly way. In Great Britain and Ireland the work will undoubtedly remain a standard for many decades to come, and we congratulate the garden fraternity on thus possessing such an excellent treatise.

To us in this country where far greater extremes of climate and soil obtain, the consideration of hardiness of many plants, especially broad-leaved evergreens, in this book has little or no application. In these matters we have to work out our own problems. But apart from this important detail, Mr. Bean's book is full of valuable information and should be in the hands

HAMMOND'S PAINT & SLUG SHOT WORKS, Beacon, N. Y.

of all interested in hardy woody plants. In this connection it is interesting to note that a few things are mentioned as uncertain in Kew which have so far proved hardy in the vicinity of Boston—for example, *Viburnum Carlesi*. Among the plethora of works on gardening now issued or being issued a few have and will attain permanent character, and among these "Trees and Shrubs Hardy in the British Isles" will command a prominent place. Had we space we might enter into greater details in regard to this work, but we content ourselves with commending it to our readers as a worthy book on a worthy subject worthily executed.

The book is being distributed in this country by E. P. Dutton & Company, 681 Fifth avenue, New York City.

FLATHEADED BORERS ON FOREST TREES.

Flatheaded borers are among the most important of the borers infesting forest trees in the United States. Some mine the leaves, one burrows into the cones, a number bore into the inner bark and outer wood of the trunk, branches, and roots, while the majority excavate oval winding "wormholes" throughout the sound or decaying sapwood and heartwood.

The bark-borers often girdle and kill healthy trees or those injured by fire, floods, droughts, diseases, other insects, or careless lumbering, and at other times weaken trees so that they become easy victims of diseases, other insects, or unfavorable environment. Sometimes when they do not kill the tree outright their work causes dead limbs or twigs, or serious defects, checks, or gum spots to form in the wood, or swollen galls to form on the branches. The wood-borers mine the sapwood and heartwood of the trunk, top, and larger branches and thus destroy or seriously injure a large amount of the tree's most valuable product, its timber. Wormholes will cause the finest grade clear lumber to become unfit for the higher grade uses and, therefore, unsalable at the higher prices. Bureau of Entomology, U. S. Department of Agriculture.

HOLYOKE AND NORTHAMPTON (MASS.) FLORISTS' AND GARDENERS' CLUB.

The regular meeting was held Dec. 5th at Gallivan Bros.' greenhouses with a good attendance of members. Chief interest centered in the election of officers. George Strugnell was

ERECTED ON GALEN L. STONE ESTATE, MARION, MASS.

This is an unusually compact and well planned range of houses, and considered the largest MODERN range of glass in the STATE of MASSACHUSETTS, located in the HISTORIC CAPE COD section at MARION, MASS. It is one of the show places of that neighborhood. THERE is a certain distinctiveness to LUTTON HOUSES that is always firmly established in the minds of the visitors. It is our infinite detail and attention to perfecting the greenhouse that has made the LUTTON REPUTATION. We want

to tell you about our work and how much it differs from our competitors.

If you are coming to NEW YORK, be sure and inspect our greenhouse erected complete in the largest RAILROAD TERMINAL in this country, GRAND CENTRAL STATION, 12ND STREET, NEW YORK. To keep a fully equipped greenhouse right in the heart of NEW YORK for the benefit of our patrons is only another sample of our progressive methods.

WILLIAM H. LUTTON COMPANY

Designers and Builders of GREENHOUSES, CONSERVATORIES AND MODERN GLASS STRUCTURES

Office and Works: JERSEY CITY, N. J.

In Writing Advertisers Please Mention HORTICULTURE.

Notice how compact is this combined plate and drip gutter. No cumbersome fittings, no suspended gutter to add shade.

Sills secured to the rafter this way, combine to make an important rigid bracing feature.

The steel post is entirely above the ground, protected from destructive soil rusting. The base is cast iron which will last almost forever without rusting out.

Some Construction Things As They Are

NEXT to seeing a thing itself, is the seeing of the photograph itself. Here, then, is the next best of our side construction, plainly showing several vital construction points.

Number 1 calls attention to the good, sturdy fitting that firmly secures the eave plate to the post and rafter. It also points to the point that there is no heavy splice plate at this point. The post and rafter are in one solid piece, making a neat job, a light job and a strong job.

Number 2 points to the ventilating shaft bearer we use instead of punching an inch hole in the post to carry it. That hole may or may not seriously weaken the post, but we are certain sure that these two quarter inch bolt holes don't.

Number 3 calls your attention to the way the cast iron sill is secured to the post—one such fitting on each side.

Now look at the details in the circles for still further points of view. Every single member of any importance in our entire construction, we would like to both tell and show you about.

Nothing would please us better than to sit down with you and compare point by point, our construction, with any or all the constructions you wish.

We have a notion it would be decidedly interesting to both of us. It might even result in saving some money for you and making a little for us.

You know we go anywhere for business. Or to talk business.

HORTICULTURE

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

"If vain our toll, we ought to blame the culture, not the soil."—Pope.

Care of Manure

One of the important problems is to conserve as much of the fertility as possible, and still produce good crops. There are two ways by which the fertilizing value in manure is lost; first by heating, and second by leaching. If manure is left in piles until 85 degrees is reached, it soon begins to heat, even in winter, especially if it contains any large proportion of horse manure. When it heats, the manure is decomposed and the element of most value, nitrogen, is lost in the form of gas. If manure is lying about the yard where rain can fall on it, much of the fertility is leached out and carried away. Give heed to this and always see that stable manure is given proper protection.

Gardenias

The soil must never become either pasty or dust-dry; either condition will cause loss of buds and yellow foliage. The aim should be to keep an even moisture at the roots. The minimum temperature should never be lower than 65 degrees and a good fire heat to maintain a buoyant atmosphere will now be a necessity. The night temperature as a rule should now be 68 to 70 degrees and the atmosphere should be moist. Let the thermometer reach 75 degrees before ventilating; then air a little at a time until 85 degrees is reached, reducing it in the same way. The plants, on every clear day, should have a thorough spraying to keep mealy bugs in check. Go slowly on feeding. A good plan is to give occasional light top-dressing of fine cow manure, in preference to using manure water. During February and March you can use manure water with better success.

Giganteum Lilies for Easter

As soon as the shoots are well above the soil, place the pots on the bench in a warm house, in 60 to 68 degrees at night. Avoid too much water until the pots are full of roots. Giganteums need heat from the start, and must have it or they will not flower on time. If you start cool, the chances are that you will get a larger percentage of sickly plants and will then blame the dealer for selling you diseased stock. Remember you must see the buds six weeks before Easter to be sure they will be on time. It is always well to have them a trifle early, as it is better to hold them a few days in a cold house to stiffen up the flowers than to force them hard the last few days to open the blooms. Of course all do not flower together, and, while some may need retarding, others will probably need heat right up to the last.

Next Week:—Care of Sweet Peas; Forcing Dahlias; Geraniums; Oncidiums; Propagating Carnations; Reminders.

Hydrangeas

French hydrangeas started now in a temperature of 50 degrees will flower in March and prove useful. Also late-propagated Otaksa to be flowered with a single large head each, can be put in heat now. The French varieties bloom so much better early in the season that they have practically superseded H. Otaksa. However, the latter will still be grown in great numbers for later flowering and is still without a rival for tubs for lawn, piazza or other uses. It is better not to subject such plants to a temperature as low as freezing, as is often recommended. It is far better to let them hold all their foliage. Avoid leaving hydrangeas too long in frames or pits from which frost cannot be excluded. The French varieties are somewhat more tender, and even a little neglect here may cause a loss of all the terminal buds.

Schizanthus

Seeds sown now will make nice plants for spring flowering. Sow in a flat and pot off singly. In addition to their beauty as decorative plants, schizanthus flowers last wonderfully when cut. The best variety for pot culture is Wisetonensis. The earliest sowing is now well established in 6-inch pots and already the plants have some flowers open. With the pots full of active roots, they must have lots of water, in addition to feeding twice a week. If much heat is given, the shoots will become weak and leggy and the flowers will lack substance. A temperature of 45 degrees at night is sufficiently high and the plants should be well up to the glass. As they are rather brittle they must have at least one stake each to prevent this breaking off near the pot. Give plenty of ventilation whenever possible and see that they have room between the pots. Fumigate every ten days.

Reminders

Endeavor in all decorative work to arrange something novel or original.

When a plant is sold from the show house always replace it with another at once.

Always have a few freezias in the store when in season, on account of their delicious perfume.

A few notes made regarding the business done at the holidays will be a great help at next Christmas.

Publicity among the kind of readers reached
by this paper is THE SORT OF PUBLI-
CITY THAT PAYS.

Cyclamen

The giant-flowered strain of *Cyclamen* is undoubtedly the best, for general decorative purposes. To have them in flower by Christmas the seed should be sown the latter part of August or first week of September, and for Easter sow at any time from 20th to end of November. Prepare a light open compost of loam two parts, leaf mold one part and one-fourth part sand, which mix thoroughly, and sift through a half-inch sieve.

See that the pans are clean and well drained, and then fill them to within an inch of the top with the compost, press it down medium firm with a smooth surfaced board, and water well, let drain off, then sow the seed, and cover same with about three-eighths of an inch of the compost, shaken through a fine sieve.

Place the pans on a shelf, and cover with a sheet of glass and paper to exclude the light. A temperature of 60 to 65 degrees at night should be kept up, and as soon as the seedlings appear, remove the covering and afford them all the light possible, shading from the sun. As soon as the third leaf is developing transfer the young plants into flats containing a compost of loam three parts, leaf mold one part and a half part cow manure, charcoal and sand; allow two inches space between the plants. Maintain the same temperature until the plants get established, then remove them to 55 to 60 degrees at night. As soon as the plants are large enough pot them into 4-inch pots, using similar compost, adding a half more cow manure. Be careful to leave two-thirds of the corm above the surface, as deep potting means failure in the growing of cyclamen.

When fairly well established, reduce the temperature five degrees. By the second week in May move them to a cold frame, protecting from late frosts, and shading from the sun, with plenty of ventilation when possible. Shift next into six-inch pots using a fairly rough compost of loam three parts, cow manure one part, leaf mold a half part, charcoal and sand, and to each barrow load of compost add a 5-inch pot of bone meal. After potting, place them back in cold frame, spray overhead twice per day, and water carefully, shading them from the sun.

By September the plants intended for Christmas should be moved indoors. Those that are intended for Easter may remain in cold frame until first week of October if well protected on cold nights.

The mite is a troublesome pest in cyclamen growing, but it can be kept in check if the plants are sprayed once in every ten days with X. L. All compound, one part to fifteen parts water, from the time they are in 4-inch pots until they come into flower, also by placing tobacco stems amongst the pots while in the cold frame, but above all, a low temperature, and a cool bottom for the pots to stand on and spraying overhead with clear cold water on bright days, goes a long way in keeping down this pest. When well-rooted in the six-inch pots, give the plants liquid cow manure twice a week alternated with Clay's fertilizer. As soon as the flower buds show color stop spraying overhead, and water carefully.

John S. Darg

Southboro, Mass.

Sempervivum

SEMPERVIVUM ARACHNOIDEUM

Sempervivums, though more or less known to every horticulturist, until recently could rarely be found except in plant collections of amateurs or in botanical gardens. The general trade was not interested in house leeks. Since the beginning of dry wall planting and the steadily increasing rockgarden building matters have changed and sempervivums are at present one of the standard items in hardy plant catalogues. The renewal of our acquaintance with those modest plant species nestling between the stonework of walls or in the crevices of rocks makes us again wonder how they can exist and grow in so little of soil as they usually require. Nature, indeed, has fitted them out with a most wonderful resistance both against prolonged aridity in summer and the inclemency of frigid winters. Today the rockery, perhaps more than the dry wall, offers these strikingly attractive mountain denizens ideal conditions for perfect development. For a minimum of care we may enjoy the quaint picture of a plantation in full bloom such as represented by our illustration. The photograph was taken during the past summer in the writer's rockgarden in Glenside, Pa. *Sempervivum arachnoideum*, a native of the Alps, is distinguished by the cobwebby hair connecting the tips of the leaves of the inner part of the rosettes. The comparatively large blossoms in bright reddish pink are borne on thick stalks, three to four inches high. Being in flower during July and August they add to the floral mid-summer effect of rockeries in a perceivable degree.

Best known and easily obtainable sempervivums, besides the species mentioned, are *Sempervivum Amaliae*, *Reginae*, *robustum*, *soboliferum* and *tectorium*. Desirable varieties distinguishable by brownish colored rosettes are *Sempervivum rubens*, *triste* and *violaceum*. Propagation is by offsets, leaf-cuttings and spring sowings of seed.

Richard Rothe

Glenside, Pa.

ROSE GROWING UNDER GLASS

CONDUCTED BY

Arthur Ruzicka

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Ruzicka. Such communications should invariably be addressed to the office of HORTICULTURE.

The Propagating Benches

As soon as these are properly cleaned top and bottom, and underneath, they should receive a good dose of whitewash, to which can be added a little copper sulphate, or bluestone as it is called. This will act as a fungicide and will enable the lime to make a much better job of the cleaning. Following the whitewashing the fires can be started if separate boilers are installed to care for the propagating house. After this the sand can be brought in. This should be screened free from all small pebbles. It should not be too fine nor too coarse, but medium grade such as would be used by masons in plaster, clean and sharp. The benches should be filled so that when the sand is packed down it will be about four or five inches in depth. Make sure that all holes in the bench bottom are stopped up with moss or the sand will run through as soon as water is applied. For bench bottom we like nothing better than slate, although there are thousands of roses rooted on wood bottoms. As long as the bottom will give good drainage and let enough heat through, it will answer. As soon as the benches are filled, a good watering should be given, first making sure that the sand is leveled off properly. After this the sand should be well packed with a brick or some wooden tool made for the purpose. Care should be taken to pack the sand evenly and not to strike too hard in any one place and it should be gone over three or four times until it is very smooth and firm. Thermometers should be placed in the sand every twenty feet or so, and there should be a thermometer for every ventilator overhead. There should also be cheese cloth or muslin curtains provided, extending from the edge of the bench to the glass if the house is low, or else the muslin should be stretched over a frame built over the bench if the propagating is done in a big house. There should also be a piece of cloth across the bench every here and there to break all air currents as much as possible.

Shading

Before the house will be ready for cuttings, attention will have to be given to shading it, so that there will be no danger of the sun's rays working through anywhere and hitting the cuttings, causing them to wilt the least bit, for once they wilt it will be all over with them, as they will never root. One cannot be too careful therefore when applying shading. Lime should not be used as it will destroy the paint on the woodwork. There are concerns that manufacture greenhouse shading and this shading is ideal to use. If none is on hand some can be made at home of white lead and kerosene or whiting and kerosene, adding a little drier to set it quicker. Gasolene would be better, but it is much more expensive. Add a little green paint to the mixture to

give the shading a greenish tone. This will reduce the light a great deal and will be better for the cuttings and look better on the outside as well as inside. The shading should be applied with a brush to insure proper distribution, this not always being possible with a spray pump.

A Cross House as a Propagator

Many plants are started in cross houses and if no better house is to be had, a cross house can be made to do. If possible select the one that is used the least for walking, so that the cuttings will not suffer from draft and jarring of the doors as they are opened and closed. This may seem very small, but the doors are often slammed and the vibration is none too good for the cuttings. The trouble with most cross houses is that they usually have far too much heat, and if this is the case in the one selected, the mains and, as many of the pipes as necessary should be covered over with asbestos, or if looks are no consideration ordinary newspaper can be used. Be careful to keep enough pipes under the benches uncovered to give the proper amount of heat. The bench to be used for propagating should be boarded in on the sides so that all heat will have to go through the sand. Doors should be left all along so that the heat in the sand can be controlled by opening or closing the same. Should there not be sufficient ventilation some glass can be taken out on the side and cloth substituted. This cloth can be sprayed with water during real cold weather, and will freeze stiff, thus being as tight as the glass would be, at the same time letting air in and out during the mild days when air is necessary to keep the house cool enough. If the cross house was never used before it will be best to test it out thoroughly before chancing any cuttings in the sand. To do this have a thermometer every ten feet in the sand and every ten feet overhead, to see just how the temperature runs. If it is very uneven, pipes will have to be uncovered in the cold spots, and covered up where the temperature exceeds the required point.

Temperatures

We find it best to run the thermometer around 66 degrees F., in the sand, with as near 50 as possible overhead. The low overhead temperature will keep the top eyes from starting and this is necessary so that all the energy will be given to making roots. Some growers propagate right in a rose house having a high overhead temperature. The cuttings may root well, but the plants will never have the vitality of cool propagated stock, and in the long run it will pay to go to a little extra trouble and have everything just so in the propagator, as next season's profits largely depend on the plants that will be turned out now. With the high cost of everything nowadays, every plant must be a thoroughbred or there will be money lost. There is nothing in growing poor stock except a lot of hard work, and a deficit at the end of the year. Get the cuttings as good as possible.

Mr. Ruzicka, in his rose notes this week, strikes a responsive chord when he asserts that under existing conditions—the high cost of everything, etc.—there is nothing in growing poor stock except a lot of hard work and a deficit. As Mr. Ruzicka says, "every plant must be a thoroughbred or there will be money lost." Written more particularly for the attention of the rose growers this truth has equal application to the growers of carnations or any other class of plants raised for the florist trade. The thought impressed itself upon us when visiting the carnation houses of S. J. Goddard at Framingham a few days ago, as mentioned in another part of this paper. The flowers grown by Mr. Goddard are of a

quality that at once takes the carnation out of the cheap class of florists' stock and clothes it with a dignity that arrests attention and compels enthusiasm. Why are there not a greater number of carnation growers who make it their aim to produce blooms of the quality marketed regularly by establishments such as the one we have mentioned? All might not get there, for there are many local and incidental impediments not easily overcome, but with a more general exercise of the requisite amount of ambition, insight and endeavor, there can be no question that the quality of the stock seen in many wholesale marts might be materially advanced toward a higher standard and the returns from the sale of the goods increased accordingly.

Our news columns this week contain the announcement of the closing down for an indefinite period of a well-known middle-west flower pot factory because of the present cost of material, the exactions of labor, etc. The Walworth Mfg. Co., of Boston, commenting upon the continued advance in cost of raw materials entering into the manufacture of heating apparatus, give the following comparison of prices of today with those of Dec. 1, 1914:

	1914	1916
Pig Iron, per ton.....	\$15.25	\$28.25
Bar Steel, per 100 pounds...	1.20	2.90
Sheet Steel, per 100 pounds..	2.85	4.90
Copper, per pound.....	.12½	.33½
Zinc, per pound.....	.053	.16

A prominent dahlia grower in a western city, acquaints the trade and the public with the fact that with the exception of postage stamps, everything connected with the management of his business—from the tools used in the production of the crops, to the paper on which the finished product is billed, has advanced in price from 20 per cent. to over 100 per cent. in the past year or two while he is quoting the same prices as heretofore. To have a working profit left over, he states, will require more care in extending credit to persons unknown and also to those who in the past have been negligent in meeting their obligations when due. The foregoing facts hardly fit in well with the boasted prosperity of which we hear so much. Concerns such as the Walworths and others who can "pass it along" to their customers need not suffer and may benefit from existing conditions, but there are others, many of them, who find it quite impracticable to do so and among these are certainly the florists and nurserymen.

HORTICULTURE voices a loud "me too" in accord with the dahlia grower above quoted. The cost of paper alone has advanced more than 100 per cent., yet our subscription and advertising rates remain as they were before this great wave of "prosperity" struck in. To continue thus we need the co-operation and kindly consideration of our friends to the extent of early subscription remittances and prompt settlement of advertising accounts together with all the increased business they can send us. Christmas is here and New Year's close by, and in wishing our subscribers and advertisers the Compliments of the Season we here seize the opportunity to suggest that by now carrying the foregoing advice into execution they will be doing a very welcome part towards assuring a wave of genuine prosperity for HORTICULTURE. With these timely hints we lay down our pencil and extend to one and all our sincere wishes for

A Merry Christmas

ORCHID CULTURAL NOTES.

By the time these notes appear in print many of the autumn flowering Cattleyas will have entered into a period of rest; it will be worth while to carefully look over them and attend to any of their requirements. Very often, when a flower is cut, the flower-sheath is left in a damaged condition, and even when a clean cut is made the base still remains, only to decay in the course of a few days. An opportunity now exists to inspect these Cattleyas and to remove all that is left of the old sheath, which can generally be done by pulling it gently away in the opposite direction to the leaf. As the old spike is often left as well, a good plan is to split the sheath and remove each half separately, thus well exposing the remains of the spike, which can be finally removed by means of a sharp knife. Insect pests are very fond of getting into the crevices, and are best removed by a small brush and suitable insecticide.

Some have the habit of tying up the bulbs far too closely, so much so that they are brought out of the perpendicular and make the top of the plant even smaller than the pot. This is a great mistake, for with the bulbs out of their natural position, the leaves also are wrongly exposed to the light, and if bright sunlight is allowed to fall on a portion of the leaf hitherto unaccustomed to it damage to the tissues is almost sure to result. On the other hand, the bulbs must not be allowed to hang down in a weakly style, hence the cultivator must use his discretion and arrange them in a natural as well as neat manner.

Many plants will require re-potting, or at least some attention will be needed in replenishing the food supply. Whenever new roots are to be seen pushing from the base of the last-made bulb this operation may be taken in hand with the least shock to the plant's constitution. In some cases almost the whole of the old compost will have to be removed, but in the majority of well-cared-for plants the chief need will be a slightly larger pot with fresh compost to fill up the extra space. A few plants will only require the surface to be picked over with a small pointed stick, and any weak places filled up with compost. It is of little use surfacing with moss those plants that will be kept on the dry side for the next few months, but the smaller ones, which have not flowered and are making a second growth, often receive beneficial support by adding living heads of sphagnum moss around the edge of the pot. All potting fibres have considerably advanced in price, and some are unobtainable at any figure, consequently many plants that in normal times would be repotted this season will have to wait until the following one.

Temperatures will now be considerably lower, except in the houses where seedling Cattleyas are being raised. A minimum night temperature of 65-70 will be found suitable for Cattleyas, with 55-65 for *Odontoglossums* and other cool-house Orchids. No matter how a house is constructed, there is some difference to be found in the temperatures when taken at various positions, hence the cultivator has many places to select for his plants, and if they fail to grow well in one situation removal to another place will often

CHRYSANTHEMUM HAMBURG LATE WHITE

One fault with the so-called White Maud Dean chrysanthemum is that it is not pure white but has more or less of a lavender tinge. Four years ago there was found amongst the stock of C. T. Guenther, Hamburg, N. Y., a plant which produced a pure white flower. Cuttings were taken from this plant and the flowers kept the same pure white color and Mr. Guenther now has several thousand plants in bloom.

The variety will be called "Hamburg Late White" and is pure white under all weather conditions. The

variety has been grown for the past three years and when taken on a late bud will be in flower all during December and the early part of January; in fact, the flowers are generally so late that it cannot be shown at the exhibitions or during time when committees of the Chrysanthemum Society of America meet. Keeping qualities are excellent and being somewhat fuller than the original Maud Dean it forms a very graceful white flower.

This variety will be disseminated in Spring 1917, by William F. Kasting Co. and E. G. Hill Co.

bring about the desired good result. Frequently it will be found that certain plants grow well at the warm end of an *Odontoglossum* house when they fail in the cool part of the Cattleya house, although the temperature of both positions may be almost identical; the reason for this is that there is a vast difference in the humidity or circulation of the atmosphere. Practical experience alone will discover these suitable positions. Growers will do well to remember that plants suspended high up are in a very different atmosphere to those nearer the ground, both in temperature and in humidity; and here, again, the removal of a sickly plant from one position to the other may bring it back to a vigorous condition. Sunny positions as well as shady ones both have their value, and it only needs the thoughtful attention of the cultivator to decide which plants are most suitable for the one or the other. This may seem an unimportant point, but practice will prove its value to an unexpected degree.

—The Orchid World.

THE BAGATELLE ROSE GARDEN.

Calling attention to the editorial note in our issue of December 2d, in which we said that—

"We are informed that it is proposed by the Government of the City of Paris to establish in the Department of the Seine a 'Rose Concours' to continue for three years—1917-1919."

Mr. Robert Pyle, president of the

Conard & Jones Co., writes as follows:

"The point of similarity and dissimilarity leads me to believe that there has been a slight misconception of the exact situation, because the Government of the City of Paris *did* establish in the Department of the Seine a "rose concourse" about ten years ago. This was and is called the Bagatelle Rose Garden in the Bois de Boulogne, and the government of the City of Paris invited rose originators and raisers from all countries to send contributions, especially of their new seedlings. Furthermore, they invite representatives from each nation each year to be present at the time of the judging of the roses, etc., and it is my impression that the invitation from the City of Paris to which you now refer marks the continuation of this plan, which, much to their credit, has been kept up steadily even during the past two tragic years of the war.

"You may remember that I had the honor and pleasure of acting as the representative of The American Rose Society and was the only American present at the judging of the roses in this Garden in 1911, and it has been a great pleasure to me to keep in touch with their work ever since.

"I am very glad that you are calling the attention of American Rose Raisers to the opportunity of exhibiting in the Bagatelle, which up to this time has been the most noteworthy International Rose Garden on the globe, I believe."

CLUBS AND SOCIETIES

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The regular monthly meeting of the above Society was held at Horticultural Hall, Boston, on Tuesday evening, Dec. 19. The lecture of the evening was given by J. N. Keeler, Boston manager for Hitchings & Co. Eight new members were elected. It was decided that the annual banquet be held at Horticultural Hall on Feb. 7, 1917.

Mr. Keeler in his interesting talk explained that his concern divided private greenhouse construction into four distinct types: the straight roof gutter eave, the standard curved eave, the semi-curvilinear and curvilinear type. The gutter eave and curvilinear types are the oldest, then came the standard curved eave and finally the semi-curvilinear type of which more are being built now than any other.

The reason for the popularity of the semi-curvilinear type was described as being due to the fact that by its use one obtains continuous and direct side ventilation above the benches, extra high growing space over the side benches which is obtained by having the eaves curved to a 30-inch radius, the use of glass in lights 24-inch square and the generally fine proportions that houses of this newest type have.

The speaker pointed out that although other concerns followed their lead in building houses with curved eaves and side ventilation above the walls, they are still held to the 16 or 24-inch radius curved eaves and the use of 16-inch wide glass, while his concern had standardized on the house having 30-inch radius eaves and 24-inch wide glass.

Mr. Keeler also showed by a series of slides how a large range of greenhouses could be built up from a start of one house and a service building to any number of houses by simply planning for the whole range right at the start and then building each house as a new unit. The proper planning, he said, would save a great deal of bother and expense when new houses are added.

Some very interesting views were shown of greenhouse boilers during the process of manufacture, from the making of the sand cores to the final testing.

Under the head of commercial greenhouse construction a comparison was made of the older arrangement in which six lights of 16-inch wide glass is used to each section of 8 ft. by 4 in., with the newest method which is called the "Reconstructed Construction." In the latter type the rafters are spaced 12 ft. 13/4 in. apart and seven lights of 20-inch wide glass are used in each section. The purlins are spaced farther apart also, so that one-third less rafters, columns, roof bars and purlins are required. Each member is made proportionately heavier, Mr. Keeler said, with the result that houses of this type were lighter, stronger and much more satisfactory in every other

way than houses of the older type.

A nice exhibit was put up by W. W. Edgar Co., consisting of good flowered azaleas, cyclamen, freesias, Euphorbia jacquiniæflora and a robust plant of Acalypha Sanderi, the latter very attractive with its long tassels of light crimson flowers. The whole received a certificate of honorable mention. Begonia Mrs. Peterson from the same exhibitor, received a report of merit.

Two well-grown plants of Erlangea tomentosa from Faulkner Farm received a report of cultural merit. This is the first time this plant has been exhibited before the club.

The annual election of officers was held at this meeting and the following were elected: President, James Methven; vice-president, A. K. Rogers; secretary, W. N. Craig; treasurer, S. J. Goddard; executive committee, H. H. Bartsch, W. J. Kennedy, Peter Miller, Thomas Coles, W. H. Judd.

SEWICKLEY HORTICULTURAL SOCIETY.

At the regular monthly meeting of the Sewickley (Pa.) Horticultural Society, Dec. 12, M. Curran resigned his office of secretary. New office bearers for 1917 were elected as follows: President, John Barnet; vice-president, A. E. Bonsey; treasurer, Wm. Thompson, Jr.; secretary, John Carman (address care of Col. Schoonmaker, Sewickley, Pa.); executive committee, Alex. Davidson, Wm. Thomson, Sr., Chas. Patton, R. Boxel, Wm. Gillies. John Barnes and A. E. Bonsey gave an interesting account of their trip to the convention at Washington, D. C., and intimated that there were prospects of the 1918 convention coming to Pittsburgh. The secretary's annual report showed the Society to be in a flourishing condition. Owing probably to the wintry weather the exhibits were very few. Twenty-one new members were elected and eight applications were filed.

M. CURRAN.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

The first preliminary plant schedule of the Fifth National Flower Show to be held in the Coliseum, St. Louis, Mo., April 6-15 inclusive, 1918, has been distributed from the office of the Secretary. Complete schedule, which will include all cut flower classes, will be issued later. For additional schedules, or information, regarding space in the trade section, apply to John Young, Secretary, 53 West 28th street, New York. The National Flower Show Committee will welcome any suggestions or recommendations as to where this schedule may be improved. All communications on this subject will receive careful consideration, and the Committee will include these recommendations if approved in the next schedule.

AMERICAN ROSE SOCIETY.

The Executive Committee of the American Rose Society at its meeting on December 11th in New York City, registered the rose "Mrs. Chas. Gersdorff," a new climbing hybrid tea offered by Chas. E. F. Gersdorff, Washington, D. C., described as follows:

"The plant is of strong climbing habit, sending strong canes yearly from the root, both in spring and fall. Strong thorns not too thickly set. Profuse and almost constant flowering habit. Flowers generally borne singly though always in clusters of two to four. Foliage very durable, remaining in good condition in hot sunshine for five days by actual test. Buds large like tulips in shape. Color a beautiful Killarney pink, shading to bluish shell pink. The flowers possess a strong hybrid tea fragrance. Have grown these roses for past seven years outdoors without protection in both northern and southern exposures without winter killing."

An invitation was received from Cleveland, Ohio, for the joining of the American Rose Society with the Cleveland Flower Show to be held in November, 1917. November 7th will be designated as special Rose Day at that time. This invitation was accepted. A contract was ordered signed for the use of the 1st Regiment Armory for the Spring Show in Philadelphia, March 20th to 23rd inclusive. Arrangements are being made for a central attraction of Rose Gardens. The committee on plant schedule and prizes reported, and the support received so far has caused an increase of the amount to be awarded for cut roses. There will be a special gold medal valued at \$50.00 offered by Kroeschell Brothers, Chicago, Ill., and the Toronto Horticultural Society has also sent medals.

The death of S. J. Reuter, Westerly, R. I., was reported. Mr. Reuter was one of the substantial life members of the Society, and the sense of the committee was expressed in the following:

RESOLVED: That this committee express to our vice-president, Mr. Louis J. Reuter, and his family, the sincere regret of all at the loss sustained by them in the death of Mr. Reuter, senior, who was one of the early life members of the American Rose Society, and a man respected by all, and that the secretary be directed to transmit the same to Mr. Reuter's family.

The list of Guarantors to the fund which now reaches in excess of \$6,000, and the total number being 67, is as follows:

Messrs. A. B. Scott, C. H. Grakelow, W. K. Harris, W. A. Burpee, George Burton, Conrad & Jones, Jos. Heacock, Alfred Burton, Adolph Farenwald, Robert Craig, H. F. Michell, Geo. C. Thomas, Jr., Stephen Mortensen, W. A. Leonard, Florex Gardens, M. Franklin, Lord & Burnham Co., Aug. Doemling, Myers & Samtmann, John Burton, H. H. Battles, Louis Burk, J. J. Habermehl's Sons, Edw. Towill, L. B. Coddington, P. Welch, E. G. Hill, A. M. Henshaw, W. H. Elliott, P. Breitmeyer, Cleveland Flower Show Association, Knoble Brothers, John Welsh Young, M. H. Bickley, S. S. Skidelsky, Gude Brothers Co., Robert Simpson, Benjamin Hammond, Admiral Aaron Ward, S. J. Reuter & Son, Harry O. May, S. S. Pennock-Meehan Co., E. Allen Pelree, A. N. Pierson, J. M. Gasser Co., Victor Groshens, Fred Burkl, Henry A. Dreer, Rudlong Rose Co., Leo Nessen Co., Peter Fisher, H. Bayersdorfer & Co., C. H. Totty, Samuel Murray, Emil Buettner, Pennock Bros. Hentz & Nash, Inc., \$100.00 each; South Park Floral Co. and Vaughan's Seed

Store, \$50.00 each; W. F. Kasting Company, S. A. Anderson, W. J. Palmer, Robert Scott, Jacob B. Wiese, Chas. Schoenhut, \$25.00 each; Edward Stroh, \$15.00.

The preliminary schedule of prizes will be issued at an early date.

BENJAMIN HAMMOND, Secy.
Beacon, N. Y.

MINNESOTA HORTICULTURAL SOCIETY.

The 50th anniversary of the Minnesota Horticultural Society and its affiliated associations was a notable gathering. There has been a review of what has been accomplished—a succession of victories has been recorded. This is now the largest society in the United States if not in the world—total membership, 3,837. No state has had more to contend with or won grander results. The display of fruits was amazing.

The Northwestern Peony and Iris Society was an enthusiastic affair. Many of the wealthy business men of the Twin Cities are members and are pushing it with vigor and enthusiasm. They have set their mark for two hundred members the first year. The meeting was held Dec. 6th and was well attended. Two leading lawyers, one from St. Paul and the other from Minneapolis made stirring addresses. Their summer meeting disclosed the fact that this section could raise as fine peonies as could be grown anywhere.

A few years ago, one of the real estate men of St. Paul commenced importing the very choicest peonies from Europe. His name is D. W. C. Ruff. At first he had no thought of doing anything in a commercial way. But he had a very favorable location and his peonies would grow and bloom and he had such a splendid collection that he sold thousands of dollars' worth the past year. His are the very finest. Two parties came all the way from Chicago to see them in bloom and bought heavily. He also sent many to the Atlantic cities. The summer exhibit here surpassed anything I ever saw and I have attended many notable shows. I have seen our American raised varieties side by side with the choicest importations and they show well beside them. I think the fact is clearly established that if you want the very best you must come to the Twin Cities for them. At least so think many Eastern growers who come here after them.

Thursday afternoon was given to memorial services for the illustrious dead who helped to make this great society what it is and who pushed this state from the rear to the front as a fruit growing state. The writer was called on to forecast the future and he outlined the probable victories of the next fifty years—judging the future from the past.

The weather has been ideal—being like California in its mildness, so the attendance has been large and the cheer and enthusiasm has been contagious. All bow to these soldiers of peace who build up instead of destroying, who follow paths of peace and not of war.

C. S. HARRISON.

NASSAU COUNTY HORTICULTURAL SOCIETY.

The annual meeting of the above society was held in Glen Cove, N. Y., on Dec. 13. The judges awarded 1st prize on the exhibits to Peter McDonald for 25 carnations, 1st to John W. Everitt for single violets, and honorable mention to Harry Goodband for a chrysanthemum, Cosmos Pink. Mrs. Payne Whitney was elected an honorary member and three applications for active membership were received. The president presented the silver and glass trophies, won at our recent exhibitions, to the winners. Treasurer Ernest J. Brown read his annual report, showing this Society to be in a splendid condition financially.

Balloting and installation of officers was well conducted with James Duthie in the chair, the following named officers being elected: President, James McCarthy; vice-president, James Gladstone; secretary, Ernst Westlake; corresponding secretary, Harry Goodband; treasurer, Ernest J. Brown; executive committee, Robert Jones, Joseph Adler, George Ford, John F. Johnson, Arthur Cook, Archie Trail, Frank Watson; trustee for three years, James McDonald; trustee for two years, James Holloway.

Our next monthly meeting will be held on Wednesday, Jan. 10th, at 2 o'clock. Monthly competition, 12 freesias, pot or pan of *Primula malacoides* and three poinsettias. It was decided to hold our annual dinner on Tuesday, Jan. 23rd, 1917.

HARRY GOODBAND, Secy.

AMERICAN CARNATION SOCIETY.

The schedule of premiums for the 26th annual meeting and exhibition of the American Carnation Society, to be held at Indianapolis, Ind., on January 31 and February 1, 1917, has been received. Secretary Baur has succeeded in filling it up nicely with good sized advertisements from the leading trade houses. The list of premiums, etc., is of the customary extent and quality. The business session of the society will be called to order at 8 P. M. on Wednesday and the banquet will be served on Thursday evening at the Claypool Hotel.

CLUBS AND SOCIETY NOTES.

Jas. Foster, Norton Hill, Stanford, Conn., received honorable mention from the New York Florists' Club on December 11 for seedling single chrysanthemums.

A short business meeting was held by the Reading, Pa., Florists Thursday evening, Dec. 7, at the home of D. P. Guldin. The report showed that the recent show proved a success in every sense and the association will hold one next year. The meeting was in charge of Stanley Giles.

At the meeting of the Rhode Island Horticultural Society, held in the public library, Providence, December 20, Mrs. Levi B. Edwards lectured on "Glimpses of South American Vegetation." Mrs. Edwards has recently returned from a trip across South Amer-

ica, and her lecture was much enjoyed. A business meeting preceded the lecture at 8 P. M.

ERNEST K. THOMAS, secy.

The Florists' Club of Hartford, Conn., met at the Hotel Bond, Tuesday evening, Dec. 12. Fifteen florists attended the dinner, at the close of which there was an informal meeting. The secretary read the by-laws, constitution and rules drawn up by the executive committee, and they were approved. The members discussed business matters relating to the handling of the Christmas trade.

George T. Boucher spoke before the Rochester (N. Y.) Florists' Association on Dec. 11, on "The Marketing Problems and Methods of Retail Florists." Mr. Boucher declared that increased competition was making the retailing of flowers so difficult that the florist could succeed only by the strict application of modern business methods. Several of the points which go to the making of an efficient flower shop clerk were touched upon by the speaker, enthusiasm in his work being mentioned as one of the most necessary qualities. A nominating committee was appointed to select a slate of officers for the election to be held at the next meeting.

A banquet of the Andover (Mass.) Florists' and Gardeners' Club was held in A. O. U. W. Hall, Thursday night, Dec. 14. Addresses and discussions followed and means of securing more support were planned. It was voted to organize a campaign to secure 200 or more associate members at \$1.00 per year to help carry on the work and equalize the burden. To this end a committee of three was appointed consisting of Samuel H. Bailey, George Piddington and Warren L. Johnson. There was a question as to continuing the flower show but the members finally agreed to try the above plan this year in support of the exhibition. Among those present were J. H. Playdon, Samuel H. Bailey, John Nicoll, Warren L. Johnson, H. Coles, J. F. Coles, John Buchan, James Fairweather, Henry A. Bodwell, R. Donald, George Piddington, H. F. Chase and Messrs. McCloud, Webber and Bernardston.

SNOW BLOCKED THE EVERGREEN RAID.

Plenty of snow with its accompanying coasting, sleighing and snowshoeing, may add greatly to the charm of the Yuletide season, but this year it has also served to save hundreds of dollars' damage to the woodlands in Weymouth, Hingham and Cohasset. The process was simple. It stopped the autos.

Every year scores of auto parties scour the woods in this section, gathering young fir and hemlock trees, evergreen and holly for the Christmas decorations. And aside from the greenery actually taken away, they ruin nearly as much more.

Yesterday, however, there was too much of snow in the woods, there was too much in the roads for comfortable driving, and there was not an evergreen hunting auto to be found in the three townships.—*Boston Post*.

Obituary

Daniel Stilphen.

Daniel Stilphen, a florist of North Conway, N. H., died on Dec. 10. Mr. Stilphen made his headquarters in summer at the New Mount Washington hotel and was well known to White Mountain summer visitors.

Charles Elbrecht.

Charles Elbrecht, 60 years old, a florist, of 415 Steinway avenue, Long Island City, N. Y., was found dead in bed early Sunday morning, Dec. 10, from gas poisoning. His home was in Scranton, Pa., and among his effects was found a card which referred to relatives in Honesdale, Pa., in case that he met with an accident or needed assistance. It is thought to be a case of accidental death, as the man had been in good spirits and there had been no indications that he contemplated suicide.

Charles W. Prescott.

Charles W. Prescott of Concord, Mass., who knew more about asparagus growing than any other man in the country, died in the Haymarket Square Relief Hospital, Boston, Friday night, Dec. 15. He was taken to the hospital Sunday after he was stricken with a hemorrhage. He was about 58 years old. Mr. Prescott was the largest individual asparagus grower in the Eastern States, his farm in Concord being He had been growing asparagus since considered the finest in the country. 1879, and no one was regarded as better authority than he on that esculent vegetable. He acquired a National reputation, however, by his scientific battle against what was known as asparagus rust. Much of what has been accomplished in rendering asparagus immune from rust or in the discovery of a species that would be a resistant to rust can be justly credited to the labors, researches, experiments and scientific studies of Mr. Prescott.

THE LATE WM. C. BARRY.

Our readers will be interested in the following additional notes which were not available for our obituary notice of this eminent horticulturist which was published in last week's issue.

Mr. Barry was born in Rochester, September 17, 1847, the oldest of eight children of Patrick Barry. He received his education at Seton Hall college, New Jersey, after which he was graduated from the universities of Heidelberg, Germany, and Louvain, Belgium. Soon after being graduated, he entered the nursery business with his father in the firm of Ellwanger & Barry.

When the old board of Rochester park commissioners was organized in 1888, Mr. Barry was appointed one of the twenty-one members. He immediately took an active part in the work of the board and was instrumental in obtaining for the city all of the parks now in existence. When the board was abolished in March, 1915, Mr. Barry and John E. Dunbar were the only charter members on the board. When the Ellwanger & Barry Co., gave the ground to the city for Highland park, Mr. Barry was ap-

pointed chairman of the committee to take charge of the work in laying out the grounds. His knowledge of plants, trees and flowers made his work in this park invaluable and soon the park became noted throughout the country. In 1890 he presented to the children of Rochester the beautiful pavilion that crowns the highest point in the park. The pavilion was built at a cost of \$8,000 and its dedication was one of the first affairs of its kind that proved to the city authorities the value of the parks as a great public recreation place.

Mr. Barry's wife died about five years ago. He leaves three sons, William C. Barry, jr., Frederick G., and Arthur A. Barry, jr., daughter, Mrs. Charles H. Stearns, and a sister, Mrs. Bernhard Liesching, all of Rochester.

In speaking of Mr. Barry's death, Calvin C. Laney, superintendent of parks said:

"Only those who have seen the growth of Rochester's parks, in which Mr. Barry took such an active interest, can realize what his death means. Nothing proposed for the benefit of the public was too small for his careful investigation. Rochester has lost a citizen whose worth cannot be overestimated."

PUBLICATIONS RECEIVED.

Studies in Gardening, by A. Clutton-Brock. With Introduction and Notes by Mrs. Francis King. Published by Charles Scribner's Sons, New York. Here we have a really remarkable book on gardening. The author is not only a well-informed and practical plantsman, but is a master of fine phrasing and expresses himself in language that illumines long-standing controversies in garden art with a light which at once impresses and captivates the reader.

Mr. Clutton-Brock writes of English gardening but so largely of the general theory and practice of the art that his work is equally valuable in America and Mrs. King on her part has ably edited it to fit American climatic conditions. The book is a marvel of suggestive logic, so entrenched with proof that its assertions seem almost impregnable even when quite antagonistic to one's cherished convictions. It is the sort of book one cannot devour in chunks—every word and line must be attentively read in order to absorb its full meaning. Exquisite word pictures, judicious cultural advice, expositions of the principles of good taste and common sense in gardening, and the interrelationship of nature and art, caustic condemnation of objectionable art—the latter sometimes carried a bit too far, however,—all conduce to the conviction as expressed by Mrs. King, that "American gardens cannot but be richer, finer, for every reader of this book." The true gardener, whether amateur or professional, will find Studies In Gardening full of healthy inspiration. The practical value of the chapters is distinctly strengthened by Mrs. King's careful foot notes where the American reader might be misled by the text.

Studies In Gardening may be had at the office of HORTICULTURE at the publisher's price, \$2.00 net.

During Recess

Lancaster County (Pa.) Florists' Club Annual Banquet.

Exactly half the members of the Club responded to the invitation to a banquet and social at the Brenneman Building on Thursday, Dec. 14th. While the caterer was preparing the tables a short meeting was held at which the report of the Flower Show auditing committee through the chairman, W. B. Girvin, was given showing a surplus of \$176.95, which was a delightful surprise. The programme committee reported a carnation meeting for Jan. 18th, with Elmer Weaver of Ronks to give his experiences with a number of last season introductions. Exhibits are looked for from introducers of new ones for 1917. Officers for 1917 were nominated as follows: President, Harry A. Schroyer, Lancaster; vice-presidents, Elmer Weaver of Ronks and Willis B. Girvin of Leola; secretary, Frank L. Kohr, Lancaster; treasurer, Harry K. Rohrer, Lancaster. An adjournment was then made to the dining hall which had been decorated by Lemon Landis, H. D. Rohrer and B. F. Barr. The dinner was in the words of our only visitor, T. J. Nolan, "a wonder" from a quality point of view. Cigars were provided by H. A. Schroyer as they had been earlier in the game presented to him as a mark of appreciation for his services the past year.

President Schroyer presented the Henry F. Michell medals during the course of the dinner with a neat little speech accompanying each medal, one to Elmer Weaver for the best display of cut flowers and plants combined, and the other to B. F. Barr for the best table display, at our flower show. Wm. P. Brinton made a few fitting remarks applicable to the season and the necessity of treating our holiday customers so as to make permanent buyers of them instead of intermittent ones.

Billiards and pool, cards and bowling were then indulged in until a late hour and every one went home delighted, but with a sympathetic tear for those who were unable to attend.

ALBERT M. HERB.

Washington Florists' Bowling.

The bowling team of the Florists' Club of Washington, D. C., showed a marked improvement last week when it defeated the Perpetuals, both of which teams bowl in the Mount Pleasant Duckpin League. Jenkins was high man for the florists, and George Shaffer second. The score was as follows:

MOUNT PLEASANT DUCKPIN LEAGUE.			
Florists.			
Schoeps	93	105	89
Jenkins	102	105	112
G. Shaffer	101	104	107
A. Shaffer	89	90	85
Gouldman	98	93	97
Totals	483	497	490

SOILS.

By Leonard Macomber, in "The Golf Course."

Text books classify "clayey soil," "loam," "light sandy soil," and the like and the average person looks at his lawn, which to him is only plain "ground" and is quite at a loss to know its real description.

The principal ingredients of soil are sand, clay, gravel, and humus; and it is the proportion in which these are mixed that determines the kind of soil.

A loam, as far as plants are concerned, is a workable and a most digestible mixture of clay, sand, silt and humus, but when one or another of the ingredients predominates, it gives its name to the loam—viz.: sandy loam or clay loam.

A sandy soil, by adding humus, can be converted into a sandy loam, and a heavy clay soil by adding sand, peat, leafmould, and often lime is necessary, can be converted into a clayey loam.

An Easy Soil Analysis.

Aside from the feel of soil and its appearance, there are mechanical tests which are not so difficult to apply. First get a fair sample of the soil from several different places (say a quart). Weigh this and put down the weight. Next put the soil in a pan at the back of the stove and let it stand until thoroughly dry, but it must not be allowed to burn. Weigh again and the difference between this and the first weight is the amount of water the soil holds.

Now put it in a hot oven for three or four hours; then weigh again. The humus will have burnt and the difference between the second and third weights gives the amount of humus.

Now in your pan is clay, sand and silt. Put this soil in a wide-mouthed glass bottle or jar—a two-quart jar will do; the larger the better. Fill it with water and then shake it violently. Then set it down on a table and observe.

The sand or gravel being heaviest will settle first; next the silt; while the clay will remain in the water for hours. After a day or so, it will be seen that there are no sharp divisions, but yet the different elements are separated definitely enough to give a fairly good idea of the proportions. You can then work and treat your soil accordingly to make it well balanced.

It is hardly ever necessary to make a complete chemical and mechanical analysis of soil, unless one knows for certain that its failure to carry the desired crop is entirely due to the structure or chemical constituents, and not to position or environment or the climate conditions ruling in the district.

If soil is known to be barren, it is

A DWARF LEMON FOR FLORISTS' USE.

MEYER'S DWARF LEMONS

Our picture shows a new dwarf lemon which promises to be very desirable for pot culture as it bears profusely while quite small. The fruit is orange in color and of excellent qual-

ity when ripe. We are indebted to Dr. W. Van Fleet of the U. S. Department of Agriculture for the photograph, who informs us that the variety is distributed under the Foreign Seed and Plant Introduction Number S. P. I. 23028.

necessary to make a close analysis of it to find out why it is barren. If however, soil is not barren, but does not carry a crop well or is under suspicion, it is well to test for nitrogen, phosphoric acid, potash and lime, but unnecessary to test for iron, magnesia, sulphuric acid, silica, soda, or chlorine, because the latter are so generally present that they can be almost ignored.

It is almost always better to work from a description and an examination of samples of soil in prescribing than from the closest and cleverest analysis, unless the soil is known to be barren.

The analysis of soil can only be approximately true for these reasons:

If the sample is taken from one place and represents several acres, it may be absolutely misleading. The presence of a leguminous plant growing on the spot, the stalling of a beast, or the presence of a piece of refuse, might throw the analysis right out of gear.

If the area to be analyzed is plotted and samples carefully taken from each plot, the whole mixed and a small portion analyzed—the result would be substantially correct, but in all probability if portions of the one sample were sent to different chemists for analysis, each one would give a slightly different result.

To sum up, science in regard to agriculture is a good servant, but a cruel master—or in other words, a crop cannot be grown by thumb and rule, and unless rainfall, temperature, the humidity of the air, the quality of the soil, its conditions, drainage, power to conserve water, and all such factors are taken into account, and are more or less favorable—soil may be barren, although it may be proved by analysis to be rich and fertile.

The analysis of poor soil placed against a good soil is pretty confusing

to the ordinary man, and so hopelessly unintelligible to the majority, that they rarely exist except in text books.

Example:

	Poor Light Soils	Poor Heavy Soils	Good Heavy Soils
Example:			
Nitrogen	0.10	0.12	0.19
Potash	0.02	1.11	0.60
Lime	0.10	0.00	2.61
Phosphoric Acid...	0.05	0.05	0.27

The usual chemical analysis of a soil consists in finding out the amounts of the above elements present and also the percentage of magnesia and humus contained. These materials, except the humus, are extracted from the soil by strong acids, and the action of these acids is many times stronger than is ever brought to bear by plants on the soil in its normal condition in the field. It is therefore impossible at present to draw any certain conclusions from the results of such an analysis that are applicable to field conditions, since the acids used in the laboratory dissolve out much more of the plant-food in the soil than is ever in solution in normal soil water. If, however, an analysis shows only a very small amount of nitrogen, then one can certainly conclude that the soil is deficient in this element and would probably be benefited by its application. In inspecting new property and judging the qualities of the soil it is always advisable to observe the natural plant growth.

A soil deficient in nitrogen is constantly showing its condition in the growth of the plants on it. Short growth of straw and vine, failure to develop a full dark green color in the foliage and the growth of sorrel and ox-eye daisy, all tell as accurately as the chemist, with all his skill, that the soil lacks nitrogen. It is the same with the other constituents.

It is only when a soil is extremely deficient in certain plant foods that a chemical analysis of it shows the cause of the trouble. Usually an examination by an expert will suffice.

MARYLAND WEEK

The week ending Saturday, November 18, 1916, was more than seven calendar days for the people of Maryland. It was an entire year of work, of crops, and of thought put into and filling everyone of the 60,000 square feet of floor space at the 5th Regiment Armory of Baltimore. Maryland Week has become an institution, and the story of its steady growth, from a small exhibit a few years ago to a state show of national prominence at the present time, is an excellent indication that it is carrying out the first conceived idea that it should be a clearing house of agricultural opinions, teaching by the sight of good products, by the hearing of authoritative lectures, and by a general "swapping" of ideas among the visitors themselves, the lesson that the prosperous farmer must be up-to-date, must follow new methods or improve on the old, and that Maryland holds within her borders just about all the requisites for successful agriculture.

Perhaps no expression could be given that would furnish a truer idea of what the show has become than the one of Mr. W. H. Olin, supervisor of marketing of the Frisco Lines:

"The best corn that I have seen this entire year in my travels from Kansas City to Chicago and the eastern coast is on display at this show; in fact it is the best I have seen since the days of the National Corn Show at Dallas in 1914.

"The best apple barrel pack that I have ever seen is the one that took the blue ribbon in the apple display. The plate display compares very favorably with the one at Spokane.

"The uniform good qualities of the varieties shown seems, in my judgment, to speak for the Maryland people more than anything that I have seen and it does convince me that there are several varieties that can be grown in Maryland that are equal to, if not superior to those grown in any other locality. There are several things that have impressed me as being desirable here; first, it shows the agricultural resources of the state; second, quality seems to be what the grower is seeking in his display; and third, that every phase of good farming is here emphasized."

These thoughts are the sole ideas of one man, but indeed they can be classed as identical with those of everyone of the 50,000 people who thronged the Armory on every day and evening of the show. Never before has the show been so large, never has quality been so good, never has there been more or better team work between officers, and never have such efforts been rewarded with the success of a Maryland Week that has just passed into history.

The Corn Show.

The West will have to "perk up." No longer is the supremacy of corn growing going to center around a few states of the Mississippi Valley if the indications that have shown up in the corn exhibit run true. Better type in all varieties is seldom attained in a show of this size, according to visitors from the Corn Belt and better quality has not been shown this year at any show. A. B. Twining of Forrest Hill, one of this year's winners, won the Eastern Championship at the National Show in Dallas in 1914. J. H. Gal-

breath, of Street Maryland, high man at the show this year is prominent as an eastern exhibitor at western shows. He won the highest honors this year with display of Johnson County white corn, the prize of a silver loving cup having been won by him during the two preceding years also. In the boys' classes a brother, Paul Galbreath, won first and sweepstakes and the entry was also the reserve grand champion of the show. The boys exhibit alone included 140 entries, with ever county in the state being represented, Worcester leading with 45.

Along with the good quality of the corn shown there has been another factor present which the middle west has yet to solve, and that is the association of good show corn and high yields. This correlation has not been preached by institute workers in Maryland as it has been elsewhere, but some unseen force has apparently been moving with the development of the show, making impressive the fact that very few prize winning samples have come from fields yielding less than 75 bushels per acre. A. B. Twining, one of this year winners averaged 94 bushels per acre with his entire crop, and this is a record that will hustle any mid-western state to duplicate.

Vegetable Exhibits Increases 120 Per Cent. in Size.

Three years ago four thirty foot tables held the vegetables exhibit, while the present year found the entries in this class occupying almost one-fourth of the entire space. "The quality of this exhibit has not been surpassed by any state show so far this year," said Dr. D. N. Shoemaker of the U. S. Department of Agriculture, who was one of the judges.

Furthermore, the quality has improved not only in the appearance of the individual exhibits but also in the uniformity and trueness to type of the entries, indicating and emphasizing that the educational features of former shows have found root in fertile soil.

Fruit Displays Quality.

The fruit display was good but not what the state is capable of showing. Situated as is Maryland, close to markets, and enjoying excellent climatic conditions and soil adaptations, her showing fell short. But if the visitor had compared the present quality with that displayed six years ago there would be left no room for doubt but that great progress has been made. Freedom from disease in such an unfavorable year was remarkable, and the uniformity and general approach to market standards gave indications that new orchards are coming into bearing, that new growers are being added to the list, and the old growers are giving more attention to spraying and pruning.

The exhibits of Stayman Winesaps were the best that have ever been shown, and the prize-winning box was sent to President Wilson. It was grown by Hanson Bros. of Ellicott City.

Dairymen's Exhibit Makes Hit.

The State Dairymen's Association furnished one of the drawing cards of the show with their very much alive, flesh and blood exhibit of dairy cows. Eight kind and gentle faced "bossies" made their home in the Armory during the entire week, and after the first day were as reconciled to their quarters as if the visits of thousands of eager visitors were every day affairs.

Through the courtesy of the Loudon Company stanchions and stalls were provided, and the Sharples Company installed a milking machine on an elevated platform where a cow was milked every hour. Demonstrations in feeding both cows and calves were carried out and the four pure bred calves looked at the crowd through their little stanchions, ready to convince the spectators at all times of the palatableness and desirability of skim milk as a ration and also that a small amount of ground feed in the bottom of the bucket was a much relished dessert after the main meal.

A complete dairy equipment was also installed including everything from pasturizer to bottler. Many city people for the first time obtained the idea of how their milk was or was not handled, and the insight they obtained to the meaning of such terms as "pasteurized," "certified" and the like will bring about a much better understanding between producer and consumer. Many also declared their intentions of visiting their dairymen's farm, thus bringing together two forces that have been or may be otherwise working in opposite directions.

Apiary Exhibit.

The products of the apiary were not displayed in much greater quantity than last year. The weather is a great factor in the quality of the bee-man's products and the year just passed has not been one most favorable. However, there was not a single doubt lingering in the minds of the spectators but that a better quality would require a bit of time to find. The observation hives attracted much attention, and the attendants were kept busy explaining just how the honey was obtained and the personal peculiarities of this winged tribe.

"Folly Quarters."

There are few farms on which one can find everything from dried sage to sausage, but the 177 different articles shown in the "Folly Quarters" booth included both these and all that a farmer or any other person would include as articles of diet. Be it wholesome ham with either brown eggs or white ones; or sweet potatoes and possum; or the constituents for a mixture of these which we often pay a high price for and is indigestible after we get it; all were here, and grown on the farm, owned by Mr. Van Lear Black of Baltimore.

The booth represented in its outline a barn. The frame work was of lumber sawed from trees on the farm. The sides were bales of straw, sheaf wheat was draped over the entrances, and the roof was thatched with fodder. The farm products were displayed on shelves, and vegetables were canned and raw. In the ice box was a dressed turkey and chicken ready for the oven; a rabbit, a 'possum, and a half dozen quail made up the game portion; and the only things missing which the

average person uses were sugar, coffee and salt.

To the few who may have wondered "why so much?" the remark of one man who passed would clear matters considerably; "It shows that the farmer is still the most independent and most favored gent on this old earth." The officers of the Maryland Agricultural Society and its affiliated organizations Maryland State Horticultural Society, Maryland Crop Improvement Association, Maryland State Dairymen's Association and Maryland Beekeeper's Association, and everybody else whose energies played a part in the big affair, deserve unstinted praise for their efforts in making the Exhibition successful.

Plans for next year's Maryland Week are already under way. The new officers elected are men of experience who have seen the show from the beginning to its present attainments, and the increasing success will be given more momentum by a larger prize list, more advertising, and the help that the present year's efforts have brought in the way of success.

NATIONAL FORESTS AND NATIONAL PARKS.

The handling of the national forest recreation resources inevitably raises the question of the relation of the national forests and the national parks. At present there is no clear distinction in the public mind between the two. Both are administered for the benefit of the public along lines which overlap. The parks and forests occur side by side and have the same general physical characteristics — extensive areas of wild and rugged lands, for the most part timbered, with development conditioned upon road construction and similar provisions for public use. They differ chiefly in the fact that the attractions of the national parks from the recreational standpoint are more notable. Yet this is not always true. Several of the parks are inferior in their natural features to portions of the forests. The need of drawing a clear distinction between national parks and national forests and of a definite policy governing their relation is increasingly evident. Parks are being advocated where the land should stay in the forests, while elsewhere areas which should be made parks continue to be administered as forests—for example, the Grand Canyon of the Colorado.

A national park should be created only where there are scenic features of such outstanding importance for beauty or as natural marvels that they merit national recognition and protection and, on this account, have a public value transcending that of any material resources on the same land—such areas, for example, as those now comprised in the Yellowstone and Yosemite Parks and in the Grand Canyon National Monument. The areas should be large enough to justify administration separate from the forests and the boundaries drawn so as not to include timber, grazing, or other resources the economic use of which is essential to the upbuilding and industrial welfare of the country. In addition, when parks are created from parts of the forests, the portions remaining as forests should not be left in a form difficult or impossible to administer.—Report of Secretary of Agriculture.

The Recognized Standard Insecticide. A spray remedy for green, black, white fly, thrips and soft scale.

One Week's Imports.

Imports at the port of New York, of horticultural material, for the week ending Dec. 8, were recorded as follows:

Bulbs — Denmark, \$1,419; France, \$542; Netherlands, \$44,906; Norway, \$2,625; England, \$661; Bermuda, \$15; Japan, \$14,925.

Plants — Belgium, \$12,106; France, \$449; Netherlands, \$43,962; England, \$1,140; Ireland, \$778; Bermuda, \$3; Brazil, \$149.

Red clover seed—France, \$5,404.

Clover seed—France, \$2,220.

Grass seed — Russia, \$448; Ireland, \$4,824.

Other seeds — Denmark, \$1,794; France, \$36,465; Netherlands, \$465; England, \$1,916; Ireland, \$122; Hong-kong, \$181; Argentine, \$3,778.

Nitrate of soda—Chile, \$325,857.

Other fertilizers—Argentine, \$8,570.

M. van Waveren & Sons, Ltd., Hillegon (Holland).

We are informed that this old established firm has appointed as managing directors, Messrs. W. A. Philippo and C. de Wreede, who have both held leading positions in the firm for many years.

Mr. Philippo has made frequent visits to the United States until three years ago and is well known to the seedhouses in the East. Mr. T. van Waveren under whose leadership the business has flourished and attained its present prominent position in the horticultural trade, will as before devote his energies toward its further development, as president of the company.

This firm established a branch office in New York many years ago, which was incorporated in 1916 with H. Langeler as managing director.

Washington, D. C.—The so-called Barkley misbranding bill, now pending in the House of Representatives, is to be amended so as to relieve shippers of indistinguishable seeds and nursery stocks from its penalty provisions. This action is to be taken by Congressman Alben H. Barkley, the author of the bill, following the receipt by him of a number of requests from those engaged in this business who fear that the bill as it now reads will work a great injustice and hardship upon them. The amendment will exempt seeds, roots, bulbs, or nursery stock indistinguishable by their appearance and unintentionally mislabeled from the penalties provided for violations of the proposed law.

HOLLAND GROWERS TO DISCONTINUE AUCTION CONSIGNMENTS.

The Protective Association of Holland Nurserymen, in its meeting held at Boskoop, September 12th, 1916, resolved to submit for the signatures of its members a mutual agreement in which they bind themselves not to ship any nursery stock to the United States or Canada to be sold at public auction; any one found breaking this agreement to pay a fine of five hundred guilders. In the meeting of October 6th, 1916, the agreement was read and signed by all members present except one. The Association resolved that members who will not sign this contract shall be expelled from the Association. After being presented to all members, the agreement shows the signatures of 37 exporters, 5 members being unwilling to sign.

The contract reads, translated:

Mutual Agreement.

1. The undersigned (here follow the names of the 37 parties) all being professional nurserymen and (or) exporters of nursery stock, bind themselves mutually not to ship any plants, of whatsoever nature, neither directly nor indirectly, to the United States of America or Canada, with the intention of having the same sold at public auction. They declare that they will have broken this agreement and will be considered having sent plants directly for sale at public auction when they should have any interest whatsoever, or should participate either directly or indirectly in the shipment of plants to the United States of America or Canada for sale at public auction.

2. They bind themselves to have forfeited the sum of five hundred guilders as a fine whenever they should break this agreement and to pay this fine to Mr. H. L. Maarschalk, Notary Public, at Boskoop, the said Mr. H. L. Maarschalk being hereby authorized to claim this fine in or out of court.

3. They authorize Messrs. P. M. Koster and C. Grootendorst, nurserymen, residing at Boskoop, or any other persons to be appointed by the parties to this contract, to publish the contents of this agreement translated into the English language, with the names of the persons who signed it or the names of the firms under which they do business, in the trade papers of the United States and Canada, in such manner as Messrs. Koster and Grootendorst aforementioned shall deem to be in the interest of those concerned.

4. The fine, after being collected by Mr. H. L. Maarschalk following a breach of contract, shall be divided by this party as follows: One hundred guilders to be paid to the person producing evidence of the breach of this agreement (whether this person is a party to this contract or not and four hundred guilders to be divided equally among those who signed the agreement, with the exception of the one who did not live up to it.

5. This agreement is made for one year, and must be considered to remain valid for the same term, every year, unless anyone who signed it, informs one of the parties mentioned in clause 3 per registered letter, not less than six weeks before the expiration of a term, of his intention to withdraw. Messrs. Koster and Grootendorst are then authorized to publish this withdrawal of signature according to their best judgment.

6. This agreement takes effect on the first day of October, 1916.

Declared as agreed upon and signed this sixth day of October, 1916, by the following named, all of Boskoop except as otherwise noted:

J. Blaauw & Co., Bulk & Co., J. Boer Gz (East End Nurseries), Ebbinge & Van Groos, L. J. Endtz & Co., Felix & Dijkhuis, Van Gelderen & Co., F. J. Grootendorst & Sons, Guldemond & Co., W. C. CARNATIONS AT S. J. GODDARD'S

The proposed "field day" of the Gardeners' and Florists' Club of Boston at Framingham was at the last moment postponed until January on account of the heavy snow storm in progress. A half dozen of the more venturesome, however, carried out the program to the extent of a visit to S. J. Goddard's carnation houses and found plenty to fully compensate for the trip. Mr. Goddard is one of the growers who make a reputation for Boston carnations and his place is at all times a model of clean culture and good management. At present, however, interest is focussed on the house of Dorner seedlings and we were glad to see here indisputable evidence that the old time Dorner fame is destined to shine out in undimmed lustre in these new things now in training. Pink Sensation, we might say in starting, suits us; it is worthy of its name. Laddie is a salmon giant, but impresses us as rather coarse. Another nice salmon pink is No. 148. Rosalia, however, "hits the high spots" with a color unprecedented in carnations. The color is what the French call "ponceau," deep pink with a lively glow, and it has all the attributes of stem and vigor as produced here. No. 167 is a true scarlet, with color, form and fragrance leaving nothing to be desired. No. 34 is a handsome white, with pink pencillings, finely formed flower and enormous plant. There is another unique white with scarlet markings that will be heard from. Mr. Goddard says that next year he expects to have the place nearly all in Dorner novelties.

We cannot quit this interesting place without a word of comment on the other varieties seen in quantity.

Mr. Goddard's favorites—Doris and Rosetta, are demonstrating every quality that has been claimed for them. Helen Goddard is still going strong and Matchless is still maintaining its right to its name. Mr. Goddard advises that Matchless should never be "topped" but left alone after it is planted inside. Gloriosa, like Pink Delight, is rather expensive to grow, owing to the smallness of the plants which necessitates "planting double" in the house. Nancy is a better plant and flower than Pink Delight, not quite as tall but superior in fragrance, and although not available for a very early crop it stands to put all the old light pink sorts out of the market.

Plant Propagation, Greenhouse and Nursery Practice

By M. G. KAINS

We have had many inquiries from time to time for a reliable and up-to-date book on plant propagation, but were always at a loss to find any publication that we could recommend. The subject has been dealt with in fragmentary manner only in books that have come to our notice. So it is well that this new work has been issued, especially as it is both comprehensive and practical, and it should meet with a ready sale among plantmen, nurserymen and gardeners. There are nineteen chapters covering in detail topics of germination and longevity of seeds, propagating by buds, layering, cuttings, grafting, etc., fruit tree stocks, clones, etc., and there are eight pages of condensed cultural instructions in tabulated form, covering annuals and perennials from seed, woody plants, evergreens, vines, bulbs and tubers, greenhouse and house plants, ferns, palms, water plants, orchids and cacti. The illustrations are numerous, comprising 213 figures and halftone plates. There are 322 pages well bound and on heavy paper, teeming with helpful information. It is a book which no cultivator can afford to do without. It is worth many times its price. Copies can be supplied from the office of HORTICULTURE at publisher's price, \$1.50.

NEWS ITEMS

BOSTON.

J. R. Shields who has conducted a greenhouse in Woburn for many years discontinued business last week and is now with J. W. Howard.

William J. Kennedy, a prominent figure in the Gardeners' and Florists' Club has been re-elected president of the Massachusetts State Employees' Benefit Association.

H. M. Robinson celebrated his twentieth wedding anniversary last Wednesday. The office and store employees presented him with a handsome leather armchair which, as Mr. Robinson is now thoroughly domesticated, will probably be very welcome.

The Filene department store building has been very tastefully festooned with garlands and wreaths of laurel and red material by John D. Twombly. The garlanding is such as is rarely seen, each loop heavy in the centre, and graduated gracefully to a point at the tips.

Growers in Tewksbury, Lowell and Danvers suffered a severe blow when C. S. Ketcham, transportation agent for many greenhouses in this vicinity, met with a serious accident while bringing their stock to market. While examining the storage battery it exploded, blinded him and gashed him about the face and hands. The doctor attending him advises that he may lose his eyesight permanently.

Excitement reigned, but no loss was sustained when nearly a half of Boston's fire apparatus crowded into Winthrop Sq. and vainly searched through the flower market and wholesale florist houses for a fire at about 3 P. M., Wednesday. After an hour's fruitless search the apparatus withdrew. Later it was discovered that an automatic sprinkler was responsible for the alarm and had put out the flames before the department arrived.

WASHINGTON, D. C.

Robert W. Pyle, of West Grove, Pa., delivered a lecture on the roses in the Arlington experimental gardens before the Takoma Park Citizens' Association at a meeting in Takoma Park last week.

As was the case four years ago when President Wilson was first inducted into the office, W. F. Gude will head the committee on illumination and will have charge of the additional electric installation which this year will make the entire downtown section a "Great White Way." Mr. Gude is picking a lot of "live-wire" assistants, included among them being a number of florists.

A. N. Pierson, of Cromwell, Conn., last week conferred with Marion Letcher, foreign trade advisor of the State Department, Senator George P. McLean and other officials in an effort to find some way in which to secure the immediate exportation from Denmark of a large quantity of lily of the valley pips which have been held up by the British Government on the ground that they were goods of enemy (German) production. Mr. Pierson assured the officials that the pips were strictly of Danish production and were "neutral" goods. He was informed that the State Department had a number of such cases in hand and that every attention would be given when these others were taken up with the British Government.

Worcester, Mass.—According to an order issued by the committee of arbitration which has been investigating the case of James E. Carrigan of 88 Coburn avenue, who claims to be an injured employe of H. E. Littlefield, a Worcester florist, Carrigan will not receive any compensation for his injuries and his claim, which was made under the provisions of the workmen's compensation act, has been dismissed.

SENSE AND SENTIMENT.

In a recent issue of the London Times the following advertisement appears:

"By the special desire of the late Clement Leigh Watson-Smith friends are requested not to send flowers at his funeral, but in lieu thereof a donation to the Faversham Cottage Hospital would be appreciated by his family."

The obvious comment which the average person would be inclined to make with regard to this unusual request would be that the money undoubtedly would do more good if donated to the hospital instead of being spent for flowers. But is there not another side to the question? Are we becoming so utilitarian in these latter days that our criteria of values are to be thus weighed and measured with such nice calculation?

The custom of bringing a few flowers to the bier of our beloved dead is one which, whatever its origin, expresses a sentiment which finds echo deep in the common heart of man. The parting from a loved one through death is a universal experience, one which sooner or later brings us face to face with the one insoluble mystery of life. Faith alone solves it in keeping with the longings of the human heart. Faith upholds and strengthens the fragile and tender hopes of love when love faces the cold and lifeless form of one beloved. Somehow there is an involuntary groping after some tangible expression of all this, and what more beautiful and appropriate form could it take than the bringing of an offering of a few fragrant blossoms to his grave? And why should such a perfect expression of love be marred by the utilitarian consideration as to whether the pittance spent might not be put to better use?

So, in spite of the apparent good sense of the gentleman's "special desire," we shall bring to the bier of each departing friend, as in turn they leave us through the coming years, an offering in keeping with the tender sentiment which prompts it—whether it be good sense or not.—*Macon (Ga.) News.*

Flower Market Reports

BOSTON Considering the proximity of the final Christmas drive, the market is in a very perplexing state. Greenhouses are not producing and salesmen are cutting holiday orders in half on both roses and carnations. Long varieties of the former are impossibly expensive and the great bulk of business is being done with the short lengths. Chrysanthemums have entirely disappeared. Trumpet narcissi have made their season's first appearance this week. More calendulas could be disposed of if they could be obtained. Violets are in heavy demand, and are rather plentiful. The old favorite stevia is not passing unnoticed. Large shipments have been sold and more is still demanded. Lily of the valley has again reached empyrean heights, striking the \$10 mark.

BUFFALO Business good, stock scarce and prices ruling high. The supply of carnation for past two weeks has been very short, which has been helping the sale of short and medium roses, lilies and other stock. Fancy and special grades in roses are plentiful enough to take care of the demand but the merchant that has floral work is inconvenienced at times in securing material for this special purpose. There are good lily of the valley, violets and narcissus but chrysanthemums are practically ended except the Guenther Late Hamburg White. These blooms are ordered days in advance and sell at \$15.00 to \$35.00 per 100. Beauties are in normal supply and no special demand. The quality has been only ordinary. The sale of holly, laurel and other decorative stock has exceeded previous years. The plant trade is excellent with the supply rather short all around.

NEW YORK Stock of all kinds is very scarce in this market at the present time. Prices are high and the pros-

Asparagus Plu. & Spren. (100 Bhs.)	25.00 to 50.00	25.00 to 50.00	35.00 to 50.00	40.00 to 50.00

pects are that by Saturday they will be still higher. From all indications it is safe to say that flowers generally will be limited in supply for Christmas deliveries although there is a possibility that Monday may see a serious set-back. While carnations are in very moderate crop, the outlook for roses is for a pretty heavy cut at the wind-up and the sale is likely to suffer on account of the prices de-

manded in advance. Cattleyas are not in oversupply but gardenias are more plentiful than of late. For advance orders pretty stiff prices are quoted. The figures at which Christmas deliveries are booked at present writing are approximately—Beauties, \$75 to \$100 for specials; other roses all the way from \$5 to \$25 with the exception of Hadley, which will run to

Flower Market Reports

(Continued from page 855)

double these figures; carnations, red, \$12 to \$15; other varieties, \$8 to \$12; violets \$1.50 to \$2. Next week we can tell the Christmas story for "hind-sight is invariably better than fore-sight."

PHILADELPHIA There is nothing much of interest to report on the week's business (13th to 19th). The near approach of Christmas week had its effect on prices which stiffened up considerably. Flowers were scarce and everything cleaned up well. On Wednesday (the 20th) Holiday figures went into force, and from all we can hear they are considerably higher than a year ago. This is true of plants as well as cut flowers. At this writing all the indications are for a very good Christmas for both grower and retailer.

WASHINGTON Prospects never looked brighter for an enormous Christmas business than they did in the early part of this week. It is expected that there will be just enough stock of all kinds to go around. Prices are high because of the general shortening up of the supply and early in the week the bottom price for roses was \$8 per hundred and from there they went to almost that amount per dozen. Carnations are quoted at from \$8 to \$12 per hundred and there are not enough to go around, red carnations being particularly scarce. There is a marked shortage of orchids and they will be replaced by gardenias that are now being offered at \$6 per dozen. Although chrysanthemums are about over with, there is still a limited quantity of exceptionally fine stock at \$25 per hundred. There is a heavy demand for sweet peas with the probability that the market will be sold out early. They will be replaced by violets of which there is a considerable quantity. Pot plants are selling very well and there seem to be enough of these to go around, despite the reported shortage of azaleas and other imported plants.

Manufactured for us exclusively. The best tub ever introduced. The neatest lightest and cheapest. Painted green, with electric welded hoops. The four largest sizes have drop handles.

HENRY A. DREER, Seeds, Plants, Bulbs, and Supplies, 714 Chestnut Street, Philadelphia, Pa.**NEWS NOTES**

Alliance, Neb.—The Alliance Greenhouses have been purchased by Edward Tatro.

Springfield, Mass.—Owing to the failure of the Springfield Home for Aged Men to take over the Gurdon Bill Mansion in Liberty street under the conditions imposed by his will, a permit has been granted for its demolition. The property will be cleared of all buildings and will be turned into an arboretum under the care of the city.

Detroit, Mich.—The Detroit Flower Pot Co. announce that they have closed their factory indefinitely, because of the labor and fuel conditions, car shortage, embargoes on freight, smoke ordinance and other matters over which they have no control, hoping that at some future period they may be able to renew.

**The Only Perfect
Liquid Putty Machine**

Will last a life-time.

\$1.25 EACH

Adjustable—can and frame separate—easily cleaned. Frame all one piece, of malleable iron. More practical and more easily operated than any other.

ROYAL GLASS WORKS

120 Wooster Street NEW YORK CITY

Duplication Proves Satisfaction

Mr. P. H. Burton of Glenside, Pa., was so highly gratified by the results he achieved with his first Metropolitan Greenhouse, that he specifically instructed us to plan his new one identically the same as the other.

After a whole year of experience with Metropolitan construction, he decided that no change could possibly improve upon it.

His duplication proves his satisfaction. We can do as well for you.

PUT YOUR GREENHOUSE PROBLEMS UP TO US

We go anywhere in the U. S. to submit plans and prices.

PATENT LAWYERS

Box 9, National Union Building
Washington, D. C.

The sash closes AGAINST a steel angle sill, not on top of a wooden one. It swings up tight to the T-Bar division piece, between ends of the sash.

Note that the galvanized drip gutter is separate from the eave; not part of it. It's been tried both ways and we have proven that this way is the best way.

Here is the first really successful counterbalanced gear. Runs up as easy as it runs down.

Some Construction Odds and Ends Worth Knowing About

TAKE our handling of the side ventilating sash on the Iron Frame house. Instead of closing it down on top of a wooden sill, that in spite of anything that you can do, will swell causing the sash to stick; we close it against the edge of an angle iron. No swelling; no freezing; no sagging makes any difference with its easy working. Always it opens and closes without sticking.

Then another thing; instead of using a cypress piece between the runs of sash, we use a T-bar against which the sash fit on either side of the metal division.

Now take the post. It is guaranteed Wrought Iron secured to the steel rafters by double gusset plates. The galvanized angle iron eave

The center door lifts out. The doors on both sides are hinged to the side posts which fit against the gable rafters.

plate is equipped with a U-shaped drip gutter. Being independent of the eave itself; the clogging objection of a combined eave and drip gutter is overcome. Like the eave plate, the drip gutter is also galvanized.

And so if we could sit down with you and point out point by point; the superior points in our construction; you would be surprised to find out in how many important ways it differs so differently from other constructions.

Differences that many times over make up any differences in cost.

When you make up your mind you want a house of Everlasting Longness; then let's get together and talk things over.

NOTES ON CULTURE OF FLORISTS' STOCK

CONDUCTED BY

John J. M. Farrell

Questions by our readers in line with any of the topics presented on this page will be cordially received and promptly answered by Mr. Farrell. Such communications should invariably be addressed to the office of HORTICULTURE.

"If vain our toll, we ought to blame the culture, not the soil."—Pope.

Care of Sweet Peas

If the stems show any signs of becoming shorter a watering of liquid cow or sheep manure once in two weeks will help them. A top dressing of well decayed cow or pulverized sheep manure is better if lightly forked into the ground before watering. It is better to avoid all chemicals at this season, for unless applied with great caution, they will do far more harm than good. If the plants are covered with buds and in good health, with small fibrous roots coming to the surface, a light mulch will do them good. Feeding must be given with care. The plants are unable to assimilate anything like the amount of food now that they can two months hence. Tying must be regularly attended to, for once any stems become bent the flowers are unsalable. The temperature with sun heat can run up to 65 or 68 degrees, but on cloudy days a maximum of 55 to 58 degrees is sufficient and at night about 50 degrees. On all good days see that they have a syringing. Give light fumigation about every 10 days, so as to keep down green fly.

Forcing Dahlias

Now is the time to start the roots. Be sure when planting that you give them plenty of head room, and 5 or 6 inches of good soil. Where there is a vacant bench I would suggest the forcing of a few dahlias as they will come in about right for Easter, giving abundance of bloom from that date on. They can be grown in any house where a temperature of from 55 to 60 degrees can be maintained. Plant them from 18 to 24 inches apart as they will need all of this room. Stake and disbud the lateral growths as they progress. Give them abundance of water at the roots when well started, not forgetting a syringing on all fine days, using a good pressure on the underside of their foliage so as to hold red spider in check. The single, cactus, and pompons yield well to forcing. Watch out for the green fly and on the first appearance fumigate for this pest.

Geraniums

Where a supply of stock plants is on hand in pots or benches (the latter gives the more abundant crop of cuttings) a fresh batch can be secured almost weekly, and now that they can be given a little steady bottom heat, few should damp. If the sand in the cutting bench is rather fine and water does not pass quickly through it, break up some charcoal, pass it through a $\frac{1}{8}$ -inch or even a $\frac{1}{4}$ -inch screen and mix it with the sand. This will make a splendid rooting medium. Bedding geraniums, as the weather becomes colder and proportion of dark days increases, must have more careful watering. It is better to keep them on the dry side through the coldest month. If kept constantly moist at the root, they make too rank a growth and there is also a greater probability of their damping off.

Oncidiums

Ventilation should be given with intelligence so as not to cause any draughts or sudden falling or rising of the temperature. It is well to give these orchids a good cleaning and sponging about once a month to keep down insect life. Give just enough water at the roots to keep them in plump state. They delight in a position where they can have an abundance of light during the winter months. Where it is possible suspend them as near to the glass as you can. As they go out of flower they should have a period of rest. Oncidiums can be grown either in pans or baskets. The best potting material is clean chopped fern fiber and live sphagnum moss in equal parts. This should be liberally interspersed with pieces of charcoal. Make the plants secure by fastening them firmly. A good winter temperature is from 50 to 55 degrees at night, with 10 to 15 degrees higher with sunshine. On all good days give them overhead syringing.

Propagating Carnations

The next two months are the best time of the year for this purpose, as we have conditions in the greenhouse absolutely under control. As the ventilation is limited, this eliminates the danger of wilting from drafts. Shading from the sun is easily managed, too. Propagating benches should be located so that we can keep off both sun and drafts without covering the cuttings too closely. Bear in mind that on the success of your propagating will largely depend your success next season. Trim the cuttings fairly well, and see that they are made firm in the sand. All the foregoing notes pertain to the preliminary arrangements, which I consider as important as the propagating proper. With the right facilities, there is no more pleasant or interesting work in the greenhouse than the propagating. Too often, growers select odd corners, where nothing else will thrive, on account of poor light and sometimes too much heat, for their propagating.

Reminders

Prepare all hardy shrubs and plants for forcing by a few weeks' sojourn in a cool house.

Achimenes started now, will do fine later in baskets. They are fine and useful pot plants.

Ivy-leaved geraniums struck in September may be topped now and the tops inserted as cuttings.

Resting conditions are best now wherever possible for all classes of palms, ferns, crotons, and other foliage plants. Bulbs fresh from the plunging material should not be exposed to full light at once but shaded lightly for a few days.

Carnations

We all know how to grow carnations. We have grown them and we can read the rules of the game in any year's notes of a live trade paper. But we all fall down somewhere during the season on a few benches or a house or two, so let's take a look at the houses today and see why we are cutting less than we should or why the quality is not as good as the best grown. It's Dec. 27, we will say, and the holiday cut can be estimated. Well, reds brought a record price and our cut of reds was not half what it should have been. Beacon has cut four to the square foot, so far, and should cut eight up to Jan. 1. What is the reason and how shall we do it right next season? Has Beacon gone back? No, it is as good as it ever was in some places and should be with us. Our benches of Beacon are full of strong, vigorous plants covered with buds and a grand crop coming on. No stem rot, few bursts but late for the best week of the season before May 30.

When did we go wrong? Were the cuttings taken early when they come well up on the stem or did you get caught shy last season and take thin bottom shoots late in the season? Perhaps they were allowed to starve in the flats, get yellow and hard. Don't put the fault all on the bad weather conditions in the field. And did you bench them in July or early August and keep them moving? Did you keep the weeds down and the top soil open and sweet? Did you actually examine the soil on the bottom of the bench to see if water was getting away down? Perhaps they needed an early mulch to protect the soil from drying out. And did you remember that Beacon has a heavy top and small root and so needs frequent waterings? Neglect at any one of these periods means small returns at the holidays.

Another house has a wonderful stand of Beacon blooms but 40, 60 or even 80 per cent. all splits. Beacon is a thoroughbred and of course sensitive. Rank feeding, irregular temperatures day or night, in fact any neglect will throw it off and on the other hand it will respond to good care more promptly and cheerfully than most sorts. Lots of new scarlets are being brought out. It will be interesting to see which sort wins in the 100 scarlet class at Indianapolis Jan. 31-Feb. 1.

Better look over the Beacon beds carefully *now* and if you see any strong cuttings well up above the first tie take them for next season's stock. They will sell at benching time if you do not need them.

Here are a couple of benches of Benora plants that look pretty light; they have hardly paid fifteen cents to the foot of bench space. Why were they not doubled? Short of plants? Well the 1600 plants would have given as many blooms on one bench as they are giving on two and you could have used the extra bench to good advantage. And there is a bench of Alice full of bloom and buds as it should be now, for Alice is one of the best sorts at this season, but the stems are rather weak even for Alice. Better lower the temperature and study the watering carefully. A feed of wood ashes may help.

Charles J. Strunk.

Carnation Problems

Kindly advise me why Matchless does not bloom nearly as freely as White Wonder?

Also, I remember a noted grower of carnations last year in reply to a query stated that bone meal was the cause of splitting the calyx in dull weather. Is this true in general? What do you consider the best method of feeding the plants?

Also, is the new crimson Arawana as large a bloom as Princess Dagmar?
J. S. New York

Matchless

Matchless, grand sort as it is in every other way, is by the majority of growers in this section of the country regarded as less floriferous than White Wonder. There are a number of growers who do Matchless to perfection—great, big blooms on excellent stems and with wonderful keeping qualities and fragrance, but I have found only a very few who would call Matchless a very free blooming variety and none who would class it with White Wonder in prolificacy. It takes Matchless a good deal longer to develop its flowers than it does White Wonder. As far as I know, Matchless will not in the course of a season reach the same average number of blooms that White Wonder will produce under similar conditions. I feel convinced that many growers will like and appreciate Matchless much better after one or two more experiments in growing it. The variety seems to require a considerably larger quantity of manure and water than what is generally given to it. It does not enjoy being on the dry side at any time; in fact some very successful growers have said that Matchless wants just double the quantity of feed and water usually given other sorts and their plants certainly showed that they got all they needed.

Letting Matchless grow in the field for too long a period will produce some monster plants, but these will take considerably more time to get established in the bench than young and smaller plants will require. The first crop of flowers will also come on shorter stems. It is well not to cut the stem too far down; rather leave enough of a stump to throw a number of new shoots. I should try Matchless again. It is too good a sort to be discarded.

Splitting

Bone meal may be a contributory cause of the splitting of the calyx in dull weather. I have not used bone meal for some years and although I have less trouble with splits every season, yet I would not positively say that the absence of bone meal had anything to do with this fact. Some sorts, like Beacon, Ward, Enchantress, White Perfection, etc. need very little provocation to make them split in dull weather, while sorts like Benora, Delight, Matchless, etc. at the same time, in the same house or bench and under same conditions as the first mentioned will produce nary a split.

Proper watering, airing and temperature day and night will reduce the percentage of split carnations. Sudden changes of temperature or too low a temperature at night will seldom fail to give us a beautiful crop

Polemonium

Distinguished by a bushy habit of growth, very attractive dark green pinnate foliage and normally blue flowers in terminal clusters or spikes, we know the garden varieties of polemonium as very desirable plants for the hardy flower border. In New England gardens the "Jacob's Ladders"—the popular name for polemoniums—can be frequently seen in full perfection occupying conspicuous situations. A richly manured rather light garden soil and, for the north, an open sunny exposure are essentials. South of New York I find partial shade an advantage. At least, I noticed the period of flowering is shorter in the full sun and during prolonged hot spells the foliage does not hold out so well. The latter is strikingly ornamental especially of our native Rocky Mountain species *Polemonium Richardsoni*, syn. *P. humile*, the subject of our illustration. The very handsome sky blue flowers appear during May and June, and this plant, scarcely exceeding 12 inches in height, proves ideal for small narrow beds requiring low growing materials. In Maine summer resorts I found this species also very effective for edging of large borders. With the only exception of *Polemonium confertum* which thrives best on dry rocky slopes, plantations should not be allowed to suffer by want of irrigation during their growing season. The creeping variety *Polemonium reptans*, syn. *grandiflorum*, does not grow except in moist situations and semi-shade.

Of the taller growing European species, *Polemonium*

POLEMONIUM RICHARDSONI

coeruleum, I see a variegated leaved variety listed by some firms abroad. All the Jacob's ladders mentioned in this note appear in white flowering forms with the specification var. *album* in catalogues.

Stock may be readily raised from seed, spring seedlings flowering the second year. Propagating by division of old plants is preferable when colors are desired separate.

Richard Rothe

Glenside, Pa.

of splits in the short and dull days. Overworking or overfeeding have the same effect. Feeding the plants often and not too much at one time has always given me best results, providing that all other details have been duly attended to. Overfeeding is probably the cause of most troubles we hear of in carnation growing, especially in the fall and winter. I have found dried blood a very good and economical fertilizer and am using it year after year. About 40 to 50 pounds to 500 square feet will do the plants good. I give it in four doses. First lot mixed in the soil before or at planting time, 10 to 12 pounds for 500 square feet; then the same amount in September or October, in January and in March. It is well to remember always that blood is a powerful article, but the above amounts are perfectly safe and give good results in my soil.

Sheep manure is a very good fertilizer and easy to apply, but the cost is too great in proportion to actual value. Plants that are not growing freely should not

receive too much of any sort of fertilizer; half doses at one time are often best.

Gustav Thommen

It Is Read Carefully

A gentleman of nation-wide prominence in commercial horticulture writes to the office of HORTICULTURE as follows:

"HORTICULTURE appeals to me, and in spite of rather numerous demands I endeavor to make a study of each succeeding issue. You may be interested to know that when I asked for an opinion on HORTICULTURE, in connection with other trade journals, from one who is in a position to know, who sees things squarely and tells them truly, the reply came in this wise, 'It is really and truly edited. Its articles are high class and authoritative. It is read carefully.'"

To
 the ladies

Nobody will dispute the assertion that HORTICULTURE presents a very attractive front cover picture in this issue. The talented young lady who has been chosen by the feminine auxiliary of the Society of American Florists as their standard bearer for the year 1917 is exceedingly popular among the members of both organizations and it goes without saying that the success of the big convention in New York next summer

will be enhanced in no small degree through the participation of the Ladies' Society under her inspiring leadership. Congratulations, ladies, with HORTICULTURE's best wishes for a happy and successful 1917

The New Year knocks at the door as we pen these closing lines for 1916. The old year has been kinder to us than its predecessor—more so, perhaps, than we expected when

it was ushered in. We all recall how with subdued confidence, rather hopeful, yet discreetly moderate from the discipline of previous experience, we welcomed its coming and now so quickly is it gone, its story irrevocably written. Fortunately we may all now greet the incoming year with a measure of confident reliance which was not possible twelve months ago. The situation is decidedly more encouraging and we fully expect to see the season upon which we now enter well filled with progressive horticultural activity.

A commendable project

It is pleasing to note with how much spontaneous enthusiasm the local newspapers have come forward in approval of the plan proposed by the Florists' and Gardeners' Club of Andover, Mass., for the purpose of continuing their fall exhibitions. During a number of years past they have been putting up a really fine show each fall but the public patronage has not always sufficed to defray the cost and now the Club faces the alternative of financing these enterprises through some other means or abandoning them altogether and so the experiment of having a list of guarantors or associate members has been decided upon and will be tried out for the coming year. The florists and gardeners of Andover and vicinity richly deserve the assistance they ask for and the encouraging way in which the papers have espoused their cause seems a very good omen that they will succeed, and we cordially hope they may.

Your opportunity

After an exceptional fall trade and the largest money income on record for the Christmas season it goes without saying that the plant and flower trade people should now be in the mood to spend and to expand. Their customers have been making money and will put most of it into circulation at home—certainly not abroad. The florist, plantsman, nurseryman, seedsman and landscape gardener are all in line to get a substantial share of the distribution and indications all point to 1917 as destined to be the best buying year ever experienced in these particular lines. You who have something to sell to these people—what are you going to do to get your proportion of this business? There is no better medium for your use, considering the cost, than the advertising pages of HORTICULTURE. Buying power is what the advertiser is supposed to pay for but does not always get. Buying is the long suit in HORTICULTURE's circulation. No other paper in its class can outrank it in influence and effectiveness among the purchasing classes of the trade. Now is the right time to get busy, for the "big drive" will start early in January. HORTICULTURE is ready. Are you?

HAPPY NEW YEAR.

Important Experiments With Peonies

Our dry, hot summers are hard on peonies. These plants require plenty of water and a good drainage. Under favorable conditions they should double every two years, and in addition furnish planters for as large an area as they occupied. Very often in our hot, dry climate they took four years to double, and then often the roots would seem to lack vigor.

I determined to remedy this so I bought two lots near the heart of the city, giving me ground 100 x 120 feet. I planted in rows 18 inches apart and about seven inches apart in the row, following somewhat the intensive methods of France and Holland. I put a hydrant in the center which furnished abundance of water when needed. I had enriched the ground well with rotted manure and mulched with coarse manure. The land had been plowed deep and summer fallowed. The first year they made a fine growth and many of them had doubled.

The next year you never saw such a sight. The foliage was so rampant you could hardly tell where the rows were and there was such a glory of bloom, it was the wonder of the town and people came miles to see them. The summer was hot and dry and we poured an abundance of water on them. We found they had doubled, and often more than that, furnishing enough small roots to replant the ground.

We found quite a difference in multiplying. Umbelata Rosea proved the most prolific of all; sometimes we got three or four divisions from one. Marie Lemoine was the slowest of all to increase.

The Three to Five-eye Test

This is a very unsatisfactory one. There is a trick about it. By cutting your plant up small you develop buds—too many of them. They make too large a drain on the roots. There is another trick. Dig your plants early, bury in a warm place and if your roots have a good-cleavage like Queen Victoria or Edulis Superba you can pull off roots like fingers from your hand without a bud on them, and if well watered they will throw out

buds galore and you can take tiny roots with three to eight eyes if you are satisfied with that test, from roots without a bud when buried. I much prefer a good strong root regardless of the buds. If the root is vigorous it will give you buds enough. If you have too many buds you have small flowers. The experiment showed that you could raise both flowers and roots. The second year my lots were a carpet of bloom—great large flowers. But you must take them up every two years or they will crowd each other. By spading deep and pulverizing well, if you are careful not to replant in the same row, you can replant your ground once, but never twice. I would make but one change in this system of intensive cultivation—the rows should be two feet apart instead of 18 inches, then you can hoe and spade between. Mine were so thick I could not cultivate in the second year.

If you watch closely you will find about the last of August the earlier sorts have formed their buds, and commenced to throw out tiny roots for the next year. So your transplanting should be done early in September. If you have a dry fall your plants should be thoroughly watered so they can throw out an abundance of those tiny fall roots. I noticed in spots not well soaked the roots soon dried and withered in the ground, and that condition would prevent flowering in the spring. Close watching showed that plants plan a year ahead for fruits and flowers and we should help them carry out their plans.

I give these notes because people with only a small plot of ground can raise an immense amount. To test I ran in debt on my two lots and also ran in debt \$600 for peony roots. I raised more than enough to pay for both in two years, and now have as many as I started with.

NATIONAL FLOWER SHOW GUARANTEE FUND.

The following open letter has been sent out by Secretary John Young.

"Dear Sir—At a meeting of the National Flower Show Committee of the Society of American Florists and Ornamental Horticulturists held on October 13-14 last, in St. Louis, the Chairman, Mr. George Asmus and the Secretary, Mr. John Young, were instructed to raise a guarantee fund of \$10,000 to cover the National Flower Show to be held in St. Louis, April 6-15, 1918.

"While the sum mentioned could, no doubt, be raised in and around St. Louis, it was the thought of the Committee that the fund should be national in character and represent every section of the country. The forthcoming show in St. Louis promises to be as successful as the previous National Flower Shows, and it goes without saying that it will result beneficially to the trade at large.

"Your kind interest in the project in the way of a contribution to the guarantee fund is cordially solicited, hence the inclosure herewith of a contribution blank. The guarantors for the last National Flower Show not only were reimbursed to the extent of their actual contributions, but also received a substantial share of the profits equal to 10 per cent of the entire amount subscribed.

"The Committee also would esteem donations of special prizes, the same to be offered under the names of the donors. If you should feel disposed to favor us with the offer of a special prize, kindly, if possible, select the subject for your award from the preliminary schedule, thus relieving our obligations to the prize fund to the extent of the value of your donation. The first preliminary schedule is now on the press."

OHIO STATE HORTICULTURAL SOCIETY.

The program for the fiftieth annual meeting of the Ohio State Horticultural Society will be held from January 30 to 31 during the sessions of Farmers' Week at the Ohio State University at Columbus. The Ohio Vegetable Growers' Association will be held on February 1 at the same place. Horticulturists and vegetable growers of national prominence will speak, in addition to a large number of members of the Ohio State University faculty. Among those to appear on the program will be; H. C. Thompson, specialist in vegetable gardening, U. S. Department of Agriculture; C. W. Waid, extension specialist in truck gardening, Michigan Agricultural College; Hon. Henry M. Dunlap, president, National Apple Growers Association; S. W. Fletcher, professor of horticulture,

FALL MEASURES TO COMBAT ROSE DISEASES.

Rose gardeners should take advantage of the fall season, says the U. S. Department of Agriculture bulletin, to make their plants as free as possible from disease by methods that cannot well be followed during the growing season. It is true in general that whatever the disease, the affected portions of the plants should be cut out in the fall and the shortened bushes sprayed. It is assumed, however, that spraying will not have been delayed until fall, but will have been carried on as a control measure at frequent intervals since spring. The diseased wood removed in the fall, together with the old leaves and debris under bushes, should be burned. In case of attacks by rusts, canker and leaf spots, the diseased wood or leaves should be removed and burned even during the growing season.

A wholly satisfactory method of control of rose canker has not been worked out. The early symptoms are the appearance of small reddish patches on the green parts, generally of 1-year-old growth. The disease is caused by a fungus classed as a wound parasite, that is, the spores gain entrance to the bush through certain mechanical injuries. These may be slight ones made upon the young branches by the thorns of the bush itself when one branch has been blown against another, or by insect punctures. Such infected areas may increase until the entire stem is surrounded and may extend for several inches along the branch. The only advice to be given is to cut away rigorously all diseased branches, and it may be necessary to cut back entire bushes if badly infected. Cover the exposed surfaces made by this cutting with paint or tar. This diseased material must be burned and the dormant bushes sprayed with strong Bordeaux mixture in both the autumn and early spring. At the first appearance of the disease, cut away and destroy all the branches showing infection. Then spray about every 10 days, first with Bordeaux mixture and later with ammoniacal copper carbonate, as spraying has no disfiguring effect upon the foliage, an appearance to be avoided when blossoming time is near. It is possible that by such careful attention the plants may outgrow the disease.

Pruning Climbing Roses

Special pruning methods must be employed for climbing roses. These methods are determined by more or less of a compromise between the desire, on the one hand, to force the growth of blossom-bearing, new wood by removing old wood, and, on the other hand, the desire to keep arbors and similar structures at least partially covered. One-half of the wood should be pruned from all the climbers, as from the other types of roses, at planting time. In the case of the

established plants the Wichuraiana and hardy climbing roses should be pruned just after blooming. At this time young shoots will have started from the roots. The growth of these shoots should be encouraged, as it is from them that most of the branches are produced that bear the following year's bloom. The best way is to remove all the old wood at this time, so that all the strength will go into the young shoots. Where the roses are trained over a trellis so high that one season's growth will not cover it, the method just described is not practicable. In such cases some of the old shoots should be cut off at the ground, and the others should be shortened from 3 to 6 feet, depending on the amount of growth the vine has been making each year. New shoots should be trained to take the place of those removed. It should be kept constantly in mind that the present year's growth bears next year's flowering branches and that a few vigorous branches are more desirable than many weak ones.

REMEDIES FOR GRASS DISEASES.

First and foremost the best treatment in all cases where grass is attacked by disease is to mow the turf as closely as possible and then to encourage a strong growth of grass by quick-acting manures, so as to enable the grass to grow away from the disease. In soft shady turf, and on those golf courses that lie on river flats where fungoid diseases spread very quickly, drastic treatment may be rendered necessary. In this case, spraying with sulphide of potassium (one ounce to ten gallons of water) may be done. Permanganate of potash diluted to a clear rose color also makes a useful preventive, and applications of flowers of sulphur applied when the grass is wet may be recommended for bad outbreaks of the red mould, etc. Excepting in cases where soil is sour, solutions of Kainit (one ounce per gallon) are useful in helping the grass to resist mild attacks of rust, etc. Dry lime is particularly useful in most cases, excepting that it is always well to avoid using lime as much as possible, as it encourages clover.

All dressings are best applied in the evening, as it is during the night that mildew spreads most rapidly. On soils liable to repeated attacks of various grass mildews, the excessive use of nitrogenous and crude acid manures should be avoided, and where it is necessary to hasten the growth without unduly forcing the grass, phosphatic dressings should be used. Bone meal must be blamed for causing a large amount of fungoid growth as well as encouraging clover; whilst leaf mould, especially that from ash and sycamore leaves, also sets up mildews, though the advantages of the leaf mould may possibly outweigh the disadvantages.

Most of the diseases are noticeable when they are in the form of white, gray or orange-colored moulds, this generally being the spore-bearing stage. It is then that precautions to prevent the disease from spreading should be taken. Rough grasses in hedgerows, reeds and rushes are nearly always infected with rust and

other diseases, so these should be kept cut down as much as possible. Cigarette ends and bits of rag lying in the turf are frequently the starting place of the white grass mildew. Leaving cut rye grass on the turf is also particularly bad, as a poisonous ferment is set up by the rye grass leaves that rots the finer grasses.

There is, however, a brighter side to this gloomy lecture, for parasitic fungi are not always injurious to the plants on which they live, and in some cases plants when infested with a particular parasite often grow more robust and vigorous than the non-infested plants. This condition, known as *symbiosis*, is noticeable in the case of rye grass. Even if grasses have their parasitic enemies, all plants are affected in the same manner, and, like "the fleas that have lesser fleas upon their backs to bite 'em," so these different mildews and fungi have other moulds that live upon them, which keeps the balance of Nature and prevents every blade of grass in the country from being destroyed. The *Yellow Rattle* is also punished for its greedy disposition of living on the grass roots by suffering in its turn from a parasitic fungus that causes gouty swellings on its roots.

A NEW USE FOR DAHLIAS

There is a chemical substance called "Inuline." This substance is necessary for the production of the serum used in anti-typhoid and anti-typhus inoculations. Before the war Germany supplied this. Since then chemists have discovered that this can be extracted from the root of the dahlia, and as only two per cent. is yielded from the root, great quantities of the root must be obtained to fulfil the demands of the government.—*Hort. Trade Jour. England.*

FRUIT-VEGETABLE TOMATO,

I saw a photographic illustration last week of a Fruit-Vegetable Tomato, which produces potatoes at the roots and a heavy crop of tomatoes on the vine. It is said to be the result of scientific plant-breeding, and a plant of far reaching economic importance. What sort of a reception it will get remains to be seen.

(Onlooker, in *Hort. Trade Jour.* (Engl.)

We think "Onlooker" should be given another guess. If he will look a little closer, he will no doubt find our old acquaintance—a tomato grafted on a potato.

In our notes on "Studies in Gardening" last week a minor typographical error crept in. In fourth line from the bottom read "text" in place of "test."

NOTES ON CONIFERS

THE PINETUM. At one time or another every conifer which had any chance of surviving has been tried in the Arnold Arboretum, and some useful information on the value of the different exotic and American species, with the exception of the new introductions from China, as ornamental trees in this climate has been obtained from the Arboretum experiments. Considering how generally unfavorable the New England climate is for trees of this class, the large number that succeed here is surprising, although it must be remembered that in this climate many conifers, especially Spruces and Firs, are often at their best when not more than forty or fifty years old and that as they grow older they gradually fail and lose their value as ornamental trees. This is true of the so-called Colorado Blue Spruce (*Picea pungens*), which is still one of the most popular conifers in the northern United States, where it is propagated and planted in immense numbers, in spite of the fact that it early loses its value as an ornamental tree. The Blue Spruce is very hardy, is easily raised and grows rapidly; young plants are of good shape and dense habit with their lower branches resting on the ground. There are two forms, one with dull green and the other with blue leaves, and the latter especially appeals to persons who are fond of unusual looking and sensational plants. For the nurseryman the Blue Spruce has everything to recommend it, easy germination of the seed, quick growth and unusual beauty in the young plants, and therefore a certainty of a quick sale. For the planter looking for something more important than a plant for a city garden or a small suburban yard this tree has proved a failure. It is not surprising, for *Picea pungens* growing in small groves near streams in the valleys of the Rocky Mountains of Colorado, long before it attains its full size is a thin, scrawny, miserable looking tree with a few short branches only near the top of the stem. This tree was discovered in 1862; seed was planted the following year in the Harvard Botanic Garden, and one of the plants raised at that time is still alive in the Arboretum on the southern slope of Bussey Hill where it is kept as a warning for planters who are deceived by the beauty of young plants of the Blue Spruce.

PICEA ENGELMANNII. This tree as it grows nearly up to the timber line of the central Rocky Mountains, where it once formed great forests, is one of the handsomest of the Spruces with its narrow spire-like crown, soft gray-green foliage and tall trunk covered with bright red scaly bark. It was also discovered in 1862 and what are probably the largest specimens in cultivation are in the Arboretum Pinetum. Until two or three years ago these were narrow, perfect pyramids with the lower branches resting on the ground; then the lower branches be-

gan to die gradually without apparent cause. This has continued, and the stems of some of the trees are now bare of branches for six or eight feet from the ground, and their beauty as specimen trees is ruined.

PICEA CANADENSIS. This, the White Spruce of British North America, is a very hardy, fast-growing tree here, and is one of the handsomest of the Spruces which can be grown in this region; but the climate of eastern Massachusetts is evidently too warm for it and after it is thirty or forty years old it becomes thin and unsightly.

PICEA RUBRA. This is the Appalachian timber Spruce and retains here its beauty longer than the White Spruce, for it is a native of Massachusetts and ranges southward along the mountains to the high Carolina peaks. It is a handsome tree with dark green leaves, but it probably grows more slowly than any other large coniferous tree, and it is not easy to establish. For these reasons it will probably never be a favorite tree with nurserymen.

PICEA OMORICA and P. ORIENTALIS. These are handsome and hardy trees, the former a native of the Balkan peninsula, and the latter of the Caucasus. No weakness has yet been found here in these trees except that they too often lose their leaders from the attacks of the borer which so often destroys the leaders of the White Pine.

PICEA GLEHNII. What the future may have in store for this tree here, which is a native of northern Japan and Saghalien, no one can predict as it has been in cultivation in the Arboretum for only twenty-two years. The trees now grow rapidly, are perfectly hardy and show no signs of failure of any sort. The best specimens here are now about eighteen feet high.

PICEA JEZOENSIS. This is the most widely distributed of the species of eastern Asia; ranging as it does from the Amoor region to Manchuria, Korea, and to northern and central Japan. This is the only Spruce in all that region with flat leaves like those of *P. omorika* and *P. sitchensis* of our northwest coast. It has been sometimes called *Picea ajanensis*, *P. microsperma* and *P. hondoensis*. In Great Britain, where it is usually incorrectly called *Picea Alcockiana*, it grows remarkably well and has been recommended as a timber tree for forest planting. In a collection of exotic trees made in 1870 by Dr. George R. Hall in Warren, Rhode Island, there is a specimen of this tree from sixty to seventy feet high with a trunk forty-six and a half inches in diameter and branches spreading on the ground. In this Arboretum and in the Hunnewell Pinetum at Wellesley this tree has grown badly, losing many of its branches and soon becoming unsightly.

PICEA BICOLOR. This is one of the rarest of the Japanese conifers, and

as it grows in the Hunnewell Pinetum it is now the handsomest of all the Spruce trees which can be grown in this climate. Mr. Hunnewell's trees are now about forty feet high with the lower branches resting on the ground and covering a space from thirty-five to forty feet across and with perfectly straight stems. This beautiful tree is probably better known by its incorrect name of *Picea Alcockiana*. It is one of the rarest of the Japanese conifers in cultivation and it is to be regretted there are no good specimens now in this Arboretum.

PICEA ABIES. This unfortunately is the correct name for the so-called Norway Spruce of Europe which has generally been known as *Picea excelsa*. Fifty or sixty years ago this tree was very generally planted in southern New England where it has not proved a success as an ornamental tree as it begins to fail at the top when about thirty years old and then soon becomes ragged and unsightly. In some parts of Virginia and in the Middle States this is a better tree than it is in Massachusetts. In the National Cemetery at Gettysburg in Pennsylvania there are magnificent specimens of the Norway Spruce in as perfect health and beauty as can be found anywhere.

FIRS. The number of Fir trees that can be successfully grown in this climate for many years is not large. One of the handsomest here is the White Fir of western North America, *Abies concolor*. There are fine specimens of this beautiful tree in the Arboretum raised here from seed planted in 1874 and now about sixty feet high, with the lower branches resting on the ground, and solid masses of gray-green foliage. As handsome and as promising in this climate is the Japanese *Abies homolepis*, or, as it has been more often called, *Abies brachyphylla*. This is a large tree on the mountains of central Japan with dark green leaves silvery white on the lower surface and violet-purple cones. It has proved perfectly hardy in this climate. The largest specimen in the Hunnewell Pinetum is now fifty-five feet high with branches sweeping the ground. The Arboretum trees are smaller but already produce their handsome cones. A variety of this tree, (var. *umbellata*) with green cones and rather lighter-colored leaves is established in the Arboretum where it has grown rapidly, the largest specimen raised from seeds planted in 1891 being thirty-five feet high. *Abies cilicica* from Asia Minor and *A. cephalonica* from southeastern Europe are hardy trees in the Arboretum and now promise to grow here to a large size. *Abies Veitchii* from Japan is still a handsome tree in the Arboretum but it is doubtful if it carries its beauty to old age. *A. amabilis* and *A. grandis* from northeastern North America are handsome young trees here, and *A. nobilis* from the same region just keeps alive here as a nearly prostrate shrub, although in Methuen, in the extreme northern part of this state, there are handsome and healthy specimens of this Fir nearly thirty feet high.

PINES. Among exotic Pines the three Japanese species, *Pinus parviflora*, *P. Thunbergii* and *P. densiflora*,

Obituary

Samuel Snyder.

Samuel Snyder, retail florist. Second avenue and 59th street, New York City, died at the Flower Hospital on December 17, aged forty years. He is survived by his widow.

L. D. Baldwin.

Leslie D. Baldwin, florist, Foxboro, Mass., died on December 13, aged thirty five years. His parents and one sister survive him. The funeral was brightened by many floral tokens of esteem from friends in the trade and others.

C. J. Blackert.

Chas. J. Blackert, for many years a prominent florist of St. Louis, Mo., died on December 9, aged 72 years. He was a native of Sweden, coming to this country 45 years ago. His son, Chas. J. Blackert, Jr., will continue the business.

J. E. Hoopes.

Joseph E. Hoopes senior member of the firm of J. E. Hoopes & Co., seedsmen, Muscatine, Ia., died on December 15, after a long and painful illness, aged 63 years. He was a man of large activities in the business and civic life of Muscatine. He leaves a widow.

Robertson Kirkpatrick.

Robertson Kirkpatrick, landscape gardener, died on Wednesday, December 20, at a local hospital in Nashua, N. H., aged 55 years. The cause of his death is stated to have been rupture of the spleen. For the past month he had not been feeling in his usual good health and Tuesday night there was such a turn for the worse that he was taken to the hospital. His death came as a great shock to the members of his family and the community.

Mr. Kirkpatrick was born at Rutherglen (near Glasgow), Scotland, Nov. 4, 1861. He served his apprenticeship at Gallowflat (Rutherglen), the estate of F. R. Reed, remaining there five years in all. After two years on private estates in Glasgow and St. Andrews, Fifeshire, he came to the United States in 1882. He was in the employ of Mr. Bowles, editor of the Springfield Republican and

then went to Nashua where he was with C. W. Hoitt two and one-half years and then with George E. Buxton, after which he went to Newburyport, Mass., in charge of T. W. Goodwin's greenhouses returning to Mr. Buxton's two years later. He final-

ROBERTSON KIRKPATRICK

ly went into landscape and nursery business on Ferry Road, Nashua, where his nursery is located. He leaves a widow, one son, Wm. R. Kirkpatrick, superintendent of parks in Nashua, a granddaughter, three brothers and one sister in Scotland, and one brother in Montreal, Canada.

THE FERTILIZER SITUATION IN CONNECTICUT.

THE RAW MATERIALS MARKET.—A very unsettled condition prevails in the wholesale market on "chemicals." Manufacturers are buying only for their immediate needs. In small lots, such materials as Nitrate of Soda, Sulphate of Ammonia, Tankage, Blood, Cyanamid, Cottonseed Meal, Acid Phosphate and Bone are all high. Acid Phosphate seems to be slightly lower than last year but Cottonseed is 30 per cent higher. Nitrogen in Nitrate of Soda and Sulphate of Ammonia is about 23 cents per lb. and 22 cents in

9-9 Tankage. In mixed goods Nitrogen is about 23 cents. These values are based on cash quotations, carload lots. No firm will hold quotations open on unmixed goods, indicating the instability of prices. Those in close touch with conditions seem to feel that plant food can be purchased cheaper in mixed goods than in unmixed. This is probably true when the cost of mixing is considered. The safest procedure would be to get quotations from several sources on both mixed and unmixed goods and make the comparisons.

If present conditions continue, we may be able eventually to supply our needs. Several firms are offering as high as 4 per cent Potash goods. Some offered this goods earlier but are sold out now, the Maine growers having contracted for the entire supply.

Our results so far on corn indicate that potash pays at normal prices. This, however, is on the Gloucester Sandy Loam on the Station Farm. On heavier soils the results might differ. We very seriously question the advisability of paying \$5 a unit for potash to be used on the common field crops. Where large applications of potash have been made in previous years, as on tobacco land, it does not seem wise to use much if any potash this year.

LIME—Last year it was suggested that stress be laid on the use of lime, the price at that time being normal. This year lime has advanced, and notice is given of a further increase on March 1. In spite of this fact, we believe that lime will in the long run, repay the investment, although every means should be used to secure good quotations.

MANURE—We have this year another opportunity to hammer on this point. Too much stress cannot be laid on the proper care and use of manure. An Extension bulletin on this subject is now in press.

TRANSPORTATION—This would seem to be the most serious problem we are facing. The fertilizer manufacturers are at present working to secure preference for fertilizers over some other classes of freight. Some pressure might be brought to bear if farmers' organizations were to take up the matter with the railroads. The wise man will order early. It is already late.

—Agronomy Dept., Conn. Agri. Col.

SEED TRADE

AMERICAN SEED TRADE ASSOCIATION

Officers—President, Kirby B. White, Detroit Mich.; First Vice-President, F. W. Bolgiano, Washington, D. C.; Second Vice-President, L. L. Olds, Madison, Wis.; Secretary-Treasurer, C. E. Kendel, Cleveland, O.

Record Prices.

The seed situation does not ease up as the season advances, excepting possibly in the matter of seed corn. Predictions of record high prices made in these columns some weeks ago have already been realized. For instance: Alaska peas have sold as high as \$12.50 per 100 lbs. and there are apparently reliable reports that they have sold as high as \$13.50 per 100. This seems to be a record price for this variety, and it is questionable whether they ever sold at so high a figure in large quantities. The green sweet wrinkled sorts which have not been in demand excepting by canners have suddenly become popular for export, and have recently been sold at \$9.50 per 100 lbs.

To Sell by Weight Instead of Measure.

Right here it may be well to call attention to a plan which while not new in theory is practically new in practice, that is, the selling of peas, beans and corn by weight instead of by measured bushel. There is no question whatever about the plan being far preferable to the old way of selling by the bushel. The latter plan was prolific of complaints because of shortages, and this cannot occur where the goods are sold by weight, excepting through some one's carelessness, and any shortage can be easily made good. One of the prime causes which has led the seedsmen, and particularly

Some common Sucking Insects, magnified.

HAMMOND'S PAINT & SLUG SHOT WORKS, Beacon, N. Y.

the seed growers, to decide to sell their products by weight instead of measure is the conflicting state laws fixing the weight of a bushel. It has been the custom of the pea and bean growers from the earliest days of the seed business to consider 60 pounds a bushel of the round smooth peas, and 56 of the sweet wrinkled varieties. These weights were fixed after long experience and were based on a just quantity to the bushel, but our ignorant and demagogic law-makers with the idea of currying favor with the farmers have made 60 pounds arbitrarily a bushel without regard to variety. When peas are worth \$10.00 and \$12.00 a bushel it is easy to see what loss the seed grower would sustain by being obliged to give away four pounds to every bushel. It is to avoid complaints and endless discussion that the seed growers are making an effort to introduce the cental system. One can appreciate that at the beginning this change is liable to be a little confusing, but we shall all speedily become accustomed to it and learn to think in pounds as readily as we do now in bushels.

Effect of Export Demand on Seed Peas

What has really made the price of dried peas this year has been the export demand. This has been very heavy up to a very recent date, and just at present trade in this line is very quiet, but it is expected to revive and become active again within the next few weeks. This foreign demand has had much to do in fixing the prices of future peas, because the growers realize that they will have at least one year more of very active demand from Europe for dried peas for culinary purposes, and should the war in Europe continue over another year it will mean that the demand will continue, just so long as the war lasts and for practically one year after its close. To those who are buyers of peas in quantities, whether canners or seedsmen, it would seem to be an act of wisdom to cover one's future requirements quite thoroughly while the present situation exists, as any price named now by the growers is liable to look low a year hence.

It is exceedingly fortunate for the seed growers that the foreign demand has been so strong, while they had a large surplus of peas to sell. The canners are the largest consumers of peas for seed purposes, but they are diffi-

EASTERN CHEMICAL CO., BOSTON

cult to deal with; almost any price quoted they regard as too high, and the laborious task of educating them up to appreciate values must be gone through with times without number. When seed peas were quoted the canner at \$3.00 a bushel, which was practically cost, they were still too high, and he was combing the country to dig up some nondescript individual who would undertake to grow the peas for a little less money. The canners did not seem to realize that what they saved in dollars they lost in quality, but without any conscience placed the high-class seed grower with the nondescript and irresponsible one. This is a familiar plan of the canners and they have very nearly exhausted the patience of many of the seed growers; still there are among them a number of fair, honorable men who do not expect to buy all wool at the price of shoddy and are willing to pay for all wool.

Notwithstanding the very high prices that have been ruling on seed peas, and the apparent scarcity a few weeks ago, they are now coming to light from unexpected quarters, and being offered at slightly lower prices than those ruling a few weeks back. This simply means that the top price has been reached, and that from now on there is likely to be more or less decline.

The Seed Corn Situation.

The same situation exists with reference to seed corn, only in the case of the latter prices have been more exaggerated. We have believed all along that while seed corn was genuinely scarce and worth a pretty high figure, a point has been stretched, and prices named as the result of more or less of a panic caused by fear that it would be next to impossible to secure the desired quantity of seed corn, excepting at extravagantly high prices. We expect to see a considerable drop in most standard varieties of corn. Such items as Golden Bantam are genuinely scarce and quite possibly the prices quoted on this item more nearly represent values than anything else in the corn line.

When we consider that as early as the middle of October seed corn was quoted at from \$8.00 to \$10.00 per bushel, with a fair cargo in prospect, it is difficult to account for the fear which seized so many canners that they were ready to pay for once almost any price named if they could only secure the seed corn they wanted. We are reliably informed that Stowell's Evergreen and Early Evergreen have sold at \$12.00 to \$14.00 per bushel, while Country Gentleman and Crosby's have sold as high as \$16.00 to \$18.00 per bushel. That there should be a drop from such prices is what might be expected.

Bean Crop Failures.

Since we last discussed crop news there has been a marked change in the situation on seed beans. Owing largely to unfavorable weather the crop has been reduced almost to the point it reached last year. Six weeks ago there were only a comparatively small number of varieties listed as crop failures, and deliveries from 25 to 75 per cent. were expected on most

Commerce Bldg., Boston, Mass.

standard sorts. Now we are informed that a large number of varieties have been called failures, while deliveries on other varieties have been reduced from 25 to 50 per cent. In so far as values go, beans are almost if not quite as scarce as last season and the prospects for the future are far from encouraging. Many growers lost a part and in a few instances the whole of their seed stocks of certain varieties. Farmers who have experienced a succession of crop failures growing beans are not at all eager to try it again and the growers are finding it a strenuous uphill fight to secure their required acreage. It is said that prices for another year will be very high, averaging in some instances \$2.00 per bushel over last year. While the seed grower is powerless against these advances the seedsmen and canners seem to think that they are being plundered and several have stated that they would not pay such prices but would take chances on buying their requirements after the crop is made. In this same connection it may be well to say that there has been a sharp advance in the prices of future peas, but the bean situation is what is claiming most attention.

One Week's Imports.

Imports at the port of New York, of horticultural material, for the week ending Dec. 15, were recorded as follows:

Bulbs—France, \$319; Netherlands, \$647; England, \$56; Japan, \$5,172.

Plants—France, \$669; Netherlands, \$2,334; England, \$311; Scotland, \$277; Colombia, \$1,385; Japan, \$25.

Red clover seed—Russia, \$690; Chile, \$4,311.

Grass seed—Denmark, \$18,800; Ireland, \$5,879; Canada, \$457; Brazil, \$33.

Other seeds—France, \$1,670; Italy, \$8; Netherlands, \$1,356; England, \$1,315; British East India, \$772; Hongkong, \$185; Japan, \$20; Austria, \$4.

Fertilizers—England, \$2,239.

Notes.

Prices for timothy seed on Chicago Board of Trade, December 20 were \$4.00 to \$5.75.

M. Van Waveren & Sons have removed their New York office to 26 Cortlandt street.

About five thousand acres are now devoted to the production of sugar beet seed in this country.

J. Bolgiano & Son of Baltimore have announced their intention of sharing the profits with those employees who have been associated with them for a number of years, as a recognition of their loyalty and industry. This plan was put into operation this week, when substantial checks were handed to all who were entitled to them for the year ending September 1st, 1916, which was one of the best of the 99 years of this firm's existence. At the same time it was decided to increase the salaries of those employees entitled to such increase through merit and devotion to duty.

Plant Propagation, Greenhouse and Nursery Practice

By M. G. KAINS

We have had many inquiries from time to time for a reliable and up-to-date book on plant propagation, but were always at a loss to find any publication that we could recommend. The subject has been dealt with in fragmentary manner only in books that have come to our notice. So it is well that this new work has been issued, especially as it is both comprehensive and practical, and it should meet with a ready sale among plantmen, nurserymen and gardeners. There are nineteen chapters covering in detail topics of germination and longevity of seeds, propagating by buds, layering, cuttings, grafting, etc., fruit tree stocks, clones, etc., and there are eight pages of condensed cultural instructions in tabulated form, covering annuals and perennials from seed, woody plants, evergreens, vines, bulbs and tubers, greenhouse and house plants, ferns, palms, water plants, orchids and cacti. The illustrations are numerous, comprising 213 figures and half-tone plates. There are 322 pages well bound and on heavy paper, teeming with helpful information. It is a book which no cultivator can afford to do without. It is worth many times its price. Copies can be supplied from the office of HORTICULTURE at publisher's price, \$1.50.

MAKING FALSE STATEMENTS.

The Penalty for Speaking Falsely of a Competitor or of a Business Man Not a Competitor.

I have received the following through a Western paper:—

I have read in magazines from time to time of the penalties for various legal offenses, but have never had the pleasure of reading what the penalty is, or should be, if one man should knowingly send out a false statement that would have a tendency to destroy the credit of another. For instance, I know a watchmaker and jeweler in a country town who is a master of his profession, has a jewelry store that is a credit to the town—in fact, the best store the town has ever had. His store is paid for and he discounts all his bills. Now if, knowing the facts as I do, I should publish the story that this man carries no stock, does not always pay his bills promptly and is only a practical workman, what is the penalty for such an offense, or what should it be? Are there any United States Supreme Court decisions applicable to such a case, or what is the law pertaining to such an offense?

This correspondent asks about a jeweler, but I suppose I need not say that the legal principles involved here are the same no matter what line it is.

The correspondent seems to have an idea that the offense he speaks of is in itself a criminal offense, separate and distinct from other libels. That is not the fact. Aspersing the credit of a solvent merchant, or his ability as a master of his craft is a civil offense, and it may even be a criminal offense, but it is merely one of the class of punishable libels or slanders.

There are three aspects of such an offense:

- 1—The criminal libel (or slander) aspect.
- 2—The civil libel (or slander) aspect.
- 3 Misuse of the United States mails.

Such an offense could offend against the law in all three respects. If it offends against the first and third it would be punishable with fine or imprisonment; if it offends against the second it would be penalized by the payment of damages.

If the defamatory statement is written, it is libel; if spoken only, it is slander.

Consider No. 1. I question very much whether the language which this correspondent sets forth would be criminal libel at all. A man may be guilty of criminal libel though he speaks only the truth. The theory is that criminal libel tends to a breach of the peace, and it is therefore immaterial whether the thing said is true or not. But even if false it must be something pretty strong—stronger than this, in my judgment.

As to No. 2, this might or might not be misuse of the mails, and a

criminal offense under the United States laws. Sending through the mails any matter which is "libelous, scurrilous, defamatory, threatening, or calculated in any way to reflect injuriously upon the character or conduct of another," is misuse of the mails. But the matter must be exposed to the public gaze. If it is sealed inside of an envelope or a wrapper, it makes no difference how libelous it is, it is not misuse of the mails and the postal authorities will take no notice of it.

If this correspondent wrote the above on a postal card, he might or might not be guilty of misuse of the mails. I say he might not, because this language is a little weak for a criminal offense, in my judgment.

What this offense really is, is trade libel, a civil offense only. The law is pretty uniform about trade libel throughout the United States. Words which when spoken or written of an ordinary individual might not be slander or libel at all, would at once become so if spoken of a man in connection with his business, trade, profession or calling. A good definition of trade libel is—"any words spoken or written of a person in his office, trade, profession, business or means of getting a livelihood, which tend to expose him to the hazard of losing his office or position, or which charge him with fraud, indirect dealings, or incapacity." Such statements can be sued for even if no damage has occurred, because they tend to injure him in his trade, profession or business. In other words, the charge must be such that if true, would render him less qualified to carry on his business.

The law is especially tender with the reputations which men have won in business and will sharply punish anybody who destroys or injures them. To falsely say that a business man is in financial difficulty, or is dishonest, or a fraud, or has been guilty of any other practice which if true would make him a poorer manufacturer, merchant, clerk or artisan than he would otherwise be, is to be guilty of trade libel.

There is a case which holds that it is not a trade libel to say that a merchant does not pay his debts, because even if he didn't he could still be a first-class merchant so far as the public was concerned. But where you run him down generally—say that he has a poor store, doesn't keep a stock, and in fact is a poor, one-horse merchant besides not paying his debts, you paint a picture of slackness, inefficiency, and poor credit, which any court would almost certainly call a trade libel. Always provided, of

course, that it was untrue. If true, it is not a civil libel at all.

If the court held it to be a trade libel, it would allow damages even though no actual damages were suffered. The libel law knows two sorts of damages, general and special damages. Special damages are actual damages—those which do not necessarily follow from libel, but which may follow. If they have followed, no matter what the circumstances, they can be collected. An example would be where one merchant, speaking of a competitor, said to one of the latter's customers, "he is notorious in the trade for the shoddy goods he sells," and the customer, believing it, took his trade away. In many cases no damages except those which have actually happened, such as the above, or the loss of a position or of a contract, can be collected. If no damages can be proven, none can be collected.

But in trade libels it is not necessary to prove special (actual) damages; the law allows what it calls "general damages." General damages are those which the law holds necessarily follow from the speaking or writing of false words about business men. In other words, if I say to a jobber, speaking of a retailer, "I consider him financially weak," the law considers that I have inevitably done that man some injury—that I have in part destroyed the good opinion which the jobber had of him, even if the jobber did not take any business notice of what I said. Therefore, because there is this inevitable injury, which cannot be estimated in money, the jury which tries such a case will be allowed to give the plaintiff such a sum as it thinks will make him feel good again. This is the sort of damages which can be recovered in actions for trade libels.

NEWS ITEMS

CHICAGO.

August Jurgens was operated on for appendicitis at the Alexian Bros. Hospital last week. He is said to be doing nicely.

Gus Martial, who was for eight years with Reed & Keller in New York, is now in the supply department of Poehlmann Bros.

The tendency of prices to soar has not missed the supply houses. Ruscus is bringing 75c and \$1.00 per pound, wholesale, and statice \$2.50 per pound.

The Mrs. Shawyer rose has not been a success to many growers here, but F. F. Benthey is now getting splendid results from this variety at New Castle, Ind.

Albert Cole, proprietor of the Columbus Flower Shop, and American Beauty man for the E. C. Amling Co., is back to his duties after several days on the sick list.

At Poehlmann Bros. supply department it has been necessary for the force to work evenings and Sundays in order to get out the shipping orders, so great has been the demand for the holidays.

The American Bulb Co. is receiving gratifying reports from its traveling salesmen. Their attractive corsage accessory known as tricatine, is taking well with the trade. These are gold or silver.

At J. A. Budlong's some of the finest Milady roses coming into this market are seen. The heads are large and the stems fully four feet long, while the color is all that could be desired in a red rose. Miss Marie Sietmann is now with this firm as assistant bookkeeper and stenographer.

Extreme temperature caused some

eastern Christmas stock to come into Chicago frozen. The loss was mostly in plants. This was particularly unfortunate when the plant supply was inclined to be short. For some days the thermometer registered several degrees below zero.

Much interest has been shown in the trial of Nicholas Moga, gardener for the Saddle and Cycle Club, accused of murdering William Ulrey, 15 years old, by throwing a pair of shears at him for trespassing on the grounds. There was no question as to his guilt, but the jury was locked 11 to 1 for conviction, and was discharged. A new trial will follow.

BOSTON.

Robbins Bros. of Cambridge have leased a 125 foot greenhouse in Brighton and after making extensive alterations, intend to conduct business there, starting after January 15.

East Boston may now boast of another thoroughly modern and up-to-the-minute florists' shop. William J. Flynn has hung his sign out in Day Square and from all appearances the venture should be highly successful.

W. A. Riggs, Auburndale's popular florist, has just recovered from an acute attack of rheumatism. Mr. Riggs has been confined to his home for over two weeks, the busiest of the year, and consequently his business has suffered as well as he himself.

Thomas Connors, an old timer at the florist game is now connected with J. Newman of Tremont street. Martin Lally, Newman's manager had a serious attack of tonsillitis just prior to the Christmas rush and consequently Mr. Connors fitted into the temporary vacancy very nicely.

PERSONAL

We regret to hear of the illness of F. C. Weber, Sr., of St. Louis and hope he will have an early recovery.

Luther Burbank and his secretary, Miss Elizabeth Waters, were married at San Francisco on December 21. This is Mr. Burbank's second marriage.

Mr. Woodward, of the Lord & Burnham Co., left Philadelphia on the 22nd to pass the holidays at his old home in New Hampshire. About the 2nd or 3rd of January he will start for Chicago to take up his new duties there with the same firm. We bespeak for him, and for his genial chief, Montague Wright, the distinguished consideration of the trade in the Windy City. Both gentlemen have made good here in the Quaker City, and we part with regret and best wishes for their future welfare in their new field.

THE BIRD TREATY.

At the State Department in Washington last Thursday an absolutely novel event was staged. This was the exchange of ratifications by Ambassador Spring-Rice and Secretary Lansing of the treaty between Great Britain and the United States for the protection of insectivorous birds on both sides of the Canadian boundary.

And why not a treaty for the saving of these valuable friends of all the nations? They are far more worthy of international action than many other subjects of treaties. May this first agreement of the sort not be the last.

Flower Market Report

BOSTON It is no exaggeration to say that Boston shattered some old traditions and

established some new precedents during the recent Christmas season. The violet, the former aristocrat of this holiday was "relegated to the rear" for corsage use and cattleyas found a cordial welcome in bouquets and for corsage wear. The expected demand for roses and carnations was cut nearly in twain. Potted plants were eagerly sought by the purchasing public. Ericas, poinsettias, bouvardias, begonias and cyclamen broke all records for number sold and the same would have been true of orange trees had there been more of them. Azaleas made the poorest showing of anything. Flowers were scanty and small, giving mute evidence of the lack of skilled labor and proper cultural attention in the Belgian nurseries, as well as injury suffered in their long journey and neglect, in transportation and on the docks. Ardisias, the gem of all Christmas berried plants, were very scarce and not very good as a rule. Although the local retailers did not handle the usual quantity of roses the wholesale houses made tremendous shipments to more distant points. Red varieties were especially active and what is believed to be a record price for Hadleys was established when one grower received \$1.00 apiece for the top quality. Red carnations were almost prohibitive in price and of inferior quality on the average. Other colors moved fairly well but white was discarded generally. The bulb stock moved rather weak. Trumpet narcissi and paper whites were in no great demand. Poinsettias of excellent quality and with stiff price tags were eagerly bought. Callas and lilies sold as usual. Lily of the valley was much in evidence, but quality far from extra. About half as much smilax as usual was on the market and it was all spoken for. Christmas wreaths, holly and mistletoe came into their own for a week and boxwood wreaths, balls and baskets were eagerly bought up. Up until Saturday night, Christmas quotations held fairly steady, but Sunday and Monday saw the customary drop and now all are back to normal

Smilax	15.00 to 20.00	10.00 to 20.00	15.00 to 20.00	10.00 to 20.00
Asparagus Plu. & Spreng. (100 Bhs.)	25.00 to 50.00	25.00 to 50.00	35.00 to 50.00	40.00 to 50.00

Chicago has had a wonderful Christmas trade and a general feeling of satisfaction prevails among wholesalers and retailers alike. The clean-up on plants was no surprise, for there were not enough to fill regular orders in expensive stocks, and heavier orders came in early for low priced plants in consequence, which were soon disposed of and retailers were on the alert for more before the rush was fairly begun. Cut flower sales were almost equally good on the closing days of the week. Buyers were on the market up to midnight Saturday and trade on Sunday was good. The pickled stock was again in evidence, with the usual unsatisfactory result to all concerned. Prices varied according to quality in the wholesale houses and there was plenty for all.

Poinsettias were in excellent supply for Christmas and met with a good demand. Roses were not

as plentiful as they had been, but there was a sufficiency. Carnations were fairly plentiful, but prices ranged high. A heavy cut of lilies came into the wholesale houses, also callas, stevia and narcissus were in good and sufficient quantity. Violets enjoyed a heavy call. Lily of the valley was not scarce and there were orchids and sweet peas in generous supply.

Trade was fair but not exceptional up to Saturday evening, December 23. After that the entire list broke badly. A heavy overstock had to be carried over by the wholesale dealers, with the usual result of ruinous prices for the accumulation on Monday and thereafter. All white roses went very slow, but the others cleaned up well until Sunday night. Top Beauties brought the traditional dollar each but it required some effort. There was a good demand for Russell, Hadley and Ophelia.

Flower Market Reports

(Continued from page)

There was quite a slump in carnations and there were sales on Monday morning as low as \$2.00 and \$3.00 even for reds. Violets did very well. Lily of the valley sold all right, but at moderate figures. Mignonette, gardenias, wallflowers and calendulas had to be sold very cheap and did not clean up, at that. There were also plenty of sweet peas left over. Cattleyas did very well when quality was right. Generally, the feeling in wholesale flower circles is not at all jubilant over the Christmas outcome. Retailers acknowledge having given preference to the plant department and lay the blame for this on "pickled flowers" more than they do on the high prices asked. The present week is very dull on all sides.

PHILADELPHIA The general verdict is one of the best Christmases we ever had. This applies not only to cut flowers, but plants also. The Wednesday to Friday, three days, were the best. The last day coming on Sunday rather put a damper on the two closing days' trade which as a rule are always the best. Everything sold well and at good prices. About the only things left over were paper white narcissi and stevia. One would have thought that lilies would have shared in this neglect, but for some reason they didn't. They were in very good demand indeed and cleaned up at good figures.

ST. LOUIS Christmas prices were high in this market although there was no insurmountable scarcity. Roses and carnations held at top figures for fully a week previous and the stock was very fine, especially the roses. Red flowers had the call throughout. Violets held out well at excellent figures. The plant demand was very heavy and benefited by the prices asked for flowers. Poinsettias, begonias and cyclamen were the outstanding favorites. Lycopodium was very scarce.

FLOWER MARKET REPORTS.

Delayed mail deliveries have interfered with our market reports for the past two weeks. Christmas accounts from several points are still missing as we go to press.

A cutting from an American Journal has come into my hands, which imparts the information that The Protective Association of Holland Nurserymen has agreed not to send, direct or indirect, any nursery stock to be sold at auction, either to U. S. A. or Canada. Will our Dutch friends extend to Britain this same guarantee? Or will they seek the earliest opportunity of dumping into England the stock that might otherwise have found its way to America? We must watch this.—*Hort. Trade Jour. (Eng.)*

Kroeschell Bros. Co., 466 W. Erie St., Chicago**NOTES ON CONIFERS.**

(Continued from page 29)

have all grown well here in this climate for nearly thirty years and are still handsome and attractive trees of much promise. The Scotch Pine (*Pinus sylvestris*) and the Austrian Pine (*P. nigra*) are perfectly hardy and grow rapidly in this climate, but they are comparatively short-lived trees here and do not promise to be so valuable as the Japanese species. The White Pine of the Balkan peninsula (*Pinus peuce*) is very hardy here, producing its cones freely, and now promises to be a large and valuable tree. The Swiss Pine (*P. cembra*) is hardy but grows very slowly but it is possible that the form of this tree from central Siberia may prove more successful in this climate. The Asiatic representative of this Pine, *Pinus koraiensis*, from eastern Siberia, Korea and Japan, grows well here and produces its cones freely. Of the Pines of western America *Pinus flexilis* of the Rocky Mountain region grows slowly in the Arboretum but is healthy and perfectly hardy, as are the two White Pines, *P. Lambertiana*, the great Sugar Pine of California and Oregon, and *P. monticola* which ranges from Idaho to the coast of British Columbia and to the high Sierras of California.

Arnold Arboretum Bulletin.

THE PROPOSED FEDERAL QUARANTINE AGAINST TREES AND PLANTS.

Concerning the foregoing a prominent importing house has written to us as follows:

"Are you members of the American Forestry Association? We are, and have today an invitation to attend their meeting January 18-19 at Washington. In it they call attention to a movement to eliminate the White Pine Blister Rust in this country and other plant and tree pests imported annually, causing damage to the extent of hundreds of millions of dollars (hear?) and they propose to advise legislation for 'a wholesale Federal Quarantine against the importation from any Continent of Plant and Tree Stock, unless deemed necessary by the United States Department of Agriculture, so that in the future these diseases may be kept out of the country.'"

How is this, and how will it affect

our florist trade? Will the S. A. F. swallow this peacefully? If Europe, the declared home of these pests can combat them by intelligent measures to keep a plentiful supply of white pine and other trees, would this not look—to use a professor's term—like a "testimonium paupertatis" to our eminent specialists in Washington and elsewhere? You can cure a headache by cutting off your head, but I, for one, do not quite fancy such treatment. Will you investigate this a little closer? The writer thinks that our different trade associations should take timely steps in this matter, otherwise good bye all imports from Holland, from France, from England, from Belgium, etc."

GREENHOUSES BUILDING OR CONTEMPLATED.

Rydal, Pa.—Chas. E. McInnes, one house.

Austin, Tex.—Charles Alf, Sr., range of houses.

MASSACHUSETTS AGRICULTURAL COLLEGE NOTES.

Professor A. H. Nehrling and Mrs. Nehrling are spending the holidays in Indiana.

Prof. Arthur Thurston of the Iowa State Agricultural College is spending the holiday season in Boston.

The winter short course begins January 1. Prof. A. H. Nehrling is handling commercial floriculture; C. E. Wildon is conducting the course in garden flowers. Information regarding the short course can be had by addressing William Hurd of the Extension Service, Amherst, Mass.

Marlton, N. J.—Reopening of the old marl pits in this vicinity and the establishment of a great fertilizer industry are expected as a result of recent borings made by geological experts. Holes have been drilled to a depth of 60 feet, and the deeper they went the better was the quality of the marl. In some of the tests it is said a 10 per cent. deposit of potash was found in the marl. The old pits were once the centre of a great industry, the deposits here being regarded as the richest in the country.

SERVICE

We're leaving no stone unturned to keep it just as close to top-notch as possible

THIS time of booming business, is the time of times when you want that new greenhouse of yours in a jiffy—so that you can surely get your share of the boom-profits.

Yet this time of booming business (**because** of booming business) is just the time when manufacturers in most lines find their raw materials pretty seriously tied up; and deliveries delayed more or less as a result.

We are no exception.

But we **are** making efforts that are perhaps **exceptional** to make delays in our deliveries "as less" as possible; and have our service to you just as top-notch as it can possibly be under existing conditions.

Of course, we can't help the raw material tie-up. But we **can** do things on **this** end of the line, so that when we **do** get our raw material we can make up a good bit of the time lost in getting it.

We **do** do, these very things.

We consider no expense for new machinery or additional skilled labor needed to do them, too great; because we so keenly appreciate the vital importance of **quicker deliveries** to you.
